Meanwhile, Rumrill-Hoyt, an agency that was reported to be in the running for the $25 million-to-$30 million account voluntarily dropped out of the competition last week.

"We didn't feel we could do justice to the President's campaign and provide the kind of service we like to provide to existing clients," said Gary Landis, president-chief executive officer. Rumrill had suggested a combination of a full-service agency and outside people to handle the account.

The Della Femina agency had been in line for the account, but subsequently withdrew. Jerry Della Femina, chairman, said at the time that he was unable to satisfactorily arrange agency compensation and allocation of his time.

The move by Mr. Della Femina to back out of the competition immediately prompted a scramble among ad agencies to secure the account.

John Buckley, assistant press secretary with the Reagan/Bush campaign, would not confirm the reports circulating through the industry that Mr. Travis would head the advertising effort.

"There is no decision yet, and there won't be any decision on any agency or people involved from agenices until sometime next week," he said in a telephone interview conducted last Friday from Washington.

Isacsson exits CBS for Y&R

By GAY JERVEY

New York—Paul Isacsson has resigned as senior vp, Cable/CBG Enterprises, CBS/Broadcast Group, to become exec vp-director of network programing and purchasing at Young & Rubicam.

He succeeds Richard Low, who has left the agency by mutual agreement to start his own production and consulting company.

Both resignations are effective April 2.

Mr. Isacsson returns to Y&R, where he worked for several years during the 1960s. He had held his latest position at CBS since December, 1982, when he was promoted from vp-sales, CBS-TV Network, a title he held for the uncommonly long tenure of five years.

While head of network tv sales, Mr. Isacsson earned a reputation as being one of the most knowledgeable tv sales strategists and as a fierce and extremely skillful negotiator.

It was under Mr. Isacsson that CBS-TV unleashed its controversial policy to cease providing advertisers with guarantees for demographic audience deliveries in prime time. The decision to rescind the guarantees, considered by most

Pillsbury's Milk Break hits cereal bar market

By JANET NEIMAN

Pillsbury will make its first, and probably not last, entry in the cereal-meal-bar category next month, when it begins marketing nationally Milk Break Milk Bars, a four-item line of chocolate-covered wafers with cream filling.

The product will be positioned in the healthy snack foods section of grocery stores along with granola bars and dried fruit rolls. But the new product will compete most directly with Quaker Oats Co.'s Granola Dipps chocolate-covered chewy granola bars, introduced this year (AA, Dec. 19).

Pillsbury is calling that supermarket aisle the "good-for-you" section, and it is placing Milk Break in that category because each bar contains "half a glass of milk."

The bars are flavored in chocolate, peanut butter, natural milk and chocolate mint.

The product will be packaged in cartons of six individually foil-wrapped bars. Each bar has three wafers separated by two layers of cream centers and chocolate coating. Milk Break was not test-marketed.

Pillsbury is backing the entry with what it calls its biggest introductory support ever. Advertising and promotion, handled by Ketchum Advertising, San Francisco, will reach $16 million.

Pillsbury's belated entry into the $350 million retail cereal-meal-bar category, which has grown 110% since 1980, is likely to be followed by other products. Rick Zaksas, marketing manager-new products in Pillsbury's consumer foods group, noted that Pillsbury considers Milk Break a major introduction, "an indication of our intent to establish a foothold in this category."

He would not comment on a potential granola product, but said it "would not be uncommon to look at second, third and fourth-generation" cereal-meal-bar lines.

Milk Break appears to fuel growth in the category segment

P&G going into test with new liquid Tide

By TERESA H. BARKER

Trading off its longtime No. 1 brand in laundry detergent powders, Procter & Gamble has introduced a new liquid Tide in test market, and is expected to use heavy advertising and coupon promotions to woo consumers in the liquid-detergent market long dominated by Lever Bros.' Wisk.

In a liquid-product category estimated at about $700 million, Wisk claims about a 33% unit share, followed by P&G's Era Plus with 4.5% and Colgate-Palmolive's Dynamo with about 2.5%, industry sources say.

Wisk, which has enjoyed steady market share growth since its "Ring around the collar" campaign began in the early 1960s, recently surpassed P&G's Cheer granular detergent as the No. 2 detergent category-wide, with a market share of about 8% of the estimated $2.8 billion market.

Tide, the No. 1 seller, retains about a 22% market share in the over-all detergent category, but that claim is reported to reflect a decline of 3% since 1981.

New liquid Tide, an orange plastic container with the familiar Tide bull's-eye design, is being introduced in test markets in Florida, Iowa, Illinois and Indiana. The liquid is competitively priced, P&G said.

The liquid Tide package design features a built-in handle and a measuring-cup cap that is designed to drain unused detergent back into the bottle, P&G said.

Unlike P&G's concentrated Era Plus and its ¼-cup measure per load, liquid Tide is not a concentrate and uses a ½-cup per load.

P&G declined to discuss planned advertising except to say the account is handled by Compton Advertising, New York. The agency also has the powdered Tide, which accounted for more than $25 million in advertising in 1983. Retailers said they have been promised extensive tv advertising and coupon offers from April through August.

Industry observers say the new Tide product represents P&G's boldest move in a string of global efforts to establish a strong liquid-detergent product. P&G introduced Vizir liquid detergent overseas in 1981. It introduced Bonus liquid detergent in Japan.

In addition to Era Plus, P&G also sells Solo liquid detergent with fabric softener.

P&G said the new Tide is formulated differently from the granular Tide, but shares a "similar performance profile."#

world news roundup

TOKYO—Newsweek is negotiating with TBS Britannica, a Suntory Ltd. subsidiary, to publish a Japanese-language edition of the magazine by the end of the year to complement the English-language edition already available in Japan. *Newsweek* has a Japanese circulation of 48,000.

ROME—Federico Fellini, Italy's foremost movie director, has agreed to direct a commercial for Campari bitter soda. Mr. Fellini reportedly has been given creative carte blanche for the spot, his first ever.

adWatch

How much attention has Wendy's "Where's the beef?" campaign received?

Forget the stories about the commercial last week in both *Newsweek* and *Time*. Forget that almost every political cartoonist has worked a drawing around the line. Forget that syndicated columnist Bob Greene wrote about Dancer Fitzgerald Sample copywriter Cliff Freeman. Forget the national discovery of director Joe Sedelmaier.

All that pales in comparison with a major newspaper such as the *Chicago Tribune* having its food section profile the food stylist who actually baked the big, fluffy buns used in the commercial.

When a commercial receives that kind of attention, it hardly seems necessary to say that Wendy's "Where's the beef?" is the best-remembered advertisement in the nation.

According to the February adWatch, ADVERTISING AGE's monthly survey of consumer advertising awareness, no other advertisement came close to Wendy's blockbuster. In fact, last month's awareness level for "Where's the beef?" was the highest registered since the survey was inaugurated in April, 1982.

Clara Peller and friends came to mind first for 90 of the 1,254 adults surveyed. That may not sound impressive, but dozens of ads are named in an average month. The Miller and Lite beer spots, which were the most frequently recalled advertising in January, were named by 33 respondents.

Last month's runner-up to Wendy's was Pepsi, which, like Wendy's, also had the distinction of being included in news programs after the injury to Michael Jackson during filming of the commercial. Pepsi was named by 40 respondents, and it probably would have been No. 1 in any other month.

All that attention also has brought "Where's the beef?" its share of criticism. John Kawula, vp at the

(Continued on Page 72)

Census study shows major agency growth

WASHINGTON—The first ad agency results from the U.S. Census Bureau's five-year census of service industries show a period of unparalleled growth, with receipts up 83.8% in 1982 over 1977.

While the receipts are not adjusted to reflect inflation, other information released from the census provides strong evidence that agencies have been building on a momentum that surfaced in the preceding census.

That census, covering 1977, had recorded a 73% increase in receipts, compared with increases of about 30% during each of the three preceding censuses.

Receipts are distinguished from billings and are defined as commissions on media, materials and services; pr and service fees, and other receipts.

Other impressive gains were recorded in employment, up 27.6%; annual payroll, up 78.5%, and the number of ad agencies, up 23.6%. Employment had been up 10.7% in the preceding census; payroll, 52.6%, and the number of agencies, 12.5%. The payroll and employment data represented dramatic changes from the 1972 census, which showed a fractional percentage point decline in employment, with payrolls up only 22.8%.

The results also indicated rising productivity. Payroll per employe was up only 39.9%, while receipts per employe showed a 44% gain.

Actual dollar receipts for 1982 were $5,822,664,000, compared with $3,168,560,000 in 1977. Agency annual payrolls totaled $2,618,668,000, up from

Where's the beef?

Wendy's agency, Dancer Fitzgerald Sample, claimed a stake in the "beef" fallout with an ad in the *New York Times* (above). Meanwhile, a Milwaukee fast-food chain, Suburpia, said the Wendy's commercial uncannily resembled its own (photos at right).

'Beef' goes abroad, but heats up at home

DUBLIN, O.—Walter Mondale's embrace of "Where's the beef?" as a campaign jibe at Gary Hart may hasten Wendy's use of the commercial overseas, just as another chain lays claim to the line's authorship.

Extensive news coverage of the U.S. presidential race has introduced the line to foreign markets, although it has produced some confusion in at least one country.

William Welter, Wendy's exec vp-marketing, said the chain's Australian franchisee called the parent company here after hearing Mr. Mondale leading supporters in a "Where's the beef?" chant.

"He thought it had something to do with a controversy over Australian beef shortages," said Mr. Welter.

The line has caught on in Aus-

(Continued on Page 72)

Dorland, DFS create European net

By DENNIS CHASE

Dancer Fitzgerland Sample and Dorland Advertising set up a new agency network last week that will expand the Saatchi & Saatchi empire.

Dorland is owned 100% by Saatchi & Saatchi, which wants a second agency network to go with Saatchi & Saatchi Compton Worldwide and handle conflicting accounts (AA, Aug. 1).

The new agreement creates Dorland/DFS International, a pan-European consortium based in London.

Dorland appears to have gained control over Dancer's European operation, although details about equity positions in the new group will not be announced for about six months.

The new group will be run by Dorland board member Neil Kennedy, who becomes managing director, and will take over all the current clients of Dancer's struggling London agency, Michael Bungey & Partners/DFS Holdings.

That agency saw its gross income fall 21% last year, to $6 2 million.

By contrast, the combined billings of Dorland and Dorland/DFS are expected to reach more than $180 million, boosting Dorland from ninth to fourth in U.K. agency rankings.

Dorland/DFS also will take over all 14 of Dorland's owned, partially owned and affiliated agencies in Europe. It will change their names eventually to Dorland/DFS

DFS' international network last year had total billings in Europe of $211.6 million, while Dorland has no agencies outside Britain.

"Dorland is gaining access to an established network with offices in place," admitted William Vickery, chairman of DFS International and now a member of the Dorland/DFS board. "If they bring business to those offices, it benefits both agencies."

Dorland has many clients, including Sheraton Hotels, Jaguar and British Airways group tours, that want to expand into new European markets.

DFS International clients also are expanding in Europe, including Wendy's International and General Mills' toys.

But expansion plans for Dorland/DFS go beyond Europe and encompass even the U.S.

"For our British clients in particular there will be a lot more activity in Europe than elsewhere in the world," said Jack Rubins, Dorland chairman-chief executive officer. "But eventually we hope to introduce them to the worldwide facility, including the U.S."

Both Mr. Vickery and Mr. Rubins deny any Saatchi & Saatchi involvement in the new agency. Mr. Rubins says his portion of the funding for the new venture came from sources outside the Saatchi agency, which "doesn't come into it, except that we kept them informed."

Previous talks between the two agencies fell through last year when DFS resisted Dorland's attempt to take over the U.S. agency, according to one source. Other sources said DFS' $200 million asking price was too high for Dorland (AA, July 25).#

U.S. Agency Income issue due March 28

The 40th annual U.S. Agency Income issue will be published by Advertising Age as a special midweek issue March 28. It will contain individual profiles of 812 agencies, including 1983 gross income, billings and accounts won and lost.

The special issue also contains an extended profile of Ad Age's selection of Agency of the Year for 1983.#

Wolfe, Liff join 'AA'

CHICAGO—John Wolfe and Mark Liff have joined ADVERTISING AGE as assistant international editor and senior editor, respectively.

Mr. Wolfe, who reports to Dennis Chase, international editor, holds day-to-day operating responsibility for the international news department of AA, including editing, rewriting and production of the international section and editing of all other international coverage.

Working with the international correspondent network and with domestic news bureaus, he is responsible for generating story ideas, approving story proposals from reporters and making assignments.

He succeeds Carolyn Hulse, who earlier left the publication.

Mr. Wolfe formerly was with the Associated Press news bureau here, where he had been a general-assignment reporter, writer and editor since August, 1981.

Previously, he had been with the *Kansas City Times* serving as a metropolitan desk reporter (1979-80) in Kansas City and legislative and political reporter in Jefferson City, the Missouri capital (1980-81).

■ Mr. Liff will be based in the New York bureau. His duties include story-project direction and planning, editing and rewriting.

He'll work directly with John O'Connor, New York bureau chief, and Craig Reiss, New York news editor, in this newly created position.

Mr. Liff comes to AA after 10 years with the *New York Daily News*, where he has worked in a large number of reporting and editing areas. Most recently, he has been a reporter, writer, rewrite man and editor on the national/foreign news desk.

His previous *Daily News* experience includes stints as a general-assignment reporter, overnight editor, education writer, labor writer and transit writer.

Mr. Liff also will do spot news and news feature reporting and writing for AA. He has been contributing free-lance articles to the Magazine section of ADVERTISING AGE for more than a year.#

corrections & clarifications

- The totals given in the fast-food chain tv spending chart (AA, March 19, P. 1) were for the complete fast-food/restaurant category, not just for the top 15 chains listed.
- Robert McConaughey's title at *Dental Economics* is associate publisher (AA, March 12, P. 20).
- The agency for Hewlett-Packard's co-op sweepstakes campaign is Benard/Resnick & Co., San Francisco (AA, March 12, P. 8).
- The phone number for Pets Are Wonderful's ad competition is (312) 836-7145 (AA, March 12, P. 59).#

adWatch

(Continued from Page 3)

Point-of-Purchase Advertising Institute, says the "commercial has committed the gravest sin in advertising. It doesn't sell Wendy's fast-food. It sells the ad agency, the author, director and, most of all, Clara Peller."

But Wendy's remains sanguine despite the second-guessing and envy that have accompanied the campaign's success, in large part because "Where's the beef?" has kept the cash registers ringing and the lines long.

"We wouldn't have moved our marketing calendar around and returned to the network with it if it didn't work," said William Welter, Wendy's exec vp-marketing.

Although unwilling to divulge exact sales figures, Mr. Welter said Wendy's next month "will be proud to announce first-quarter results that I think will speak for themselves."

Market researcher Restaurant Industry Trends estimates that February sales for Wendy's (unadjusted for menu price increases) were up 19% from the previous February, after being up 15% in January. Mr. Welter said those figures are "in the ball park."

In addition to the sales gains and the millions of dollars worth of free publicity, Wendy's believes it has accrued some equally important long-term benefits from the campaign.

According to the chain's tracking survey, public perception of Wendy's Single as being larger than Burger King's Whopper or McDonald's Big Mac has increased 47% in the two months since the campaign began. Encouraging such movement had been the original impetus for the "Where's the beef?" campaign.

Mr. Welter said much of Wendy's increase in favorable consumer perception has come at the expense of Burger King's Whopper, while McDonald's Big Mac has held steady and continues to be perceived as largest by the most consumers.

Similar shifts occurred for the three chains' advertising awareness. Last month's adWatch figures for the fast-food category suggest that some consumers may not identify "Where's the beef?" with Wendy's.

Wendy's 14.5% share of first mentions in the category represented an increase of 6.8 points since January. Burger King's awareness fell 5.2 points to 16.3% of mentions. McDonald's was off slightly, dipping from 41.8% in January to 39.3% last month, but its advertising still dominates recall in the category.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of adults to name the advertising that first comes to mind in a variety of product and service categories from all they have seen, heard or read in the past 30 days.

Last month, 1,254 consumers were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly samplings is considered statistically significant and attributable to more than sampling variations.

Among movers in other categories:

- Michael Jackson was again forced to play second fiddle to Clara Peller as Pepsi's 5.6 percentage point increase in the **soft drinks** group was the second-largest improvement. With 28% of first mentions, Pepsi replaced Coke in the No. 1 spot for the first time since November, 1982.

Riding Pepsi's—and Michael Jackson's—coattails was Diet Pepsi, which apparently overtook Diet Coke last month to claim the No. 4 spot with 3.6% of first mentions. Seven-Up held the No. 3 position with a 7.9% share.

- Avon, preparing to launch a more aggressive advertising campaign this spring (AA, March 12), already has received an awareness boost. A 2.9 point increase to 6.5% of first mentions last month helped the direct marketer recapture the No. 1 spot in the **cosmetics & fragrances** category.

January's leader, Maybelline, also received an improved rating last month with a 5.6% share, but slipped to No. 2, ahead of Cover Girl (3.2%).#

SHELL ALPERT'S DM WAR COLLEGE IS ALL YOURS.

This is the "private one" you've read so much about, heard others rave about, wanted to find out about!

Whether you're new to direct marketing or an old pro, bringing Alpert's famous War College to *your* office, *your* people, gives *your* firm an updated, battle-ready competitive edge. A private workshop/clinic that's prepared and conducted solely for you.

You've read about it in the NY Times, Wall St. Journal, Ad Age, Zip Magazine, Direct Marketing, DM News, Folio, Focus, Catalog Age, Cable Marketing, to name a few. Fortune 500 biggies like Hershey, Merck, Armco, Xerox — plus hundreds of smaller organizations — have profited from Alpert's free wheeling, beans-spilling, *mind-opening* approach to direct marketing.

A one- or two-day War College gives your managers and staff the opportunity to interact with, learn from — be inspired by — one of direct marketing's foremost field generals. To find out more about this custom-targeted "combat training" program (and its *very affordable* cost) write or phone today for your FREE BATTLE-PLANNING PORTFOLIO!

The Shell Alpert Direct Marketing War College, 444 Lakeview Ct., Dept. N12, Langhorne, PA 19047 215/752-3433.

Avon promoting fashion, discount

By PAT SLOAN

After a three-year hiatus, Avon Products' Avon division is back with a multi-million-dollar spring promotion offering lipstick and nail enamel at a discount (AA, March 5, *et seq.*).

While past commercials such as the $4 million "Color never looked so good" promotion in 1979 showed Avon representatives selling, the new commercials are pure fashion.

Described by ad director Tabor Butler as "graphic techniques interspersed with a beauty payoff," the commercial features three women models and a specially created song.

Tv is backed by radio and a *People* gatefold. The $3 million-plus campaign will account for 20% of Avon's U.S. ad spending in 1984. Worldwide, Avon will spend $25 million.

According to Avon executives, the division is projecting unit sales of 12.5 million each for lipsticks and nail enamels during the four-week promotion, when the products will sell for 50¢ instead of the usual $3.50. N W Ayer is the agency.

With sales soft from 1980 through 1982, the Avon division virtually dropped its advertising, said Ms. Butler.

In the first nine months of 1983, however, Avon spent more than $13 million on measured media advertising, according to Leading National Advertisers.#

Beef goes abroad

(Continued from Page 3)

tralia even though Clara Peller hasn't been seen there—yet. While Wendy's presence in Australia and England is limited to fewer than 12 stores in each country, both are major expansion targets.

McDonald's and Burger King are better represented abroad and are advertising aggressively.

Mr. Welter agrees that "Where's the beef?" could help raise Wendy's awareness in England and Australia, as it has here.

Although he said he'd "love to put it on the air in London tomorrow," Mr. Welter said Wendy's international marketing executives are studying how well the spots might travel.

Back home, new questions about the origins of the line were raised by Suburpia, a 19-store sandwich-shop chain based in Milwaukee. Joe Pecor, marketing director for Suburpia, said a 1979 commercial Joe Sedelmaier directed for the chain and its agency, Van Leeuwen & Partners, bears so many resemblances to Mr. Sedelmaier's Wendy's spot that Suburpia can't use its own commercial without looking like an imitator.

Mr. Pecor said Suburpia officials have contacted Wendy's and its agency, Dancer Fitzgerald Sample, requesting compensation for its inability to run the spot. He said if no out-of-court agreement could be reached, the company would be "forced to file a copyright-infringement suit."

In the Suburpia spot, which has not run since 1979, a man orders a cheeseburger from a clown-face menu board. When a very small burger is delivered, the man says, "That's it? Where's the meat?"

Receiving no satisfactory response to his question, the man angrily yells into the clown, "Hey, you. I know you're in there. Where's my meat?"

That, Mr. Pecor said, is similar to Clara Peller's line, "I don't think there's anybody back there."

Mr. Pecor also pointed to the use of a small burger on a large bun in both commercials.

Mr. Pecor said the Suburpia spot was aired Nov. 26 as part of NBC's "TV's Greatest Commercials, Part Four" and Suburpia had planned to revive it this year.

"Unfortunately, there are a lot of people trying to share the limelight," Wendy's Mr. Welter said of the Suburpia claims. He said DFS copywriter Cliff Freeman hadn't seen the Suburpia spot before he wrote Wendy's last summer and wasn't influenced by it.

Mr. Sedelmaier was more upset by the brouhaha.

"I would never do something I had done before and try to foist it off on a new client," he said.

But it is hardly surprising, he added, that his personal style is evident in both spots he directed.

Mr. Sedelmaier showed Advertising Age original scripts for both spots and said he had changed the line, "But I can't even find the meat" (written by James Weller, now with Della Femina, Travisano & Partners in Los Angeles), to "Where's the meat?" for Suburpia before filming. The Wendy's line as scripted was "But where's all the beef?"

Mr. Welter said the matter is in the hands of lawyers and Wendy's is not about to pull the country's hottest commercial.#

Schaefer to carry low-alcohol banner

By RALPH GRAY

DETROIT—Stroh Brewery Co. will mix an old ad theme with its just-named Schaefer LA (for low-alcohol) beer. "The one beer to have when you're having more than one" is the revived Schaefer line.

Schaefer was picked to carry the Stroh low-alcohol banner because the brewer is aiming at buyers of lower-price beer. Schaefer, once an eastern beer, was taken national as a lower-price brew after Stroh acquired it in 1980.

The old theme line was brought back because "it is a well-known phrase in the beer business in association with Schaefer, and the concept [of having more than one] is closely related to the reasons consumers will be drinking Schaefer LA," said John Bissell, group vp-marketing.

The new brand will be introduced in late spring, probably May, but Stroh wouldn't disclose further details. MCA Advertising, New York, will handle.

Stroh decided on a brand extension rather than a new name because "we have the equity of that brand name out there and its price level is established," Mr. Bissell said in an interview.

Schaefer LA will be met by low-alcohol beers from Anheuser-Busch, which will test-market a product it is calling LA from Anheuser-Busch (AA, Jan. 23). G. Heileman Brewing Co. is close to an entry, sources say, while Hudepohl Brewing Co., Cincinnati, markets Pace in Ohio and C. Schmidt & Sons, Philadelphia, is selling Break Special Lager in Texas and Massachusetts.

"We have no way of knowing what size the market is, but other brewers are out there, so for competitive reasons we want to be represented," Mr. Bissell said.

"Demographics are a mystery area, but we believe LA will draw interest from those drinking regular-alcohol beer and those not drinking much beer," he said.

Low-alcohol beers probably won't hit the 17% market penetration of light (lower-calorie) beers. But in western Australia, a heavy beer consumption area, weaker beer has taken 25% of the business, Mr. Bissell noted.

American beer is weaker than Australian beer and runs about 3.8% alcohol with light beer slightly less. Low-alcohol beer comes in at less than 2%.

One problem all marketers of low-alcohol beer face is that brewers can't mention there is less alcohol. "Many states prevent you from giving the amount of alcohol, and current interpretations of federal rules is that labeling cannot mention the alcoholic content," Mr. Bissell said.

But there are no restrictions on publicity, Mr. Bissell said. "LA is a segment where there is already a lot of inherent consumer interest, so we don't believe we need a big consumer-education program. Some of the interest groups like Mothers Against Drunk Driving have heightened consumer awareness on alcohol abuse," he said.

Stroh's entry isn't intended to placate such groups, but rather to respond to consumer desires, Mr. Bissell said.#

Kodak to enter videotape

(Continued from Page 1)

wars.

"This is going to be the year to watch," said Eugene Glazer of Dean Witter Reynolds. "All the big players will try to reverse this price-cutting trend by spending a lot of money to create distinct brand identities."

Kodak plans to capitalize on its long-established image as America's premier picture-taker. "We're known for quality products," said Richard McCoy, Kodak's director of marketing communications-consumer, professional and finishing markets. "We'll build on that heritage, as well as the considerable brand recognition of the Kodak name."

Kodak's tv buys have not been finalized, but the campaign—McCann-Erickson's first U.S. assignment for Kodak—will break April 2. Kodak declined to confirm the budget figures.

In addition to network prime time and sports, the company will use major-market spot tv and cable sports. The print schedule will include between 15 and 20 magazines, ranging from mass-circulation publications to *The New Yorker* to video buff books.

Mr. McCoy said the campaign has two distinct, immediate objectives: First, to let consumers know that Kodak is now in the tape business and, second, to convince them Kodak is the tape to buy.

The Rochester, N.Y.-based company will use the theme: "When the moment means more. Tape it. And keep it. On Kodak videotape."

The ads feature vignettes of great moments from the past as well as significant contemporary events in sports, entertainment and news, the company said.

Initially, Kodak will market products manufactured only by TDK Corp. of America. Analysts, however, speculate that if all goes well, Kodak will produce its own videotapes. It has the technology to do so; the process for coating magnetic tape is similar to that for coating photosensitive film and paper.

In addition to its marketing expertise and spending ability, Kodak brings considerable distribution clout to its latest endeavor. The tapes will be sold through Kodak's photo outlets—including Sears, Roebuck & Co. and K mart Corp.—as well as electronics shops.

Kodak is entering a growth market that is not dominated by any one company. According to Dean Witter's Mr. Glazer, sales of blank videocassettes more than doubled last year from 23 million units to 57 million units.

He expects 1983 unit volume to increase by some 30% to 40%. And if all goes well, he estimates Kodak could garner between 10% and 20% of the market in its first year.#

Merrill Lynch

(Continued from Page 1)

"cost situation." He did not deny that a large layoff would take place. If Merrill Lynch reduced its work force, others in the industry possibly might follow suit.

Meanwhile, as the company was reporting cost-cutting moves, it announced a joint venture with IBM Corp. to deliver financial information to IBM desktop computer units.

The service, which would enable brokers and financial services to gain access to stock quotes and other data over the IBM PC, is to go into test in 1985.#

Census sees agency growth

(Continued from Page 3)

$1,467,071,000 in the earlier census, with 105,319 employed, compared with 82,515 in 1977.

The information was collected early in 1983.

The Census Bureau's national and state information shows 9,559 ad agencies with payrolls, compared with 8,089 recorded five years earlier.

New York and California led with 1,327 and 1,106, respectively, compared with 1,222 and 919 in 1977. Texas, with 675 (464 in 1977), took third place away from Illinois, which had 606 in 1982 and 563 in 1977.

The advance report for 1982 shows the states of New York, California and Illinois with 56.2% of agency industry receipts.

Three big cities in these states—New York, Chicago and Los Angeles—had recorded 53.1% of the entire ad agency industry receipts in 1977.

Among the four states leading ad agency business, New York's results were generally lackluster, although its receipts of $2,036,728,000 still tripled second-place California.

New York's 66.8% gain in receipts barely topped the national average of 83.8%, while California was up 121.7%.

New York's 1,327 agencies was an increase of only 8.5%, compared with a 23.6% national increase; its annual agency payrolls were up only 61.6%, compared with 78.5% nationally, and employment was up 18.4%, compared with the 27.6% national gain.

Nearby New Jersey had a 161.3% increase in receipts, placing it 10th in the nation.

The state is also eighth in number of agencies, with 374, a 26.8% increase.

It registered a 48.8% increase in number of jobs and a 150.8% increase in payrolls.

California, second in number of agencies; Texas, third, and Florida, fifth, were among the standout performers.

California agency receipts of $640,512,000 represented a 121.7% increase, jobs were up 41.7%, payrolls up 111.2% and number of agencies up 20.3%.

Texas, with receipts up 167.5%, was still in fourth place, trailing Illinois, but the 45.4% increase in number of agencies in that state eased Illinois out of third place in that category.

Texas also marked up a 72.8% increase in jobs and 169.6% increase in payrolls.

Florida agencies reported $143,111,000 in receipts, up 147.4%; a 45.9% increase in jobs; a 121.7% increase in payrolls, and a 30.6% increase in number of agencies.

Receipts per employe and payroll per employe are measures of productivity.

For the U.S., receipts per employe were $55,286, up 44%, while payroll per employe was $24,864, an increase of only 39.9%.

Michigan and New York, first and second in receipts per employe, had gains of 37.6% and 40.9%, respectively, in productivity.

Better than national average receipts per employe were recorded in Illinois, 48.4%; Georgia, 54.9%; California, 56.5%; New Jersey, 75.6%, and Texas, 54.8%.

The payroll per employe rankings showed New York first, followed by Illinois, District of Columbia, Michigan, California, Alaska, Minnesota, Georgia, North Carolina and New Jersey.

New York, on the top with payroll per employe at $28,952, held its annual increase to 36.5%, compared with the national average increase of 39.9%.#

LBS, Turner avoid court battle

By MAURINE CHRISTOPHER

NEW YORK—Lexington Broadcast Services' out-of-court settlement with Robert Turner, its former president, reportedly ensures that Mr. Turner will stop raiding LBS for personnel and projects and prevents him from using confidential information for his new company.

Both sides pledged not to divulge specifics of the agreement. Steve Felsher, vp-corporate counsel at Grey Advertising, parent company of LBS, said LBS and Grey chose to settle when they thought they had sufficient guarantees to stop Mr. Turner.

Mr. Turner resigned from LBS last month to form Orbis Communications. Since then, he has hired two LBS executives, John Ranck, exec vp, and Ethan Podell, a vp.

The court papers show that Grey and LBS were concerned about protecting material relating to Procter & Gamble schedules. The agreement states: "Defendants represent and warrant that they do not possess copies of plaintiff's proposal to Procter & Gamble for the 1984/85 fiscal year, the design document for plaintiff's computer program or any other confidential document of the plaintiff."

Orbis has been assigned to sell national barter spots in some Metromedia Producers Corp. syndicated shows. That arrangement, as well as others, is not affected by the settlement.

While the lawsuit is over, the after-effect may linger. In a 46-page brief, Mr. Turner charged that Grey and LBS distorted their net profits for 1982 and underestimated amounts payable to licensors of shows. It said five producers—Bandana Enterprises, Televentures, Rif Markowitz, Russ Kagan and Pierre Cossette TV—had asked LBS for audits on their shows.

Grey's Mr. Felsher termed the charges of tampering with the profits "baseless and not worthy of comment."

Some observers had theorized that the specter of having their finances spread out in a court record prompted LBS to withdraw from the legal battle.

Not so, said Mr. Felsher, who claimed that Mr. Turner's brief was filed after the settlement. Sources on the other side disagreed; they said Mr. Turner's reply went into the record the day before the settlement.#

Agency income tops $6.5 billion in 1983

Worldwide billings total $44.2 billion, up 12.8% over 1982

Copyright 1984 by Crain Communications Inc. Quotations or reproduction in whole or part without written permission is expressly prohibited.

By John J. O'Connor

Aided by the nation's economic recovery, the U.S. advertising agency industry in 1983 posted record gross income of $6.51 billion on worldwide billings of $44.2 billion.

According to the 40th compilation of agency data by Advertising Age, last year's gross income was 10.7% above the $5.88 billion reported by 822 agencies in the survey a year ago. The 812 agencies taking part in the 1983 survey saw billings rise 12.8% over the previous year's record of $39.2 billion.

The industry's growth over the past five years in terms of gross income is as follows: 1979, $4.10 billion (up 18.5%); 1980, $4.67 billion (up 13.9%); 1981, $5.24 billion (up 12.2%); 1982, $5.88 billion (up 12.2%), and 1981, $6.51 billion (up 10.7%).

The industry's international gross income in 1983 was $1,703,400,000 on billings of $11,466,300,000. In 1982, international operations contributed $1,596,100,000 to agency coffers on billings of $10,667,000,000.

It should be noted that 1983 gross income and billings do not include the results of NCK Organization, a large international agency that merged this year with Foote, Cone & Belding. With that merger, NCK relinquished financial control of Altschiller Reitzfeld Solin/NCK, a domestic agency that had enabled it to be represented in AA's U.S. income survey. In 1982, NCK Organization reported gross income of $69.8 million on billings of $433,500,000. (NCK's 1983 results will appear in AA's survey of foreign agencies.) The 1983 gross income of Altschiller Reitzfeld Solin is $5.4 million.

A total of 54 agencies in the current survey each had gross income of more than $15 million in 1983. The combined gross income and billings of those 54 shops was $4,978,900,000 on billings of $33,550,800,000. There were 87 agencies in the $5 million to $15 million category, whose combined gross income was $587,400,000 on billings of $4,081,200,000. The total gross income for 1983 of agencies with gross income under $5 million was $940,500,000 on billings of $6,611,800,000.

Young & Rubicam once again emerged as the gross income rankings leader as its family of agencies chalked up gross income of $414 million on

Agency of the Year: Fallon McElligott Rice

By Nancy Millman

When Fallon McElligott Rice first opened its doors above Peter's Grill in downtown Minneapolis two and one-half years ago, it was without clients, and everyone pitched in to trim expenses. Pat Fallon, president, recalls that among his duties was to clean the restrooms.

Today, "the Fallon brothers"—as they are referred to by one client—are billing $26.5 million and turning out advertising that is winning coveted industry awards and capturing national attention. And Pat Fallon no longer has his clean-up duties.

Less than three years old, this Minneapolis agency has been winning both awards and clients.

In leaving secure, top-dollar jobs at Bozell & Jacobs and Martin/Williams, two major Minneapolis agencies, the founding partners of FMR had something else in mind besides security.

"We wanted to be the preeminent creative agency in America," Mr. Fallon says of the move. "Our aspirations have been so large, it's almost embarrasing."

Under the creative direction of vp Tom McElligott, the agency has won, in its short history, six Clio awards, many Andy awards from the New York Advertising Club Show, gold and silver medals from the New York Art Directors Show and The One Show, 17 citings in the 1983 edition of *Communication Arts*, and scores of top prizes in local competitions.

Recently Mr. McElligott was informed the agency has 46 finalists in the New York Art Directors Club show for this year. "Nobody had anything near that except Doyle Dane Bernbach," he said upon hearing the news.

Modeling their agency after such hot creative shops as Ally & Gargano and Scali, McCabe, Sloves, Messrs. Fallon and McElligott say they want to break the industry norm of compromise, and maintain idealistic standards of arresting, witty advertising that sells the product.

The editors of Advertising Age believe they have succeeded in this pursuit, and on the basis of the agency's creative output have selected Fallon McElligott Rice as Agency of the Year for 1983.

Five quietly intense and aggressive people lead this 38-person agency: Mr. Fallon, who formerly was vp-director of marketing services at Martin/Williams; Mr. McElligott, who worked for ten years at Bozell & Jacobs, ending his tenure as senior vp-creative director; Nancy Rice, vp-executive art director, who also came from B&J where she was vp-senior art director; Fred Senn, vp-account executive, who was at B&J client Wilson Learning Corp., as director of marketing services, and prior to that vp-account manager at Martin/Williams, and Irving Fish, chief financial officer, who had been director of finance and administration at Martin/Williams.

Together they have created an atmosphere in which every staff member seems to share the same mission. The creative product—be it zany tv spots or the compelling print advertising that forms the backbone of the agency's work—counts more than anything else.

The group has its origins in a free lance business called Lunch Hour Ltd., which Messrs. McElligott and Fallon started in the mid-1970s. "We competed by day," Mr. Fallon says, "and worked together at night." The two had several retail clients and also did powerful advertising for the Episcopal Diosese of Minnesota. The advertising created by this partnership attracted much local attention for its sense of humor, and for its often daring approaches.

Mr. McElligott says his tenure at Bozell & Jacobs was "not a happy marriage."

The shy and often self-effacing son of an Episcopal clergyman admits, "I've never been much of a fan of advertising, you know. I there to influence things there from the bottom up, but advertising is not a very democratic business."

Colleagues say Mr. McElligott always marched to a different drummer. He describes himself as "a driven idealist. What drives me and makes me compulsive is a single-minded pursuit of excellence."

Although he says he had "nice offers" from agencies in larger cities, Mr. McElligott was committed to living in the Minneapolis area.

The only alternative was to expand Lunch Hour Ltd. into a fulltime enter-

When you ride alone you have to sit tall in the saddle.
USWEST

Versatile Fallon McElligott Rice uses dramatic Western scenes for client U S West, one of the new regional telephone and communications companies, and takes a lighter approach in tv spots for Minnesota Federal Savings & Loan (left above) and for Jobs for Minnesotans (left below).

Agency of the Year: FMR

(Continued from Page 1)

prise, with a group of partners—the first of which was Ms. Rice, a soft-spoken, dedicated professional. The search for the right partners took many months, because it was essential all have the same mind-set.

In July, 1980, Mr. Fallon and Mr. McElligott shook hands on a plan to work a year in planning their venture, while continuing their mainstream agency careers. They wanted to be ready for business—with everything from computers to stationery—on the day they opened.

Among the credos in the Fallon McElligott Rice creative philosophy: "We believe there is no such thing as a 'me-too' product, only 'me-too' advertising."

They recruited the other partners with the unusual twist of signing up Mr. Fish as the controller before they had any money to control.

The company was totally self-financed—each of the partners chipped in their savings until they had $200,000—the sum they figured would be enough for them to survive without any business.

"We never borrowed a dime," Mr. Fallon says. To this day, the agency has no long-term debt.

A local tv station, NBC affiliate WTCN, was the first client Mr. Fallon landed. He planted himself in the reception area until the general manager agreed to see him—the 17th agency interviewed. (FMR resigned the account last July for financial reasons—the client was "very penurious," Mr. Fallon says.)

The fledgling agency set tough standards for clients they would accept. Put simply by Mr. Fallon: "People who were used to covering their ass couldn't hire us."

In other words, and this is clearly spelled out to prospective clients in initial meetings—FMR is only interested in handling clients where the advertising decision-making process is clear and non-political. That means no committees, and no voting, according to Mr. Fallon.

"We're more interested in being good than in growth," the energetic 38-year-old executive says. He points to several potentially large pieces of business, including Minnetonka Inc. and B. Dalton bookstores, that he has turned down because of these conditions.

Applying its own marketing principles, the new agency ran an ad for itself in local newspapers. A strong headline: "A new advertising agency for companies that would rather outsmart the competition than outspend them," is coupled with a photograph of the principals, and a long copy block that concludes with the agency's philosophy:

"At Fallon McElligott Rice we believe in advertising the way Ray Rubicam, Leo Burnett, David Ogilvy and Bill Bernbach once practiced it.

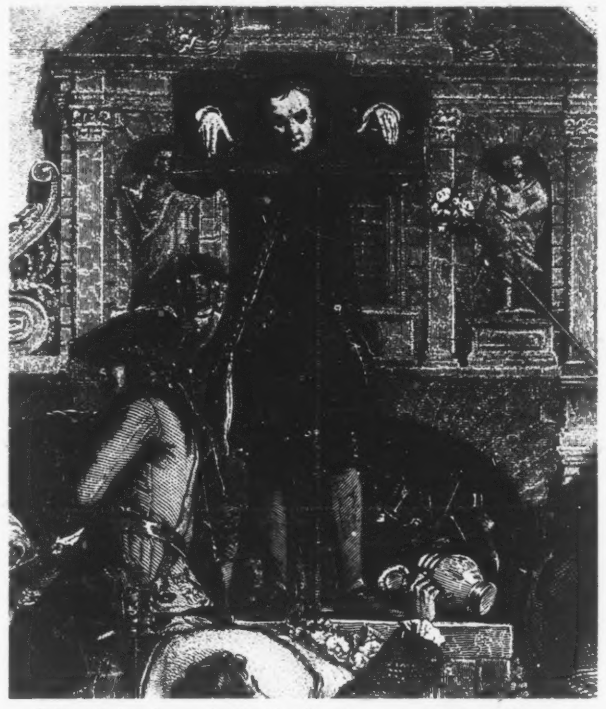
"We believe that imagination is one of the last remaining legal means you have to gain an unfair advantage over your competition.

"We believe you shouldn't have to repeat yourself ten times to be heard once.

"We believe there is no such thing as a 'me-too' product, only 'me-too advertising.' "

This ad drew the first major client (now about $1.2 million in billings) to take a chance on FMR—ITT Life Insurance Corp. The company's president, Mr. Fallon says, was looking to break the rules of insurance advertising.

What Exactly Does "Penalty For Early Withdrawal" Mean?



The language of banking can be very intimidating.

That's because, rather than speak in plain English, bankers tend to talk in bankerese. "Penalty for early withdrawal," for example.

Simply stated, it means that we can't pay you as much interest as we promised if you don't leave your money with us as long as you promised.

This kind of explanation is rare in the financial world. Which is unfortunate, because today, with new banking laws and a changing economy, you need a banker who offers more than industry cliches and buzzwords.

You need someone who'll explain things clearly. Like the people at Minnesota Federal.

We have a program called Plain Talk that puts our employees through special training to make sure they talk the way real people talk.

And Minnesota Federal's Plain Talk also means that our forms are written in the same plain English we speak.

So whether you're talking to a Minnesota Federal employee or filling out a Minnesota Federal loan application, you won't have to bring along a translator to feel comfortable.

Stop in at your nearby Minnesota Federal office soon.

You'll find that Plain Talk is just one example of the things we're doing to make Minnesota Federal your choice when it comes to banking.

Because while other banks may seem preoccupied with what they'll do if you withdraw your money, Minnesota Federal is obsessed with giving you every reason not to.

Minnesota Federal
The Plain Talk Bankers

A print ad series for Minnesota Federal Savings & Loan, like the tv spots, brings a lighthearted approach to matters financial.

"I need an agency that will get me kicked out of the club," Robert MacDonald told the hopeful agency.

The agency's first assignment was to unsell the concept of whole life insurance.

"Your whole life is a mistake," the bold headline read in the resulting ad. It was teamed with an illustration of a middle-aged man peering dejectedly from a corner.

The current magazine campaign for ITT is work of which Mr. McElligott is very proud. The selling proposition is that if customers take good care of their health, through diet and exercise, they will be rewarded with lower life insurance premiums.

Dramatic black and white ads with arresting visual images—a beautifully fit young woman, a powerfully muscular man—join with bold headlines to communicate the message. "ITT Life believes a beautiful body should be worth more than a few whistles at the beach," one prize-winning couponed ad says.

In the first six months, about 12,000 coupons were returned and the client's business has increased 204%, Mr. Fallon says.

Few clients are more conservative than bankers. Minnesota Federal Savings & Loan had had three bad years, and the bank executives realized that several of the city's lending institutions were lumped together in terms of their image to consumers.

To make it stand out from the crowd, FMR parodies the money-lending business in hilarious fashion.

One in the series of spots opens on a cold, stone-faced banker. "For years," the announcer says, banks and savings & loans have been singing the same old song." The banker shakes his head and mouths the words to the song. "I can't give you anything but love, baby. That's the only thing I've plenty of, baby."

"They tell you how much they love you, but they never seem able to loan you money," the voiceover continues. "At Minnesota Federal we love you, too, but we also have money to loan . . . at very competitive rates.

"Minnesota Federal . . . money to loan without the song and dance."

Another spot features a potential customer swimming in a fishtank behind an uncaring banker.

And an upcoming commercial goes even further into the absurd, using the Ray Charles song "Hit the road, Jack."

In the spot, bank personnel leave their stations to shoo out an unwelcome prospective borrower, all singing and dancing to the song. Minnesota Federal, copy will relate, will give a warmer reception.

Gordon Mozeltine, president of the s & l, said his company moved from in-house advertising to FMR because "we wanted more bang for our buck." He says mortgage, checking, and consumer lending business are all "up considerably" as a result of the advertising.

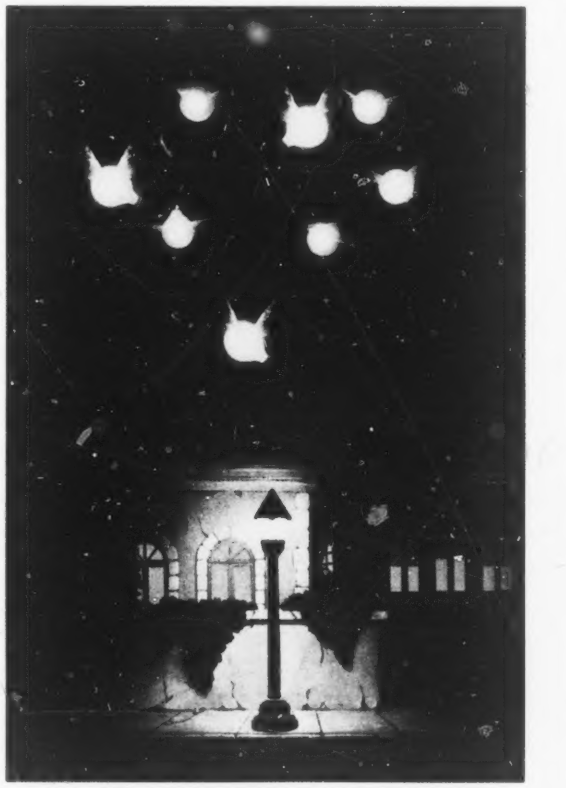
Perhaps the most off-the-wall campaign yet to leave Mr. McElligott's office—for in addition to writing a great deal himself, he approves every piece of art and copy—is for Gold'n Plump chickens.

Using black & white newsreel film style, the commercials put crash helmets on chickens and deliver them by parachute and by tank into battle, simulating wartime newsreels.

"People say to us, 'how do your clients let you do that?' We force them to do it. If they let us, we'd be like any other agency," Mr. Fallon says.

"I want our advertising to be powerful, memorable, strategically strong, and to have wit and charm," Mr.

(Continued on Page 4)



GREAT IDEAS DON'T ONLY COME BETWEEN 8 AND 5.

CONTROL DATA
TWENTY-SIX YEARS OF BRIGHT IDEAS

The light bulb is recurring element in FMR's color ad series for Control Data.

A NEW ADVERTISING AGENCY FOR COMPANIES THAT WOULD RATHER OUTSMART THE COMPETITION THAN OUTSPEND THEM.

"I know that only about half of my advertising works. The trouble is, I don't know which half."
John Wanamaker

If you're spending money on advertising, you've probably wondered: Is anybody out there listening?

The answer to that question may come as a shock.

Consider the following facts.

American business will spend over $54 billion on advertising this year.

According to one estimate cited in *The Journal of Advertising Research,* that money will buy over 200

THE CLUTTER TRAP.

In an effort to counteract the dwindling effectiveness of their messages, more and more companies increase their media frequency.

This leads to clutter.

Advertisers like Wisk and Sanka, once content to run their shrill, tedious commercials several times a week, now may run them several times an hour, trying to bore their way into the consumer's consciousness.

Ironically, while the number of messages (and media costs) have doubled in the past several years,

RAISING AWARENESS, NOT BUDGETS.

It's clear that if you want your message to be one of the precious few that are remembered – the less than 2% – you've got your work cut out for you.

Outspending the competition is increasingly expensive and, as we've seen, may even work against you.

Instead of trying to *outspend* the competition, why not try to *out-think* them? With messages so interesting that even the most indifferent consumer will stop and look.

According to researcher Daniel Starch, one advertisement can outperform

As The Harvard Business Review once observed,

"... creativity is like peace. Everybody wants it, everyone seems to have some ideas about it, but nobody seems able to produce it."

Once every several years, however, an advertising agency with the ability to produce truly exciting, original and compelling advertising appears.

Fallon McElligott Rice is such an agency.

Although we've just opened our doors, the campaigns we've created at past agencies are famous. They've won market share for our clients, and a lion's share of awards for us.

They've been studied in journalism schools, and copied by competitors.

In every case, these campaigns *seemed* like they had more money behind them than they did.

The ideas were big; the budgets small.

WHAT WE BELIEVE.

At Fallon McElligott Rice we believe in advertising the way Ray Rubicam, Leo Burnett, David Ogilvy and Bill Bernbach once practiced it.

We believe that imagination is one of the last remaining legal means you have to gain an unfair advantage over your competition.

uldn't have to
nes to be heard

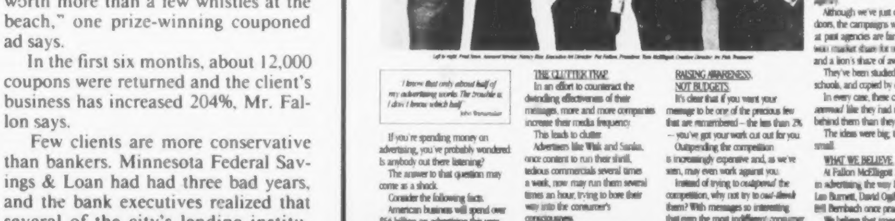
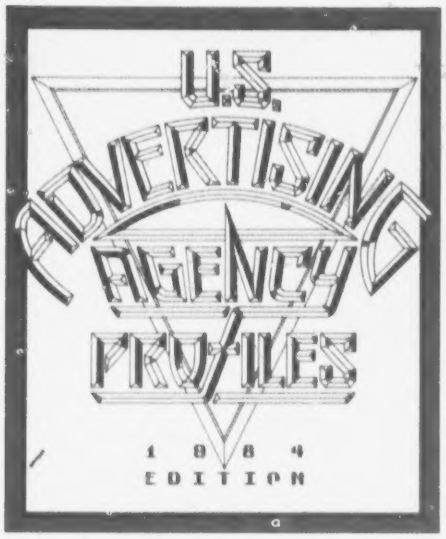
rove.

FALLON McELLIGOTT RICE
99 South 9th Minneapolis, Minnesota 55402 Telephone 612-332-2445

The principals of Fallon McElligott Rice set forth their advertising philosophy in this introductory ad when it opened for business two and one-half years ago.



The problems that can befall the unschooled do-it-yourselfer, including malfunctions that blow out the street lights and send towers of water spewing from the water pipes, are portrayed in this spot for Knox Lumber.



40th report on U.S. agencies

A comprehensive view of the U.S. advertising agency business begins on this page, as Advertising Age presents its 40th annual issue of profiles of the agencies, their gross income and billings in 1983 and 1982, accounts won and lost last year, media mix, top personnel, number of employes and phone numbers. The agency profiles are arranged alphabetically by four income groups. In addition, agencies in the two lower income groups are divided into four regions—East, South, Midwest and West. The first group, beginning on this page, is comprised of agencies that recorded gross income of more than $15 million in 1983.

Admarketing Inc.

Gross Income*	1983	1982
U.S.	$23,000,000	$18,750,000
Total	$23,000,000	$18,750,000

* AA estimate

Admarketing Inc., Los Angeles, is estimated to have had gross income of $23,000,000 on billings of $146,300,000. Its gross income in 1982 is estimated at $18,750,000 on billings of $126,200,000.

The agency's 1983 volume consisted of $145,000,000 in media and $1,300,000 in materials and services. Its 1982 U.S. volume consisted of $125,000,000 in media and $1,200,000 in materials and services.

In 1983, the agenc[illegible]ned Continental yogurt and M[illegible]a Mix non-dairy products, La Victoria Foods, Leo's Quality Foods, Regal Vitamin, Ronco Teleproducts, Breuner's Rents Furniture, Kentucky Fried Chicken (Southern California and San Antonio, Tex.) Southern California Oldsmobile Dealers., New Horizon Pictures and KJOI-FM, Los Angeles.

It lost Hartman Catalogue, New World Pictures, Airco Technical Schools (East Coast only) and KMGG-FM, Los Angeles.

Billings breakdown: Newspapers 5%, magazines 3%, supplements 5%, radio 5%, network tv 1%, spot tv 68%, cable tv 1%, business press 1%, transit advertising 2%, point of sale 5%, direct mail 1%, other 3%.

The agency has 275 employes in three offices; a year ago it had 250.

Top execs: Jack Roth, president-ceo; Robert Recht, chairman; Martin Cagan, exec vp.

Phone: (213) 203-8400.

Ally & Gargano

Gross Income	1983	1982
U.S.	$22,229,800	$16,583,000
Total	$22,229,800	$16,583,000

Ally & Gargano, New York, which is now a publicly held agency, reported gross income of $22,229,800 in 1983 on billings of $174,067,000. In 1982, it reported gross income of $16,583,000 on billings of $125,970,000.

The agency's 1983 volume consisted of $149,274,000 in media, $16,117,300 in materials and services and $8,675,700 in capitalized fees. Its 1982 U.S. volume consisted of $108,800,000 in media, $11,289,000 in materials and services and $5,881,000 in capitalized fees.

In 1983, the agency gained Comp-U-Card International, Franklin Computer Corp., Kloss Video, NFL Properties, SFN Cos., Union Carbide and WYNY.

It lost Commodore Business Machines.

Billings breakdown: Newspapers 8%, magazines 15%, radio 3%, network tv 36%, spot tv 36%, business papers 2%.

The agency has 244 employes in one office. A year ago it had 209.

Top execs: Carl Ally, chairman; Amil Gargano, president-chief operating officer; Edward Gallagher, Harold Weston, Michael Tesch, exec vps.

Phone: (212) 688-5300.

N W Ayer Inc.

Gross Income	1983	1982
U.S.	$83,200,000	$73,100,000
International	14,200,000	10,800,000
Total	$97,400,000	$83,900,000

N W Ayer Inc., New York, reported gross income of $97,400,000 in 1983 on billings of $650,000,000. In 1982, it reported gross income of $83,900,000 on billings of $587,000,000.

The agency's 1983 U.S. volume of $558,000,000 consisted of $423,000,000 in media, $67,000,000 in materials and services and $68,000,000 in capitalized fees. Its 1982 U.S. volume of $515,000,000 consisted of $403,100,000 in media, $63,700,000 in materials and services and $48,200,000 in capitalized fees.

The agency's overseas volume was $92,000,000 in 1983 and $72,000,000 in 1982.

In 1983, the agency gained Seven Up Co.'s Like cola, Sun Co., American Lamb Council, Emerson Electric's Dremel power tools, Leaf Inc.'s Jolly Rancher and Switzer-Clark divisions, Oxford Properties, Zena jeans, Walt Disney Telecommunications and Non-Theatrical Co. (home video), Toshiba America's Information Systems division, Gillette's Body Flowers body spray deodorant and Morton-Thiokol's Texize division, billing $8,000,000 to $10,000,000.

It resigned Cannon Mills and Howard Johnson's, the latter billing $8,000,000, and lost Goodyear Aerospace, Goodyear Tire & Rubber, Host International, Coast Federal, *Business Week*, Northern Ireland Development Organization and Official Airlines Guides.

Overseas, the agency gained over 60 accounts, including Charms Sweets (Motta Group) and Bahamas Ministry of Tourism, both Italy; Air France, Trident Life and Volvo, United Kingdom; Capstain, Chesterfield and Marvels cigarets in Hong Kong; New Zealand Fishing Industry Board and New Zealand Kiwi Fruit Authority; Williams & Humbert Dry Sack and Pando brands, Belgium; Bredenberg fashion chain, Sweden; Smirnoff and Velcro Espanola, Spain; Beiersdorf, Germany, and Evelyn Woods Reading Dynamics (Australia). Its overseas losses included BMW, Italy; Cooks New Zealand Wine Co.; Peaudouce, Belgium; Lederhausen, N K Kristensson, Sweden; *Manager* magazine, Germany, and Lifesavers Ltd., Australia.

Billings breakdown: Newspapers 9%, magazines 20%, radio 9%, network tv 43%, spot tv 12%, outdoor 1%, business papers 5%, Yellow Pages 1%.

The agency has 1,230 employes in four U.S. offices; a year ago it had 1,252 in four U.S. offices.

Top execs: Louis T. Hagopian, chairman-ceo; Jerry J. Siano, vice-chairman, chief creative officer; David H. Means, Domenick F. Rossi Jr., Patrick J. Cunningham, George H. Eversman, Jerry N. Jordan, Thomas Maxey, V. Hugh Wells and Theodore M. Regan Jr., exec vps; Bartine A. Stoner Jr., chairman, western region; Robert P. Zabel, president, Midwest division.

Phone: (212) 708-5000.

BBDO International

Gross Income	1983	1982
U.S.	$199,000,0000	$155,000,000
International	90,000,000	86,250,000
Total*	$289,000,000	$238,250,000

*AA estimate

BBDO International, New York, is estimated by Advertising Age to have had gross income of $289,000,000 in 1983 on billings of $1,949,000,000. In 1982, its gross income was estimated at $238,250,000 on billings of $1,605,500,000.

The agency's 1983 U.S. volume of $1,349,000,000 consisted of $926,000,000 in media, $217,900,000 in materials and services and $205,100,000 in capitalized fees. Its 1982 U.S. volume of $1,050,000,000 consisted of $701,700,000 in media, $165,900,000 in materials and services and $182,900,000 in capitalized fees

The agency's 1983 overseas volume was estimated at $600,000,000 in 1983 and $555,000,000 in 1982.

Included in the agency's figures are the billings and gross income of the following U.S. subsidiaries:

- BBDO Direct, BDA/BBDO
- Blair Advertising
- GM DuBois Corp.
- Caravetta Allen Kimbrough/BBDO
- Frank J. Corbett Inc.
- Franklin Spier Inc.
- Lavey/Wolff/Swift
- MARCOA Direct
- Quinn & Johnson/BBDO
- RC Communications
- TELERx Marketing
- Tracy-Locke/BBDO
- Waring & LaRosa.

In 1983, the agency gained Apple Computer's international division, billing $1,500,000; Home Box Office, Hasbro Industries, Jacqulin Cochran Inc., KNBC-TV News; General Foods Ken-L Ration Tender Chunks, Menley & James Labs, New Vector Communications, and Xerox Educational Publications.

It lost American Cyanamid, R.J. Reynolds Tobacco's Camel cigarets, billing over $100,000,000 globally, to McCann-Erickson, Sealand Service, and Thom McAn Shoe Co. It did not report its overseas account gains or losses.

Billings breakdown: Newspapers 13%, magazines 16%, supplements 1%, radio 8%, network tv 29%, spot tv 22%, cable tv 1%, outdoor 1%, business papers 5%, direct mail 1%, other 3%.

The agency has 4,018 employes in 116 offices, including 2,896 in 35 U.S. offices. A year ago it had 3,583 employes in 114 offices, including 2,416 in 32 U.S. offices.

Top execs: Bruce Crawford, president-ceo, BBDO International; Allen Rosenshine, exec vp, BBDO International, and chairman-ceo, BBDO; Norm Campbell, exec vp, BBDO International, and chairman-ceo, Tracy-Locke/BBDO; Steve Kahler, exec vp, finance and administration, BBDO International, Willi Schalk, exec vp, BBDO International, and president, international group; William Wilson, exec vp-international group; Ray McGovern, secretary-general counsel; Jim Cannon, senior vp-controller, and Tom Watson, senior vp, BBDO International.

Backer & Spielvogel

Gross Income	1983	1982
U.S.	$45,000,000*	$37,245,000
Total*	$45,000,000	$37,245,000

*AA estimate

Backer & Spielvogel, New York, is estimated to have had gross income of $45,000,000 in 1983 on estimated billings of $300,000,000. In 1982, its gross income was estimated at $37,245,000 on estimated billings of $249,500,000.

The agency's 1983 volume included an estimated $275,000,000 in média and $15,000,000 in capitalized fees. Its 1982 volume is estimated to have included $240,000,000 in media and $9,500,000 in capitalized fees.

In 1983, the agency gained Campbell Soup Co.'s JuiceWorks, Miller Brewing's new Calgary imported beer, NCR Corp. (personal computers, corporate advertising), United States Data Processing Group, Paddington Corp. (Ma

Income tops $6.5 billion

(Continued from Page 1)

1983 billings of $2.76 billion Y&R's total in 1983 was $376.6 million on billings of $2.51 billion.

The agency rankings from first through sixth place remained unchanged last year from the previous year. In decending order, the five agencies below Y&R are Ted Bates Worldwide, gross income of $388 million on billings of $2.59 billion; J. Walter Thompson Co., $378.4 million on billings of $2.52 billion; Ogilvy & Mather, $345.8 million on billings of $2.36 billion; McCann-Erickson Worldwide, $4298.8 million on billings of $1.99 billion, and BBDO International, $289 million on billings of $1.95 billion. The only change in the top 10 rankings from 1982 was the move by Saatchi & Saatchi Compton from No. 8 into the No. 7 spot with gross income of $253.3 million on billings of $1.71 billion. Leo Burnett Co., in turn, dropped to No. 8 with gross income of $216.5 million on billings of $1.49 billion.

One of the largest jumps up the rankings ladder was made by Creamer Inc., through its merger with Humphrey Browning MacDougall. The newly named HBM/Creamer's 1983 gross income of $43.5 million on billings of $290 million pushed it up to No. 28. In last year's report, HBM had ranked No. 59, while Creamer was No. 32. Other big gainers were Bloom Cos., moving from No. 48 to No. 43 in the charts with gross income of $22.8 million; Ally & Gargano, now publicly held, from No. 49 to No. 45 on gross income of $22.2 million; Hill, Holliday, Connors, Cosmopulos, from No. 58 to No. 52 on gross income of $17.3 million; Tatham-Laird & Kudner, from No. 43 to No. 37 on gross income of $27 million, and Rumrill-Hoyt, from No. 76 to No. 54 on gross income of $16.2 million.

It should be noted that Rumrill-Hoyt's showing was aided by its merger with another Compton subsidiary last year, the former New York/Compton.

As for regional rankings battles, Dallas-based Bloom Cos., comprised of Bloom Advertising and several specialized operating units, barely edged out Tracey-Locke/BBDO, Dallas, for No. 43. Bloom had gross income of $22.81 million while Tracy-Locke had gross income $22.79 million.

In Chicago, eighth-ranked Leo Burnett Co.'s 2% drop in gross income to $216.5 million has narrowed the gap between it and Foote, Cone & Belding, No. 9 with $208.4 million. With NCK Organization's gross income shown in its figures next year, FCB will most likely pass Burnett to become Chicago's largest shop.

HBM/Creamer was one of two Boston agencies that jumped into the top category of rankings (income above $15 million). The other is Hill, Holliday, Conners, Cosmopulos, reporting gross income of $17,300,000 on billings of $115,000,000.

Internationally, the top 10 U.S. agencies had 1983 gross income of $1.23 billion, compared with gross income of $1.15 billion in 1982. International billings of the top 10 were $8.3 billion, compared with $7.71 billion in 1982. The top 10's world gross income was $2.99 billion on billings of $20.1 billion. In 1982, the top 10 had gross income of $2.68 billion on billings of $18.04 billion. Among the top 10 in 1983, the international contribution accounted for 41.2% of the world gross income and 41.3% of world billings total. Among the larger agencies, TBWA showed the largest percentage of gross income from overseas—78%. Another agency with strong international ties, SSC&B Lintas, ranked second with 71%. McCann-Erickson was third (68.1%), Saatchi & Saatchi/Compton fourth (56.2%) and J. Walter Thompson Co. fifth (49.8%).

This is the eighth year that AA has ranked agencies by gross income rather than billings. The change was made

(Continued on Page 6)

Agency of the Year: FMR

(Continued from Page 2)

McElligott says. "You can be powerful and memorable and offend a lot of people. I surely want our stuff to work. But I prefer to do it with charm, and a sense of integrity. I'd rather overestimate the public's intelligence than underestimate it."

In the few years during which the agency's payroll has grown from $34,000 to this year's projected $1.3 million, finding people who are equally committed to the agency's objectives has been the trick.

Agency staffers, all of whom are under 40 years old, communicate zeal for their work, and an almost religious admiration for the agency's leaders—primarily Fallon and McElligott. Says one art director: "Wherever I've worked before it was always a power struggle. It was not a question of what advertising was better, but whose will would prevail."

Here, they say, Mr. McElligott "will not compromise—he rejects and rejects work" until it meets his "incredibly high level of taste."

In recruiting to build the creative department, which numbers four art directors and five copywriters, "I look for myself," Mr. McElligott says simply. "There is a creative idealism that we all share.

"I look for people with a sense of mission. They have to share the joy. If they don't they'll hate it here," Mr. McElligott says.

U S West, the Western region communications company created after the AT&T breakup, is the agency's biggest client, billing in the $5 million range.

FMR was charged with creating an image for a company that never existed before, and making that image attractive to a target audience of securities analysts. The agency chose to personalize the company, using striking photographs of cowboys, and continuing the pioneering metaphor with photographs of Big Sky country under a headline "It is impossible to think small in a place this big."

According to Jack MacAllister, chief executive officer of U S West, it is not only the agency's creative work that is outstanding. "They really became a part of our organization," Mr. MacAllister says. "Fred Senn and his team personally spent time in our presentations to securities analysts, and then they followed up with the analysts to find out how they felt about our presentations.

"We went from no recognition as a company to the highest level of recognition among our target audience" he says.

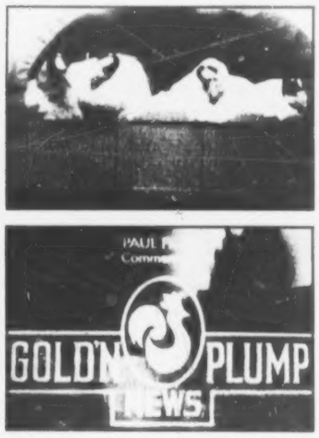
Although its batting average for account pitches is .653 or 17/26, Mr. Fallon says "the best pitch we've ever given we lost." That was for Midway Airlines, and ironically, the winner was one of the New York shops FMR emulates—Ally & Gargano.

But the agency has not yet given up on this one. The door was reopened by a call from the new advertising director, who said that "people are still talking about your presentation."

Mr. Fallon is acutely aware of two things that may hold his company back from landing bigger and bigger pieces of business: It has no clout for network tv buys, and it has no international marketing capabilities.

Still, Mr. McElligott can envision the day when billings could reach the $75 million-to-$100 million range. He admits, however, that it may be "difficult to keep the focus" at that size. "And I won't be here if it goes away."

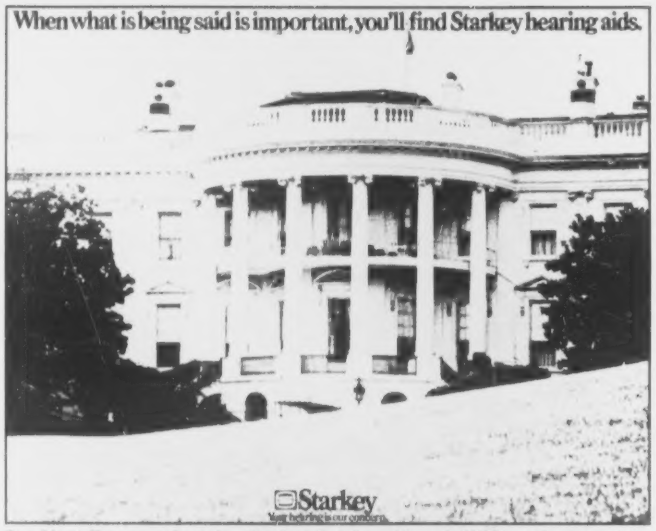
He calls upon a quote from Chiat/Day chief Jay Chiat to describe his point of view: "I want to see how big we can get before we get bad."#



Fallon uses newsreel format in b&w tv spots to promote Gold'n Plump chickens, which "liberate" the public from "ordinary chicken."

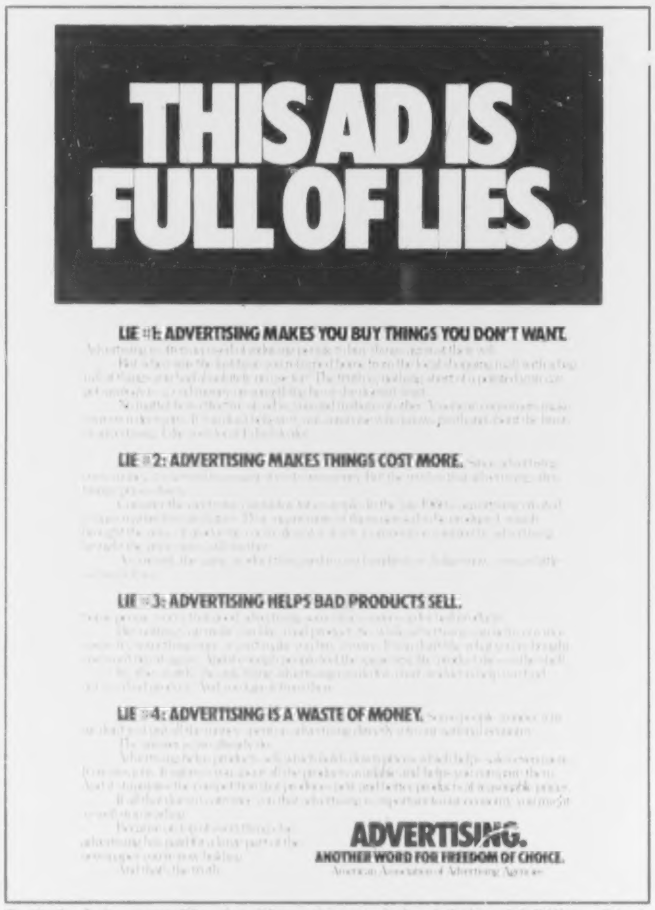
NO MORE
TAX
INCREASES.

For client Jobs for Minnesotans, FMR took candy from a baby, saying that's the way state legislators look on tax increases. The baby cried on cue.



When what is being said is important, you'll find Starkey hearing aids.
Starkey
Your hearing is our concern.

President Reagan selected a Starkey hearing aid, and FMR made note of its client's prestigeous sale with this spread ad in the newsweekly genre.



THIS AD IS FULL OF LIES.

LIE #1: ADVERTISING MAKES YOU BUY THINGS YOU DON'T WANT.

LIE #2: ADVERTISING MAKES THINGS COST MORE.

LIE #3: ADVERTISING HELPS BAD PRODUCTS SELL.

LIE #4: ADVERTISING IS A WASTE OF MONEY.

ADVERTISING.
ANOTHER WORD FOR FREEDOM OF CHOICE.
American Association of Advertising Agencies

Typical of the compelling headlings characteristic of Fallon McElligott Rice's work is this ad, part of the new campaign on behalf of advertising sponsored by the American Assn. of Advertising Agencies. Tom McElligott, a member of the association's committee on the image of advertising, convinced members that an ad campaign was needed, and returned to a subsequent meeting with a full-blown campaign. It was approved unanimously by the Four A's board, which presented the campaign to its members at the association's annual meeting earlier this month. Another ad in the public service campaign, with illustrations of Billy beer, an Edsel and French's Doggie Donuts, carries the headline: "No amount of advertising can make you buy a product you don't want."

Criteria for Agency of the Year

Advertising Age's annual selection of Agency of the Year is based on evaluations, by a committee of the publication's editors, of the creative product of the nominated agencies.

The creative product, rather than business success or number of accounts gained, is given primary attention in order that agencies of all sizes and types can be considered for the annual award.

The creative product can include copy, creative strategies, merchandising, media planning, research and related factors.

An agency's business success and growth throughout the year is considered only to the extent that it is reflective of creative excellence.

Nominations for Agency of the Year are submitted to the editors by editorial staff members in all Ad Age bureaus and offices.

While primary emphasis is put on nominations from members of the AA staff, careful consideration also is given to the candidacies advanced by agencies themselves.

Staff nominations result from the monitoring of the advertising and agency business throughout the previous year in the course of covering the news.

This year's issue includes brief portfolios of ads by other nominated agencies that were considered in the final round of judging.

Although these finalists, as well as many others considered during the judging, created outstanding advertising, Fallon McElligott Rice won the final nod for the freshness of creative approach exhibited in its broadcast and print advertising.

The three other agencies considered in the final judging are listed below in alphabetical order with the page on which their portfolios appear:

Burrell Advertising. . .Page 26
Needham, Harper & Steers. . .Page 42
Young & Rubicam. . .Page 54

Past years' winners

Previous winners of the Advertising Age Agency of the Year award:

1973—Cunningham & Walsh
1974—Scali, McCabe, Sloves
1975—Leo Burnett Co.
1976—DKG Advertising
1977—Needham, Harper & Steers
1978—N W Ayer and Young & Rubicam
1979—Henderson Advertising
1980—Chiat/Day
1981—Ally & Gargano
1982—Ogilvy & Mather

Creativity abroad: Saatchi & Saatchi

Among the reels that garnered a lot of applause during Advertising Age's review of Agency of the Year candidates was one from London-based Saatchi & Saatchi.

The competition currently is restricted to U.S. agencies, but AA's international editors nominated the Saatchis because of the agency's humorous, often hilarious, creative approach.

(Saatchi & Saatchi's U.S. presence is via Saatchi & Saatchi Compton Worldwide, New York, but the reel sent for review was from Saatchi's U.K. operation.)

Most of the Saatchi spots—with the exception of the British Airways series—were new to the selection team. This, perhaps, made the humorous and irreverent commercials all the more invigorating.

The popularity of the Saatchi work has led to discussion by Ad Age editors about selecting an international agency of the year in the future, calling upon the expertise of AA's correspondents abroad.

Reader comments on this proposal are invited.#

New KP Cheese Dips

UNIPART

Among the humorous ads produced by the U.K.'s Saatchi & Saatchi were tv spots for Typhoo tea (featuring singing mules) and KP cheese dips (left). Print ad for Unipart features an unusual headline to promote spark plugs.

Profiles of 3 major U.S. agency groups

The accompanying table shows how leading U.S. agencies and agency groups compare in terms of income and billings.

Agency groups include holding companies that do not qualify for listing as agencies, but whose subsidiaries are principally in the advertising agency business. It should be noted that agencies which own other agencies can report combined income and billings data for the ADVERTISING AGE profiles, but holding companies that are not themselves agencies are not ranked in the listings.

As the table shows, two of the groups are larger than any agency.

Profiles of three major U.S. agency groups follow:

Interpublic Group

Interpublic Group of Cos., New York, the holding company for McCann-Erickson and other major agencies, had total gross income of $620,382,000 in 1983 on revenues of $4,137,948,000.

Interpublic's gross income in 1982 was $541,707,000 on billings of $3,612,186,000. (If the company's 1982 figures were restated using current exchange rates, its gross income for that year would be $516,878,000 on billings of $3,447,576,000).

Among its agencies, McCann-Erickson Worldwide (which includes March Direct Marketing) reported gross income of $298,816,000 on billings of $1,993,101,000 last year. Marschalk Campbell-Ewald Worldwide (comprised of Marschalk Co., Campbell-Ewald and Clinton E. Frank Inc.) reported 1983 gross income of $132,959,000 on billings of $886,837,000.

SSC&B:Lintas Worldwide had gross income of $175,561,000 in 1983 on billings of $1,177,945,000. Dailey & Associates had 1983 gross income of $22,515,000 on billings of $143,505,000.

Philip H. Geier Jr. is chairman and chief executive officer of Interpublic. Other top execs include: J. Donald McNamara, president; Peter H. Dailey, vice-chairman; Eugene P. Beard and Donald M. Casey, exec vps.

How agency groups, top agencies compare

(Income figures in millions)

Rank	1983 gross income	1983 billings

19. Mickelberry Corp.*	95.4	0.64 billion

**Agency group*
†Subsidiary of JWT Group *††Subsidiary of Interpublic*

JWT Group

JWT Group, New York, a holding company whose principal subsidiary is J. Walter Thompson Co., reported gross income of $479,200,000 on billings of $3,196,300,000 for 1983. In 1982 JWT Group had gross income of $433,500,000 on revenues of $2,891,400,000.

JWT Group's principal subsidiary, J. Walter Thompson Co., reported gross income of $378,400,000 last year. Included in the agency's figure are income from Brouillard Communications, which specializes in corporate communications, Thompson Recruitment, and J. Walter Thompson USA, the principal agency organization in the U.S.

Subsidiaries of J. Walter Thompson USA include Hispanic Advertising, Deltakos USA (ethical drug advertising), Soskin/Thompson Associates (direct marketing and sales promotion) and The Entertainment Group.

Other parts of JWT Group include Lord, Geller, Federico, Einsten; Hill & Knowlton, a leading pr agency; E-A International; Survival Anglia, and the research company Simmons Market Research Bureau.

Don Johnston is chairman, chief executive officer and chairman of the executive committee of JWT Group; he is also chairman and chief executive officer of J. Walter Thompson Co. Hugh P. Connell is exec vp-secretary of JWT Group.

Mickelberry Corp.

Mickelberry Corp., New York, formerly a diversified company that marketed meat and other products, now is primarily a holding company for advertising agencies. In 1983 the combined gross income from its agencies was $95,360,000 on combined billings of $643,400,000.

Cunningham & Walsh is the largest of the Mickelberry agencies. Last year it reported worldwide income of $52,700,000; its U.S. billings totaled $366,000,000.

Nadler & Larimer's gross income in 1893 was $12,360,000, with U.S. billings of $82,400,000.

The other Mickelberry shop, Laurence, Charles & Free, had 1983 gross income of $29,300,000 and U.S. billings of $195,000,000.

James Marlas is president and chief executive officer of Mickelberry Corp.#

Income

(Continued from Page 3)

because most agencies recognize gross income as a more meaningful measurement. ADVERTISING AGE this year rejected income reports of 50 agencies for lack of information or supplying obviously erroneous data. In addition, the U.S. Postal Service returned over 100 questionnaires stamped "Moved, left no address" or "Return to sender."#

425 Advertising Agencies - all at the same address.

The address, of course, is the Advertising Agency Register. The agencies are the cream of U.S. Advertising.

For your convenience agencies have condensed themselves into video presentations lasting just ten minutes, each with supporting print portfolios and current fact books.

Just give AAR a list of your requirements and we will produce a full brief of agencies meeting your specifications. From this you then select the agencies you wish to view.

Simply spend a few hours in the privacy of our offices and you will arrive at a short list of agencies to visit personally. And nobody knows—our confidentiality is our success.

After all, the reason for your visiting us is the same as the one for the agencies being here. To improve business.

Top execs: Carl W. Nichols, chairman; Anthony C. Chevins, president; Horace E. Malfa, Warren E. Albright, Frank P. McDonald and Arthur R. Meranus, exec vps.

Phone: (212) 683-4900.

Dailey International Group

Gross Income	1983	1982
U.S.*	$17,000,000	$19,273,150
International*	4,515,000	3,520,000
Total**	$21,515,000	$22,793,150

*AA estimates

**Reported by Interpublic but not broken out.

Dailey International Group, Los Angeles, had estimated gross income of $21,515,000 in 1983 on billings of $143,505,000. In 1982, it had estimated gross income of $22,793,150 on billings of $152,587,671.

WHO REACHES THE NATION'S BUSINESS MORE THAN INC. & VENTURE COMBINED?

It's *Nation's Business* with a circulation base of 850,000 versus *Inc.* and *Venture* with a combined circulation of 775,000.* If that surprises you, it's time you found out more about *Nation's Business*, and more about the *Nation's Business* reader.

For example, 559,000 *Nation's Business* subscribers are in top management running small to mid-sized businesses. That's more top management subscribers than *Inc.* has total circulation. And the average income of the *Nation's Business* reader is $76,000.

You'll pay a CPM that's less than half the cost of any other business magazine to reach this influential market. So, to reach them, reach for the phone and call your *Nation's Business* representative, or Brett Perrine, Advertising Director, at (212) 370-1440.

NOBODY REACHES THE NATION'S BUSINESS LIKE NATION'S BUSINESS.

**Inc.* rate base 500,000 *Venture* rate base 275,000

Nation's Business
IDEAS?
THE MONEY IS

Agencies with gross income of more than $15 million

Figures shown in this table (000,000 omitted from dollar totals) and in the tables on Page 1 represent the best information available to ADVERTISING AGE and are constructed either from answers to questionnaires (sometimes revised on the basis of other information) or on the best data available. In some cases, income and billings figures are also included in the parent company totals. All material on this page and throughout the issue are Copyright 1984 by Crain Communications Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited. Daggers (‡) indicate that income and billings of the agency are included in the consolidated returns of its parent shown elsewhere on the chart.

Keller-Crescent Co.

Gross Income	1983	1982
U.S.	$19,189,000	$16,841,000
Total	$19,189,000	$16,841,000

Keller-Crescent Co., Evansville, Ind., reported gross income of $19,189,000 in 1983 on billings of $96,124,000. In 1982, it reported gross income of $16,841,000 on billings of $85,669,000.

The agency's 1983 volume consisted of $17,313,000 in media, $33,012,000 in materials and services and $45,799,000 in capitalized fees. Its 1982 U.S. volume consisted of $11,109,000 in media, $27,243,000 in materials and services and $47,317,000 in capitalized fees.

In 1983, the agency gained Black Beauty Resources, Kimco Auto Products, Luber-finer, Master Parts division, Saft Batteries, Illinois Bronze Paint Co., L. Perrigo Co., Arkla Equipment, Wilson-Fiberfil International, Lee Filter division, Caltex Petroleum, El Chico Corp., Highland Park National Bank, Suburban American Co., Tandy Corp./Radio Shack, Kingwood Systems, Wilmes Window Mfg. and Godfather's Pizza (six cities).

It lost American Uniform Co., Blairex Labs, Hill Rom Co., Hollywood Brands, Neapco and Safeguard Engine Parts.

Billings breakdown: Newspapers

Agency Q&A

Q: Will more agencies go public this year?

Answer: I don't believe our going public late last year has caused a rush of phone calls by ad agencies to the investment banking community. However, it would seem reasonable to expect that a few agencies may seriously investigate the possibility in 1984.

Going public is complicated and timing is crucial. There are many factors that determine whether an agency should go public and for the following reasons I feel very few, if any, will make it a reality this year.

Gargano

1. Emerging from the worst recession period since the decade of the Great Depression, many agencies are confronting difficult times. Having a consistent growth and earnings record is essential and that aspect alone could be the main obstacle for many agencies.

2. The new issue market has been sporadic. If the new issue market is depressed, regardless of an agency's past performance, it isn't likely to go public unless the market turns around. And the market, currently, is performing poorly.

3. Agency size and diversity of clients also are key. An agency must be large enough to attract investors or, if its revenues are too small (regardless of impressive growth on a smaller base), it will not generate institutional and retail attention.

4. Can the agency management demonstrate its ability to potential investors that its future is still ahead and not behind it? Another key factor.

In summary, if you eliminate the number of agencies and their subsidiaries that are currently public, eliminate those agencies that are too small, eliminate those agencies that haven't performed well financially, and eliminate the management of agencies that don't wish to answer to a broad constituency of shareholders, it would appear to me that the number of agencies that remain as possibilities to go public has got to be very, very few, and I doubt if any agency will do it this year.

Amil Gargano

PORTFOLIO: Agency of the Year candidate

Burrell Advertising

Burrell Advertising, Chicago, is a consistent winner of awards for its advertising, which is primarily directed to black consumers.

The $26 million agency handles black consumer marketing for blue chip clients such as Coca-Cola Co., McDonald's Corp. and Jos. Garneau Co., a division of Brown-Forman Distillers Corp.

During the last year, Burrell also became an agency of record for Procter & Gamble and Ford Motor Co. for minority-oriented advertising. In addition, Burrell is the primary agency for Johnson Products Co., Chicago, which markets health and beauty aids for black men and women.

Its creative reputation is built on such quality tv advertising as the Coca-Cola spot. The commercial—featuring the Grambling College marching band—is energetic, sparklingly executed, and targeted to its audience.

The agency also excels at the heartwarming approach, as evidenced by its work for Ford Motor Co. Pride of ownership is portrayed in a spot where a successful young man drives his grandmother to church. Their dialogue draws the viewer a realistic picture when the grandmother says, "Drop me off right here so Mabel can see."

Burrell's flair with print advertising is demonstrated by its sophisticated campaign for Martell cognac. "I assume you drink Martell," the only copy, is against a background of stunningly photographed models.

Phone: (212) 661-5491.

Marschalk Campbell-Ewald

Gross Income	1983	1982
U.S.	$ 99,523,000	$ 81,633,000
International	33,436,000	37,354,000
Total	$132,959,000	$118,987,000

Marschalk Campbell-Ewald Worldwide, New York, including Clinton E. Frank Inc., Chicago, reported gross income of $132,959,000 in 1983 on billings of $886,837,000. In 1982, it reported gross income of $118,987,000 on billings of $793,642,000.

The 1982 figures were compiled using the then current foreign exchange rates. If the 1982 figures were restated using current exchange rates, Marschalk Campbell-Ewald's 1982 gross income would have been $113,021,000 on billings of $753,850,000.

Marschalk Campbell-Ewald is a member of the Interpublic Group of Cos., whose other units include McCann-Erickson Worldwide, SSC&B:Lintas Worldwide and Dailey International Group.

Marschalk Campbell-Ewald's U.S. volume was $663,818,000 in 1983 and $544,492,000 in 1982. Its overseas volume was $223,019,000 in 1983 and $249,150,000 in 1982 (or $209,358,000 if restated using current exchange rates).

Overseas, the agency's account gains included: McEwans retail catalogs-Australia; Societe Generale de Banque, Unilever and Philips for new assignments-Belgium; Borden, Temana, Philips, Johnson & Johnson, Ralston Purina and Visagis-Brazil; Gilbey and Ragold-Canada; Meule d'Or, Queroy/Ideal Standard and Sopexa-France; Underberg, Nestle/Allgauer, Henkel Bausparkasse Schwabish Hall, Hewlett Packard-Germany; S. Margherita and Cementir-Italy; Heublein, Diners Club, Bristol-Myers-Mexico; Sherry Institute of Spain, Cointreau, Henkel-Netherlands; General Motors, G.M. Dealers Assn., Spur National Steakhouse Chain-South Africa; L'Oreal, Dragon Data-United Kingdom.

Overseas, it lost: Red Lobster Foods, EOY Pty. Ltd.-Australia; Anhyp, Electrolux Martin-Belgium; Morumbia Shopping Centre-Brazil; International Wool Secretariat-Germany; Habitema-Italy; Lance and High Life-Mexico; Citizen's Watches-United Kingdom.

Campbell-Ewald

The Warren, Mich.-based agency had 1983 total gross income of $96,932,000, with $63,496,000 from the U.S. and $33,436,000 from abroad. The agency's volume was $646,537,000, including $423,518,000 in the U.S. and $223,019,000 from abroad.

Its 1982 total gross income was $88,108,000, including $50,754,000 in the U.S. and $37,354,000 from abroad. Total billings were $587,679,000, including $338,529,000 in the U.S. and $249,160,000 from abroad. (Using current exchange rates, 1982 figures would be $31,388,000 in gross income on volume of $209,358,000.)

Campbell-Ewald last year gained Howard Johnson's. The agency lost no accounts.

Marschalk Co.

The New York-based agency had 1983 gross income of $32,129,000 on billings of $214,300,000. Its 1982 gross income was $25,979,000 on billings of $173,280,000.

The agency gained Chattem Inc. for new assignments, Heublein, Erewhon food products, Norcliff-Thayer's Revlon vitamins and antacids, Coopercare's Aveeno Medicated Soap, Oral B toothbrush and Zendium toothpaste, Gillette's Toni Home Perm, Del Monte's Chun King.

It lost Richman Bros. men's clothing and Cone Mills.

Clinton E. Frank Inc.

The Chicago-based agency had 1983 gross income of $3,898,000 on billings of $26,000,000. Its 1982 gross income was $4,900,000 on billings of $32,683,000.

The agency gained Popeye's Famous Fried Chicken, Rust-Oleum and NEC-Tokyo computers.

It lost Stokely-Van Camp, International Minerals & Chemical, Wendy's and Nalco Chemical Co.

***

Marschalk Campbell-Ewald did not supply a billings breakdown. The agency has 1,851 employes; a year ago it had 1,964. Of that total C-E has 706 in the U.S. and 615 overseas; Marschalk, 459, and Clinton E. Frank Inc., 615.

Marschalk Campbell-Ewald Worldwide top execs: Thomas B. Adams, chairman; Richard D. O'Connor, vice-chairman, ceo; Lester A. Delano, president-chief operating officer; Paul L. John, vice-chairman, ceo/Campbell-Ewald; Michael S. Lesser, chairman-ceo/Marschalk Co.; John H. Nichols, vice-chairman, ceo/Clinton E. Frank Inc; Robert P. Roselle, chief financial officer.

Phone: (212) 489-6200.

Marsteller Inc.

Gross Income	1983	1982
U.S.	$73,066,000	$58,593,000
International	26,494,000	22,589,000
Total	$99,560,000	$81,182,000

Marsteller Inc., New York, a subsidiary of Young & Rubicam, reported gross income of $99,560,000 in 1983 on billings of $664,065,000. In 1982, it reported gross income of $81,182,000 on billings of $541,484,000.

The agency's U.S. volume was $487,350,000 in 1983 and $390,815,000 in 1982. Those figures were not broken down. Its overseas volume was $176,715,000 in 1983 and $150,669,000 in 1982. (If 1983 exchange rates were applied to 1982 figures, Marsteller would have gross income of $79,386,000 on billings of $529,504,000.)

In 1983, the agency's U.S. account gains included Oscar Mayer Foodservice, Crown, Sanna Inc., Taylor Foods (Mr. and Mrs. "T"), Blue Cross and Blue Shield, Combined Network Inc. (Allnet), *Chicago Tribune*, R.T. French Co.'s household products division, Temple Inland (corporate), Alberto-Culver, Dow Corning and Beatrice Foods (corporate, Culligan USA, Stiffel Co., Samsonite Furniture Co., LouverDrape, DelMar Window Coverings, Chicago Speciality Mfg., specialty apparel and agri-products groups, Tropi aseptic packaged fruit drinks, British American Air, American Cable Connection, Milburn Sterling, American Home Alert, Phelps Dodge Zeolites, Telecrafter Corp., Fitch-Wyckoff, MacRobertson Ltd., Roffler Industries, Fred S. James Co., Parke-Davis, Grumman Recruiting, McNeil Pharmaceutical (new product) and Arthur Young Co.

It lost FMC Ag Chemical, Daisy, PGA Golf, IDS, IU International and MAI/Basic Four.

It did not indicate overseas account gains or losses.

The agency did not supply a billings breakdown.

The agency has 1,883 employes including 1,275 in the U.S. A year ago it had 1,648 employes, including 1,104 in the U.S.

Top execs: Richard C. Christain, chairman; Louis A. Magnani, president; J. Thomas Sharp, president corporate communications group; Bert Rosenberg, exec vp; Gerry Linda, Michael H. Popernik, senior vps; Reginald C. Bird, president-Marsteller International.

Nationwide Advertising Service

Gross Income	1983*	1982
U.S.	$18,500,000	$18,679,167
International	1,500,000	1,455,513
Total	$20,000,000	$20,134,680

*AA estimate

Nationwide Advertising Service, Cleveland, an agency specializing in recruitment advertising, is estimated by ADVERTISING AGE to have had gross income of $20,000,000 in 1983 on estimated billings of $67,000,000. In 1982, it reported gross income of $20,134,680 on billings of $68,303,032.

The agency did not break out volume in 1983. In 1982, Nationwide had U.S. volume of $63,329,016 and overseas volume of $4,974,016, all in media.

The agency last year reported that it operates on a cash basis accounting system which causes gross income to be higher for a given year due to collections of accounts receivable from previous years. However, the agency's present management execs failed to respond to this year's AA survey despite repeated requests.

Well-known Cleveland sports executive and Nationwide's former president, Theodore J. Stepien, sold the agency last year to George and Gordon Gund. Mr. Stepien was succeeded by Thomas Richey, former exec vp.

Billings breakdown: Newspapers 95%, magazines 3%; other 2%. In 1982, the agency had 270 employes in 34 offices, including 245 in 28 U.S. offices.

Top exec: Thomas Richey, president.

Reynolds, Hathaway, Johnson & Johnson, Merrill Lynch, Shulton, Club Med and Shaeffer pens.

Billings breakdown: Newspapers

Agency Q&A

Q: Will clients ease their stance on conflicting accounts this year?

Answer: I seriously doubt that major clients will ease their stance regarding the issue of product or client conflict. I feel this is extremely unfortunate since when one views other service businesses, such as accounting, law, investment banking or commercial banking you find that rather than being seen as a conflict a reasonable concentration on an industry basis is considered a plus. Additionally, when looked at, it is not as though those service firms are dealing with noncompetitive information in servicing their clients. They clearly are dealing in highly sensitive areas. But they have learned how to deal among themselves with matters that could impinge on client confidentiality.

Austrian

As mergers and acquisitions proliferate, and as the larger agencies continue to grow and as clients themselves continue to expand via acquisitions into nontradtional areas for themselves, the conflict issue will continue to increase rather than decline. Clearly at some point if the major advertisers want to take advantage of the creative and marketing skills that are available at the larger multinational agencies, an entirely new and different thinking and evaluation of the conflict issue must occur.

Conflict really lies in the eyes of the client management. They will have to learn to believe that an agency can deal with these sensitive issues and treat confidential matters professionally. In addition, they will have to become comfortable with the fact that what was a good idea for a competitor may not necessarily be a good idea for them since their image and products may be typically and dramatically different.

PORTFOLIO: Agency of the Year candidate

Young & Rubicam

Young & Rubicam's advertising for 1983 stood out from the crowd primarily because of its production values, in the estimation of Advertising Age editors.

It appears that no matter what the campaign, the execution was handled impeccably.

Of course, Y&R, with 1983 billings of $1.828 billion in the U.S., works for major clients with giant production budgets. For example, one of the recent Dr Pepper commercials boasts a cast of hundreds, and sets that recreate a world of centuries past.

A 60-second commercial for New York Telephone Co. depicts a couple through 50 years of their relationship—from their courtship in the 1930s up through the present. Costumes, settings and props all work together to convey the message that NYTEL has been providing service for the last 100 years.

In introducing Kodak Trimprint instant film, the agency used a technique called "motion control" to take the Trimprint on a journey through space.

Even in the most straightforward commercial on its reel—opera star Leontyne Price's musical appeal for the United Negro College Fund—it was the starkly simple presentation that made the agency's commercial dramatic.

It lost Lunkenheimer, ASF Sales, Doehler-Jarvis division of NL Industries.

Billings breakdown: Newspapers 5%, magazines 3%, radio 16%, network

to add The Chronicle to your broadcast buy.

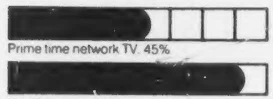
Houston cable penetration now stands at 40%. And among adults with household incomes over $35,000, the ones you want to reach most, 48% subscribe to cable.

What you get is a TV picture so hopelessly fragmented, it's virtually impossible to cover Houston with broadcast.

Solution? To increase your reach and frequency, make The Chronicle the primary part of your Houston media plan. As the largest newspaper in the Southwest, Chronicle penetration among adults with household income of $35,000+ is unmatched.

For example, a one week, $25,000 prime time local network spot TV schedule in Houston delivers only 45% of adults living in $35,000+ households. An equal investment in The Chronicle delivers 64% of these affluent adults*.

One week $25,000 media buy
Adults $35,000+ households



That's 142 extra GRP's. At no extra cost.

For a detailed media comparison, call our Research Manager collect, 713/220-7401. Under the circumstances, it's the only reasonable thing to do.

Houston Chronicle
The Primary Advertising Investment

Included in the agency's figures are

Agency Q&A

Q: What is the future for middle-size agencies?

Answer: No one in this business seriously doubts the ability of today's giant agencies to become tomorrow's mega-agencies. Likewise, no matter how gargantuan the giants become, there will always be small agencies doing business in predominately local ponds. But what about the agency in the middle? As the giants gobble up accounts (and other agencies) can the mid-sized agency find a middle ground?

McKinney

It's a fair question, considering the peculiarly American notion that bigger and bigger means better and better. Just look at a newspaper: GM and Toyota plan a joint venture, U.S. Steel buys national Steel, Texaco swallows Getty.

But advertising isn't like those businesses. Especially when your goal is to create exceptional advertising. Let's face it, exceptional advertising doesn't come from achieving economies of scale. No robot will ever make you cry, or try, or buy. Great advertising just doesn't roll off assembly lines.

The trouble with giant agencies is that they inevitably become a mirror image of the giant advertisers they serve. In the agency that means the emergence of a creative review board, hard-packed layers of approval, and a mentality necessarily dedicated to "play-it-safe." The best work doesn't survive.

When creativity and craftsmanship are the essential ingredients, it's the individual or a small group of individuals that has always done the best job. It was true in Michelangelo's time. And it will be true five hundred years from now.

In the agency business there is one place where that realization is still alive and well. The mid-sized agency. The best of them have the needed talent, the ever-present will to take risks and a structure that sees to it that the best work gets out the door.

Will they survive? They will as long as they provide an alternative to the kind of advertising offered by the giants.

Charles C. McKinney
Chairman, McKinney Silver & Rockett
Raleigh, N.C.

Gross income of $5,000,000 to $15,000,000

those of subsidiary KPR Infor/Media Corp.

PORTFOLIO: Agency of the Year candidate

Needham, Harper & Steers

Needham, Harper & Steers, with 1983 billings of $632 million, continues to "break the pattern," in a creative sense, finding unique solutions to consistent advertising problems.

From the Chicago office comes the continuing campaign for Anheuser-Busch's Budweiser Light. Last year brought several new commercials, including a spot about boxers and another featuring figure skaters. Delving deep inside the minds of the athletes, the commercials work as short stories depicting the trials and triumphs of individuals striving toward their goals. The stories are symbolic of the campaign's theme line, "Bring out your best."

For Xerox Corp.'s business machines, Needham's New York office uses infants as a metaphor for "infant copiers." Placing an actor in a hospital nursery, the spot illustrates how copiers continue to grow in sophistication. Using straightforward writing and delivery, and the right sprinkling of wit, the commercial attempts to humanize Xerox and its products. According to the agency, tracking studies show marked perception changes in the attitudes of the target audience.

On the West Coast, NH&S continually has created outstanding advertising for American Honda Motor Co. In addition to dramatic tv commercials, one magazine ad stands out. "The yacht is optional," attracted great attention because of its unusual composition, which minimized the auto for maximum effectiveness.

And in response to Chicago-generated "Big Boys" campaign for General Mills' Wheaties, letters from consumers poured in to the client praising the "hunks" in the campaign. Rugged looking male stars, combined with a socko musical theme and a drop of milk clinging to the lip of a burly baseball player translate into powerful and popular advertising.

Agency Q&A

Q: What new creative techniques will emerge this year?

Answer: I'm assuming you're referring to the broadcast medium rather than print. In print there are no new formula techniques, just outstanding creativity, which seems to set the good apart from the bad.

Olshever

As far as broadcast is concerned, specifically television, I suppose we'll see more computer graphics, continued use of highly stylized visuals, extreme close-ups of food, and lots of music. I wouldn't be surprised if some soft drink company doesn't come up with a concept built around the "break dancing" concept.

That's one of the problems with much of television advertising today. Too much technique—not enough concept. Used to be that it wouldn't enter our minds to try to prognosticate technique.

I know this sounds like a broken record but in the '60s we asked about ideas. The mermaid on the rock eating oatmeal for Quaker Oats, and the Volkswagen commercial—"How does the man who drives the snow plow get to the snow plow?"—were creative solutions based on ideas.

Amazing how those concept-driven commercials still stay with us. Wouldn't it be nice if the creative technique of 1984 would be back to basics?

In 1982, volume consisted of $945,000 in media, $369,000 in materials and services and

Agency Q&A

Q: What is the financial outlook for advertising agencies this year?

Answer: The outlook for agencies in general is excellent for 1984. The economic recovery continues quite strong. It should be a close election, but I see the reelection of President Reagan and the party of business. All signs indicate that advertisers will be increasing expenditures, stepping up new product introductions. Media costs are going up, too, and, as yet, no group has marshalled strengths to call a halt to them. It will be another big year for network tv, especially with the presidential election and the Olympics. Agencies and advertisers will experiment more substantially with the new electronic media, even during their coming shakeout. Special interest magazines and departmentalized newspaper sections should do well.

Hagopian

All this bodes well for agencies.

The agencies that beat the averages will do unusually well in this kind of climate. These will be the agencies that can:

1. Keep rolling to get new business.
2. Manage their income from overseas most capably, in an effort to take advantage of the vicissitudes of the dollar in various parts of the world.
3. Resist the temptations to spend out of control just because things look good.
4. Manage their cash and cash flow with prudent investments in equity markets.
5. Keep and get the best possible people. . .and do outstanding advertising.

Louis T. Hagopian
Chairman, N W Ayer
New York

Coming April 23: Foreign agency profile reports

Advertising Age's annual report on income and billings of advertising agencies outside the U.S. will be presented in the April 23 issue. Last year's report on foreign agencies included data on more than 800 agencies in 74 countries with combined gross income of $4.2 billion.

In this issue, the same rate of exchange will be applied to foreign income and billings of U.S. agencies for both 1983 and 1982, resulting in some restating of 1982 data.

Agency Q&A

Q: Will international growth by agencies in the U.S. accelerate this year?

Answer: In local currencies, yes. In dollars, perhaps. Much depends on the strength of the dollar as the year progresses.

Right now, on a local market basis, I see 1984 as a good growth year over-all for international advertising. By that I mean growth of 5% or more, after adjustment for inflation. Naturally, growth will vary by market, but conditions are finally right for healthy increases in ad spending.

Schalk

Remember, the economic recovery in the U.S. has been under way for over a year and the ripple effect on the rest of the world has been surprisingly slow. We saw some good signs in the more developed economies at the end of 1983, which makes me optimistic that a prolonged recovery is finally spreading to other markets.

Just how much U.S.-based agencies will benefit from this growth is largely a matter of exchange rates. It will be difficult for these agencies to show much headway if the dollar stays as strong as it's been in the past year. As an example, BBDO's international billings in 1983 would have been more than 20% higher than we reported had exchange rates remained at the prior year's level. Whether the dollar will stay that strong is a prediction better left to the bankers.

Again, I think 1984 will be a good year for the agency business outside the U.S. Whether it will translate into significant gains in dollars is out of our control.

Willi Schalk
President, International Group
BBDO International
New York

Agency Q&A

Q: Will agency mergers increase this year?

Answer: Last year was a pretty big year for agency mergers. I expect this trend to continue in 1984 and beyond.

I think there are three fundamental reasons for this.

The first reason relates to the powerful business trend toward globalization of markets. As more and more companies operate worldwide they look for the extra resources and leverage that come from an agency with matching worldwide capabilities. This trend causes larger companies to seek agencies around the world to complete and strengthen their networks. It also causes many good local agencies to seek alignment to better serve some of the largest and best clients in their area.

Brown

The second point is somewhat related. It has to do with the tendency now to have a total communications perspective. That is, to try to leverage total marketing efforts by integrating advertising, direct marketing, promotion, public relations, etc. This trend creates a natural attraction for a number of kinds of agency to want to come together.

Third is what I would call the natural maturing of a dynamic industry. Advertising will continue to be dynamic in that many excellent new agencies will be formed; others will grow into outstanding local, regional or national operations. But at some point, as owners get ready to retire or as their particular business changes, there are pressures to sell to larger agencies. I think our business has reached a point where many agencies built up after World War II have now reached this point of maturity. Merging is an important option.

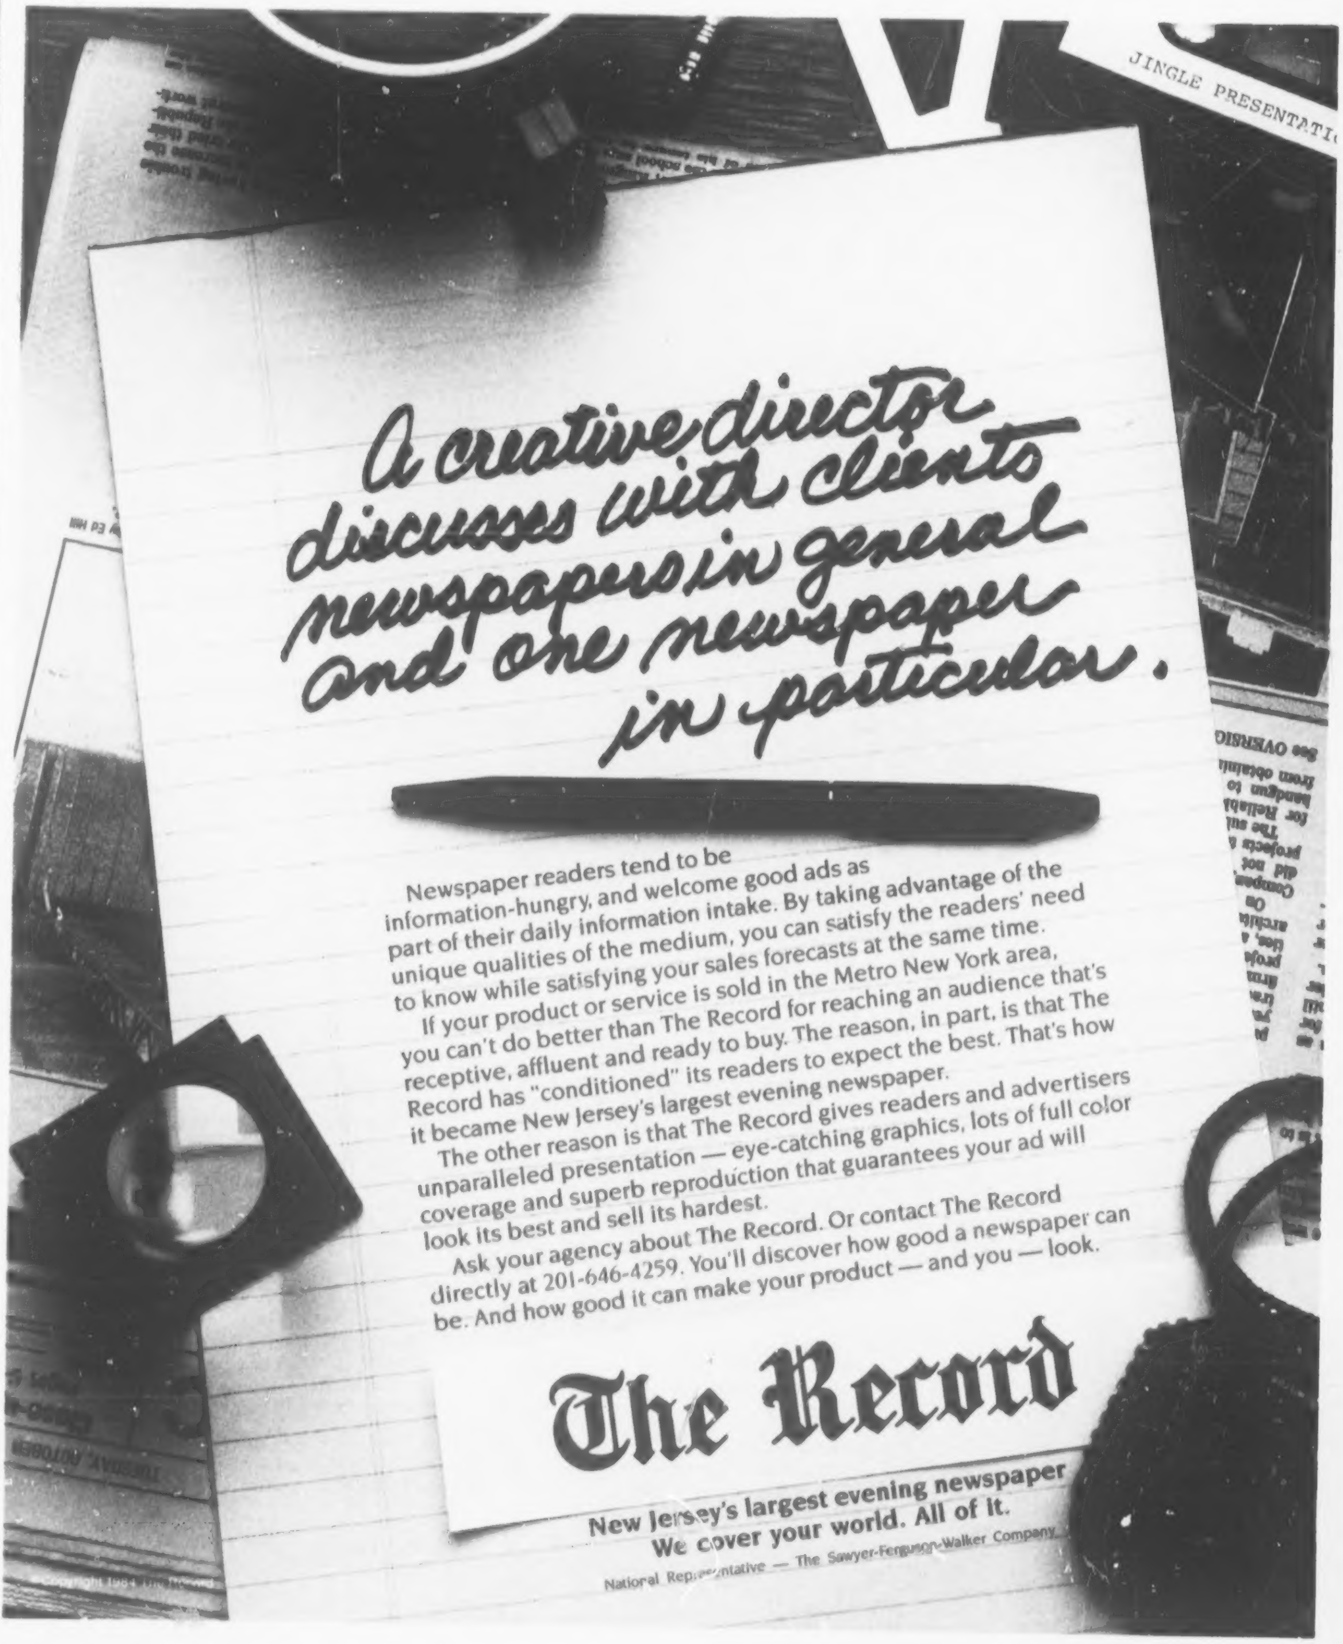
Helmsley-Spear, Inc.



A creative director discusses with clients newspapers in general and one newspaper in particular.
JINGLE PRESENTATI

Newspaper readers tend to be information-hungry, and welcome good ads as part of their daily information intake. By taking advantage of the unique qualities of the medium, you can satisfy the readers' need to know while satisfying your sales forecasts at the same time.

If your product or service is sold in the Metro New York area, you can't do better than The Record for reaching an audience that's receptive, affluent and ready to buy. The reason, in part, is that The Record has "conditioned" its readers to expect the best. That's how it became New Jersey's largest evening newspaper.

The other reason is that The Record gives readers and advertisers unparalleled presentation — eye-catching graphics, lots of full color coverage and superb reproduction that guarantees your ad will look its best and sell its hardest.

Ask your agency about The Record. Or contact The Record directly at 201-646-4259. You'll discover how good a newspaper can be. And how good it can make your product — and you — look.

The Record

New Jersey's largest evening newspaper
We cover your world. All of it.

Agency Q&A

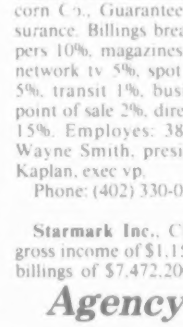
Q: Will foreign agency ownership in the U.S. increase this year?

Answer: Yes. I do believe that foreign agency ownership in the United States will increase this year and in the years to come.

As I have said on a number of occasions, advertising is no longer only a U.S. business.

Good advertising people are doing superb work all over Western Europe and Southeast Asia. They no longer look to the United States solely for leadership and ideas.

It is most likely that the truly large and great international agencies of the '80s and '90s will be "joint ventures" between American agencies and European agencies (even perhaps Australian agencies.).



Sloves

Witness the Saatchi & Saatchi acquisition mode and the interest of the French agency, Eurocom, in an American agency.

I see this as a wonderful opportunity for the agency business not only in terms of new ideas here in the U.S. but also because of the increased international quality of our business.

Marvin Sloves

Go For The Gold— CEBA!

Six years has now placed the CEBA, an acronym for Communications Excellence to Black Audiences, as one of the most prestigious awards in the communications industry today. The CEBA is awarded to those corporations, advertising agencies, and individuals who have been sensitive to the cultural differences and ethnic pride of African-American people.

First presented in 1978, the CEBA Awards will again this year acknowledge those who exhibit advertising excellence to the $150 billion African-American market.

This year's CEBA Co-Chairmen, Frank L. Mingo, Chairman, and Chief Operating Officer of Mingo-Jones Advertising, Inc. and John J. Kinsella, Chairman of the Board, President and Chief Executive Officer of Leo Burnett Company, Inc.; and the CEBA staff invite you to submit your 1983 creative efforts directed to the African-American consumer market.

We look forward to your participation, and wish you good luck! This may be your year to win.
Watch for the gold brochure which will be mailed to you soon.

The deadline for entries is May 1, 1984.

"Watch me clean up the L.A. media mess in a 2nd."
–David W. Feldman, Director of Sales

One in a series.
HERALD
Daily News
STAR NEWS

Covering Los Angeles with newspapers used to put you up to your ears in insertion orders.

With the old way, you'd get off to a clean start by buying L.A.'s "Big Mop." But it left you with three out of every four doorsteps unswept. Then you tried to spiff up your penetration with a bunch of suburban whisk brooms, but when the dust cleared, something was still missing.

I've got a new and better way. It's our "Herald L.A. County Group." One easy insertion order buys you the award-winning Los Angeles Herald Examiner–plus over 30 established Herald Community Newspapers.

Our "Group" adds more than 23% penetration in L.A. County, with circulation of over 700,000.

If L.A.'s newspaper clutter is sweeping you off your feet, call me. I'll tidy things up in a 2nd.

UPTOWN MIAMI

He was really going. She should have seen it coming. He had been obsessed with Fort Lauderdale, reading the News/Sun-Sentinel for months. The Herald may be very well for Miami, he had told her. But uptown ADI, in Fort Lauderdale, it's the News/Sun-Sentinel that pulls the purse strings of power.

Funny, how it always comes down to power, she thought. Fort Lauderdale teems with it. Phenomenal effective buying power. Monumental investment income power. And retail sales? Who could keep up with them?

He could. Two metros in one ADI, he had lectured. Both have international fame and over one million people. But Fort Lauderdale beats Miami in personal buying power every time.

"I'm leaving now," he said with no remorse.

"Which way you headed?," she asked, feigning ignorance.

"Up," he replied.

Pan American World Airways, Texas Instruments, MCI Telecommunications, The Hertz Corporation and Holiday Inns . . .

. . . along with over 200 other Epsilon clients, work with us to apply the power of computer technology to the challenges of modern direct marketing.

And it's working. Pan Am's WorldPass frequent flyer program, employing Epsilon's database and direct marketing services, has earned millions in increased income and customer loyalty. MCI has used Epsilon's super-personalized direct mail to gain thousands of new customers. And Epsilon developed and maintains a data management and fulfillment program for Texas Instruments, transforming hundreds of inquiries each day into qualified, targeted leads.

Our database technology can provide you with accurate, detailed management information. We'll help you plan, execute, and evaluate your marketing more effectively and efficiently. Our computer-segmented direct mail can give you measurable, quality responses. And we can increase your sales leads and ensure their rapid fulfillment.

To find out more about how direct marketing can work for you, call Bob Drummond at **1-800-225-1919** (in Mass. 617-273-0250). Or send in the coupon below. It might add up to more profitable marketing for your company.

Why United Flies Friendly Skies With The Weather Channel

Bill Alenson, Director of Advertising & Promotion United Airlines

"**Totally unique.**" That's how United's Bill Alenson describes local tagging of fares and schedules on The Weather Channel. "There's nothing like it on any other cable or broadcast network."

"Essentially we've turned into a local retailer and The Weather Channel's technology allows us to adapt national advertising to the specific needs of the local market."

United Airlines sponsors City by City forecasts, Vacationer's Atlas and the Hawaiian Briefing to reach their target of business and pleasure travellers.

Why The Weather Channel? "We're not gamblers; we bet only on a sure thing. The Weather Channel will become one of the staples of cable and we're delighted to be able to use it now."

For more information on local tagging and other unique opportunities, contact The Weather Channel: New York, Gary Koester (212) 308-3055; Chicago, Michael Eckert (312) 644-0570.

Diario Las Américas Readers Spend Mucho Dinero.

Diario is the one media that reaches and motivates the biggest spenders in Miami's booming Hispanic market.

In the big and growing Miami Hispanic Market, Diario Las Américas is like money in the bank.

Here's why: The average annual family income of Diario Las Américas' readers in South Florida is $27,342.

More than 93% of Diario households have cars; 72% own their own homes; 63% of them consume alcoholic beverages; 45% of them are smokers. And all of them do their daily shopping in the pages of Diario Las Américas—the Spanish-language medium Hispanic Miami swears by.

Collectively, Diario readers spend more than $1.7 billion a year.

That's "mucho dinero" in any language.

Diario. The one media that's always on the money with the Miami Hispanic Market.

Diario Las Américas

The Spanish-language Daily Newspaper
Founded July 4, 1953

DIARIO LAS AMERICAS
2900 N.W. 39th Street
Miami, Florida 33142-5193

sweep' stakes, plus

SWEEPSTAKES AND GAMES: THE TIP OF THE ICEBERG.

Because there's more to sales promotion than sweepstakes and games, at Don Jagoda Associates we do more than just create and execute sweepstakes and games.

re' bates

We work with advertisers and their agencies on planning and administering refund/rebate offers. We screen and verify all responses, very painstakingly, and return cash or coupons according to the terms of the offer. We're very careful when it comes to handling other people's money.

in·cen'tives

Because we know sometimes it takes more than money to motivate sales people, brokers, distributors and dealers, we help create and implement incentive programs. We know where and how to buy the prizes that will help increase sales, within budget.

pre'mi·ums

Looking for premiums or self-liquidators? We can help you there too. Our premium buyers shop the world looking for the right items to produce the right responses.

ful·fill'ment

And, with our ever expanding facilities, we have streamlined and expanded our capabilities for fulfillment. Getting the right merchandise to the right person on time, intact, is as important as getting people to respond to your offer.

sweep'stakes

Finally, if you decide to get involved in sweepstakes and games, the most visible tip of the promotional iceberg (in five years, sweeps have almost tripled in number), our more than 21 years of experience can be invaluable. We'll help you conceptualize, administer and—through our National Judging Institute—judge your promotion. We go out of our way to help our clients avoid the myriad pitfalls that can befall the unwary promoter.

When it comes to promotion, whether it's the very visible type or the not so visible but very effective nitty gritty variety, you have our number.

COURIER
EXPRESS
AA
PRIORITY
PARCEL SERVICE

OVER-NIGHT VS. NEXT FLIGHT

Why wait for overnight delivery when American's Priority Parcel Service can get your package there even quicker? We work 24 hours a day to give you delivery in hours instead of the next day. We'll get your small parcel virtually anywhere we serve in the continental U.S., Hawaii, Canada, Mexico and the Caribbean within hours.

So if you can't wait overnight, all you have to do to get it on American's next flight is dial toll-free (800) 638-7320. In Maryland, call (301) 269-5503. Just ask for Priority Parcel Service and we'll provide door-to-door pickup and delivery anytime, day or night, seven days a week.

When a few hours can make all the difference, call us immediately. We'll get it on the next flight, so you won't have to wait till the next day.

U.S. SAVINGS BONDS GUARANTEE GROWTH.

"New Variable Rate U.S. Savings Bonds represent one of the best all-around investments ever offered." . . . Roger B. Smith, Chairman of General Motors.

Roger B. Smith
1984 National Chairman
U.S. Savings Bonds
Volunteer Committee

"Your company's Payroll Savings Plan"

"Your company's Payroll Savings Plan provides extraordinary financial benefits for your employees with New Variable Rate United States Savings Bonds.

"Savings Bonds are convenient and easily available through the Payroll Savings Plan. It makes good sense to offer your employees a proven way to save . . . and it affords all participants the opportunity to help their country. (Bonds saved U.S. taxpayers over two billion dollars last year.)"

"It's a crop that is bound to double . . . or better in just 10 years!"

"U.S. Savings Bonds are a unique investment. They're guaranteed to earn at least 85% of the average yield on 5-year Treasury securities. They're a way to build savings, thrift, and a stable future. They're easy to buy through Payroll Savings: just a few dollars a paycheck. And they're completely free of investment risk."

"Guaranteed to earn no less than 7.5% . . . without going out on a limb."

"Series EE Bonds are directly related to Money Market rates of return. Important to all is the fact that they are backed by the United States Government. Savers who hold their U.S. Bonds for five years or more are protected by a guaranteed 7.5% minimum return. Finally, the interest on bonds is federal tax deferred and free from state and local taxes, an unbeatable advantage.

"Start your company's campaign today and encourage your people to use the Payroll Savings Plan to buy U.S. Savings Bonds. Your local Savings Bond Representative will be happy to help you."

YOUR BEST
ALL-AROUND
INVESTMENT.

BREAKING OUT OF THE PACK.

20
BIGGER THAN KINGSIZE

That's what has been happening to St. Petersburg-Tampa-Clearwater (SPTC) cigarette sales. Nearly 226-million packs were sold in the four-county area in 1982, 33-million more than runner-up Miami. In fact, nearly 20 per cent of all cigarettes sold in Florida are purchased in the SPTC metro.

Within the market, Tampa (Hillsborough County) just can't match St. Petersburg (Pinellas County), home of the St. Petersburg Times and Evening Independent. St. Pete has a king-sized lead of more than 20-million packs over its market neighbor.

So, if you want to see your brand break out of the pack, call your St. Petersburg Times and Evening Independent representative today. We'll help you become the leader of the packs.

St. Petersburg Times
& Evening Independent
P.O. Box 1121, St. Petersburg, FL 33731

Shell introduces its new gold standard gasoline: SU 2000™ Super Unleaded

All gasolines are not alike. SU 2000's formula is so unique it's patented. And SU 2000 also has high octane. It's among the highest octane premium unleaded gasolines available. (Note: SU 2000 is never blended with methanol, a low-priced alcohol some suppliers use as an octane booster.)

- So unique it's patented
- High octane
- Reduces intake deposits
- Never blended with methanol

SU 2000 helps keep your engine clean mile after mile. It is designed to reduce critical intake deposits that may be causing engine knock. In fact, the longer you use SU 2000, the better it can be for your engine.

For truly gold standard performance, get new SU 2000 Super Unleaded. In the black and gold pump at the Shell station nearest you.

The longer you use it, the better it can be for your engine.

It's a gas

Shell Oil Co., Houston, begins advertising today for SU 2000 and RU 2000 unleaded gasolines. Color magazine ads and tv spots are via Ogilvy & Mather/Houston. *(See story on Page 10.)*

New analgesic lures J&J, Bristol-Myers

By NANCY GIGES

Bristol-Myers and Johnson & Johnson are moving ahead with ibuprofen pain relievers, although approval for over-the-counter sale of the new nonaspirin analgesic appears to be snarled in red tape at the Food & Drug Administration.

Two other marketers, American Home Products and Upjohn Co., have been prepared since last August. But Upjohn, primarily a prescription drug marketer, apparently decided against competing head-to-head with the proprietary drug giants by naming Bristol exclusive distributor of its otc ibuprofen, called Nuprin.

While ibuprofen has been effective at prescription dosages in treating arthritis, it will compete in the general analgesic market as an otc drug.

According to a recent prospectus of Elan PLC, an Irish company, J&J went to Elan's U.S. subsidiary in Gainesville, Ga., to develop a sustained-release dosage form of the product. Of these major drug companies, J&J would be the only one that would be prevented from introducing a product until May, 1985, because of patent restrictions. But a sustained-release product to be taken once or twice a day would provide a product improvement over other proposed brands.

Ibuprofen, with manufacturer sales of $250 million, is the nation's largest-selling prescription remedy for arthritis. Most sales come from Upjohn's Motrin brand sold under license by the worldwide patent holder, Boots Co. When Boots realized that otc approval might be considered, it also licensed American Home Products to sell an otc version, named Advil.

Both AHP and Upjohn have appeared before an FDA advisory panel to urge approval for otc sale of a 200mg dosage formula, about

GOP picks 'Tuesday Team'

By PAT SLOAN
and RICHARD L. GORDON

Pennsylvania Avenue handed down its decision to Madison Avenue last week: Ketchum Advertising/U.S. is the loser and, as expected, an ad hoc advertising group, to be called "The Tuesday Team," is the winner of the $25 million-to-$30 million Ronald Reagan/George Bush 1984 re-election ad campaign.

The ad hoc group, as reported earlier, will be directed by James D. Travis, president-chief operating officer of Della Femina, Travisano & Partners (AA, March 26). Mr. Travis will take a nine-month leave of absence from the agency to assume the presidency of "The Tuesday Team." The group will be based in New York and is now searching for office space.

Termed an "all-star" collection of advertising talent, the group will also include Walter A. Carey, senior vp-chief operating officer of Leber Katz Partners, who will serve as exec vp and chief operating officer, and Sig Rogich, president of R&R Advertising, Reno and Las Vegas, Nev., who will be a director of the corporation.

Mr. Rogich, a veteran of more than 300 political races in the West, has also been an advisor to Nevada Sen. Paul Laxalt, general chairman of Reagan-Bush '84. Roger Ailes, president of Ailes Communications and widely regarded as one of the top political media consultants in the country, will serve as a consultant.

A three-member advisory committee—consisting of Phil Dusenberry, vice-chairman and exec creative

ABC, CBS in daytime summer tiff

By DIANE MERMIGAS

The battle for daytime ratings and demographics between ABC and CBS will escalate into a full-fledged war this summer, complete with new promotional blitzes.

There's no official word out of either camp yet as to specifics, although the new promotional campaigns will probably be launched next June in all dayparts, including prime time.

CBS' campaign will be designed to take advantage of its current first-place ratings momentum in daytime and the fact that ABC will be forfeiting much of its popular daytime schedule July 28 through Aug. 12, when the network telecasts live summer Olympics events from Los Angeles.

The new campaign from ABC, which recently was unseated as the undisputed daytime leader, will be designed to retain normal viewership for abbreviated versions of its hourlong weekday soap operas. They will air daily in two-hour

last minute news

McDonald's readies french toast morsel

Oak Brook, Ill.—McDonald's Corp. is readying a new breakfast item for national rollout in time to receive heavy advertising support during the Summer Olympics, sources report. Tentatively called Maple McCrisp, the item is said to be deep-fried french toast morsels for dipping in maple syrup. McDonald's agency is Leo Burnett USA, Chicago.

RCA introducing $1,295 vcr with remote control

New York—RCA introduced a new $1,295 model videocassette recorder that can be programed a full year ahead of time and also is capable of total programing by remote control. The company, via Leo Burnett USA, Chicago, plans a major advertising and merchandising campaign on behalf of the new vcr. Also, RCA on March 30 revised its vcr industry projections to sharply higher levels. Stephen S. Stepnes, division vp-marketing, RCA Consumer Electronics, now is forecasting 6.7 million vcr unit sales for the industry in '84, 2.2 million more than the projection of three months ago. He said consumers will spend $4.5 billion in 1984 for vcrs, nearly $2 billion more than in 1983.

Reynolds says Century almost nationwide

Winston-Salem, N.C.—R.J. Reynolds Tobacco Co. said that because of continuing action by state legislatures, Century, its 25-per-pack economy cigaret, will be available soon to consumers in nearly 99% of the country. Since the brand was introduced in 33 states in July, 10 additional states have revised laws to allow its sale. The agency is Tatham-Laird & Kudner. In addition, Reynolds is introducing its Sterling Special Blend premium cigaret nationwide today.

Coming attraction: Films by credit card

By ROBERT RAISSMAN

Fans of the automatic teller machine soon may be able to do their button-pushing at the movies, using their credit cards to pick a flick, then buy a ticket against their account.

Chits for popcorn, candy, soft drinks or other munchies also will be available by just punching a few buttons. Starting this month, Kansas City, Mo.-based AMC Entertainment will begin testing a machine called "The Agent" in one of its multiple-screen theaters in Dallas. AMC is a wholly owned subsidiary of American Multi Cinema.

The machine, similar to an ATM, will enable moviegoers to insert one of three as-yet-undisclosed major credit cards into machines at their local theater and punch in a code to see what movies are playing. The machine also will display the time the picture is scheduled to begin and the seat availability for performances, according to Ron D. Leslie, exec-vp, AMC.

The moviegoer next punches in the chosen movie and out pops a ticket. The price of the ticket is credited to the purchaser's credit card account. The service doesn't stop there. Patrons can then punch in another code and receive a chit for popcorn, candy, soft drinks or other concessions. Those coupons can be redeemed at the show.

Mr. Leslie added that AMC is beginning talks with banks which are interested in adding the ATM function to "The Agent." In essence, a consumer will be able to charge a movie and food—and make a cash withdrawal or deposit before strolling in to see a flick.

The test will last for three months, he said. "Of course it will help us sell tickets but it will definitely provide added convenience to our customers," he said. "It will take people off lines at night. When our

3 books take their last byte

By STUART J. ELLIOTT

NEW YORK—Is the long-predicted shakeout in computer magazines about to get under way?

That's what observers of the field are asking after news that *Software Supermarket*, *Sync* and *Teaching, Learning & Computing* are folding.

While some contend the disappearance of these books means the much-heralded shakeout has begun, others say a number of failures are inevitable, given the category's enormous growth.

Software Supermarket, from Amos Press, Sidney, O., will fold with its fifth issue, dated May. "Competition on the newsstand was just too great," said publisher Wayne Lawrence. Circulation for the monthly never reached its projected 63,300.

Sync, the largest of the three magazines (circulation 64,000), will cease publishing with its March/April issue. The every-other-monthly, aimed at users of the now-discontinued Timex Sinclair computer, debuted in 1981 and was sold to Ziff-Davis Publishing Co. a year later. A spokesman said the folding comes because "there won't be any growth or advancement in the market."

The comment points out a problem: As the shakeout continues among the computer manufacturers, it is bound to have its impact on publishers who put out magazines that are machine-specific.

Placentia, Cal.-based Seldon Publishing ceased publishing *Teaching, Learning & Computing* with its March issue. The monthly, which debuted last November, hoped for a circulation of 60,000, but achieved only a third of that.#

Elliott, Morgens inducted into AAF Advertising Hall of Fame

New inductees into the American Advertising Federation Advertising Hall of Fame include John (Jock) Elliott Jr. (left in left photo), former chairman of Ogilvy & Mather, and Howard J. Morgens (left in right photo), chairman emeritus of Procter & Gamble. They received citations and trophys from AAF's Bart Cummings, chairman emeritus of Compton Advertising. *(Story on Page 64.)*

Burger King in expansion shift

By SCOTT HUME

Organizational changes announced last week have set the stage for Burger King Corp. to develop additional restaurant concepts.

Chairman-chief executive officer J. Jeffrey Campbell said in a statement that the shifts in lines of command and personnel reassignments would provide him "a greater opportunity to concentrate on our long-term strategy of expansion and diversification."

Mr. Campbell was out of the country last week, but a company spokesman explained that parent company Pillsbury has given Burger King management the go-ahead to consider alternative restaurant concepts.

Such a venture most likely would represent acquisition of one or more existing fast-service restaurant chains, he said, although original restaurant concepts remain a possibility.

The spokesman also said Burger King probably would not be interested in developing a chain with a "beef-intensive" menu, preferring instead to explore fish, chicken or pizza concepts.

Pillsbury, which owns the Totino's and Fox Deluxe lines of frozen pizza, would represent a substantial resource for a Burger King-owned pizza venture and

'Beef's' bubble still expanding

DUBLIN, O.—Appearing next week at a checkout counter and candy display near you will be "Where's the beef?" bubble gum, marketed by Philadelphia's Fleer Corp.

Wrapped in foil like a takeout burger, each two-color (bun and beef) piece of bubble gum comes with a sticker bearing one of nine different phrases (such as "I don't think there's anyone back there" or "Watch your beef").

Counter displays bear the now-famous face of Clara Peller, the elderly actress in Wendy's commercials.

The bubble gum is just one of dozens of products about to appear bearing Wendy's advertising slogan and/or "celebrity presenter." Their success could change how companies and agencies look at advertising campaigns.

"I can't explain why 'Where's the beef?' is so popular or what makes it licensable," said Michael Stone, president of Hamilton Projects, New York, Wendy's exclusive licensing agent, "but after this I think a lot of agencies are going to be thinking about licensing possibilities. They really haven't been tuned to the potential before,

Agencies grab direct marketers

By GAY JERVEY

NEW YORK—Much as it was with pr shops a decade ago, the trend toward large advertising agencies acquiring independent direct-marketing companies has intensified.

The competition is expected to only stiffen as the roster of the remaining large independents thins.

Last week, two of the nation's largest independent direct-marketing companies were swallowed up by top advertising agencies when SSC&B and Needham, Harper & Steers reached agreements to acquire Frank Vos Co. and the DR Group, respectively.

In announcing the Vos deal, SSC&B chairman-chief executive officer Ken Robbins said, "There is no question about the importance of the fast-growing direct-marketing field. Its application is fundamental to the way advertising is evolving."

In its internal announcement, DR Group told of having been approached by a number of agencies—no surprise in that the company is the oldest remaining independent and had 1983 billings of some $25.5 million.

Indeed, agencies with already strong direct-marketing capabili-

Working Woman caters to the career-minded

By Neal Hirschfeld

Carol A. Taber, 39, loves to ride horseback, water ski and cook gourmet meals. She reads biographies and recently completed a massive tome on Winston Churchill by William Manchester. She enjoys traveling and wouldn't mind visiting Russia someday. She's tall, articulate, stylish.

She also happens to be the publisher of *Working Woman* magazine, promoted to that spot last November. And she's been given much of the credit for the magazine's growth in advertising and revenues.

Despite a period of internal turmoil several years ago, *Working Woman* has kept pace with the growing sophistication, responsibilities and earning power of career-minded women.

Ms. Taber joined *Working Woman* as advertising director in August, 1979, at a time when the magazine was going through a change of ownership, as well as a shakeup of editorial and sales staffs. Since then, the circulation rate base has increased from 300,000-plus to more than 600,000. By September, 1984, it is expected to reach 700,000. The number of advertising pages jumped from 358 in 1979 to 1,185 last year. The magazine is projecting more than 1,300 ad pages for 1984. Ad revenues mushroomed from less than $1 million in 1978 to billings of more than $14 million in 1983.

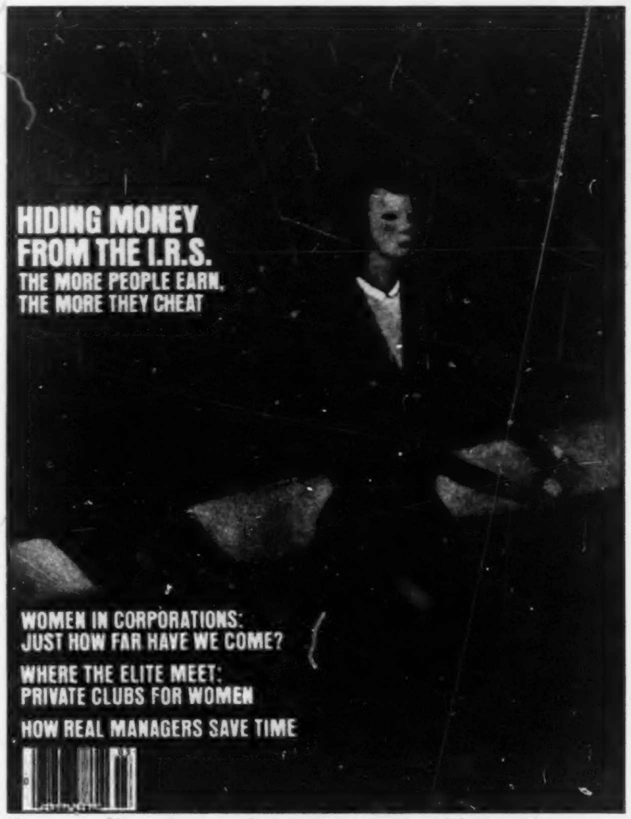
"To have this kind of success for a young, entrepreneurial company run by women [65 of the company's 70 employes are women], the adrenalin runs very high," says Ms. Taber. Characterizing her own move from advertising sales to publisher as a shift from a "tactical" position to a "strategic" one, Ms. Taber says, "It's a different hat. I'm on another learning curve."

Since *Working Woman* made its debut in the fall of 1976, its focus has narrowed dramatically. At first, says Ms. Taber, it directed its appeal more loosely, to all women who worked. Now, she believes, "We're going after women in management, the cream of the crop.

"It's yesterday's news to talk about 'working women.' What marketers are looking for today are career-oriented women. The way marketers have always spoken to men, they've spoken out to the chief executive. Now they're doing the same thing with women. Now you have a segmented market. It's no longer one big amorphous mass of working women."

One measure of the change in focus has been the magazine's cover. Five or six years ago, it might have been "a traditional women's magazine thing," says Ms. Taber. A case in point was the October, 1978, cover and its photo of dewy-eyed model Lauren Hutton being beautified by a makeup expert. Now, emulating business magazines, *Working Woman* favors "concept covers," such as the March, 1984, cover with its eerie, Giorgio De Chirico-like illustration for a story on tax cheats. The first concept cover, in November, 1982, resulted in a doubling of the newsstand sales, Ms. Taber says.

The increased targeting of career women has taken other forms in the magazine. "Five years ago, we would have run a column on how to invest $1,000," says Ms. Taber. "Now, we run stories on full-scale financial planning, buying homes, making more sophisticated financial investments." In appealing to a more sophisticated readership, the magazine has opened its pages to expert writers in various fields, and they are not necessarily women.



HIDING MONEY FROM THE I.R.S.
THE MORE PEOPLE EARN, THE MORE THEY CHEAT
WOMEN IN CORPORATIONS: JUST HOW FAR HAVE WE COME?
WHERE THE ELITE MEET: PRIVATE CLUBS FOR WOMEN
HOW REAL MANAGERS SAVE TIME

Working Woman ***is using concept cover illustrations as a departure from the "traditional woman's magazine thing."***

There has also been an upscale turn in the magazine's advertising. Office equipment, cosmetics and fashion accounts—in that order—are the three largest advertising categories, but the magazine is also drawing ads from the luxury car category—Cadillac and BMW are two examples—liquor marketers and investment funds.

Although women have made strides in controlling their own images in the marketing process, Ms. Taber believes, they still have a long way to go. "There used to be mountains," she says. "Now there are hills." Most responsive to the changing roles of career women, she believes, have been the auto makers and investment companies. "They are depicting women in real-life situations—'good dreams,' not scenes dripping in unattainable fantasies."

According to the Simmons Market Research Bureau, *Working Woman* ranked first among 29 magazines in a study of the concentration of women readers in the 25-to-49 age group with individual earned incomes of $15,000 or more. It ranked second only to *Business Week* in a survey of women readers in the same age group who consider themselves careerists. And it came in third, behind *Money* and *Psychology Today*, in a survey of women in the 25-to-49 group who consider themselves professional/managerial types.

A 1983 subscriber profile by the magazine's own marketing department showed that 45% of the readers were between 18 and 34 years old, 43% were 35 to 49 and another 12% were 50 or older. The study also indicated that more than 89% had either attended college, or graduated, 95% were employed fulltime and 88% were in professional/managerial positions. The study further showed that 64% of the readers had an individual earned income of $20,000 or more while another 29% had an individual earned income of $30,000 or more. Nearly 65% had household incomes of $30,000 or more; 47% had incomes of $40,000 or more.

Working Woman recently changed editors, when Ann Smith replaced Gay Bryant at the helm. Ms. Smith previously had been executive editor of *Glamour*, where she directed a survey on working women.

Asked to size up the competition, Ms. Taber mentions *Self*, *Ms.*, *New Woman* and *Working Mother*, but says that "*Savvy* is closest to us editorially." However, she says that *Working Woman's* editorial formula of 70% business-related articles and 30% life style-related articles (fashion, beauty, nutrition, health) distinguishes it from *Savvy*, which, she says, does not offer as much of the latter. Ms. Taber believes the business-life style mix is essential for career women who must cope with a "time crunch" and prefer to read one magazine that caters to all their needs. *Working Woman* has roughly twice the average subscription circulation of *Savvy*.

Ms. Taber joined **Working Woman** ***sensing a "communication void in this area."***

In response, *Savvy*'s director of public relations, Beth Greer, characterizes *Savvy* as a "business magazine that happens to be edited for women rather than a women's magazine with business and career articles." She also says that *Savvy* is geared more toward executive women who already have attained a certain level of expertise and success, while *Working Woman* appeals to career women at all levels. "*Savvy* takes a more sophisticated approach," Ms. Greer maintains.

For *Working Woman*, the target audience is the emerging career woman—the woman who, in Ms. Taber's words, is "head and shoulders" above employed but noncareer women and men when it comes to buying cars, cameras and telephone-answering machies, playing tennis and jogging, opening IRAs and Keough accounts and acquiring corporate stock, according to the Simmons data.

It might be said that Ms. Taber's success has paralleled the strides of her readership. Before entering publishing, she was a systems analyst. She held the position of sales manager at Media Networks, a media service company, then joined the *Ladies' Home Journal* as national manager of the *Prime Showcase* edition of the magazine. She was then promoted to New York advertising manager of the *Journal*. She is a member of the American Academy of Women Achievers and her biography appears in "Who's Who of American Women."

Not a bad set of credentials for a working woman.

Neal Hirschfeld is a New York-based free lance writer.

Women who work

Newsweek early this year conducted a national telephone survey of working women; 713 interviews were completed. Among the findings of the survey:

- Forty-eight per cent of all working women are under 35.
- Half (51%) have at least some college education and 30% are college graduates or better.
- Fifty-seven per cent of all working women earn less than $15,000 per year.
- Most (57%) have low expectations about their chances for promotion.

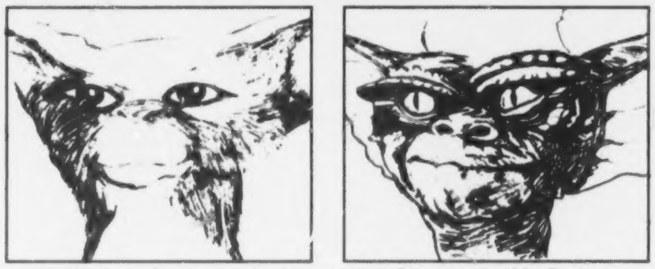
'Gremlins' looms as market-buster

By JAMES P. FORKAN



Kindly Gremlins turn evil when wet (r.). Sketches by Mr. Forkan.

What must stay away from light and water and *never* be fed after midnight?

Only a select few know the answer now, but in about two months millions of youngsters and adults will also know that's the description of the title characters in "Gremlins," the motion picture produced by Steven Spielberg that's due June 12.

At that time, it may also be clear that "Gremlins" will be this season's "E.T.," a blockbuster movie with enormous implications for merchandise spinoffs.

As usual, Mr. Spielberg has stamped his creation "top secret," warning Warner Bros., the distributor, and the 50 companies that plan tie-ins not to sell products or leak word about the film's story line. Nor can they talk about the characters.

(When making "Close Encounters of the Third Kind," Mr. Spielberg had Columbia Pictures Merchandising bar licensees from releasing any products featuring the aliens till the film hit theaters. And while working on Universal Pictures' "E.T.," he used the innocuous working title, "A Boy's Life," to defer attention.)

At the Toy Fair in February, the "Gremlins" toy licensees kept tight security on related merchandise, barring all but major retail buyers from special "Gremlins" display areas and coaching their representatives not to tell the press about the movie.

Despite the veil of secrecy, Advertising Age has since learned some details about the potentially popular characters. Based on reports from various sources, the following picture of the movie and related merchandise emerges.

Officials at LJN Toys, the major licensee, called the movie "heartwarming" and "action-packed," qualities that characterized "E.T."

" 'Gremlins' is the story of little creatures that never get wet, must stay out of bright light and must never, *never* eat after midnight," said Jack Friedman, president of LJN Toys, which also is the major licensee for two other potential blockbuster movies, "Indiana Jones & the Temple of Doom" and "Dune." "Whenever any of these things happen to the creatures, the real adventure begins," he added.

Water causes Gremlins to alter their appearance, multiply and kill, while bright light can kill them. In some forms, Gremlins are known as Mogwais. The box in the "Gremlins" logo is what the creature is kept in when a family buys

Nestle, Hills coffee deal good news, bad news

By GAY JERVEY
and JENNIFER PENDLETON

In moving to acquire Hills Bros., the San Francisco-based coffee marketer, Nestle Co. will realize a long-contemplated dream—that of entering the ground roast arena in the U.S.

Nestle's action also suggests a determination to shore up the company's listless coffee operation. It's a move that could send shivers down the spines of the small regional roasters—MJB, Butter-Nut, Maryland Club, Luzianne and others—already battling coffee giants Procter & Gamble and General Foods.

"It's only going to get harder for the smaller companies and private labels," said Robert Cummins, a securities analyst with Wertheim & Co., New York. "Never before in the coffee business have so few companies commanded such large share figures."

The comment and reaction follow Nestle's announcement last week that it had acquired an option to buy all Hill Bros. stock. Nestle, whose current coffee brands—none ground roast—are Nescafe, Tasters Choice and Sunrise, would exercise the option in early 1985.

While the acquisition brightens Nestle's coffee prospects, West Coast sources say the proposal has come just in time for Hills Bros. Not only has Hills Bros. suffered from eroding U.S. coffee consumption, but the company also has been unable to cross swords successfully with P&G and GF, which together command more than 60% of the total U.S. coffee business.

Consider the following ad spending figures: Hills Bros. spent less than $500,000 for the first nine months of 1983, compared with nearly $50 million for GF's coffee brands and about $30 million for P&G's Folger's and High Point brands. For the same period, Nestle spent about $20 million on its three brands, according to Leading National Advertisers.

Despite increasingly high ad budgets, however, Nestle has been unable to shake sales sluggishness among some of its U.S. operations. As such, the com-

CBS wins season; nets curb share loss

By DIANE MERMIGAS

The networks' prime time rankings for the 1983-84 tv season, which ended April 15, haven't really altered from a year ago. But substantial change in day-to-day competition promises to affect dramatically the horse race next fall.

Final averages for the season, which will be available from A.C. Nielsen Co. this week, are expected to show CBS doubling its last-season lead over ABC to nearly one full ratings point. Five-tenths of a ratings point separated the two networks at the end of the 1982-83 season. NBC again will come in third.

It is the fifth consecutive season CBS has led the prime time ratings.

As of late last week, CBS averaged an 18.1 rating, 28.4 share in prime time for the season. ABC averaged 17.3/27.1 and NBC 15/23.5.

CBS won 19 of the season's 28 weeks and tied once with ABC. ABC won seven weeks and NBC one. CBS also was expected to dominate the season's 29th and final week, ending April 15.

This season the networks, perhaps by their rigorously competitive counterprograming, were able to arrest the erosion of their combined share of audience. The networks on the average attracted 79% of all U.S. tv households in prime time compared to 81% during the previous season.

The networks' combined prime time rating this season has been 50.3 compared to 51 in 1982-83.

ABC's "Hotel" is the only new series premiered last fall that has

Roman Meal names two new shops

By JENNIFER PENDLETON

Roman Meal Co., preparing its first major expansion into the grocery products business, has named two additional agencies to its roster.

The family-owned, Tacoma, Wash.-based bread marketer appointed DYR, Los Angeles, to handle undisclosed new products for the grocery products division and Livingston & Co., Seattle, for hot cereals. Cole & Weber continues as agency for Roman Meal's bakery products division.

The appointments mark the first time Roman Meal has assigned agencies specificially for its grocery products division and reflects the seriousness with which the

New Alamo Basic keys on price

Alpo entry targets Chow

By JANET NEIMAN

Alpo Petfoods is facing mixed reaction from the retail trade as it introduces new Alamo Basic dry dog food, apparently targeted at Ralston Purina's Dog Chow.

The Allentown, Pa.-based company, a unit of GrandMet USA (formerly Liggett Group), is entering the new product into selected East Coast markets, including Baltimore and North and South Carolina, Virginia and West Virginia.

Alamo Basic is priced between private label and generic dry dog foods and premium-quality products. But as a branded product priced to undercut Purina Dog Chow, Alamo Basic appears to be aimed most directly at that brand, the leader nationally.

Alpo, said one source, "wants to get some more [of the] Ralston Purina business."

Alamo Basic will go unadvertised except for some newspaper and in-pack couponing.

But retail buyers in the Baltimore market say that, for various reasons, they don't plan to take on the product, which they see as being most competitive with private labels.

They cite such problems as the need for heavier trade deals and stronger advertising and the lack of consumer demand for another low-price dog food.

"Why would you pick up something priced higher than the private-label brand and maybe take away business from yourself?" asks one Baltimore buyer.

In more rural areas, including the Virginia markets, however, Alamo Basic is said to be having more success.

"In the more metropolitan areas," explained one southeastern source, "people tend to have smaller dogs that stay inside, and they want to feed them premium dog food rather than basic dog food.

"The only difference between Alamo Basic and Alpo Dry is in the flavoring and the protein content," he said.

In his own market, he expects Alamo Basic's business to come from both consumers who have used private-label brands and those who have used Purina Dog

P&G picks Pepper for U.S. products

By NANCY GIGES

In a realignment of top management, Procter & Gamble has named John E. Pepper Jr., 45, exec vp with responsibility for all U.S. consumer products except pharmaceuticals.

Formerly group vp in charge of European operations in Brussels, Mr. Pepper is now considered a strong contender to one day succeed president-chief executive officer John G. Smale.

In other moves, Thomas Laco has been promoted to vice-chairman from exec vp.

He will be responsible for staff functions, pharmaceuticals and foodservice operations. He had been responsible for all P&G business in the U.S.

Edwin L. Artzt, head of international, also has been promoted to vice-chairman from exec vp.

Messrs. Laco and Artzt's vice-chairmen positions are newly created, filling the previously singular vice-chairman slot that has remained vacant for several years, a P&G spokesman said. Owen

McDonald's

Picking up the beat

McDonald's new advertising campaign (AA, Feb. 20) is being called "more contemporary and upbeat" by agency Leo Burnett USA. Ads begin running June 18. *(See story, Page 80.)*

NAACP chapter steps into McDonald's dispute

By SCOTT HUME

The already-heated dispute between McDonald's Corp. and a dissident black Los Angeles franchisee got hotter last week as the local chapter of National Assn. for the Advancement of Colored People took the operator's side and announced a "selective buying campaign" against the fast-food giant.

Additionally, the franchisee, Charles Griffis, filed a second suit against Oak Brook, Ill.-based McDonald's, charging the company with libel and seeking $70 million in compensatory and punitive damages.

He also has hired a black advertising agency, International Communication & Advertising Network, Gardena, Cal., to create a separate ad campaign for his stores.

An "open letter" advertisement signed by NAACP chapter president John McDonald appeared last week in Los Angeles dailies, announcing the action and calling on McDonald's president Michael Quinlan to address the issues "in good faith."

Donald Fields, economic development director for the Los Angeles NAACP, said the organization planned to picket McDonald's restaurants in that city and urge minorities not to patronize them. Black-owned McDonald's would be exempted from the action, Mr. Fields said.

Reginald Webb, McDonald's regional vp for Southern California, who is black, last week said he was "incredulous" that the NAACP "would take such drastic action given our long-term track record" in affirmative action.

The campaign has been launched, Mr. Fields said, because of "allegations from many black owner/operators across the country that McDonald's is highly discriminatory in hiring executives, awarding franchises and purchasing food and supplies."

Although Mr. Griffis has made similar charges in his legal battle with McDonald's, Mr. Fields said the NAACP's action results from what he characterized as "a national pattern" of alleged discrimi-

IPG's Wilen to be scout on barter

By STEWART ALTER

New York—In his new position as senior vp-development and professional services at Interpublic Group of Cos., Arthur E. Wilen will oversee Interpublic's possible involvement in a barter operation and its potential acquisition of a public relations company.

Mr. Wilen, who had been exec vp-media director at Marschalk Co., one of the Interpublic agencies, will take his new position May 1. He will be "exploring all kinds of opportunities," said Peter Dailey, Interpublic vice-chairman. "Barter is one, public relations is another, acquisitions is a third, new market segments is a fourth."

Mr. Wilen's function at IPG is not entirely new, Mr. Dailey added, noting that Donald M. Casey had similar responsibilities before joining Young & Rubicam last January as director of business development-worldwide.

Mr. Dailey said Mr. Wilen's general business experience, as much as his media directing role, explains his new job. Before joining Marschalk, Mr. Wilen was president of U.S. operations for Canada Dry.

Interpublic currently has no sep-

Direct marketers outline goals, troubles

Boosting image, product development among priorities

What does the direct marketing industry view as its key challenges and opportunities in the coming year? How do direct marketers feel they are going to cope with the pressing issues? Some of the answers are revealed in the first Direct Marketing Assn.-sponsored trend survey of members. Robert Kaden, president of Goldring & Co., Chicago, analyzed survey results for a recent DMA executive conference. Following are highlights of what Mr. Kaden calls "a benchmark of member attitudes" that will provide "a roadmap of opportunities and problems facing direct marketers."

> **"They seem to have been more concerned with selling unique products or just generating response."**

The industry seems generally to be expecting an improved economic picture in the coming year. More than one-third of the 700 respondents to the DMA survey believe a brighter economic outlook will be extremely important to the growth of their business in the next 12 months. And almost 80% felt that the economy would be extremely or very important. "It's interesting," Mr. Kaden says, that the periodical direct marketers had a much more optimistic outlook than those in the financial fields.

Supporting the bright economic outlook, Mr. Kaden notes, "less than 20% thought that interest rates or a rise in inflation would be an extremely important problem" affecting their business.

Yet, the service companies—mailing services, computer services, printers, the envelope and paper manufacturing people—and nonprofit or fundraising executives are much more concerned about interest rates and inflation than business-to-business marketers.

One finding that surprised Mr. Kaden was the degree to which direct marketers seem concerned about image. The survey indicated that fully half thought developing an image that differentiates them from the competition would be extremely important to their business in the coming months.

"I think this is just absolutely amazing considering direct marketers in the past haven't been too concerned with image and differentiating themselves," Mr. Kaden says. "They seem to have been more concerned with selling unique products or just generating response."

He speculates that "as more and more competition develops for the consumer's direct dollar" marketers are becoming more concerned about the way consumers see them.

In light of other findings, however, Mr. Kaden wonders how direct marketers think they are going to effectively accomplish image shifts or bolstering.

The survey showed that only 1% "indicate that using radio, tv or even general print media to support direct marketing efforts are important opportunities in the coming year."

Says Mr. Kaden, "If these image-building media aren't important, I wonder how [direct marketers] see themselves building an image and differentiating" themselves. He feels direct marketers "may be kidding" themselves if they feel more traditional direct methods of communicating with customers will help them quickly develop a differentiating image. "If image is important, as an industry we better start asking ourselves how we can make general media economical for us to use," he advises.

And if image is a concern, the kinds of products and services they will have to offer is seen as a major challenge to continued growth.

The ability to develop profitable new products and new services in the next 12 months was especially of concern among business-to-business, financial and noncatalog direct marketers.

Aligned with this, Mr. Kaden reports, almost one-third of those responding to the survey see the ability to develop new consumer benefits and services that differentiate them from competition as an extremely important problem. And more than two-thirds acknowledge this is either extremely important or very important.

Similarly, the development of new and unique creative formats for direct mail pieces rates high as a concern. Almost 30% saw this as a major challenge, particularly those in periodicals, fund raising and financial services.

Again, Mr. Kaden feels that direct marketers may not be taking the steps needed in the area of product development. "You would think that with such emphasis placed on developing new products, new services, and new creative formats" that the industry "would turn to consumer research to help determine what customers want," he says, adding that "unfortunately this does not seem to be a technique that [direct marketers] feel can help develop those new services and new products."

He reports that only about 15% feel there is an important opportunity in using attitude and behavior research methods to determine better ways of serving present customers or in using consumer attitude and behavior methods for new product development.

"The financial services people are looking more to attitudinal research to help them in this regard," Mr. Kaden says, "but as an industry, we seem to be saying: 'We want to develop new services; we want to develop new products, but as yet we don't really see attitudinal research as that helpful.' "

And from Mr. Kaden's point of view this failure to look at these types of research methods is a mistake. He feels direct marketers *should* start talking to customers "and looking at the situation from their standpoint. In other words, adapt a more consumer goods companies' approach in looking for new products and services."

If direct marketers are still wary of consumer-type research tools, more traditional research methods "such as using customer data segmentation techniques for better targeting, using customer demographics, and using geo-demographics segmentation" are in favor.

While almost 25% of DMA members surveyed believe geo-demographic methods are extremely important, "it really is the financial people who are emphasizing geo-demographics. The book and the record people, for instance, do not see geo-demographics as a major opportunity for growth in the next 12 months," Mr. Kaden says.

A substantial number also feel it is extremely important to pretest prior to rolling out. It seems the use of pre-testing, which is a traditional direct marketing technique, is continuing to be viewed as important.

Seeking creativity among the teaser envelopes

Direct ad makers find some future inspirations in the past

By M. Howard Gelfand

Direct response advertising's only living legend is taking refuge from the New York City winter at a bruised and battered Holiday Inn in West Palm Beach, Fla. John Caples is 84 now, and his back is bent from a nasty fall. A cane supports him as he looks across the street to the Atlantic Ocean.

But his gray-blue eyes are clear and so is his memory as he remembers the day, more than 55 years ago, when the former phone company engineer turned adman wrote the lines that etched his name in the annals of advertising immortality:

They Laughed
When I Sat Down
At the Piano
But When I Started to Play!

Advertising has created many a star since that day when the 27-year-old Mr. Caples struck gold.

When Mr. Caples wrote his legendary piece, direct marketing wasn't quite so exacting a science.

"Where's The Beef?" has replaced "Do You Make These Mistakes in English?" as the most familiar commercial question, and Michael Jackson has supplanted the Doublemint Twins as the most omniscient singer of what used to be called a jingle.

But the stars strut their stuff in the blinding spotlight of general advertising, a medium that seems to be producing hits the way McDonald's, or at least Wendy's, produces hamburgers.

Direct response advertising, meanwhile, remains an obscure science, a science that hasn't produced a big name since that long past time when Mr. Caples was the hottest thing going and Max Sackheim was writing ads for the Sherwin Cody School of English.

When Mr. Caples wrote his legendary piece, the medium wasn't quite so exacting a science. Sweepstakes and the computer lay ahead; in their place was the freer, narrative style of writing that most closely mimicked fiction. This sort of advertisement set scenes, employed dialog and often required the writer to assume a persona:

Instantly a tense silence fell on the guests. The laughter died on their lips as if by magic. I played through the first bars of Liszt's important Liebestraume. I heard gasps of amazement. My friends sat breathless—spellbound.

I played on and as I played I forgot the place around me. I forgot the hour, the place, the breathless listeners. The little world I lived in seemed to fade—seemed to grow dim—unreal. Only the music was real. Only the music and the visions it brought me . . .

ANNOUNCING A STARTLING NEW WAY TO DETECT CYSTIC FIBROSIS BY ROUTINE EXAMINATION INSTEAD OF BY AUTOPSY.
WITH THE MERIDIONIC OF INDICATOR YOU CAN SCREEN FOR CYSTIC FIBROSIS WHILE THERE'S STILL TIME TO DO SOMETHING ABOUT IT.

Following some of the effective design techniques used in general print advertising, this direct mail piece differs in that it arrived in a 2-ft.-long unmarked black envelope—complete with coupon.

Some 1,600 miles from Mr. Caples' current winter hideaway, there's someone with a theory about the dearth of creativity in direct advertising now. If you had to pick a likely candidate to inherit Mr. Caples' crown, Rod Kilpatrick might be your man. He's young enough—29—and, like Mr. Caples, he got into the direct marketing side of advertising because that's the only side that would have him. Like Mr. Caples, he made his mark quickly, and now is a copywriter at Fallon McElligott Rice in Minneapolis.

But if Mr. Kilpatrick represents the future of direct response advertising, he does so with a reverence for the past.

"That ad," he says of Mr. Caples' classic, "was a brilliant ad for any age. Direct marketing has been in a downslide ever since."

As Mr. Kilpatrick sees it, that downslide—that utter absence of creativity—is the major reason that direct response advertisers are clouded by obscurity.

"Today," he says, "a copywriter would write: 'Now Learn How to Play the Piano in Your Own Home.' "

But there does seem to be a growing emphasis on creativity. Maybe it's just talk at this point, but many direct response advertisers claim that the burgeoning use of the medium has created an influx of clients and professionals who insist upon the same standards that are applied to general advertising.

All this interest in creativity may or may not have enhanced the medium, but it *has* produced an award—the Maxwell Sackheim Award.

While another advertising award is not exactly enough to stop the earth from orbiting these days, awards for direct advertising are another thing.

There are only a couple of awards shows for the direct marketing crowd. And so it was news last year when the Sackheim Award was added to the Caples Show as the crown jewel for the most original advertising in di-

Mail campaign gives client a lift

The Rise Inc. campaign is a sterling example of effective direct response advertising. But not necessarily because it won an award.

The people at the Minneapolis company that employs handicapped people for bindery work know that only too well.

In 1977, a group of ad people who worked for various Twin Cities agencies offered to put together a campaign for Rise on a volunteer basis. What came out of the project won two Andy Awards.

The only problem was that the campaign never existed, except on paper and tape. In fact, the volunteers' efforts left Rise with such an ugly hangover that the company was reluctant to accept Bozell & Jacobs' similar offer.

Rise public relations manager Beth DePoint recalls that the volunteers "went on the premise that we were a poor group of handicapped people and please help us because we need the work. It was so demeaning and it was the complete antithesis of what we wanted the public to view us as."

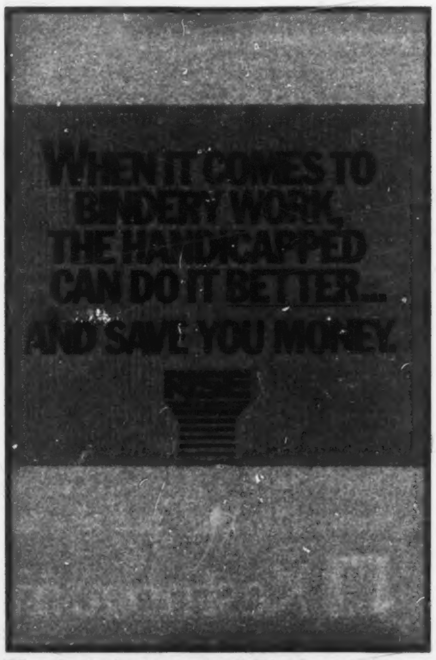
Even worse, it would have cost Rise more than $100,000 to implement the campaign—an unrealistic expense for a company with a total annual operating budget of only about $1 million.

"It made me wary when Bozell approached us," says Ms. DePoint. "I'd been stung before. But they were so enthused and impressed with what was going on here that I thought we'd give it a shot. And as it went along they were so on target with the thing we wanted to project that I can't remember ever having to ask them to change a word."

The approach chosen by writer Rod Kilpatrick and art director Julie Vanatta was actually a bit sly—almost like a politician who says, "I'm running on the issues, not on the fact that my opponent was once convicted of tax evasion."

By stressing that Rise wasn't trying to get work because many of its employes are handicapped, the campaign reminded potential clients that they *were* handicapped.

Rise "suggested we completely sidestep the issue of them being handicapped," says Mr. Kilpatrick. "It seemed to me that they had to address the whole matter of them being handicapped. They had to be proud of it, but they had to get the people to notice their substantial work."



WHEN IT COMES TO BINDERY WORK, THE HANDICAPPED CAN DO IT BETTER... AND SAVE YOU MONEY.
RISE

The fact that most of Rise's employes are handicapped was presented as an asset rather than a liability.

And so the result was a campaign that pleased different people for different reasons. The Caples Award committee was impressed by the creativity. The Rise people were impressed by the honesty of the image.

And the targets of the mailing? The fact that six of the 105 who originally got the package hired Rise indicates the campaign worked.

Dave Olson, who runs a print shop in St. Paul, got the package the other day and quickly asked Rise to bid on a project.

"It was very informative," says Mr. Olson. "It really caught our eye. It actually shows you what they do. I'd never seen a piece like this before, one that has this much work put into showing what they do."

The way Mr. Olson tells it, his interest was piqued by pragmatics, not creativity. But, then, creativity isn't supposed to hit people over the head. When it does, it's called pretension.

—*M.H.G.*

Brokers making lists and checking them twice

While interviewing a source for this story, Ms. Norris received a second telephone call through her "call waiting" feature. She put her source on hold, only to be interrupted by a local builder who wanted to congratulate her and her husband on the purchase of their first home. "We can offer you remodeling inside or out," the cheerful voice told her.

In answer to her question, the caller explained he had gotten his sales lead from the voter's registration list of new additions in her precinct. After explaining she was not now in the market for remodeling, Ms. Norris returned to her story on solicitation by lists and phone.

By Eileen Norris

So, you say you have a pink flamingo tattoo to sell and you think the readers of *Dirt Rider* magazine might be interested? Maybe you want to reach a bunch linked simply as "gamblers from Atlantic City" because you know they would love the tabletop slot machine your company is peddling?

Or, perhaps your company has a miniature solid gold egg that could be a dandy paperweight for the high-ticket buyers at Neiman-Marcus or the 25,000 reported millionaires in the U.S. who subscribe to *The Robb Report*. Where *do* you go?

To the experts, my friends. No feat is too big (or strange) an order for the mailing list business, which has logged a lot of names and addresses since its unremarkable debut in 1872. That was the year a fellow named Aaron Montgomery Ward mailed out a one-page catalog to a list of midwestern farmers. Today, Montgomery Ward & Co., now a giant retailer and mail-order cataloger, is one of the few businesses that steadfastly refuses to rent out its customer mailing list.

But mailings lists are big, big business. Like Hollywood stars with agents, mailing lists have managers and brokers to see that their "star" is rented out on a steady basis. Companies are even starting to count on their rental lists as operating income, not the little splash of petty cash formerly tripped over at the end of the fiscal year.

In the last five years, the mailing list business has become increasingly sophisticated, computerized and targeted. One list broker contends that the "right" mailing list accounts for 60% of the sale. The actual item being offered is only 30% on the importance scale, and the copy in the message only a mere 10% of the sell.

Are you looking for the owner of this slipper?

CALL TOLL FREE
AMERICAN LIST COUNSEL, INC

Targeting the right audience, such as the proven mail order buyers touted in this ad from American List Counsel, is becoming more important.

"Lists *can* be extremely reliable, depending on the work that's put into them," says Marcia Cinamon, president of Cinamon Associates, a direct mail/reponse company and list broker in Brookline, Mass. "But you have to go beyond what is available," she points out. "You have to be a good detective, and creative."

Because list cards detailing what is available for rent go to all of the 100 or so estimated list broker companies in the country—they are the middlemen between the list owner and the mailer—any company using a broker should expect much more than just getting a list of the available lists, experts say.

"No one broker or list manager has an edge over the other," says Steve Millard, president of the Peterborough, N.H., company bearing his name. "We all have access to the same mailing lists. The big thing is knowing what 'selects' to look for in the list. Over the years, a list broker will accumulate facts and experience that the client just won't have. The client may know what lists are available for a particular mailing, but I know what list or lists will probably work," he says.

A list broker's job is to cull through information to get at the client's audience profile and then came up with recommendations for a particular mailing, says Ralph Stevens, chairman of the newly formed Mailing List Users & Suppliers Assn. (ML/USA) and president of Woodruff-Stevens & Associates, a list management company in New York.

"It's a whole art and science," he says. "And you just don't try one list. A list broker should come up with 15 to 20 lists, each of which will have its own dynamics. A large-scale mailer may want to try 30 different lists or test each list by sending out to 10,000 or so on each one."

> **"A large-scale mailer may want to try 30 different lists or test each list by sending out to 10,000 or so on each one."**

A business or organization wanting to rent a list should ask the list broker or manager when the list was compiled and tested, when it was maintained and what kind of performance rate it has, Ms. Cinamon says. "With a direct response list for mail order, one would want to know if those customers ever bought through the mail before, how much was spent and what products were purchased," she says.

Targeting the right audience and customer is becoming increasingly important as rising mailing costs and intense competition force marketers to zero in on their most likely prospects much more precisely, says Jack Oldstein, president of Dependable Lists, New York.

"With the average mailing piece costing more than 25¢, it's simply not cost-effective to prospect broadly without extensive research, consultation, testing and analysis," he insists. A list broker should be able to come up with a mailing list that closely resembles the profile of the audience the mailer is attempting to reach, Mr. Oldstein says.

"A mediocre mailing package sent to an excellent list will generally prove more profitable than an excellent mailing package sent to a mediocre list," says Mr. Oldstein. "But the best bet is a combination strong offer

Target Your Market

When you want to make a "killing" in the 13 to 35 demographic market, "set your sights" on custom imprinted wearables from the T-Shirtery Inc. We also offer custom computerized precision embroidery on finer garments.

THE T-SHIRTERY INC.
1200 Menlo Drive Atlanta, Ga 30377
404-351-9850 (inside Ga.)
Toll Free 800-241-1062

and strong list," he adds.

With all this seeming attention to list planning, why do so many consumers have stories to tell about being on the receiving end of inappropriate mailings? Those in the business don't seem overly concerned by this issue and tend to view it more as "rare exception" than common occurrence.

Speaking from a broker's perspective, Mr. Oldstein says, "If a piece of mail is supposed to go to 'new mothers' and it goes to single people, the mailer will be furious! Remember, the mailer has a stake in finding the proper audience. The mailer would be out on the street corner selling apples if he sent pieces to the wrong audience. And the consumer wouldn't get mail from that company any more because it would be out of business."

But, misdirected mail is a reality, Mr. Oldstein admits. Sometimes, he says, consumers are to blame.

"For example," he says, "somebody wants to give a donation to Ronald Reagan so they send in a letter and call the donor 'Sam' something or other. That's their dog's name. Well, another company buys the fundraiser's list and sends out a 'Dear Sam' letter and it goes on and on. Each piece of mail costs about 45¢ to print and mail, so nobody in this business wants to mail to the wrong person."

"If a piece of mail is supposed to go to 'new mothers' and goes to single people, the mailer will be furious."

Occasionally, a name will go astray or a mailer will send to the wrong prospect, agrees Ralph Stevens of the ML/USA. "But, it's no more than a couple per cent of the time," he claims. "The more generic the product the mailer is trying to sell, the more chance there is that it will go to a broad—and possibly wrong—audience," he says.

There are usually some pretty specific reasons why mail goes to the wrong person, Ms. Cinamon says.

"A mailer, for example, will know that 90% of a particular list includes married couples, so they address the piece to 'Mr. and Mrs.,' taking the chance that a small percentage will not be married. Then, they hear from a fellow who calls and says, 'I'm not married and never went to be married—I'm gay.' "

The other way the public gets misdirected mail, she says, is when consumers fail to try to correct mislabeled mail. For example, she says, "We'll hear from a woman who says, 'Don't you know my husband is dead?' But what happens is the woman leaves his name in the telephone directory because she's afraid to live alone or she still contributes to his college alumni association, in his name, because she doesn't want to stop receiving the newsletter or magazine they send. The computer doesn't know this man is dead."

Waste, she contends, is truly the exception. "The other reality is that some lists are just cleaner than others," she says.

The Popcorn Factory, a Lake Forest, Ill., mailer that sends out 3 million to 5 million catalogs every year, hears from a few people who want to be dropped from its lists, says Nancy Hensel, general manager, but she adds, "We've never had hate letters from people who despise popcorn or anything like that. If

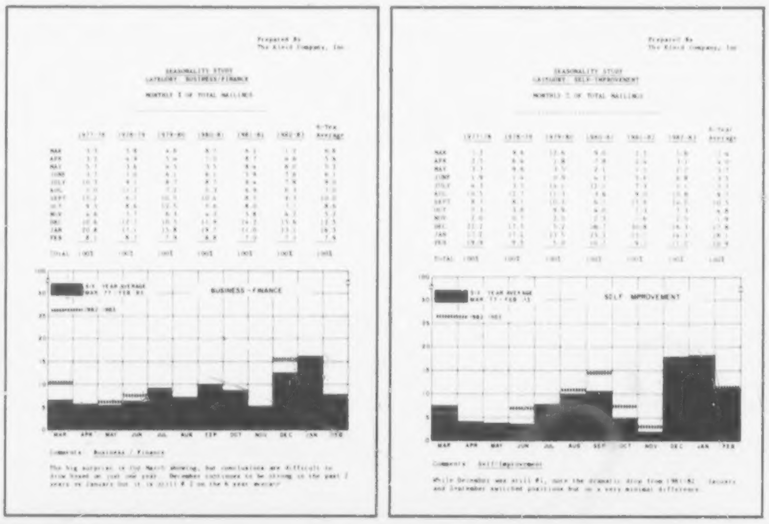
Kleid Co. has put its databank to work figuring seasonal trends in direct mail, including studying consumers interested in self-improvement and business/finance.



When it comes to paper, if you want more to weigh less...

THINK LIGHTER

Thinking light about paper is not a new idea. The search for high-performance, lightweight coated printing paper started over 30 years ago. The rising costs of postage and distribution for mass circulation magazines made finding such an alternative an economic necessity.

That's when St. Regis, working directly with these magazines, began to develop lightweight coated papers with all the quality and printability of the magazines' regular stock. It was a gradual and dramatic breakthrough as basis weights dropped from the standard 47 lbs. to 34 lbs. Today, of the 25 largest circulation magazines using lightweight coated paper, St. Regis supplies all but one.

Others have also cashed in on the lightweight technology. Catalog and direct mail merchandisers, directory publishers, producers of mass circulation newspaper inserts have all been part of the movement to think lighter about paper. And why not? Lighter weight paper equals lower paper costs and lower shipping and postage bills. With big increases expected in 2nd and 3rd class mail, it pays even more to think lighter. For you, those savings can mean more circulation reaching more people and creating more opportunities for sales.

Today the market has shifted and supplies are tight. And it's not easy to get all the paper you want. It will take time for supplies to ease and St. Regis is planning for future capacity. In the meantime, thinking lighter is our long-term strategy and it might be a good idea for you, too.

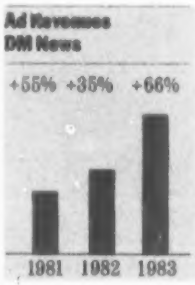
DM News is the only direct marketing publication with an audited circulation.

The hottest area of advertising and marketing is direct marketing - targeted marketing that produces a measurable response. From catalogs and direct mail to print, telephone and television, direct marketing is moving all kinds of goods and services: magazine subscriptions, computers, hotels and travel, home furnishings, cosmetics, financial services and everything in between. DM News, the only newspaper of direct marketing, has this field covered.

Who reads our paper?
26,203 professional marketers and their agencies. And, in an independent survey of readers of direct marketing publications, members of the Direct Marketing Association said they preferred DM News two to one.

What recession?
DM News ad revenues are up an average rate of 52% a year over the last three years. If you have anything to do with media planning, you know results like that can mean only one thing: Our readers are reading, and they're buying.



DM News readers buy.
When our 26,203 readers stop reading, they buy. It's their job to buy direct response space, mailing lists, computers and computer services, advertising and marketing services, telephone marketing and all kinds of printing.

Lists

(Continued from Page M-35)

someone asks to get off our mailing list, we clean their name out of our file."

The Chef's Catalog, a Northbrook, Ill., mail-order catalog operation selling professional restaurant equipment for the home chef, never has had any complaints from consumers about receiving a catalog says Marshall Marcovitz, president.

"If people are interested, they will order. If they're not, they won't order or call to complain," he says. The Chef's Catalog goes out to 5 million cooks every year.

Mailers and brokers alike agree that careful selection is the key to effective mailings. By selecting the right list of direct response names, an offer can be mailed to people who have by some action revealed an associated interest, says Rose Harper, president of Kleid Co., a leading New York list broker.

"Today, we have to supplement our demographics with something more—life style," she explains.

"We need to have a much clearer picture of who our customer is. We go about getting this information by using techniques that will zero in on the who, what, where, when, why and how of our markets and target our mailings accordingly," says Ms. Harper, who has been using a computerized databank to help get at the answers.

Kleid even has put its databank to work to figure out the seasonal trends in direct mail and, for instance, what month or season consumers interested in self-improvement or business/finance are most likely to buy by mail.

"For example, to sell toys, the lists selected should reveal the presence of children in the family because these response names have bought juvenile books, publications and/or 'parent' products. Lacking the presence of children in the home, a mailer might luck out one in 15 or 20 tries—and that's expensive. Today's typical mailing represents an investment of about, on average, $275 per thousand names. On a test of 5,000 names, that is $1,375," Ms. Harper says.

The cost of buying a rental list averages about $30 to $40 per 1,000 names, but the price can climb up to $125 per 1,000 names for those hard-to-get, likely-to-buy prospects. The mailer pays for the costs of mailing, but the list owner actually pays the list broker 20% commission on the transaction, which helps explain why it's profitable for brokers and managers to recycle lists to various mailers.

There is even evidence today that companies are starting to count on the income that is generated from renting lists.

Says Don Rappaport, chairman of the American List Counsel, a Princeton, N.J., company, "When I started in this business several years ago, list rentals were found income; now it's part of the operating income for many companies."

> **"In this world, nothing is perfect, so you try to reach as many as you can and try to use the best lists."**

There is also an increasing interest in mailing lists on the part of advertising agencies, sources say. But while Mr. Rappaport sees shift in emphasis "from creating the package to who it is reaching," he doesn't think "ad agencies use list brokers and the selection process enough."

Agencies almost are being forced to use mailing lists as a form of media for their clients, Mr. Oldstein says. "They are using lists because their accounts are asking, 'What about direct mail?' "

But part of the reason for not depending on mailing lists is because the good lists are overused, counters Phil May, vp-general manager at Cramer-Krasselt/Direct in Chicago. But he concedes: "In this world, nothing is perfect, so you try to reach as many as you can and try to use the best lists."

The biggest problem for direct marketing agencies that want to use business-to-business lists is that they are just not accurate, contends Gail Chrystal, president of the Chrystal Direct Marketing Group in Arlington Heights, Ill.

"If I had a 'wish list,' I'd wish business lists could be more ac-

In six months we doubled a new client's catalog sales . . . In nine they were tripled.

We'd like to help you do the same.

Selling products through catalogs has become really big business in the billions of dollars annually in the United States

But there are companies going broke in this expanding business, too. Because successful catalog selling does not happen by accident. If you have a catalog sales division now (consumer, business or industrial), or are considering catalogs as a means of expanding current sales you can succeed or fail based on the quality of professional help you get. And you don't have to add a six figure payroll to set up an entire department either

Your catalog must justify its existence on its own. It needs a theme, a purpose, a targeted audience, and to offer savings and convenience not available elsewhere

Then there are the considerations of product selection, positioning, catalog size, proper graphics and color, selling copy, 800 number and so on

YOU CAN HAVE THE BEST CATALOG IN THE WORLD AND IT CAN STILL FAIL

if you don't send it to the right people
Right! You've got to know the right lists. Which ones work. Which ones don't. And what about your customer file? How is it segmented? When was it last cleaned? Have you weighted it for R/F/A? Should you merge/purge?

In short, if you want to increase current catalog sales or start a new catalog selling program, call the professionals. We can help. We've been helping make clients successful for more than 25 years

curate and I would be the one to figure out how to do that," she says. "Business lists just are not as segmentable as consumer lists and the information tends to be wrong, what with the high rate of companies going out of business.

"There is a high rate of mail that gets returned or is undeliverable," says Ms. Chrystal.

According to Ms. Cinamon: "You have to calculate in the undeliverable rate. I recommend taking 15% right off the top in a mailing and basing the response rate on 85%. It's also important to look at the product that is being promoted geographically. Lists have to be tested for representative states."

While mailing lists may not be the panacea brokers might like to think, they *are* being used more and more by advertising agencies.

Ms. Chrystal says she uses "a list broker because it takes a lot of work to get the right list and it doesn't cost me any more than if I went directly to the list owner. I may know the top 10 lists," she says, "but I need someone to tell me which ones will work and take responsibility for that decision."

One large area of growth for mailing lists has been with telemarketing companies, which can find out "within an hour's time" just how good a mailing list really is, says Eugene Kordahl, president of the American Telemarketing Assn. and president of National Telemarketing, Randolph, N.J.

"We interact and talk with lists. Our lists tend to be better than nontelephone lists because they are current and accurate."

"We interact and talk with lists," he says, explaining that telemarketers have a dialog with a list, while mailers are engaged in a monolog. "Our lists tend to be better than nontelephone lists because they are current and accurate," Mr. Kordahl says.

The industry is growing at a break-neck speed, which is why the Mailing List Users & Suppliers Assn. formed in September, 1983. "Our members are people who use mailing lists to earn their livelihood," says Mr. Stevens, chairman of the 75-member association.

One of the first items the association discussed at an early meeting was the issue of the Internal Revenue Service's use of mailing lists to "flush out individuals who are not paying their taxes," Mr. Stevens says.

Although a formal stand hasn't been taken by the group, it is clear that the ML/USA believes it is wrong for lists compiled for marketing, fundraising or other commercial purposes to be used by the government or law enforcement agencies as tools of coercion or compliance.

"The Privacy Protection Study Commission of 1975 concluded that the mailing list industry is in the business of supplying audiences rather than information on individuals. We believe that using lists to obtain information on specific individuals is clearly in conflict with the safeguards espoused by the U.S. Constitution and is a violation of privacy," Mr. Stevens says.

"We are not policemen; nor are we moral guardians. However we feel that the list industry and the entire direct mail business will be the ultimate victims unless we assume responsibility for the people whose names we rent," Mr. Stevens says.

Direct mail volume (pieces)

In 1983, there was a 10.7% increase in the volume of direct mail sent. In 1982, 40.4 billion pieces were mailed. In 1983, that number rose to 44.7 billion pieces.

Categories

When you break down the direct mail volume by categories, you find that 11.5% of that was first class mail generated by direct marketing. Not surprisingly, 3rd class mail comprised 68%, with 30.4 billion pieces. And non-profit generated 20.4% of the total.

Source. Kobs & Brady Advertising, Chicago.

Besides the IRS issue, the association also plans to tackle other issues that it considers important, including a mailing list legislative watch, the formation of suggested standards and keeping on top of legal issues. Security is another major concern for mail list users and suppliers, says Mr. Rappaport of American List Council.

Because 99% of list rentals are for one-time use only, list owners and managers take extra precautions to ensure that mailing lists are not stolen.

Most list brokers or managers will seed decoy names in a list and have an employe who tracks those "seeds" to make sure no one is stealing a list or using it more than the one-time rental agreement authorizes, Mr. Rappaport says.

"For many companies, the mailing list is its most valuable asset." ■

Goals

(Continued from Page M-10)

"With all the talk about telemarketing," Mr. Kaden says, "it would seem that the use of telemarketing to produce additional sales would be a major opportunity." But the 28% that felt telemarketing will be extremely important in the next 12 months belied the results he expected.

It's the business marketers and executives in financial fields who plan a greater use of telemarketing, the survey indicates. The catalog people see less value in telemarketing in the coming 12 months than the industry as a whole. Mr. Kaden surmises that "apparently, the more limited the market, the more marketers see an opportunity for telemarketing to make an impact.

"There seems little doubt," he continues, "that the use of advanced computer technology for database management is viewed by the industry as either an extremely or very important factor in 1984. If this trend holds, there is going to be tremendous competition for good computer people, and finding qualified people to assist in the database management field is going to be a problem for us as an industry."

Among other key findings:

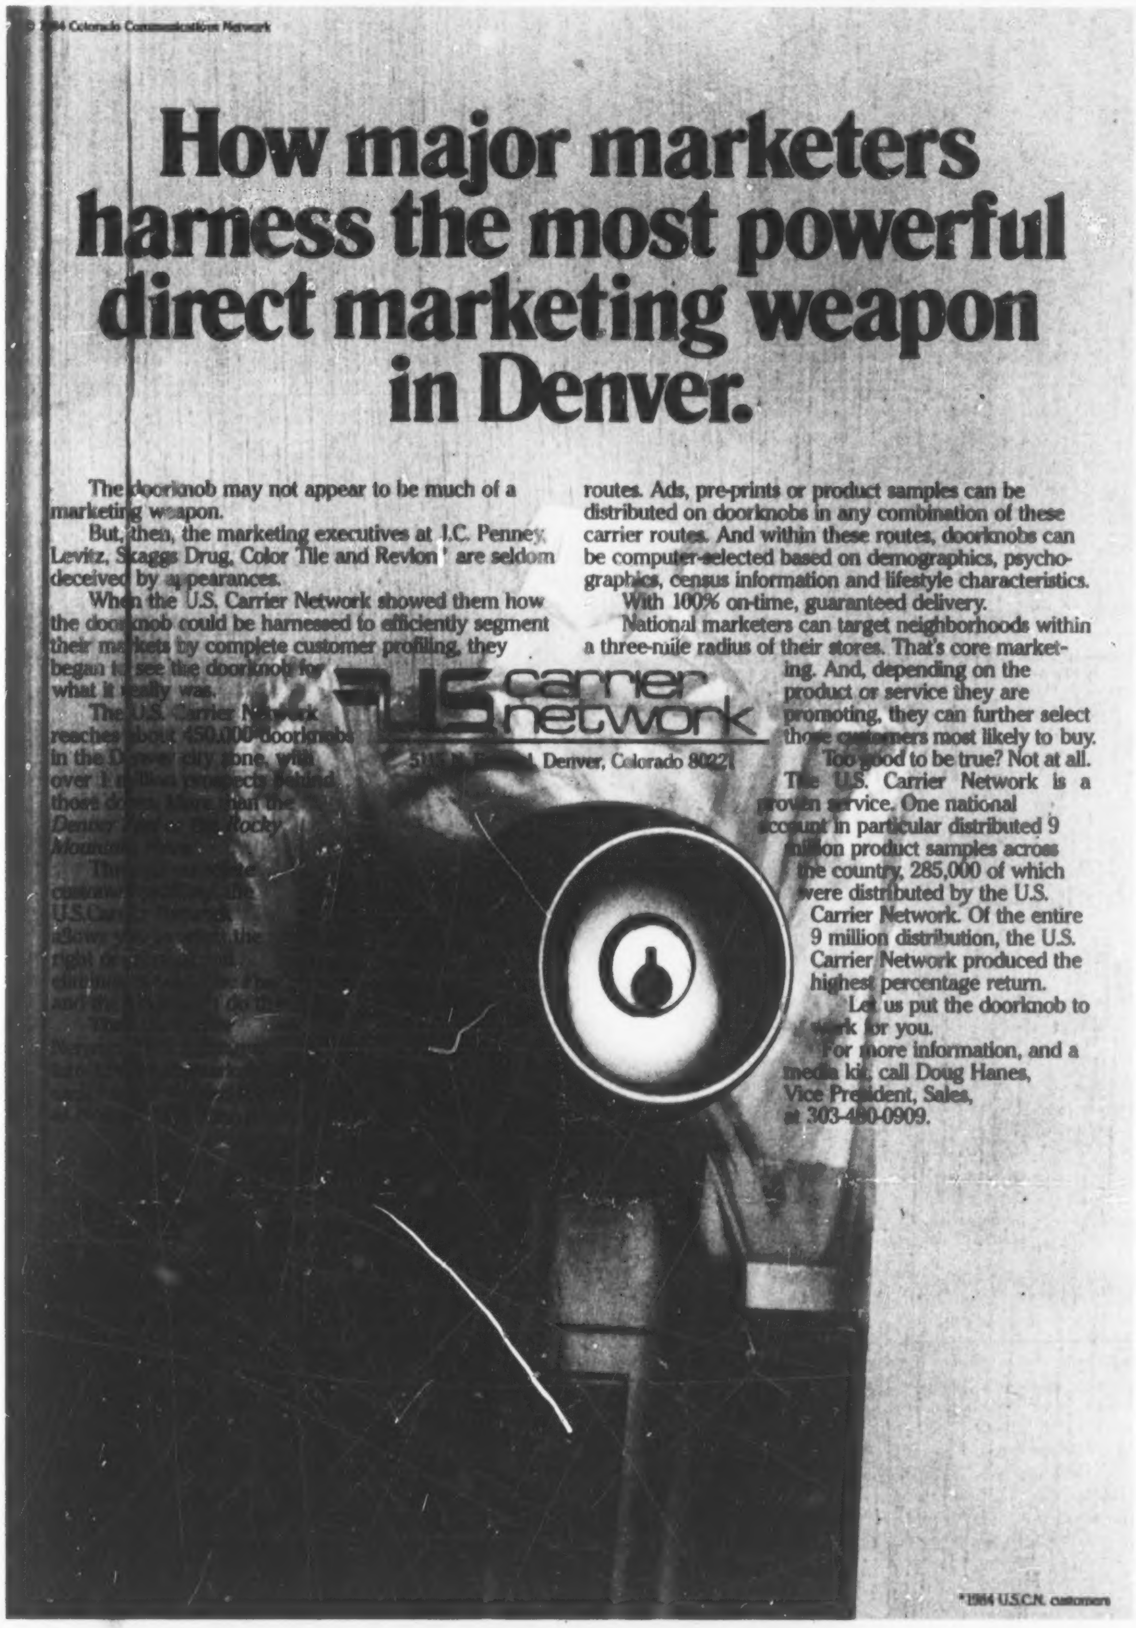
- Only 1% believe teletext will be of extreme importance in the next 12 months, and only 3% view electronic mail that way.
- Only 4% are planning to emphasize in-house direct marketing programs to train new talent, a finding Mr. Kaden finds discouraging. And only a small percentage are looking to direct marketing courses at colleges to provide better talent.

> **"The more limited the market, the more marketers see an opportunity for telemarketing to make an impact."**

- Getting a greater share of business from retail is seen as an extremely important opportunity *only* in the catalog business.

Comments Mr. Kaden, "I wonder as a group if we're not underestimating retail as a competitive factor, particularly in the latter part of the 1980s as an industry matures."

- Postage costs are a key worry for about 56% of respondents. Costs in general in such areas as printing and paper, as well as mailing efficiencies and better delivery systems are concerns.
- Strategic planning rated as of extreme importance to 43%, a finding Mr. Kaden thinks is very interesting. "We seem to be saying that as we grow more and more sophisticated and more mature, let's act more like sophisticated marketers."



© 1984 Colorado Communications Network

How major marketers harness the most powerful direct marketing weapon in Denver.

The doorknob may not appear to be much of a marketing weapon.

But, then, the marketing executives at J.C. Penney, Levitz, Skaggs Drug, Color Tile and Revlon* are seldom deceived by appearances.

When the U.S. Carrier Network showed them how the doorknob could be harnessed to efficiently segment their markets by complete customer profiling, they began to see the doorknob for what it really was.

The U.S. Carrier Network reaches about 450,000 doorknobs in the [illegible] city zone, with over 1 [illegible] prospects behind those [illegible] than the *Denver [illegible] Rocky Mountain [illegible]*

[illegible]

routes. Ads, pre-prints or product samples can be distributed on doorknobs in any combination of these carrier routes. And within these routes, doorknobs can be computer-selected based on demographics, psychographics, census information and lifestyle characteristics.

With 100% on-time, guaranteed delivery.

National marketers can target neighborhoods within a three-mile radius of their stores. That's core marketing. And, depending on the product or service they are promoting, they can further select those customers most likely to buy.

Too good to be true? Not at all. The U.S. Carrier Network is a proven service. One national account in particular distributed 9 million product samples across the country, 285,000 of which were distributed by the U.S. Carrier Network. Of the entire 9 million distribution, the U.S. Carrier Network produced the highest percentage return.

Let us put the doorknob to work for you.

For more information, and a media kit, call Doug Hanes, Vice President, Sales, at 303-480-0909.

Creativity

(Continued from Page M-11)

rect marketing.

And there may be something symbolic in the fact that the first writer to win the award—Mr. Kilpatrick—represents a bridge from the free wheeling days of Caples and Sackheim to the modern era.

Mr. Kilpatrick, who was going to be "an honest-to-God legitimate writer." wound up starting his career at a small Chicago mail order agency after deciding he didn't want to "spend a lifetime being poor but proud."

After moving on to Calhoun's Collectors Society in Minneapolis, he hit the big time—Bozell & Jacobs in Minneapolis. It was there that Mr. Kilpatrick teamed with art director Julie Vanatta for a direct mail campaign on behalf of Rise Inc., a Minneapolis company employing handicapped employes for its bindery work. This was the campaign that would win the Sackheim Award.

> **"That was really one person addressing another person . . . which we can do in direct marketing because it's so personal a medium."**

Like general advertising, the Rise campaign started out with an eye-catching headline—in this case a sticker affixed to a manila envelope that says: "*Some say the handicapped do as good a job as anyone. Nonsense.*"

A letter and brochure inside are wrapped in a binder that carries the promise: "*When it comes to bindery work, the handicapped can do it* better . . . *and save you money.*"

The brochure is a booklet done by Rise, showing examples of Rise's capability. Pages contain, among other things, labels, drilled holes, hand-folded corners, saddle stitching and glued attachments.

Mr. Kilpatrick's letter, carrying the signature of Rise's marketing vp, adopts the executive's persona in tackling the issue of using handicapped employes.

Dear Friend:

At Rise, my loftiest ambition is to make you forget who we are.

That may sound like a rather strange statement coming from a vice president of marketing. But maybe this story will explain what I mean.

A while back I was taking one of our long-standing clients—the operations manager for a major Twin Cities corporation—on a tour of Rise's facilities. (It was the same tour, in fact, that I'd *like to take you on.) I walked him through the assembly area, where we'd handled numerous jobs that were beyond the capacity of his own staff.*

We passed by the packaging division, where we'd saved the day more than once by tackling rush jobs on impossibly short notice.

Finally we paused in the bindery area, where we'd done things with paper that other binderies had said couldn't be done.

When the tour was over, he had only one comment. "It's kind of funny, Rick—but after all the jobs you've done for us, I'd totally forgotten that you work with the handicapped."

Of the 105 people who received the mailing, 10 responded. Six eventually hired Rise.

Emily Soell, president of Rapp & Collins in New York and one of the judges of the Caples awards, says the Rise campaign is an example of how creativity can make a difference in direct advertising.

"It was pure creativity to me," she says. "It was the words that did the trick. Because it wasn't a big fancy thing. The power of words work tremendously. And that was really one person addressing another person in the most meaningful way, which we can do in direct marketing because it's so personal a medium."

Of course, no one is denying that this new push for "creativity" will ever replace the old standbys—the starbursts, the You-may-already-be-a-winner, words like "Free!" and "Now!"

As a wider variety of major corporations begin to use direct marketing, it is becoming more than just a tool for instant response.

But as a wider variety of major corporations begin to use direct marketing, the medium is becoming more than just a tool for instant response. Says Ms. Soell: "When Chase Manhattan banks come to us with a project, they might say, 'We would like it to work, but if you have to make us look shlocky and project an image that we can't buy, we'd rather that it didn't work quite so well.' "

Still, there are plenty of professionals who believe that the medium has a long, long way to go. Says Tom Owens, the chairman of the judging committee for the Caples Awards: "I see islands of creativity but there's no mainstream movement [toward creativity] that I can see."

Mr. Owens, who is creative director of Publishers Clearing House, says: "I don't see any indication that creativity is taking over as a major force. You look at a DMA (Direct Marketing Assn.) meeting. If anybody gets up to speak about creativity, no matter how erudite the presentation, the first question that's always asked is, 'How do you get people to open your envelopes?' "

Still, appeals to basic instincts notwithstanding, advocates of the craft contend that the sudden legitimacy of direct response advertising, coupled with the eroding borders between direct response and general advertising, have wrought dramatic change.

"Ultimately, the superior creative product cuts through the advertising clutter, whether it's direct response or general advertising."

"The major improvement in direct marketing has come largely from the fact that what was once perceived as a business of technology and techniques has come back to what it really is: A business of, like all advertising, creativity," says Jerry Reitman, the president of Scali, McCabe, Sloves Direct Response.

"It's ultimately the superior creative product which cuts through the advertising clutter, whether it's direct response or general advertising," he says.

If anyone doubts the improved image of the medium, he need only observe the frenzy with which general agencies are getting into the action. Grey Advertising, for example, set up its Grey Direct Response unit four years ago with two people. Now there are 90, and billings of nearly $40 million. Ray Beauchamp, the creative director of the division, is among those who believe that the big agencies will elevate creativity.

"In the next couple of years I think you'll see a whole lot of breakthroughs in direct response because the field is getting filled up and the only way there's going to be a difference between direct response agencies is in creativity," says Mr. Beauchamp.

Mr. Kilpatrick is more outspoken: "The people who have been attracted to the field have for the most part been hacks. You either had the marketing people writing the ads and doing the layout because 'Anybody can do direct response advertising,' or there were writers and art directors who have not been good enough to do—quote—real advertising. We're just getting to the point where some of the most talented people are getting into the field."

Mr. Kilpatrick traces much of his own growth to his move to Bozell & Jacobs, where, he says, "I was exposed on a daily basis to some superb creative work. I realized that there wasn't a need for it to be shlocky—that the same people who could be influenced by brilliant creative work in broadcast or print advertising could be influenced by direct marketing advertising. I realized that it's no different just because there's a coupon at the end of an ad. Humans are humans and it's the same motivational button that needs to be pushed."

A mailing done recently by Mr. Kilpatrick and art director Nancy Rice at Fallon McElligott is an example of direct advertising that differs little from general print advertising.

The headline, over a pair of doors labeled "Morgue," says: "Announcing a startling new way to detect cystic fibrosis by routine examination. Instead of by autopsy." Where the piece did differ from print advertising is that it arrived in an unmarked black envelope that was nearly two feet high. And, of course, there was a coupon for those who wanted to attend a seminar introducing the product. That coupon got a response rate of 30%.

But not everyone believes the principles of general advertising enhance the art of direct response. Many direct response advertising veterans feel their craft is doing the positive influencing.

Mr. Caples himself, for 50 years a BBDO vp, says: "The big agencies gradually made a discovery: With direct response you can learn a lot of principles of advertising that can be applied to general advertising."

Indeed, Andi Emerson, one of the founders of the Direct Marketing Creative Guild, says the increasing role of the big agencies necessitated the guild. "It was my perceived need and that of hundreds of other people to help free the direct marketer from the encroaching sameness being superimposed on us by the advent of the general agency into the direct response business," she says.

Ms. Emerson and other veterans of direct response are wary of general advertising's soft sell approach—an approach they see creeping into direct response. Direct marketing people talk of the joy of measurement. Real talent, they'll tell you, is a 15% response rate.

"There's only one way to keep score," says Herschell Gordon Lewis, a direct advertising veteran who writes direct response copy in his Fort Lauderdale home.

"In other areas you can survive without the talent to force communication. But there's no court of appeal here. Your product either sold or it didn't," he says.

Mr. Lewis was one of those general advertising types him-

Dial 215-884-4252 and ask for Mort Adler

That's how easy it is to get in touch with a Direct Response expert!

Mort Adler has a lifelong record of success in Direct Response, embracing over 40 years in the business, including consultant work in the U. S. and abroad with several Fortune 500 companies.

Professionalism is the key
Under the umbrella of Morton Adler Associates we offer a full-service agency staffed by professionals whose creative talents can produce dynamic, successful Direct Response campaigns that work for *you*. Our expert service includes:

- Consulting, Marketing Strategy and Planning
- Compelling Designs and Visuals
- Powerful Headlines and Copy
- On-Target List Development

We deliver!
We deliver leads or buyers to you through the power of Direct Response, bypassing some of the uncertainties inherent in conventional advertising.

All at a unique price.
We have a most unusual pricing structure, too, making the services of Morton Adler Associates even more attractive.

Give Mort Adler a call.
Just dial 215-884-4252 and ask for Mort Adler himself. You're just a phone call away from discovering how Direct Response advertising can boost your business in ways you've only dreamed of!

Note: This list represents only those agencies who responded to a DMA request, made in 1984, for their full-year 1982 and 1983 billings. All figures were supplied by the individual agencies, which were asked to include only space and broadcast billings, billings for materials and services provided by organizations outside the agency, and capitalized agency fees.

Creativity

(Continued from Page M-65)

self once. He did a lot of broadcast work in Chicago. But then his biggest account went belly up and he opened up a little shop in suburban Highland Park and picked up his first direct business. The account was collector's plates.

"I didn't know what a collector's plate was," Mr. Lewis recalls, "but I trooped out to the company and wrote the copy and I got paid! I said, 'How long has this been going on?' "

That was 1974. Now, says Mr. Lewis, "I'm sitting here at my word processor, looking at my pool and spa, and I can't imagine doing anything else."

Mr. Lewis' success, like that of many old-school practitioners, rests on many of the traditional rules of direct response advertising. "Fear, exclusivity, guilt and greed," he says. "Those are the great motivators in direct response advertising."

But like Mr. Caples before him, he has the ability to assume the role, paint the scene, and sell the product—all at once. His brochure for Calhoun's "exclusive Theatre des Saisons" collectors plates—only 5,000 sets of the four plates were made—was written over the signature of porcelain manufacturer Frederick Haviland:

I shall tell you the story of the artist Bracquemond and how he came to paint the "Theatre of the Seasons"—four works of art representing Printemps (Spring), Ete (Summer) Automne (Autumn), and Hiver (Winter).

I shall tell you why only five thousand of each will be produced, and no more; and why, when those five thousand Haviland plates have been made, Felix Bracquemond's original art once again will be placed within the walls of the Haviland Museum and not again removed.

And I shall tell you why, in a lifetime that has spanned more than four-score years, for the first time I personally am adding my signature as an actual part of the backstamp of a limited edition porcelain plate, and why I shall not do so again.

The plates quickly sold out, at $100 apiece.

For the creative writer, the charm of a direct mailing is its length. "There are a lot of writers in general advertising who are brilliant creative thinkers but they view the body copy as something you throw out," says Mr. Kilpatrick. "But we've got to cover every base. We have to try to anticipate every question."

The narrative form favored by many direct response writers is as old as advertising, but as the medium evolves a shocking new technique is popping up: Humor.

> **"A lot of writers in general advertising, who are brilliant creative thinkers, view the body copy as something you throw out."**

It's a technique that the pioneers frowned upon. In his book *How to Make Your Advertising Make Money*, Mr. Caples warns: "Avoid humor. What is funny to one person is not funny to millions of others. Copy should sell—not just entertain. Remember, there is not one funny line in the two most influential books ever written—the Bible and the Sears, Roebuck catalog."

Mr. Caples might not approve of a mailing recently done by Rapp & Collins for Chase Manhattan Bank.

It's a pamphlet with the headline: "Chase knows what you've been waiting for." The pamphlet, folded like an accordion, gets bigger and bigger as its unfolded. Finally you see a whimsical picture of a man gliding past one of those long ropes that banks use to herd in the customers. There's no one else in line.

Even direct mail advertising, it seems, can be fun. ■

Coming

Magazine, which next appears Thursday, April 26, when ADVERTISING AGE begins publishing twice weekly, will regularly be a part of the midweek edition. The special report will focus on the Business Press.

No, we're not selling correspondence courses. Or matchbooks. We're selling advertising. And the "big money in advertising" we're talking about has to do with getting the most out of your advertising dollar. That means, in large part, choosing the right market and, of course, the right medium in that market.

Which brings us to us. The Pennysaver. Southern California's Direct Advertising System. Of course Southern California is one of the nation's premier "big money" markets. And the Pennysaver Direct Advertising System is one of the smartest ways to penetrate that market.

THERE'S BIG MONEY IN ADVERTISING
Pennysaver™

At the center of our system is the Pennysaver weekly shopping publication, which reaches almost two million households in Los Angeles, Orange, Ventura, Riverside and San Bernardino Counties—and boasts 98% saturation in its covered market areas. Add the versatility and cost-efficiency of zone buying for geographic and demographic targeting as well as a complete set of direct marketing services—including research, mailing lists, and inserts—and you have a product that will both **make** and **save** you big money.

Call us today for a complete Pennysaver Direct Advertising System media kit.

(X) Represents the number of times published each year; publications are monthly unless otherwise specified. A. Sectional linage included but prorated to circulation of regional editions. B. 1983 figures are comprised of a combination of 30-in. and 80-in. pages; 1984 figures are comprised of only 30-in. pages. C. 1983 figure reflects four regional editions; 1984 reflects national edition and two regional inserts.

Farmers reaping benefits of high tech

By WENDY KIMBRELL

The trappings of high technology—computers, telemarketing and the worship of efficiency—may be the farm lore of the rest of the century.

Speakers brought home that message at the recent National Agri-Marketing Conference in Kansas City. The farm and farm suppliers of the future, they said, will have to depend on the culture of technology to better market their products.

Don Edson, vp-administration, Federal intermediate Credit Bank, Wichita, Kan., said that farmers will begin to need more knowledge of computers and technology.

As commercial farmers become more efficient in management practices, they will look to outside groups and organizations for assistance.

"Many people are hoping for a return to 'the good old days' when farming was a way of life," Mr. Edson told the conference's 500 attendees, "but the future doesn't seem to hold this kind of agriculture in its crystal ball."

One development of technology, telemarketing, already is beginning to make a distinguished name for itself in the farm industry.

Paul Brower, vp-communications at Gold Kist, a farm supplies marketer based in Atlanta, said telemarketing, as well as direct marketing, are vital because the role of mass media for agrimarketers is changing.

Twenty years ago, he said, there were 10 million farms in the U.S. Today, there are 2.43 million.

Forty per cent of those farms provide 90% of the nation's produce by dollar value, and it is that 40% to which marketers gear their advertising. Both telemarketing and direct marketing efficiently can target this group.

Roger Bullet, director of sales at Hesston Corp., a farm equipment marketer in Hesston, Kan., explained the benefits telemarketing has provided his company.

"Before we implemented a telemarketing department into our operations, our field salespeople were spending the majority of their time with the dealers that were generating the most sales," he said. "The low-volume dealer wasn't getting anything more than a once-a-month visit from his field rep, and that was primarily just to audit his inventory."

Mr. Buller said the program helps not only in increasing support to low-volume dealers, but also will improve asset management and reduce overhead.

All of these modern marketing techniques will be played out against fundamental changes in the nation's agricultural structure, according to Mr. Edson.

Citing a study conducted by a committee of the Production Credit Assn., he said the number of small, private farmers will begin to increase by the end of the century, while the number of large, commercial farmers will decline.

However, the number of commercial farmers with a stronghold in the industry will get larger, Mr. Edson said.

In addition, the trend of migration to urban areas reversed in the 1970s, he said. Today, more people are moving to rural areas and setting up productive styles of life. Rural areas in general will begin to demand more community services.

"They aren't going to be the kind of sleepy communities we think of now when we think of small towns," Mr. Edson said.

As technology introduces new production techniques and increased management ability to farmers, their ability to increase their production with the same amount of resources will be enhanced.

Although in the past increased product yield has proved detrimental to prices for farmers, trends show that by the year 2000, farmers will be able to put a tighter control on supply and demand, according to the study.#

'New you' beauty pageant

(Continued from Page 3)

tivewear" rather than swimsuits. The tv finalists will be tracked periodically from the outset to see how they lost weight. A video capsule of each contestant's progress will be produced, and some will be used during the tv special.

Mr. Gutwirth hopes to book a major singer as the pageant entertainment plus celebrities as presenters and judges.

Marketers of diet soft drinks and low-cal foods are being approached as possible pageant sponsors. Mr. Gutwirth also is making presentations to cosmetics, fashion and automotive companies, and is lining up "an official airline."

Mizlou will sell 10 national minutes, while the stations will have eight local commercial minutes.

Mr. Gutwirth, a former director of special projects and marketing for ABC-TV who recently shed considerable weight himself, plans to publish a tie-in diet book.

Looking ahead to the 1986 pageant, Mr. Gutwirth said "The New You" may accept international contestants and include women 30 to 50 years old, and men as well.#

the advertising market place

An Equal Opportunity Employer

Sales

SPACE SALES

Vance Publishing Corporation, nationally known in business publishing and headquartered in the Chicago suburbs, is seeking an aggressive individual for advertising space sales on MODERN SALON, one of our leading monthly magazines (serving the professional salon industry). The position will be based in our Southern California office. Relocation expenses will be paid for the right individual. This is a major territory with tremendous growth potential—minimum overnight travel.

Candidates must have a minimum of three years experience in advertising space sales with a proven record of sales growth. We offer an extremely comptetitive base salary plus commission as well as a comprehensive benefits plan which includes company paid medical, life and disability insurance, profit sharing, a liberal vacation plan and more.

Send us a letter selling yourself and include a resume (must include salary history and requirements to be considered/no phone calls will be accepted) to:

Personnel Manager
Vance Publishing Corporation
400 Knightsbridge Parkway
Lincolnshire, IL 60069

CREATIVE DIRECTOR

Art or Copy

Creative Independence You'd be the creative boss for the St. Louis office of a New York agency.

Creative Challenge Blue chip accounts. Over 20 different product lines.

Creative Variety Communicating with architects, engineers, molders, farmers, veterinarians, picture framers, politicians, truck drivers, and more.

Creative Requirements A brilliant conceptual mind. Ability to motivate and supervise creative thinkers. Comfortable with clients. Time divided between creative and supervisory roles.

Please send your resume, and copies of your five best print ads, to:

Bill Rice, Muller Jordan Weiss, 7711 Carondelet Suite 704,
St. Louis, MO 63105 (314) 725-4992

Housewares push new features

By WENDY KIMBRELL

CHICAGO—Marketers at the 80th National Housewares Manufacturers Assn. exhibition here last week focused an array of new-product introductions upon a common philosophy: Consumers are willing to pay more for products with value-added features.

The aura of excitement prevailing among buyers at the show was led by small electric appliance marketers offering combination-product sets and extra amenities.

"There are so many marketers in the housewares industry offering new products, the only way to survive is to offer preemptive features offering additional value," said Carol Hubregson, marketing communications specialist at General Electric Co.'s housewares business division.

Kevin O'Malley, director of marketing programs at Allegheny International's Sunbeam Appliance Co., said, "Everything we see in consumer research says that consumers want value and they will pay more for value-added features."

Bissell's new Carpet Machine Plus, a new carpet cleaner, features an attachable upholstery cleaning head as an added convenience. "We've doubled the uses of the product for the consumer," said Jack Hughes, vp-sales. "The more uses you can give them, the more justification there is for them to own it."

The new cleaner, priced at about $160, is scheduled for distribution Sept. 15, supported by a dealer co-op tv campaign produced by Chickering & Associates, Grand Rapids.

Panasonic introduced an all-new Wet/Dry battery-operated, immersible women's shaver, as well as three extensions to its existing Mr. Whisk line of men's wet/dry shavers.

A tv campaign for the men's line will begin in November, with a 30-second spot themed "We often even amaze ourselves." Grant-Tandy Ltd., Toronto, produced the spot, and Ted Bates Advertising/New York, will handle.

Among the products debuted by North American Philips' Norelco consumer products division, in the largest collection of new-product introductions in the company's history, was a new six-item Travel Care Collection, featuring a fabric steamer, a dual-voltage spray iron and a selection of adapter plugs. The items—all compact—are sold individually, but come in a collection series for added convenience. The line is scheduled for fall.

"We think the customer is looking for unification as well as upscale features," said J. Richard Gonzales, vp-advertising. "Instead of just stressing individual products, we are stressing product lines."

Mr. Gonzales said the Travel Care Collection will be supported by a print campaign. He said the ad theme will be "For where ever you travel, home or away."

Mr. Gonzales also said Norelco will introduce five additional travel products at the October housewares show. McCaffrey & McCall, New York, handles all advertising for Norelco.

Norelco also showed its new nine-piece Satin Collection, a personal-care product line featuring a removable, washable intake filter on hair dryers and compact collection packaging, along with its Man Care Collection, a line of men's personal-grooming products.

Other new products with value-added features Norelco introduced at the show were its three new women's cordless electric razors; three new drip coffee makers featuring space-saving amenities; a rechargeable hand-held can opener, and a new Clean Up Machine that converts into a rechargeable flashlight.

Some marketers followed the lead of others that already have proven consumer demand for more features.

Scovill Inc.'s Hamilton-Beach division, for example, added 19 new products with value-added features to its small electric appliances lines, including three new under-cabinet coffee makers and an under-cabinet can opener. Those products will compete with GE's under-cabinet line, originally introduced in 1982. Its new Quik-Cup beverage maker that heats 12 ozs. of water in 90 seconds, will compete with Sunbeam's successful Hot Shot.

HB also showed such value-added items as a cordless electric knife; a new Popaire 5 gourmet corn popper, and four new blenders, including seven and 14-speed models with glass or shatter-proof containers.

Tom Albani, recently appointed group vp at Black & Decker's housewares group and formerly general manager at GE's housewares unit, said GE is concentrating on marketing and selling value, rather than just hardware.

"I have tried to be true to having no more fads or gimmicks in the products GE offers by placing more emphasis upon value," he said.

GE introduced 12 new appliances, including a travel dryer with an adjustable "telescopic" handle; a Soft 'n Curl Dry/Mist Curling Iron that helps prevent damage to the hair, and a slimline electric knife.

Adding hardware to new products, however, is not the only way to enhance their value.

Regina Co. introduced the new Regina Steemer Carpet Cleaner that consolidates all necessary cleaning functions into one compact unit for added convenience.

The item, with a suggested retail price of about $80, will be supported by a national tv campaign featuring two 30-second tv spots themed "Clean your carpets a whole new way," scheduled to be launched this fall. Grey-North here handles.

■ Libbey Glass, a Toledo-based marketer of table glassware, introduced a two-year "no-chip warranty" to guarantee its glassware against rim chippage when purchased at retail.

"Our research indicates that a consumer will be willing to pay more for a warranty," said Raymond Balbach, retail marketing manager.

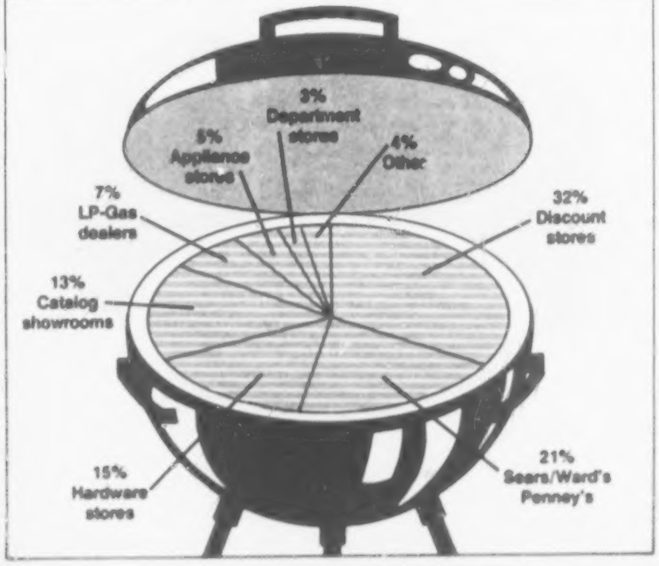
For Farberware, value-added products are replacing rebate offers, according to a company spokesman. "We're building to enhance the item," he said. "When consumers see a rebate offer, they say to themselves, 'Gee, that's a nice deal, but I'll never send it in.'"

Instead, Farberware's new Mixer—the company's first entry into the standup mixer category—includes a stainless steel mixing bowl in its suggested retail price of $250. As a separate accessory, the bowl is sold to retailers for $30.#

Chicago reporter Janet Neiman also contributed to this story.

Barbecue grill sales by outlet

When it's time to buy a charcoal grill, consumers usually head to discount stores or large-volume retailers to make their purchase. And, more often than not, they buy the grill in April. Total sales topped $345 million in 1983, a 23.7% jump from 1981, when sales tallied $279 million. ***Source: Radio Advertising Bureau and*** **Merchandising.** ***Chart by Amy Palmer.***



West Bend decides to buy Precor

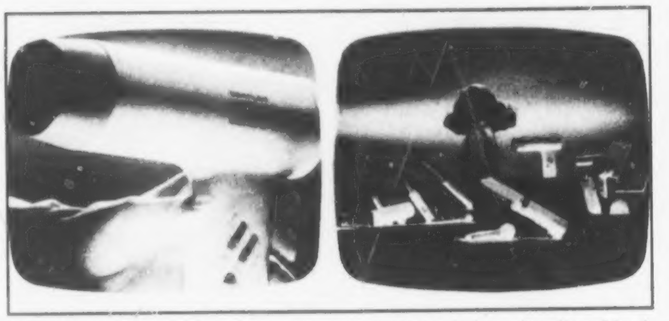
WEST BEND, WIS.—West Bend Co. has agreed in principle to acquire Redmond, Wash.-based Precor Inc., a marketer of exercise equipment, as part of its "strategic plan to develop a major presence in the fitness industry."

Precor markets rowing and running machines and exercise bicycles through specialty stores. Under the terms of the agreement, Precor will be run as an autonomous division of West Bend.

The current Precor staff will be maintained, and the company also will keep its own distribution networks.

West Bend entered the exercise equipment business last year (AA, Aug. 15), when it introduced the Total Gym exercise system.

New products the company was introducing at the National Housewares Manufacturers Assn. exposition last week included three sports stopwatches, a jogmeter and a pedometer.#



North American Philips Corp.'s Norelco division is boosting its ad budget 23% this year to $30 million. Norelco's new Satin Collection will be advertised with the slogan "So advanced, you'll never look back." Futuristic spots feature space suit-like fashions. A print campaign will support. McCaffrey & McCall, New York, handles all ads for Norelco.

Irons hot, heat up show

CHICAGO—Exemplary of the housewares trend toward value-added products was the hottest category at the show: Irons.

Dart & Kraft's West Bend Co. boldly entered the iron category with the debut of the FreeStyle cordless iron. Its heat supply comes from a separate 1,400-watt power rest base. The iron has a temperature light that alerts the user when the iron is at the desired temperature, as well as SilverStone coating and self-cleaning capabilities.

The product, priced at about $50, is scheduled for distribution in the fall, and will be supported with a tv and print campaign beginning in mid-November. Cramer-Krasselt, Milwaukee, handles.

Both GE and Allegheny International's Sunbeam Co. showed their automatic shut-off irons and travel iron/garment steamer combinations.

Sunbeam's electronic Monitor iron, which narrowly beat GE's Automatic Shut-Off iron to retail introduction earlier this year (AA, Feb. 20), will be priced at $67; GE's is priced at about $60. The GE product features an audible signal that beeps when the temperature selected by the user has been reached and when the iron has not been moved in 10 minutes.

Sunbeam's travel/garment steamer item, with dual voltage for international travel, carries a suggested retail price of about $27; GE's new Small Wonder travel iron/steamer comes with a storage pouch, an adapter plug for overseas traveling and a suggested retail price of $32.

Both companies also introduced additions to their light-weight iron lines, including a compact light-weight model from Sunbeam.

Print and tv, via BBDO, will support the new GE introductions in the fall.

Sunbeam plans to advertise only its Monitor iron, with a print campaign beginning next month. Burton-Campbell, Atlanta, handles Sunbeam.

Wesray Corp.'s Proctor-Silex unit did not introduce a new iron at the show, but Joseph T. Ianna, director of marketing, said the company hopes to have a new iron, probably a travel model, available in October.#—*W.K.*

Personal computer glut slowing sales

By BOB MARICH

LOS ANGELES—Though the personal computer market anticipates sharply increasing sales in 1984, there were signs at the Comdex trade show here of trouble on the horizon.

Personal computer retailers experienced soft sales in January and February, coming off a robust fourth quarter in 1983. Supply is growing so fast it may outstrip demand.

"We think everybody is glutted with inventory right now," Jack White, vp-sales at Columbia Data Products, told a press breakfast. Early indications are that volume perked up in March, he added. Columbia markets computers compatible with IBM's personal computer, which has the widest selection of available software.

Future Computing, the Richardson, Tex., computer-market research company, estimates personal computer sales in 1984 will reach $12.1 billion, a 57% gain over 1983. The 1984 sales break out to $9.4 billion for the office market and $2.7 billion for the home market.

Only IBM's personal computers (except the PCjr introduced in January) and Apple Computer's new Macintosh are selling out at retail, according to several sources.

In software, the high inventory also appears to be a problem.

William L. Coggshall, president of Software Access International, a software-market research company, told a seminar that a recent software convention was a dud because of excessive inventory.

IBM, finding its PCjr isn't selling out like the rest of its personal computer line, tried an intense 10-day ad blitz this month reaching outside traditional computer media, such as *Better Homes & Gardens*.

An IBM spokesman said PCjr advertising alone will match its over-all computer spending in 1983. Leading National Advertisers put that figure at about $26 million. Lord, Geller, Federico, Einstein is the agency.

Price-cutting later this year is widely predicted:

- New companies, mostly offering computers compatible with software of IBM's operating system, are crowding the market.
- IBM is expected to lower prices of its personal computer line to close the gap with IBM-compatible computers offered by other companies.

Computer company profits may suffer in the process, although production economies may ease the squeeze.

Richard Matlack, president of InfoCorp, a market researcher, predicted that in three or four years IBM will stop selling personal computers through outside retailers. He explained by then IBM "will have enough IBM product centers to cover the country directly."#

Nestle

(Continued from Page 1)

pany recently has turned to acquisition as an answer: The agreement with Hills Bros. follows two other recent purchases designed to strengthen the company's product lines in North America, an area estimated to make up 18% of worldwide business for Swiss-based Nestle.

Nestle recently completed its purchase of Chicago's Ward Johnson Co., which gave it six new candy brands. In addition, Nestle bought Canadian-based Goodhost Foods Co., a foodservice concern and marketer of ground roast coffee.

These acquisitions came as Nestle attempted to reinvigorate the performance of its U.S. coffee operations by improving existing brands.

With much hoopla, it reformulated Taster's Choice and Sunrise, giving both new packaging, flavors and bigger ad budgets.

Longtime Nestle watchers agree, however, that the Hills Bros. move indicates Nestle's acknowledgment that profitability—indeed, ultimate survival—in the U.S. coffee market requires a ground roast entry, not just new and improved instant products.

Although Hills Bros. is far from a giant marketer—it has 7.4% of the 1983 ground business, compared with 31.6% for General Foods and [illegible]4.[illegible]% for Procter & Gamble—its brand has a solid, slowly mounting franchise, particularly among upper-income, middle-aged women who covet its quality-taste image.

"This is a very smart acquisition for Nestle," said Jack Salzman of Smith, Barney, Harris, Upham in New York. "Hills Bros. has a very fine reputation, and acquisition was probably the best way for Nestle to get into the ground business.

"It's not that the technology [for making ground coffee] is esoteric, but because coffee is such a high-profile, commodity-type business, you can argue that it's smarter to buy a good brand, rather than to try to develop a new ground."

For its part, Nestle's share of the instant coffee business has declined consistently since it peaked in 1979 at 33.5%, according to figures compiled by John Maxwell, a beverages analyst with Lehman Bros. Kuhn Loeb.

Furthermore, according to one well-placed source, during the middle to late 1970s, Nestle became seduced by soluble coffee growth rates and badly misjudged that category's momentum.

In recent years, the growth of soluble coffee, which includes freeze-dried varieties, has slowed. Consumers have turned more and more to ground roast as a means of saving money.

At the same time, ground roast's popularity has grown with the development of Mr. Coffee and other such taste and time-saving coffee makers.

Both Hills Bros. and Nestle executives stress that the Hills Bros. name, staff and marketing team will remain intact once Nestle exercises its option to buy in early 1985.

However, it is not clear whether Nestle will opt to use Hills Bros. plants to manufacture ground versions of any of its key existing brands—Nescafe, Taster's Choice and Sunrise—or develop a new ground entry with a new name.

Nestle will also probably support several forays Hills Bros. has made into new markets, particularly its Hills Bros. tea bag, currently in test-market.

In a move that startled many observers, Nestle recently moved into Dallas with its own tea bag, previously in a limited test that reportedly was disappointing at best.

In addition, Hills Bros. has been experimenting with a hot cocoa mix (AA, Oct. 3) and an aspartame-sweetened version of its instant flavored-coffee line (AA, March 26). The company has also expanded into retailing, with the opening of Hills Bros. Imported Coffee Exchange, a gourmet coffee cafe in a San Mateo, Cal., shopping mall (AA, Oct. 17). The cafe is a prototype that Hills Bros. has been evaluating for possible further duplication and expansion.

Nestle is bound to back Hills Bros. with substantial distribution and marketing clout. One of the first items on the agenda, analysts predict, will be a commitment to smooth out Hills Bros.' distribution, which is national by definition but strong only in certain Midwest and West Coast pockets.

Hills Bros. president Ned Dean, one of the five investors who bought the company only four months ago from its Brazilian-based parent of eight years, Corersucar, said the company is evaluating its advertising and promotional program, but declined to be specific. He said Wells, Rich, Greene/West, Los Angeles, would continue as Hills Bros. agency.#

Overseas tourism effort revived

WASHINGTON—The government's overseas tourism ad program is scheduled to be revived this year, but the size of the assignment is still uncertain.

Some estimates say the revived campaign will be in the $2 million range. However, this depends partly on a fight now under way in the House appropriations committee to prevent this year's tourism agency operating budget from being reduced from $12 million to the $8.6 million recommended by President Reagan.

Travel agency witnesses who appeared before the committee last week stressed the recent decline in foreign visitors to the U.S.

Officials of the Travel and Tourism Administration, a Department of Commerce agency, say they are willing to divert funds from other activities to get back into advertising this year, but their plans will have to be scaled down if Congress doesn't respond to the drive to keep the current agency funding.

For almost 20 years, the scope of the overseas tourism program varied widely. It was terminated by Carter administration budget-cutters in 1979. At that time it had shrunk to $2 million in six markets, with four agencies sharing the account.

Notice has already been published that the selection process for a new agency is under way, and prospective bidders have been advised to request a solicitation package from the special projects division of the Office of Procurement, Department of Commerce.

Agencies on the account when it folded in 1979 were Young & Rubicam (Mexico, Japan and the U.K.); Baker/Lovick Ltd., Toronto (Canada); J. Walter Thompson Co. (France), and Slesina-Bates (Germany).#

Ayer favored for Army bid

WASHINGTON—While there is still the possibility of a dark horse, N W Ayer seems to be home free to be renewed as agency for the $75 million Army recruiting account.

In response to recommendations from the American Assn. of Advertising Agencies, the Army has tried to make the account more attractive by offering a five-year contract package, instead of three years as in the past. But it does not appear this inducement has made a difference.

Only three other agencies showed up for the bidders' briefing meeting last month. On the eve of the April 20 deadline for bidders, none has stepped forward to record its intention of making a serious challenge.

Dancer Fitzgerald Sample, the only challenger when the account was reviewed in 1981, has said that even though it attended the briefing it will not compete this time. NH&S/USA's Washington office, which has the National Guard account, was also at the briefing, but has opted to pursue the $10 million-plus Navy account held by Ted Bates Advertising.

Young & Rubicam, which has been a contender in the past, created the impression last week that it does not feel comfortable with what it learned at the briefing. Y&R also abstained in 1981.

Though officially "undecided" about its intentions, Y&R said it has analyzed the Army's compensation system and informed the Army that the reason no one had competed for its account, despite its size, is because only the incumbent has an incentive to compete. The Army account reportedly supports more than 100 Ayer staffers.

Ayer has had renewals every three years since 1967. In the mid-1970s there were charges of favoritism, but Ayer was cleared by the Defense and Justice Departments.

The Army retained consultants to review its selection process, but was embarrassed when DFS was the only challenger in 1981.#

Ford/Europe: JWT not shaky

DUESSELDORF—Ford Motor Co. has denied that its Ford of Europe account, assigned to J. Walter Thompson Co., might be vulnerable following the surprise departure of chairman Edward J. Blanch from Ford of Europe two weeks ago.

Last summer, the bulk of the $45 million Ford of Europe account was considered ripe for a move to Ogilvy & Mather International, but Ford stuck with JWT.

The year before, JWT moved a high-powered team from Frankfurt to London to work more closely with Ford of Europe headquarters, and some sources said that helped save the account.

Young & Rubicam is also known to be interested in the account. After losing the Talbot-Peugeot business two years ago, the agency is open for an international car account.

Sources said the fate of the account could now depend on who is appointed to replace Mr. Blanch, who is retiring.

After Mr. Blanch's departure was announced, Ford of Europe president James A. Capolongo was named to coordinate all Ford of Europe operations, but the post of chairman remains vacant.

Some sources speculated that Daniel Gouedeviert, Ford of Europe's chief executive officer in Germany, might fill the vacancy, but others disagreed.#

Gremlin licensees sign up

Licensing Corp. of America, a Warner Communications unit, is planning "Gremlins" merchandise boutiques in retail outlets for the back-to-school and pre-Christmas seasons.

But that's just for starters. The following is a list of licensees for "Gremlin" products:

BACK-TO-SCHOOL

ADI: Pencil cases, rulers, book covers and memo pads.

Aladdin Industries: Lunchboxes.

Licensing Corp. of America: Merchandise boutiques.

Al Nyman & Sons: School bags.

TOYS, GAMES, CHILDREN'S ITEMS

Atari Inc.: Videogames, coin-operated games and computer games.

Wallace Berrie Inc.: Dolls.

Coleco Industries: Inflatable pool toys and ride-on vehicles.

Colorforms: "Gremlins" in its Lazer Blazers line of holographic stickers.

Ben Cooper Inc.: Halloween costumes.

Disneyland/Buena Vista Records: Records and storybooks.

International Games: Card game based on the movie's story line.

LJN Toys: "Gremlins" collectibles, windup toys, figures and play sets.

Nelsonic Industries: Clocks and watches.

Western Publishing Co.: Children's books, coloring and activity books, board games, puzzles and a one-issue comics book.

(General Mills' Kenner Products is said to be interested, but LCA's list thus far does not include it.)

APPAREL

Bates Nitewear: Girls' sleepwear.

BBC International: Footwear.

Lee Belt

Mayfair

McCall's Pattern Co.

Union Underwear Co.: Men's and boys' t-shirts, jersey and Underoos.

PRINT

Avon Books: Novel.

Ira Friedman Inc.: Souvenir magazine (distributor Kable News Co. said it will hit newsstands and theaters on June 12, to coincide with the film's bow, although there are hints that date may be advanced to June 8).

OTHERS

Bibb Co.: Pillowcases, sheets and curtains.

Hallmark Cards: Greeting cards, party goods and adult posters.

Sheaffer Eaton Textron: Refillable Kaleidoscope ball-point pens.

Topps Chewing Gum: Trading cards and stickers.

Turtle Wax: Air fresheners.#

Making of a market-buster

(Continued from Page 1)

it as a pet.

A pop-up promotional piece prepared by Warner Communications' Licensing Corp. of America confirms these peculiar characteristics. The piece features the box from which the creature appears and says that Gremlins shouldn't be fed after midnight, no matter how much they plead. This would make them "dangerous," the popup says.

The main hero of the small creatures, according to some sources, is Gizmo, described as "lovable," "warm" and "wonderful."

Gizmo will star among the Softies plush doll line produced by Hasbro Industries, which had omitted "Gremlins" product shots from its 1984 toy catalog.

Still other sources described "Gremlins" as small animal-like Jekyll & Hyde creatures—gray and cute when good, but green, carnivorous monsters when evil. These sources say that in appearance the two versions of these characters contain elements of the E.T. being, Ewok and Yoda from "Star Wars" and Oscar the Grouch from "Sesame Street."

Officials at Licensing Corp. of America are keeping mum about the movie. Len Reiter, director of marketing, declined to confirm or deny whether Gizmo is in fact a "Gremlins" character.

But Mr. Reiter did say that 50 companies have been signed up for tie-ins, 40 in licensed merchandise and 10 in promotional linkups. The total stood at 30 near the start of the year.

The 10 companies planning promotional links with "Gremlins" will spend about $20 million to advertise their various sweepstakes and other promos, he estimated. These will include Procter & Gamble, Scott Paper Co. and Ray-O-Vac, which also has licensed "Gremlins" for use on flashlights and other lighting devices.

All told, "Gremlins" shapes up as the strongest new film in the number of tie-in commitments, the pursuit of which actually began about a year ago, sources said. Most of the products are targeted to the youth market in the mode of "E.T." and "Star Wars."

Mr. Reiter would not discuss the royalty fee arrangement for "Gremlins" beyond saying it is near the industry norm (generally 5% to 6% of sales). Some sources recalled that Mr. Spielberg had sought an "outrageous" 15% on "E.T." product once that emerged as a blockbuster.#

View-Master ties to video

PORTLAND, ORE.—View-Master International Group has licensed material from Michael Jackson's "Thriller," believed to be the first music video to inspire product tie-ins.

The company's Talking View-Master reel set will feature 21 3-D stills from "Thriller," plus about seven minutes from the sound track, according to Arnold Thaler, president, View-Master.

The company's 1984 line, also including scenes from the "Gremlins" and "Dune" films, will get tv support.

Meanwhile, Vestron Video, Stamford, Conn., said its "Making Michael Jackson's 'Thriller'" has topped 225,000 videocassette copies sold (and $7 million-plus in revenues).#

Shop now Wunderman West

LOS ANGELES—Young & Rubicam Direct's office here has changed its name to Wunderman West, a move meant to strengthen its ties to sister Wunderman, Ricotta & Kline, the world's largest direct-response agency.

This isn't the first time the Los Angeles-based agency has made such a switch. After opening in 1981 as Wunderman, Ricotta & Kline/West, the then-small office of the New York-based agency opted to change its name to reflect its relationship to its better-known parent, Y&R.

"Two years ago it made sense to link our name with Y&R, which has a strong presence in the West," explains senior vp-managing director Clare N. Thain. "But things change."

The agency's billings have now increased to a healthy $19 million-plus.

Having established a name in its own right, Mr. Thain argues, the agency now wants to position itself at the forefront of the direct-marketing industry.#

Ad Age moves to twice weekly

Buy one, get one free.

Double your pleasure, double your fun.

Transcending those familiar sales pitches, this week ADVERTISING AGE enters a new era by doubling its frequency and, at age 54 years and three months, becomes a twice-a-week newspaper. The process of dividing AA's many features between a Monday edition and a Thursday edition means that AA will now be able to carry more and later-breaking news stories than ever. With the torrent of business, marketing and advertising news steadily increasing, the new Thursday edition that makes its debut April 26 becomes the vehicle that enables us to deliver four more pages of news from all corners of the U.S. and correspondents around the world. As AA becomes more essential and urgent, the Thursday news package, with a heightened emphasis on important regional news, will accompany the popular Magazine and special report sections. It all starts this week.

Upfront buys hit early; news, daytime hottest

By CRAIG REISS

NEW YORK—The upfront network selling season will be fast and furious this year, breaking as early as late May instead of the traditional early July timing.

Daytime and news dayparts are expected to move before prime time for the first time in memory.

That is the conclusion from a random survey of advertisers and ad agencies, which also predicted that increases in cost-per-thousand rates for network upfront prime time will come in no higher than 10% and probably in the high single-digit percentages.

That anticipated increase is lower than network rate increases during the past three years.

These sources, none of whom would speak for attribution, noted several factors that will help hold the line on network pricing for the 1984-85 broadcast season. The most obvious was the absence next season of Olympics and political convention coverage that helped shrink network inventories last February and will do the same this summer.

As happens every four years, these events tip the scales of supply and demand.

Also, the advertisers said the huge sums of ad dollars committed to the Olympics this year will not necessarily be re-expressed as regular network spending next season. As a result, total available revenues may drop as inventory increases.

Furthermore, the increased in-

Gillette diverts ad dollars to syndication

By GAY JERVEY

ANDOVER, MASS.—In reaction to ever-increasing network tv costs, Gillette Co. plans to continue siphoning funds earmarked for that medium elsewhere, with syndication emerging as a key resource for the consumer products giant.

News of this direction surfaced during an interview of a top Gillette executive following the company's annual meeting here last week. The remarks, by Thomas Ryan, vp-advertising services, Gillette North America, followed comments by Milton Glass, Gillette vp-treasurer, in response to a question posed during a meeting of securities analysts following the annual meeting.

"This [the spiraling cost of network tv] is a big problem for us, one that we're trying hard to solve," Mr. Glass said. "We're looking more into print, cable and doing a lot of research and experimentation. Gillette is in the forefront of a movement to examine these issues carefully."

In elaborating on Gillette's fears, Mr. Ryan said: "There is a general concern among many large advertisers who have separately talked to the networks. A number of us are exploring other advertising [avenues]."

One of the avenues Gillette and other major advertisers explored over the past year is having several advertisers combine to be backers of syndicated packages offered by the major Hollywood studios and other production companies.

According to a source who attended advertiser meetings with the studios several packages were offered, but none worked. The advertisers could never reach an agreement on

A new ad campaign from the leader aims to separate it from the pack of "look-alikes."

Moosehead charges ahead

By GAY JERVEY

NEW YORK—Although the Canadian woods seemingly are crowded with Moosehead look-alikes, All Brand Importers' concern about their possible impact on the brand's dizzying U.S. success is not so great that it would risk tampering with marketing and advertising strategies.

As the U.S. importer of Moosehead, All Brand is furthering the Moosehead juggernaut by kicking off a $6 million multimedia campaign that represents a 20% budget increase over 1983.

The campaign by Bloom Agency will continue to stress Moosehead's family-run heritage, rather than confront what it calls its "look-alike" lager competitors—Miller Brewing's Calgary, Van Munching & Co.'s Grizzly and the smaller Yukon Gold, Trapper Canadian and Nordic Wolf brands.

"To some extent, they're all 'look-alikes,'" said Paul Lohmeyer, president of All Brand, a Nabisco Brands subsidiary. "The

Shulton's UltraSwim opens haircare lane

By PAT SLOAN

American Cyanamid's Shulton division will dive into the $2 billion-plus haircare market next month with UltraSwim anti-chlorine treatment products, a line that could open up a free lane for the company in the highly competitive market.

Shulton will support its entry, which includes soap, shampoo and conditioner, with the equivalent of an annualized rate of $8 million in print, tv and radio. Additionally, there will be nearly 200 million cents-off coupons distributed through newspapers and magazines.

Magazine ads break in May; network and cable tv, plus network radio spots, will begin with the Summer Olympics in July.

UltraSwim's positioning is neatly defined in ad copy from Ted Bates Advertising/New York, which says, "Swimming is good for you. Bad for your hair." That's followed by the UltraSwim solution:

last minute news

Miller rolls Best beer with 'old time' campaign

MILWAUKEE—Miller Brewing Co. this week backs the national rollout of its Milwaukee's Best economy-price beer (AA, Feb. 13) witha tv and print campaign themed "Old time quality, old time price." Network tv spots break April 28 on USFL, NBA playoff and Pro Bowler Tourtelecasts. Ads say the beer is a product of A. Gettleman Brewing, Milwaukee, which Miller purchased in 1961. Backer & Spielvogel, New York, is the agency.

Nabisco's Baby Ruth applies for Culture Club tie

NEW YORK—Nabisco is negotiating for a tie-in with Culture Club, the rock group starring Boy George. The deal reportedly would involve a tour sponsorship by Nabisco's Baby Ruth candy bar. Ed Griles vp-development at Ohlmeyer Communications, an affiliate of Nabisco said, "There are discussions going on to that effect."

Women's segment reborn

Gillette struts its Satin Legs

By PAT SLOAN

Women's shave creams may have flopped many years ago, but health & beauty aids marketers apparently believe their time is now.

In fact, industry executives are forecasting a $60 million to $80 million retail market by 1985.

According to trade sources, Gillette Co., a major player in men's shave creams, has completed its concept tests for a new entry called Satin Legs (AA, March 5) and is preparing a national introduction heralded by a substantial sampling program.

A spokesman for the Boston-based company declined comment.

Additionally, Elizabeth, N.J.-based drug wholesaler Selby Drug Co. recently set up a new division called House of Degas to introduce a number of pharmaceuticals and health & beauty aids. The first of these, says director of marketing Frank Schmitt, is a moisturizing shave cream named Peau de Soie.

Peau de Soie is now completing a national rollout but its distribution is still somewhat spotty. Mr. Schmitt states that it is getting into more stores on the West Coast and in the Midwest than in the Northeast. The company is acting to shore up distribution in that region, however, and has just taken on a new broker.

The main competition of these new products comes from White Laboratories' Soft Shave.

Introduced several years ago, the product can be credited with reviving interest in the category, which Mr. Schmitt believes failed in the 1970s because the original products were poorly packaged and there was no advertising. "Plus, I think the idea was just a little before its time," he adds, noting that he was in retail management with the Walgreen's drug chain when Clairol introduced Ultra Smooth, S.C. Johnson & Son brought out Crazy Legs and Helene Curtis tried Shiny Shins—all failures.

These three marketers are not among those Mr. Schmitt says are now interested in the category. But in addition to Gillette, he said, the

Introducing LA brand from Anheuser-Busch.
Here's why it's not just another beer:
A premium pilsner beer with one slight difference.
Why a beer with only half the alcohol?
Now you have a real beer choice. Anytime.
All the taste of our regular beers
with only half the alcohol.
How we take out half the alcohol and leave in all the taste.
LA. A whole new brand of beer enjoyment from Anheuser-Busch.
For the way you live today.
For the way you live today, LA.

'Light' all over again

Despite legal disputes over the use of the term "LA," beer marketers are going ahead with introductions of their low-alcohol brands, including Anheuser-Busch, which is testing its version in 12 cities. *(See story, Page 115.)*

Advertisers cool to fall USFL plan

By ROBERT RAISSMAN

While some U.S. Football League owners are anxious to meet the National Football League head-on in fall 1987, advertisers are skeptical, claiming the strategy offers them little and will only add to the glut of fall sports programing on tv.

In its present form, the USFL offers advertisers live professional football in spring, when sports programing is restricted to college and some pro basketball, as well as golf. Moving it to the fall, advertisers say, would take away a major reason for using it as an ad vehicle.

"We would have to take a real hard look at how we would perceive an additional sports franchise in the fall," said Duane Kell, senior vp-director of broadcast media, Campbell-Ewald, the agency for several major sports advertisers, including Chevrolet. "It might be an either-or decision. We wouldn't preclude it if it went to the fall, but it probably would be a coin flip over USFL versus something else based on price and performance."

Another executive was a bit more direct in assessing the situation. "We think there is plenty of Sunday football to choose from right now," he said. "I have a feeling that everybody is going to lose because it will just add to the proliferation of football in the fall."

While the USFL has received respectable ratings and attendance figures and has recruited the cream of the crop of college football players going pro, it now seems to face some problems.

A few players have announced intentions to make a reverse jump back to the NFL, and there is a perception that talk of the schedule move to fall, spearheaded by New Jersey Generals owner Donald Trump, has not been well thought out.

And Steve Young of the Los Angeles Express, football's highest-paid player, was quoted last week as predicting the NFL would eventually pick up four or five strong USFL teams, effectively crippling the new league. Later, Mr. Young apologized for the "negative" tone of the comments.

Still, the USFL owners are serious. Sources said that if a vote were taken several weeks ago, 12 of the 18 owners would have voted in favor of the switch.

But among the unanswered questions: When does

(Continued on Page 120)

RCA corporate goes to Needham

By STEWART ALTER

New York—RCA Corp., intending to reenter the corporate advertising arena, has switched ad agencies. The account, which had been dormant at Ted Bates Advertising/New York for a couple of years, has been moved to Needham, Harper & Steers/USA.

The decision to revive the corporation's image advertising is unrelated to RCA's announcement two weeks ago that it no longer would market videodisc players, said Thomas B. Ross, senior vp-corporate affairs. Neither does it reflect any unhappiness with Bates, he said.

"We have new management and they've been developing new strategies for the corporation. As part of that, they felt there was need," Mr. Ross said.

That new management includes Robert Frederick, who joined as president 18 months ago, and Thornton Bradshaw, chairman for about three years. Under Mr. Bradshaw, RCA has refocused its growth on its three main business segments—electronics, communications and entertainment.

Advertising is not likely to begin before fall, said Mr. Ross. He would not discuss budget plans or the scope of the campaign. While it definitely will include business publications as an initial effort, Mr. Ross said there was no decision on whether to expand to a large-scale tv campaign.#

Rubbermaid into toys via Little Tikes

By JANET NEIMAN

Rubbermaid Inc. is hoping its consumer plastics business will mature through the acquisition of Little Tikes, a national marketer of durable-plastic toys.

Rubbermaid, the $436 million marketer of plastic housewares and shelf and decorative coverings, said last week it agreed to purchase the Macedonia, O.-based Little Tikes for an undisclosed amount.

Little Tikes, a privately held company with $43 million in sales last year, markets traditional molded-plastic toys for preschoolers. Its indoor items include ride-on and pull toys and blocks; its outdoor line includes swimming pools and swing sets.

The company's principal competitors are marketers of high-quality, traditional toys, including Quaker Oats' Fisher-Price line and Milton Bradley Co.'s Playskool.

The acquisition represents Rubbermaid's first move into a non-housewares-related consumer business. But its entry into the toy industry might have been on the burner for a long time.

More than two years ago, Rubbermaid executives said infant toys

D'Arcy's London office caught in Libyan storm

London—The London office of D'Arcy MacManus Masius was caught in the crossfire of last week's clash between the Libyan embassy here and British police.

D'Arcy's offices were evacuated when the embassy, located next door to the agency, was taken under siege.

The incident began the morning of April 17 when Libyan demonstrators marched outside the embassy on St. James Square. Shots suddenly rang out from the embassy, killing a policewoman and injuring several demonstrators. Libyan embassy personnel then barricaded themselves inside, leading to a standoff with police.

As of late last week, the D'Arcy offices were being used by Scotland Yard's crack anti-terrorist unit as operational headquarters.

DMM employes used a fire drill procedure that had been practiced in the past and vacated the premises in 45 minutes.

The various agency departments—media buying and planning, creative and the tv department—all found haven with client companies, art studios and tv studios. Part of the staff was moved to DMM's subsidiary office of Marshall Advertising. Those not needed were asked to stay home.

According to Alan Clark, managing director of DMM, the agency

Treasury unit splits with Ad Council

Ad bond is broken

By DAVID SNYDER

Washington—After 42 years as the Advertising Council's premiere public service ad client, the Treasury Department's U.S. Savings Bond division is severing the relationship and is looking for its own agency.

Although the division will maintain its status as a public service advertiser, Treasury officials who guide the savings bond ad campaign believe they will get better results if they pay their own agency to produce the campaign and place the materials.

Although the Ad Council provides free ad agency services, this year's campaign, under the slogan "Take stock in America," is projected to cost Treasury $979,000, mostly in production costs. The total also includes a 9.5% fee for Ad Council overhead.

Treasury officials plan to announce the availability of the account immediately, select an agency by September and have a new campaign in place by December. The account is expected to be priced in the same magnitude as this year's Ad Council effort.

John Benson, account supervisor for Leo Burnett USA, Chicago, Ad Council volunteer agency on the account, has indicated that his agency will not compete.

Treasury officials said changing needs for a changing product, at a time when there is greater competition for a shrinking amount of public service time, influenced their decision. As they describe it, they are selling a product that requires seasonal access to a specific market—workers signing up for payroll savings. This requires better control over the placing of ads than they can get through the Ad Council.

Ad Council president Robert Keim said last week he shares Treasury's belief that an independent agency will be better equipped to handle a savings bonds advertising plan aimed at a more aggressive and product-oriented sales effort.

"We have graduated from the Ad Council," said Jim Gianfagna, director of public communications for the U.S. Savings Bond division, who noted that the demand for savings bonds has increased since

No losers in Gaines deal

By NANCY GIGES

The sale of the Gaines pet food business to Anderson, Clayton & Co. by General Foods is a sweet deal all the way around.

The two food companies have announced an agreement in principle in which Anderson, Clayton will purchase and keep intact the $300 million pet food business. Terms were not disclosed.

The deal fulfills corporate objectives of both companies: GF's aim to focus on larger or higher growth-oriented businesses and Anderson, Clayton's desire to expand its food franchise.

The business will continue to be headquartered in Harrison, N.Y., led by current top management. Ralph J. Cobb, GF vp and president of the pet food division, will continue to head the division for Anderson, Clayton.

Marketing manager Robert Pizzuti recently was reassigned to GF's newly acquired Ronzoni pasta and Italian foods business, but the position will be filled soon, a GF spokesman said.

The deal allows GF to focus its resources and efforts on other opportunities, including Ronzoni, Oscar Mayer processed meats, diet beverages and the expansion of Entenmann's baked goods (AA, April 16).

GF chairman James Ferguson noted, "Because of the investments of human and financial resources which will be required to support our expanded product portfolio, we see difficulty in supporting Gaines to the full extent it needs and deserves so it can remain competitive and grow in the pet food business."

As for Houston-based Anderson, Clayton, that company has been trying to expand in the food business for 10 years and has failed several times to purchase other operations.

Last year, it made a tender offer to buy Norton Simon Inc., which accepted a competing offer from Esmark Inc. The company was especially interested in NSI's Hunt-Wesson Foods subsidiary. Earlier, Anderson, Clayton tried and failed to buy Gerber Products and Stokely-Van Camp.

Anderson, Clayton's food operations include Chiffon margarine and Seven Seas salad dressing. Pet foods under the names Gaines, Cycle, Gravy Train and Top Choice will become Anderson, Clayton's largest consumer-products business. The company also has an an-

Top brands, logos provide marketers 'license' to deal

By JAMES P. FORKAN

New York—More and more major marketers have been finding a major new revenue source for their most popular brands, logos and highly familiar advertising characters: Licensing.

By means of what industry executives label "trademark licensing" or "corporate licensing," these companies have broadened their reach in terms of shelf space and media exposure while generating sometimes considerable profits.

On the other end of the transaction, various toy companies and others involved in selling lunch boxes, apparel, books and more can latch onto a property already highly visible and well liked, thanks to decades of hefty, multimillion-dollar tv and print ad campaigns.

Jerry Alpert, president, Licensed Ventures International, corporate licensing agent for Kellogg Co., Nabisco Brands and Campbell Soup Co., saw those and other marketers benefiting from the licensed-merchandise boom.

Total retail sales of licensed products should top $30 billion this year, he estimated, compared with $4 billion in 1978.

According to "Licensing Letter," the toy business alone accounted for about $5.3 billion in licensed product sales last year—which amounts to roughly half the toy industry's total retail sales volume of $10 billion in 1983 (AA, Feb. 13). Toy industry executives expect at least to equal those levels in '84.

Kellogg, Mr. Alpert estimated, stands to realize $30 million in profits this year alone from the li-

Olympic tie fuels Fuji's assault on Kodak

By GAY JERVEY

NEW YORK—Fuji Photo Film Co. will continue its battle against Eastman Kodak next month, when it launches the largest ad campaign in the company's history—one that emphasizes Fuji's role as an official sponsor of the 1984 Summer Olympics (AA, April 9).

The effort, which represents an increase of some 20% over Fuji's 1983 budget, is sure to raise the temperature of the already hot U.S. film market.

Over the last few years, Fuji—a name as synonymous with amateur photography in Japan as Kodak is here—has mounted its challenge to Kodak on these shores, where the Rochester-based company has commanded an overwhelming 85% to 90% market share.

Kodak has shown no signs of giving ground. To the contrary, Kodak this year inaugurated the most expensive film campaign ever as a means of reminding consumers that moments can last forever—but only on film.

Themed "Because time goes by," the effort shows vignettes of reunions of war veterans, black jazz musicians and baseball players.

For its part, Fuji's new campaign, which starts May 14, will run nationally and primarily involve tv and radio. Print ads will be limited to *Sports Illustrated's* Olympic preview issue and the official Olympic handbook distributed at the games.

Carl Yanowitz, Fuji's advertising director, declined to reveal ad budgets, but Fuji is expected to spend $7 million during the rest of 1984.

Fuji's new campaign carries a two-pronged message. In addition to stressing the acknowledged color quality and realistic renditions of its HR film line, the company hopes to further America's awareness of its Olympics sponsorship.

Fuji's impending tv effort stars former Olympic athlete Ann Meyers and contains a voiceover highlighting Fuji's sponsorship.

The new spot follows the basic creative tack of Fuji's 1983 campaign, which was tagged "Breakthrough" and showed water skiers flying through a giant Fuji picture of a boat.

That campaign ran in 35 to 40 markets, Mr. Yanowitz said.

In the ad with Ms. Meyers, the former basketball star is shown careening down a narrow San Francisco street on a bicycle. Wait—isn't that a street car she's plowing through? Not to worry, it's only a blowup of a Fuji print.

In addition to tv, the company is running a radio campaign with a similar message. They also feature several former Olympic greats: Jim Ryun, a silver medalist in the 1968 Mexico City games, and the youngest runner ever to break the four-minute mile; swimmer Don Schollander, who won four gold medals in the 1964 Tokyo summer games, and, of course, Ms. Meyers.

Analysts agree that Fuji has a product worth touting. Most industry executives and photographers describe Fuji film as equal to Eastman Kodak's. Some give Fuji higher marks for consistency.

No doubt, Fuji's green film boxes have been gaining a presence here. Since the fight for market share gained steam in 1981—when Fuji waved some $7 million before Olympic organizers and snared the official sponsorship away from Kodak—analysts estimate that Fuji has more than tripled its film sales and increased its market share from near zero to some 7% to 8%.

But the question remains whether these gains have come at the expense of Kodak or other, far more vulnerable, film marketers such as Agfa-Gevaert and 3M.

With some 70%-plus of the Japanese film market, Fuji will continue to look abroad for sales. Even if Fuji is just nibbling at the edges here, Kodak will continue to take notice, and its executives are expected to stress Fuji's competition at the company's annual meeting next month.#

LA CROSSE, WIS.—Trane Co., marketer of heating and air-conditioning products, will spread the theme "Comfort's coming" nationwide with the debut of two 30-second tv spots this week.

The campaign will be the first in 18 months for Trane's consumer products division since the company purchased General Electric's central air conditioning department in September, 1982.

Trane's goal is to increase consumer-product brand awareness, supported by this multi-million-dollar network tv buy.

One spot features a fleet of 18-wheelers, boldly flagging the Trane logo, traveling on a state highway. The other spot focuses on a fleet of the company's smaller delivery vehicles that arrive in a small American town. Both carry the same jingle and the theme "Comfort's coming."

The spots will run for six weeks, when the company will launch a follow-up campaign, probably with more tv spots, according to Jean Bell, Trane advertising manager. Further details were not disclosed.

A dealer co-op campaign, including print, radio and outdoor, will support the new campaign. Budget was not disclosed.

Campbell-Mithun, Minneapolis, handles.#

corrections & clarifications

- Australian police charged Austin Begg, founder of Begg Dow Priday, with conspiring to defraud a former client, not the agency (AA, April 16, P. 50).
- The production company for Greyhound Lines' "Knock, knock" spot, created by Bozell & Jacobs, and Holly Farms Poultry's "What about taste" spot, created by Grey Advertising, featured in the ADVERTISING AGE Best Commercials of 1983, is Coast Productions (AA, April 2, P. M-44).
- In the Agency Profile issue (AA, March 28, P. 70), it was incorrectly stated that Newmark, Posner & Mitchell neither gained nor lost accounts in 1983. In fact, the agency did not submit information regarding account activity.
- Rock Music Trivia is being sold by Pressman Toy Corp., New York, under license from Playtoy Industries of Canada (AA, March 26, P. 52).#

An increasing number of U.S. consumer magazines are licensing editions to tap overseas markets.

Overseas licensing growing

By DENNIS CHASE

NEW YORK—U.S. consumer magazine publishers have a gleam in their eyes these days when they talk about foreign markets.

As profitability in the U.S. has dwindled, many publishers who for years refused to license their magazines overseas now are doing an about-face.

Others, more experienced in licensing, no longer are ignoring regions of the world—such as the Far East—that seem difficult to penetrate.

"We're getting 50% more requests for information about licensing than six months ago," says Lee Hall, head of the new Playboy International Publishers Service, a 1-year-old magazine licensing consultancy.

In the past several months, *Working Woman, Newsweek, Harper's, American Health, Rolling Stone* and others have begun looking at licensing editions outside the U.S.

Publications with long licensing histories, such as *Cosmopolitan* and *Playboy*, are about to approve their first licensed Chinese-language editions in

Playboy looking for U.K. licensee

By ANGELA CHATBURN and DENNIS CHASE

LONDON—Playboy Enterprises, struggling with a faltering flagship publication in the U.S., is turning to foreign markets for help.

The company is talking with nine U.K. publishing groups about licensing *Playboy* for the first time in Britain, the scene of a gambling scandal several years ago that resulted in the company losing its highly profitable casino license.

Playboy considered publishing in Britain then, but backed off after the scandal.

If it goes into the U.K., *Playboy* will be gambling it can create a new upmarket niche in one of the raciest downmarkets for men's magazines in the world, where all the leading publications look like *Hustler* in the U.S.

That environment has caused even archrival *Penthouse* publisher Bob Guccione to retreat. Last year he partly abandoned Britain, where *Penthouse* was born in 1965. He licensed the *Penthouse* name in the U.K. to Sightline Publications because it could not compete with its racier rivals.

"It will only work if we can break out of that environment and change the minds of upmarket advertisers who are now leery of all men's magazines," said Lee Hall, senior vp-international publishing for Playboy Enterprises.

The other drawback is that magazine distribution in the U.K. is dominated by "news agents" who bunch all men's magazines together on the top shelf of their magazine racks.

"We'd want to be on the front counter with the prestige magazines," said Mr. Hall.

Until last month, *Mayfair*, the leading U.K. men's magazine with a 350,000 circulation, was the only such publication distributed by W.H. Smith, Britain's leading news agent. Now *Penthouse* has been accepted by the agent.

Mr. Hall is interested in Britain despite the problems because he sees ads geared to males in science magazines that would look to *Playboy* instead.

"The British male is changing very fast," he says. "They're a far cry from the days when they all wore bowler hats." However, others disagree.

Adrain Walker, *Mayfair* ad director, says that if *Playboy* comes to Britain "it would be with a fairly sophisticated product, and I don't see that sort of product getting the sales."#

Philip Morris may sue BAT in Brazil

By LAUREL WENTZ

SAO PAULO—Philip Morris Inc. might take legal action against British American Tobacco in a dispute over an alleged "copycat" brand in the low-tar cigaret market, sources said.

BAT's Souza Cruz recently began test-marketing Free cigarets, a brand with similar packaging and identical tar and nicotine content to PM's Galaxy brand, which accounts for 60% of the new low-tar, low-nicotine segment.

Stung, PM promptly arranged for a local court to seize samples of Free to be scrutinized for a possible future lawsuit and asked CONAR, the Brazilian advertising self-regulatory body, to suspend Free's test-market advertising.

After a CONAR hearing in Sao Paulo on April 12, CONAR postponed its decision and the two cigaret giants were attempting to arrange an out-of-court settlement.

"We were obliged to do this," PM vp Antonio Texeira da Silva said of his company's action against BAT. "Since Souza Cruz copied our package, we took an attitude of defending our property."

Both Free and Galaxy packs feature a red-and-blue stripe on a white background and a gold heraldic emblem. According to BAT spokesman Francisco Crestana, the 10 top brands—accounting for 75% of the market—all use basically the same colors and no one has objected until now.

"Philip Morris has done much worse than we did and we never thought it was illegal or went after them," Mr. Crestana said.

If the packages are similar, the prices are not. Souza Cruz is selling its brand cheaper—50¢ for the 90mm size, compared with 67¢ for PM's Galaxy.

Souza Cruz advertising for Free also irks Philip Morris.

While Galaxy is always advertised as "The intelligent decision," the Free ads aired in test markets say, "You don't have to be intelligent to choose lower tar and nicotine. It's a question of good sense and paying to find out," (a reference to the lower price). Standard, Ogilvy & Mather handles the Free campaign.

Souza Cruz' market dominance is such that the only segment it has failed to dominate is the low-tar and low-nicotine area, which accounts for only 3.65% of all cigaret sales. Two heavily ad-supported BAT brands in the segment—Advance and Columbia Ultra Lights—have flopped.

Over-all, BAT has 79% of a cigaret market that has shrunk by 9.4% since 1980 to 129.2 billion cigarets last year.#

Third World drug ad code proposal stalled by U.S.

By JOHN PARRY

GENEVA—The U.S. and other Western nations have beaten back an attempt by Third World countries to involve the U.N. Conference on Trade and Development in the policing of pharmaceutical advertising.

At UNCTAD's board meeting earlier this month, a group of more than 100 developing countries proposed a resolution calling for UNCTAD to begin debating criticism of the International Federation of Pharmaceutical Manufacturers' in-house code of conduct, which critics say is too soft.

The primary criticism of the code comes from several consumer groups that want all pharmaceutical advertising banned, except at point-of-purchase (AA, March 5).

The board decided to defer consideration of the proposal until the fall session after the U.S. delegation and other Western nations argued that the proposal was both unnecessary and wasteful.

The question of a code of conduct for pharmaceutical manufacturers in the field of advertising in the Third World has been under discussion at the U.N.'s World Health Organization for many years and is a featured item on the agenda of the World Health Organization Assembly here in May.

A lack of definitive action by WHO prompted some Third World countries to try to switch the debate to UNCTAD, where they have a built-in voting majority.

The U.S. and other Western countries have argued that there is no need for an international code, similar to the one adopted by WHO on infant formula in 1980.

Gordon Streeb, head of the U.S. delegation to UNCTAD and a deputy assistant secretary of state, has argued that because UNCTAD's primary purpose is aiding the economic development of the Third World, the body should not get involved in matters which do not concern it.

Mr. Streeb also said the U.S. feels that WHO does an adequate job in the field.#

European admen think Reagan mismanages his campaign image

By DENNIS CHASE

'84

Marketing the Candidates

New York—The people who shape the images of European heads of state believe President Ronald Reagan is mismanaging his image in the U.S.

Jacques Seguela, president of Roux Seguela Cayzac & Goudard in France and French President Francois Mitterrand's advisor, said, "He is making a terrible mistake. He is agitating people. He should run the same campaign that we ran for Francois Mitterrand, whom we called *'la force tranquille'* [the calming force]. All the people in the U.S. are upset. The contrary of upset is *force tranquille*. Ronald Reagan can be *force tranquille*."

Mr. Seguela, the enfant terrible of French advertising, eschews political affiliations and says the same advice he gave to upset Socialist victor Mr. Mitterrand in 1981 applies to the right-wing campaign of President Reagan.

President Reagan should confine most of his public comments to home and family issues, said Mr. Seguela, in contrast to Democratic presidential candidate Gary Hart, who "is a contrarian. . .All the talk about new ideas. You don't become President that way."

As for President Reagan, the first thing Mr. Seguela would advise him to do is change what he wears.

The President's wardrobe, he said, should feature more pastel colors and more cowboy hats.

"He is the U.S. cowboy, and he should be that all the time, with his wife on the ranch," says Mr. Seguela, who convinced Mr. Mitterrand to change tailors and wear "softer" clothing.

West German Chancellor Helmut Kohl's image maker, Coordt von Mannstein, says Mr. Reagan should contrive to be viewed as the underdog.

Chancellor Kohl, in his surprise victory last year, "liked nothing better than to go down in the polls so he could fight his way back," said Mr. von Mannstein, chairman of von Mannstein Gruppe advertising.

Unlike President Mitterrand, Chancellor Kohl refused to change his appearance, such as his hair style, in his successful election campaign, says Mr. von Mannstein.

However, Chancellor Kohl did allow his advisors to blow up his campaign posters to gigantic proportions, to emphasize his nickname, "The Black Giant."

"Our strategy was to make everything about him the greatest, and to give him the image of a winner," Mr. von Mannstein told a special International Advertising Assn. meeting held earlier this month.#

French say okay to fm radio spots

By PHIL HILL

Paris—The recent announcement by French President Francois Mitterrand that local radio stations on the fm band would be able to carry advertising will have a dramatic effect on ad agencies here, sources say (AA, April 9).

In making the announcement, Mr. Mitterrand said he hoped the change would help bail out France's financially ailing radio industry.

Many of the 900 stations in France have been living a hand-to-mouth existence for the last two years, deprived of legal advertising and forced to make under-the-table deals with advertisers.

Weeks before the announcement, some agencies, including Roux Seguela Cayzac & Goudard and Havas Conseil, had set up organizations known as ad *regies* to represent groups of radio stations and help find advertisers.

According to Jacques Hebert, vp, Lintas:Paris, local radio stations will initially attract local businesses and ads aimed at young people for such products as movies, American beer and blue jeans.

Mr. Mitterrand is believed to have been influenced by advice from Jacques Seguela, who ran the president's election campaign in May, 1981, and by his communications advisor, Claude Marti, a former TBWA executive and former president of the French Assn. of Advertising Agencies.#

International briefs

P&G hoping for new market with Top Job

Schwalbach, Germany—Procter & Gamble Co. is hoping to create a new market that could reach $40 million with its new laundry "booster" sheet that is called Top Job.

The new product, which is dropped in washing machines to improve the cleaning properties of detergents, was launched two weeks ago in Germany in a $5 million campaign via Benton & Bowles, Frankfurt (AA, April 9).

The launch was limited to Germany, but the product is being test-marketed in France, Austria and Switzerland as a prelude to a rollout all over Europe. It is produced in the U.K. and the package has labeling in English, French, German and Italian.

The product does not exist in the U.S. and the campaign claims the dissolvable sheets get laundry as clean as if it had been boiled. Many German housewives boil their laundry because they are not convinced that washing machines get clothes clean enough.#

Anti-smokers seek commercial status

Sydney—An antismoking group known for defacing outdoor tobacco advertising in Australia and New Zealand wants to register its name as a business.

But the group, known as BUGA UP (Billboard Utilizing Graffitists Against Unhealthy Promotions), has met opposition from the New South Wales Corporate Affairs Commission.

The commission has refused to process the group's application, ruling that its name is "offensive to the public" and "suggestive of an illegal activity."

BUGA UP says it will try again.#

Speculation rife over post-1997 Hong Kong

Hong Kong—Ever since Jardine, Matheson & Co., Hong Kong's most venerable trading company, decided to transfer its legal offices from this British Crown colony to Bermuda, rumors have been flying that other major companies might follow suit.

The talk is precipitated by concern over Britain's ability to secure an agreement with China over Hong Kong's capitalist future when the U.K.'s territorial lease expires in 1997.

Lately, the *Asian Wall Street Journal* has been mentioned as a possible candidate to move its printing operations, but newspaper executives have denied such plans.

Managing editor Mike Malloy said there was "absolutely no truth" to the rumors. He speculated that the talk was fueled by speculation about the *Journal's* recent $4 million investment in new printing, communications and office equipment was made in anticipation of a move.

"The equipment is being installed in Hong Kong," Mr. Malloy said. "It is not going into Singapore."#

'Cosmo'

(Continued from Page 55)

azine to *Metropolis* after rival *Cosmopolitan* took him to court complaining of the similarity in the two titles.

The name change came after a Swiss court banned distribution of the March *Metropolitan* in Switzerland, but not before the controversy created valuable free publicity for Mr. Czerny's 4-month-old magazine.

The "copycat" problem represents one of the pitfalls awaiting U.S. magazine publishers who are considering licensing their publications overseas.

So far, that hasn't daunted *Cosmopolitan*, with 24 foreign licensed editions in nine languages, from forging ahead internationally.

Since its arrival in Germany in 1980, *Cosmopolitan* has become well established here. Most agree the Hearst Corp. publication appeared on the market as values were changing among German women and that its editorial formula coincided with their reevaluation of their societal roles.

Since then, paid circulation has climbed to 400,000, with a quarter of those readers gained last year. In addition, ad pages in 1983 more than doubled compared with 1982, for a total of 760 pages.

Up against the might of the Hearst Corp., along with Attika Verlag, the Zurich-based publisher of *Cosmopolitan*, Mr. Czerny decided to switch rather than fight.

Mr. Czerny acknowledged there was a strong similarity between *Metropolitan* and *Cosmo* in the first three issues, and that he actually hoped for a fight to generate publicity.

Now he says he's out to corner a part of the market that he believes has become disenchanted with his competitor.

"With the new title, we want to move away from *Cosmopolitan*," he says. "Not out of fear, but because we have discovered there is a very large target group that wants a magazine that is not as sexist and feminist as *Cosmopolitan*."

Sources in the editorial offices of *Cosmopolitan* say *Metropolitan's* appearance initially fooled some *Cosmo* readers.

Before the name change, $346,000 was spent on promoting early issues of *Metropolitan*. But Mr. Czerny says the ad budget was not wasted because the new title only slightly alters the magazine's cover appearance.

He also claims a paid circulation of more than 200,000, a figure that will be audited by Germany's circulation authority next month.

Agency sources agree the market is ripe for alternatives to the classic women's titles.#

Licensing

(Continued from Page 55)

Hong Kong and other locations in the Far East, the fastest growing economic region in the world. It's also the gateway to China, the biggest prize.

A licensee operates much as a restaurant franchisee does: He agrees to pay a royalty for use of a name and concept and is subject to controls by the U.S. publisher, who independently checks whether the standards are being met.

Licensees use some local content, but devote most editorial space to stories from the U.S. edition. But even these stories are often "localized" by editors in those countries.

"In Latin America an unmarried woman usually lives at home," says Dick Deems, a longtime licensing expert with Hearst Corp. "Obviously, *Cosmopolitan* would have to be adapted for those markets."

Publishers are finding that the difficulty in making sure a foreign licensee maintains the reputation and quality of a U.S. publication is far outweighed by the easy royalties and prospect of offering international advertisers worldwide coverage.

The return on investment (royalty income divided by operating expenses) can be as much as 80%, sources say. A U.S. publisher pays only for monitoring the publication and for additional rights to republish original material. He pays no local editorial expenses.

A five-year contract between *Playboy* and a foreign licensee can bring in as much as several million dollars a year, Mr. Hall says.

With *Playboy's* U.S. circulation and advertising revenue dropping, the publication's sales of 1.7 million a month with its nine foreign editions are increasingly important to Playboy Enterprises.

Now the biggest opportunity facing these publishers is appealing to advertisers who want to run campaigns worldwide.

While *Time* and *Newsweek*, which publish wholly-owned foreign editions with virtually identical editorial content, have picked up many of these ads, so far agencies and advertisers generally have resisted similar arrangements with licensed publications for two reasons. First, they don't want to preempt their local branches from making that decision and, second, advertisers don't want their ads appearing with unfamiliar editorial material.#

FOREIGN AGENCY INCOME REPORT

Strong U.S. dollar cuts back growth

By DENNIS CHASE

The advertising industry's worldwide gross income grew sharply last year, but not when translated into the measuring stick used by U.S. agencies: Greenbacks.

According to Advertising Age's annual Foreign Agency Income Survey of 895 agencies in 76 countries, gross income for all agencies grew 13%, to $4.16 billion. That compares with 1982's $3.69 billion, restated at 1983 exchange rates.

"Our international billings, which were up 5% in U.S. dollars, would have been up 15% if the effect of the exchange rate was removed," said Steven Kahler, executive vp for finance and administration, BBDO International.

This year's increase—stated in U.S. dollars—also falls short of last year's 27% growth.

Japan's Dentsu held onto its No. 1 worldwide ranking, with $437.7 million in gross income. But its lead over second-place Young & Rubicam fell slightly to a margin of $23.7 million, compared with $26.3 million last year. Both Dentsu's and Y&R's gross income grew by about 9% last year.

In the only change among the top ten agencies, Saatchi & Saatchi Compton Worldwide leapfrogged Leo Burnett Co. into eighth place, with $253.3 million in gross income last year. The agency grew about 36%, and only strong 21% BBDO growth kept the Saatchi brothers from leaping two places.

Grey Advertising, which grew 24% in gross income last year, moved up two places into 13th place in this year's rankings.

In major international markets, growth in gross income—stated in U.S. dollars—was strongest in Germany (up 20%), France (19%), Britain (18%) and South Africa (17%). That compares with a U.S. growth of 10.7% (AA, March 28).

(Contined on Page 58)

Agencies' growth cut back

(Continued from Page 57)

In an AD AGE questionnaire that accompanied this year's survey, agencies were asked what markets are expected to show the best growth rates this year.

Most agencies worldwide believe that computer hardware and software will grow the fastest. European agencies also mention financial services, and many French agencies add cosmetics.

In answer to the question "What is the major problem facing the advertising industry in your country?" British agencies generally cited commission cutting and the growing power of retailers.

French agencies cited increased government control, lack of commercial tv time, nationalization and unemployment. Several mentioned the "de-motivation of entrepreneurs."

German agencies are also concerned about commission cutting, partly spurred by the growing competition of media independents. One agency cited union demands for a 35-hour week.

The few Japanese agencies that volunteered answers to the question generally cited proposed taxes on advertising as their first concern. A new ad tax was the main concern of South African agencies.

In Australia, growing government control was the main issue. In particular, agencies cited the increasingly aggressive Australian Broadcasting Tribunal, which is like the U.S. Federal Communications Commission.

One significant change from previous years: Inflation has receded as an issue except in one region—Latin America.#

This survey was compiled by Ilse Cermak, International department, ADVERTISING AGE.

* With Argentinian agencies, AA altered its procedure of determining an agency's "real growth" (applying 1983 exchange rate to 1982 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1982 are based on the average annual exchange rate for that year.

* With Brazilian agencies, AA altered its procedure of determining an agency's "real growth" (applying 1983 exchange rate to 1982 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1982 are based on the average annual exchange rate for that year.

Not all the perfumes and colognes of the world can't prevent the odour of sweat. And all of us sweat at least half a litre every day. What we need is a deodorant. To kill odour-causing bacteria and keep us fresh all day. Cinthol talc does — just that.

* With Israeli agencies, AA altered its procedure of determining an agency's "real growth" (applying 1983 exchange rate to 1982 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1982 are based on the average annual exchange rate for that year.

ALMAP is the world's 36th ranking agency. Second in Brazil, for now. It's one of the fastest growing agencies in the world.

But we're not satisfied with this. We're ambitious, just as our clients are.

They include some of the world's best-known companies. Alcoa • Anderson Clayton • Avianca • Braun • Consul (Whirlpool) • Dannon • Embratur (Brazilian Dept. of Tourism) • Fleischmann-Royal (Nabisco Brands) • Gillette • General Foods • Merck • National Panasonic • Pan Am • Pepsico Foods • Petrobrás • Polaroid • Rhône-Poulenc • Ralston-Purina • Stock Distillerie • Volkswagen.

And if you've ever seen the Clio, Sawa or New York Festival reels, you've seen the work ALMAP does for them. It's Brazil's #1 in international awards.

Why are we telling you this? Because we want to sell your products in Brazil. Everything we know about Brazil, its market and consumers is available to you.

Phone or write to us.

Pubbli Dan Wirz part of Wirz Holding AG, Switzerland.

Young & Rubicam Italia does not report its billings. Figures are AA estimates. Y&R Italia reports gross in-

(Continued on Page 80)

How much does a peak-time spot cost on Danish TV? Nothing – there is no commercial TV in Denmark.

The Irish socio-economic scale: A, B, C, D, E, and F. (F? Farmers, of course.)

If you want to talk to Austrian women, should you advertise in Austria? No, they read German magazines.

Cigarette advertising on Spanish TV will Costa Packet.

Are you accustomed to the traditional British pastime of pre-empting? If not, it could cost you a TV spot.

Some advertisers adopt a cool approach to Italian no-cigarette laws, and build the fine into their budgets beforehand.

WOULD YOU SURVIVE ON YOUR OWN IN EUROPE?

How many commercial radio stations has Belgium got. Six? Sixteen? Sixty? Six hundred and fifty? (0S9)

The good news: no shortage of advertising space in Portuguese newspapers. The bad news: only 3% of the population read them.

How short is the supply of airtime in the Netherlands? (Hint: a heavy campaign could be as much as one spot a week.)

Be sure to allow for little extras in your Greek media budget. Taxes can add up to 60%.

Sprechen Sie Deutsch? Parlez-vous Français? Parli Italiano? Your voice-over will have to, for Swiss national TV.

The Germans have a great system for avoiding last minute panic. Everyone has to book TV airtime twelve months in advance.

What does French TV say to margarine, computers, books, and airlines? Non, non, non, non.

Did you know you can advertise on State television in Finland?

If some of these facts came as a surprise, you'd better get the Focus European Media and Marketing Guide. We went to D'Arcy-MacManus Masius's nineteen European offices to compile up-to-date information for the 92-page Guide. How far would you get without it?

Notes to individual agency listings

(Continued from Page 77)

come for Y&R, Cato Johnson and Burson-Marsteller.

JAMAICA

CGR Communications gross income estimated by AA.

JAPAN

Asia Advertising Agency 1983 gross income and billings figures projected for fiscal year ending April, 1983.

Asatsu BBDO Intl. purchased earlier this year a 10% equity in Asatsu and the Japanese agency acquired a 2% share of BBDO Intl.

Dai-Ichi Kikaku figures are a consolidation of its percentage ownership in 18 agencies.

Dentsu-Young & Rubicam KK does not report billings. Figures are AA estimates. Totals include consolidated gross income figures for Sudler & Hennessey.

FCB (Japan) office opened late in 1983.

Meitsu Advertising part of Kenyon & Eckhardt Intl.

Standard Advertising affiliated with Needham, Harper & Steers Intl.

Tokyo Senko-Dailey/Tokyo Senko Intl. part of Interpublic Group of Cos.

Tokyu Agency International came to a joint venture agreement with Ogilvy & Mather Intl. Sept., 1983 in which O&M holds 49% equity.

LEBANON

Enterprise Middle East was founded as part of the JWT Group in 1983. Its "local currency" is U.S. dollars.

FCB Middle East local currency figures are AA estimates. The agency is headquartered in Athens but does business in the Middle East.

Intermarkets S.A.L. local currency is not given because returns from eight Middle East offices—Bahrain, Kuwait, Dubai, Egypt, Jordan, Syria, Qatar and Oman—and London are dollar-consolidated at the corporate level.

Madco Lebanon established in 1972, was considered head office of the Madco Group. At present, the Beirut office only deals with local activities and temporary headquarters have been set up in Dubai.

MALAYSIA

Flagbearer Meridian Advertising part of Ogilvy & Mather Intl.

Ronald Quay is affiliated with N W Ayer Intl.

Lawyers

(Continued from Page 3)

Court cleared the way in the late 1970s, now face a steady stream of aggressive rivals.

The veterans think some of the newcomers are making the profession look shabby with their hard-sell spots. But the familiar, big-spending firms have been forced to adjust their promotion strategy to be more competitive.

The shifting to radio, for instance, has become noticeable among some firms.

Jacoby & Meyers, No. 2 in the Television Bureau of Advertising/Broadcast Advertisers Reports rankings, has shifted a major part of its budget to radio. Last year, the firm cut its tv budget for general, nonbusiness work in four cities to $823,200 from $1.7 million, according to industry estimates.

Shifting to radio

In Los Angeles, partner Steve Meyers said escalating tv rates had prompted the firm's in-house agency, J&M Advertising, to shift 30% to 40% of the ad budget to other media, especially radio. The move, Mr. Meyers said, "is working out fine."

Radio and tv commercials emphasize Jacoby & Meyers' record of serving 400,000 clients in recent years and suggest that folks in need of legal help "ask a friend and he might recommend us."

The firm plans to spend about the same amount this year as last.

At Hyatt Legal Services, No. 1 on the list, a fresh campaign should be coming soon from its new agency, Isidore & Paulson.

Joel Hyatt, senior partner and on-air spokesman for the expanding chain, boosted his tv budget 36% to $3 million in 1983. The firm mixes newspapers with tv and stresses convenient, affordable, personalized services for everything from adoption to wills.

A spokeswoman would not say how much the firm's advertising will be boosted this year as the Hyatt partnership opens branches in Houston, Seattle, Indianpolis, Dallas and Portland, Ore.

The chain operates in 18 markets, including Baltimore, where the lawyer glut seems acute.

Baltimore placed five firms in the top 20 advertisers circle. They range from Saiontz & Kirk, with an estimated outlay of $395,000 to Cohen Dwin & Farfield, at $152,000.

Ronald M. Sharrow, who poured $246,600 into tv last year, has become a local celebrity through his commercials.

When he first went before the cameras in 1978 offering to handle personal injury complaints on speculation, he had a one-lawyer operation. Today he has five other lawyers on a 20-person staff and has branched out into criminal law. While his gross has increased from $300,000 to $2 million, he believes he may have reached the saturation point in tv. The budget may be cut to $200,000 or less in 1984.

His latest ads subtly needle his rivals. A typical spot grabs the viewer with a car smashup scene and asks: "If you had an accident, where would you turn for help?" The camera switches to Mr. Sharrow, who says something like: "A lot of lawyers think we are so successful and leaders because we were the first to get on tv. The fact is we are leaders because we get results and are aggressive. You might as well follow the leaders too; everybody else is."

Despite the lawyer-cluttered airwaves, Mr. Sharrow remains a tv booster. His ad shop, Pro Ads, handles his office and other clients.

Larry H. Parker Law Office, Long Beach, Cal., No. 3 among legal advertisers at $562,200, flies to Baltimore to tape spots under Mr. Sharrow's direction.

Tv's value questioned

One law firm that maintains some caution over tv advertising is Cohen Dwin & Garfield, Baltimore. "We don't know if tv has been worth the money," said Harold Dwin of the firm's own tv campaign. "It's expensive and it takes a long time to know if we are going to win workmen's compensation or other accident cases."

He is worried about the din of legal voices in Baltimore and the pressing technique of those who come on like pitchman for storm windows.

Cohen Dwin & Garfield, whose ad budget will go up about 10% this year, gets soft-sell generic commercials from Norton Frickey & Associates in Denver.

Mr. Frickey said he places nearly $4.5 million annually on tv for the 113 law firms in his Network Affiliates syndicate. His own firm, with a $556,400 budget, was No. 4 on the TvB list.

Mr. Frickey's ad agency, NF Advertising, produces a fresh supply of spots every six weeks to be tagged locally and booked in daytime periods.

He favors a restrained, informational approach, with ads designed to tell people of limited mea: where to turn when they need guidance in the legal maze. Many of the Frickey ads focus on industrial workers on the job.

"We don't use ambulances or hospital scenes, but some of our competitors do," Mr. Frickey said. "And that's tacky."#

Bills deck Tech HiFi chain

RANDOLPH, MASS.—Chapter 11 bankruptcy papers filed in U.S. district court in Boston indicate that Tech HiFi has 598 creditors, who are owed $21.9 million, while the audiovideo chain claimed $17.1 million in assets.

Among the creditors is Corinthian Media, New York, which handled media placement. Corinthian, which was not listed among the 20 companies owed the most money, had no comment on the Tech HiFi action.

Tech HiFi has an in-house agency, Ad Infinitum.

Tech HiFi, a 70-store chain mainly on the East Coast, filed for bankruptcy protection on April 10. The chain plans to close 14 stores in Michigan and Ohio and sell its North Carolina subsidiary with four stores.#

DMA elects council heads

NEW YORK—The Direct Marketing Assn. elected new officers to chair 10 of its special-interest councils during its annual spring conference in Phoenix.

New council chairmen and vice-chairmen are: Erv Magram (Lew Magram Ltd.) and Suzanne Taliferro (Tolliver) on catalogs; Annette Brodsky (Accredited Mailing List) and Marcella Lieberman (Prestige List Service), lists; Al Dyon (Allstate Insurance Co.) and Cheri Rodolfo (Fireman's Fund American Life Insurance), insurance; Ira Belth (Belth Associates) and James Rice (McGraw-Hill), business-to-business marketing; John Booth (Direct Marketing Group) and James Wolf (Mellon Bank), financial services; James Aldige III (Viguerie Co.) and John Temple (Guidepost Associates), fund-raising; David Shepard (David Shepard Associates) and Ronald Gerwin (American Express), marketing; Peg Kuman (Publishers Clearing House) and Robert Borders (Wometco Home Theaters), telephone marketing; Bernice Grossman (Direct Marketing Resource Services) and Jack Doyle (Rodale Press), circulation, and Michael Green (Direct Marketing Research Associates) and Emma Hildreth (Meredith Corp.) as acting heads on the council.#

to add The Chronicle to your broadcast buy.

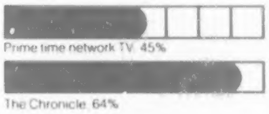
Houston cable penetration now stands at 40%. And among adults with household incomes over $35,000, the ones you want to reach most, 48% subscribe to cable.

What you get is a TV picture so hopelessly fragmented, it's virtually impossible to cover Houston with broadcast.

Solution? To increase your reach and frequency, make The Chronicle the primary part of your Houston media plan. As the largest newspaper in the Southwest, Chronicle penetration among adults with household income of $35,000+ is unmatched.

For example, a one week, $25,000 prime time local network spot TV schedule in Houston delivers only 45% of adults living in $35,000+ households. An equal investment in The Chronicle delivers 64% of these affluent adults*

One week $25,000 media buy
Adults $35,000+ households



That's 142 extra GRP's. At no extra cost.

For a detailed media comparison, call our Research Manager collect, 713/220-7401. Under the circumstances, it's the only reasonable thing to do.

Houston Chronicle
The Primary Advertising Investment

"DARE TO COMPARE"
TI makes the best software perform even better.

TI's campaign dares consumers to compare the TI Professional Computer to IBM's Personal Computer.

TI 'dares' to take on IBM

By TOM BAYER

DALLAS—Texas Instruments tackles IBM April 30 in a comparative marketing effort that "dares" consumers to compare the TI Professional Computer to the IBM Personal Computer.

Asserting that IBM may have the most widely recognized name in personal computing, TI officials are staking a claim of "superiority" in side-by-side demonstrations at most of the 700 authorized TI dealers and at many ComputerLand outlets.

With its reputation and marketing clout, IBM has established the IBM PC as the standard for competitors, thus the spate of comparisons and personal computer products claiming to be "IBM compatible." The personal computer market has seen some comparative advertising aimed at IBM, but none has been so blatant as TI. McCann-Erickson, Houston, is TI's agency.

TI will characterize its budget only as "multi-million-dollar," but the intention is to raise the national awareness of TI's computer, capitalizing on favorable reviews and comparisons in the computer press.

The 90-day aggressive merchandising program will

(Continued on Page 5)

ABC poised for 'imminent' ESPN buyout

By SUSAN SPILLMAN

NEW YORK—ABC Video Enterprises, a wholly owned subsidiary of ABC Inc., is expected to make a bid for the Entertainment & Sports Programming Network this week.

At an April 23 meeting, ABC Inc. top brass debated which of several options to take in moving toward acquiring ESPN, ADVERTISING AGE has learned.

A deal "is imminent," said a source close to Texaco, the cable network's majority shareholder. At press time, Texaco said it had gotten no formal offers.

ABC's options include buying the cable sports service outright or finding a partner. James Abernathy, vp-corporate affairs for ABC Inc., said only, "We're certainly interested in ESPN under the right circumstances."

ABC owns 15% of the cable network through a $25 million deal it struck in January with former ESPN majority owner Getty Oil.

In mid-February, Texaco bought Getty for $10.1 billion and with it inherited 70% of ESPN. Texaco has said it wants to unload the cable network. The remaining 15% of ESPN is owned by the cable network's founder, Bill Rasmussen, and his family and other original individual investors.

News of ABC's intended bid for ESPN follows reports from Turner Broadcasting Systems that it also is interested in buying ESPN (AA, April 9). A Turner spokesman said his company still planned to make a bid "in about two weeks."

When ABC purchased its current 15% interest in ESPN, the company got the right of first refusal to buy the remainder of Getty's—now Texaco's—interest in ESPN. The network is the country's largest cable network and is valued at about $200 million.

Other companies rumored to be interested in ESPN include Coca-Cola, Gulf & Western, Time Inc. and Anheuser-Busch.#

Saatchi chasing a stake in Japan

LONDON—Saatchi & Saatchi is pushing to gain a big stake in Japan, where it has virtually no presence now, and do it quickly, sources say.

The Saatchi brothers, Maurice and Charles, founders of the London-based agency, don't think they can reach their goal of having one of the top 10 agencies in each of the 10 largest markets in the world by 1986 without strong representation in Japan.

The company includes Saatchi & Saatchi Compton Worldwide, McCaffrey & McCall, Dorland Advertising and Crawford Hall Partnership.

Japan is important because multinational clients are increasingly interested in lining up accounts with agencies that have worldwide coverage, particularly in Japan.

"The Saatchis have been talking to anybody and everybody in Japan," said one source.

One agency that Saatchi executives have had numerous conversations with is Sanyu, owned 60% by Dai-Ichi Kikaku, the fifth-largest agency network in Japan.

Sanyu originally was set up by DIK to handle advertising for industrial products made by companies affiliated with Mitsubishi. In 1983, Sanyu had gross income of $1.9 million on billings of $14.4 million.

Sources say the Saatchi goal was to take a minority share of Sanyu, and quickly build that up to a majority share, then complete control.

However, the Saatchi goal of taking over a Japanese agency may be a long way off, as even Saatchi executives admit privately.

The grab for Sanyu has been stymied, according to one source, partly because of the close and broadening DIK relationship with Doyle Dane Bernbach.

For example, two weeks ago DDB and DIK joined forces with Japan Counselors, a leading Japanese public relations agency, to form an international public relations company called DDJ (AA, April 23).#

Stan's saucy snipe

By NANCY GIGES

Stan Freberg's offbeat humor has turned up in a new campaign for Prince spaghetti sauce.

Prince's sauce division, based in Pennsauken, N.J., has bypassed agency Venet Advertising, New York, for a humorous campaign created by Freberg Ltd. that refers to the 1984 Summer Olympics without actually mentioning the event. The spot could open a whole new area of "almost-Olympic" campaigns.

Prince apparently has taken this approach to gain attention in a category in which competitors outspend Prince many times over. The lion's share of Prince's ad dollars go into its pasta, which is a leading brand in New England and Chicago and No. 2 in a number of other major markets.

The Prince sauce commercial running in New England, upstate New York, Chicago and Philadelphia opens with a woman noting, "Not the official spaghetti sauce of the 1984. . ." Man: "Hold it. Not the official?" Woman: "No. Prince probably could be. If we wanted to plunk down millions of dollars to be the official. . .uh. . .you know,

(Continued on Page 5)

KTVT set to dish out

TULSA, OKLA.—United Video, a satellite carrier, will begin offering KTVT, Dallas/Fort Worth, via satellite starting July 1.

The move would give the independent station the potential of growing into a superstation going beyond its market area.

United Video expects KTVT, owned by Gaylord Broadcasting, to reach 1 million households by the end of 1984. Testing of the transmission is to begin June 15.

United Video provides satellite transmission of superstation WGN, a Chicago independent, and just recently added New York independent WPIX.#

Big Mac makes the big leagues

By ROBERT RAISSMAN
and SCOTT HUME

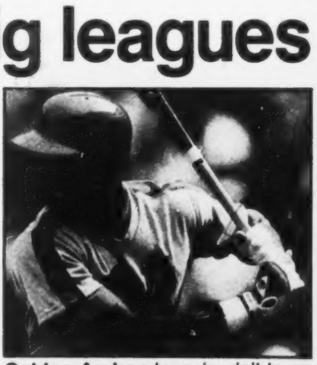
The decision by the presidents of the American and National Leagues to permit players to wear McDonald's Golden Arches on their wristbands may lead to other major league players selling other parts of their uniforms to advertisers.

"It's a disastrous decision," said a source in the Commissioner of Baseball's office. "They [the American and National league presidents] didn't envision what could happen when they allowed McDonald's to use the wristbands." The source said the decision sets a precedent.

McDonald's was given permission by the leagues in support of the company's Ronald McDonald House Team (AA, April 23).

McDonald's wants at least one player from each major league team to join. They will visit sick children at Ronald McDonald Houses and they also will be allowed to wear the McDonald's wristbands on the field.

The USFL, NFL and NBA all prohibit players from wearing logos on their uniforms.#



Golden Arches logo is visible on Darryl Strawberry's wristband in this *Sports Illustrated* photo.

It virtually pervades our everyday lives. Consumers are comfortable with and knowledgeable about the process. The media devotes more time and space to explaining and dissecting it. Companies recognize its growing importance to their very survival.

The Marketing Phenomenon

By Charlene Canape

No one has to tell Ellen Metcalf of Arthur D. Little, the Boston-based research company, that today's consumers know about marketing.

Several years ago, Ms. Metcalf was collecting consumer comments on the newly introduced RCA videodisc player (which RCA recently decided to abandon). "With any new product, we always had people who said, 'I'm going to wait to buy until the bugs are out of the system.' " But this time, the consumers demonstrated they understood the basic principles of marketing, she says.

"The people we talked with [about the RCA player] said they would wait to buy until there were more competitors, because then prices would come down, the product would be improved and over-all they would get better value for their dollar. The fact that they went through that process was amazing to me," the head of Little's consumer industries unit says.

Surprising or not, it is a fact that marketing has become an accepted—even expected—part of American life and a rapidly growing one at that. Nowhere is this more evident than in dollar figures. In 1970, ADVERTISING AGE reported that the 100 leading national advertisers spent $4.62 billion on advertising. Just 12 years later, that figure had ballooned to $17.1 billion, a whopping 270% increase.

Instead of rebelling against this marketing system, the consumer is using it to his advantage. "I see a new wave consumer who is unwilling to accept brand name, price or past experience as surrogates for value," Ms. Metcalf says. "This consumer has much higher standards now than in the past."

Many executives view this marketing-savvy consumer as the inevitable result of the current business environment in which a large number of competitors seek to market similar products. A good example is the personal computer industry. Theodore Levitt, a professor of business administration at Harvard and author of the recent book "The Marketing Imagination," notes it is no longer necessary to be a technical wizard to get into the computer business because most marketers buy the same component parts from manufacturers. "You very quickly reach product parity," Mr. Levitt says. "The effort to find ways of competing more effectively on other grounds intensifies, and those other grounds get defined as marketing."

In a fierce marketing battle, the company with the largest share of business fights to hold onto its customers, while challengers strive to take those customers away. Of course, competitors always have fought for customers, but today these battles are played out for the consumer in living color on the tv screen.

Burger King announces in its tv commercials how many customers it has won from McDonald's. MCI and Sprint Telephone Service commercials encourage phone users to switch to one of those long-distance services from AT&T. Pepsi-Cola presents filmed evidence of people being convinced that Pepsi tastes better than Coke.

If the consumer watching these commercials still manages to miss the underlying message that marketing is taking over, the press is there to hammer the idea home. Most major publications now devote more space to covering marketing in the business pages and in general trend and "living" sections.

According to Hall's Editorial Reports, an organization that measures the editorial content of the nation's top weekly magazines, coverage of business in general has increased steadily since 1980. *Time*, for example, devoted 336 pages to business news in 1983, compared with 230 in 1980. Whit Raymond, a senior analyst at Hall's, says he believes that more coverage of marketing news accounts for part of that increase.

Even tv appears fascinated with the subject. Last month, Edward Ney, chief executive officer of Young & Rubicam, was the profile feature interview on "Business Times," an Entertainment & Sports Programming Network morning program. During a recent week, ABC's "Good Morning America" devoted one segment a day to discussions of marketing and advertising.

Marketing may be big news now, but the concept is as old as civilization. In its early stages, marketing simply meant the exchange of goods for goods or services. Through the ages, merchants began to improve on this simple sales technique. Instead of waiting for the customer to pass by the shop, store owners began to investigate ways to attract customers.

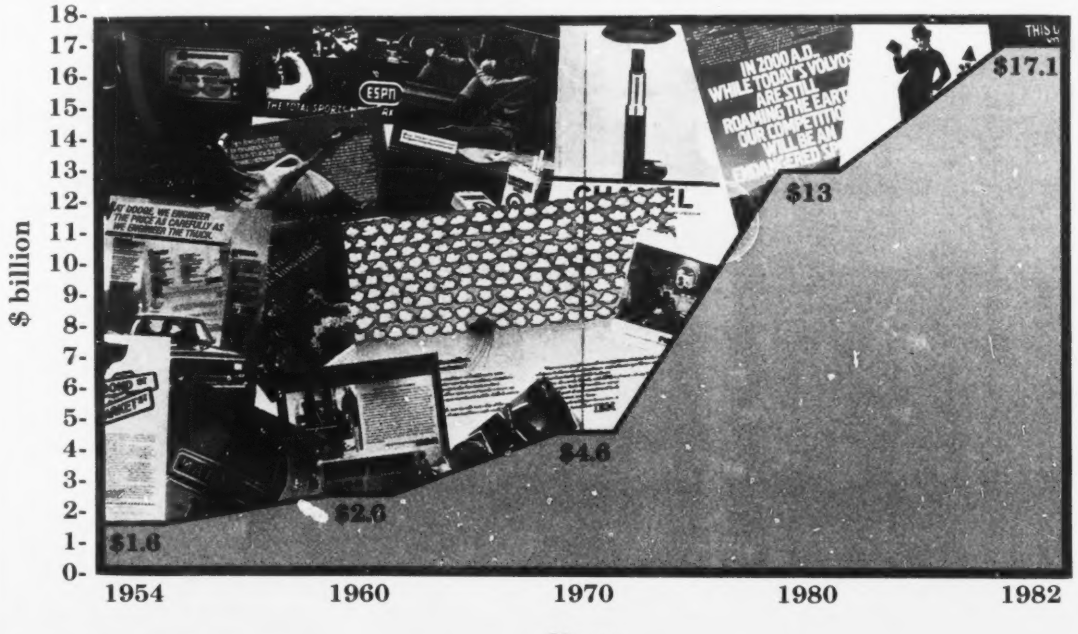
John J. McNamara, president of Young & Rubicam USA, says he believes that "modern marketing," or marketing as a science, was an outgrowth of the post-World War II era. "The war led us out of our worst economic depression and set the stage for the unparalleled expansion of those glorious postwar years," Mr. McNamara says. "Especially critical to marketing was the emergence of a true mass market as a new and increasingly prosperous middle class swelled in size."

Two other developments during this time—the supermarket and the baby boom—continue their influence. The supermarket rapidly took over as the best

Charlene Canape is an ADVERTISING AGE contributing editor based in New York.

ADVERTISING AGE's 100 Leading National Advertisers ... and how they grew

Total ad expenditures in $ billion
(including unmeasured media)



ADVERTISING AGE 100 Leading Advertisers

Almost three decades of advertising spending is represented in this graph that starts with the first ADVERTISING AGE compilation of advertising expenditures by the 100 leading national advertisers, published by AA in 1956 reporting the figures from 1954 and 1955.

way for marketers to distribute package goods to consumers. Eager to reach the large number of consumers represented by the baby boom, companies began to develop products for that audience.

"Wherever the boomers go, they seem to drag massive segments of the mass market with them," says Alexander Kroll, president and chief operating officer of Young & Rubicam. That targeting began when the baby boomers were still in diapers and is expected to continue until after their retirement.

Targeting customers is just one element of marketing strategy. Because marketing takes in a wide range of functions—from product research and development to testing to sales and distribution—it is difficult to estimate corporate expenditures for the entire process. However, most experts say marketing costs are increasing steadily as companies recognize the importance of the total function.

All this interest in marketing is good news to the advertising industry. "The most important part of business today is marketing, and advertising is the communications arm of marketing." says Walter Weir, who teaches advertising at Temple University in Philadelphia.

There also is a general perception among those in the advertising industry that the public is less critical of their profession these days. "All I am is a salesperson, and at one time that was a negative thing," says Ira Madris, executive vp-creative at McCann-Erickson. "There is a reality now that there's nothing wrong with being a salesperson. In fact, it's something to take pride in because we live in a world that needs salespersons."

"Historically, advertising has been a whipping boy," says Edward C. Stephens, formerly in account and creative positions with Dancer Fitzgerald Sample and now dean of Syracuse University's S.I. Newhouse School of Communications. "We've seen a huge shift since the 1960s. There is a greater understanding of the contributions big corporations have made to the nation and, with that, a greater appreciation of advertising."

According to an ADVERTISING AGE survey last fall, consumers *do* have a higher opinion of advertising than even many of the industry's top executives believe. In an advertising-image tracking study prepared for AD AGE by SRI Research Center, Lincoln, Neb., almost 50% of consumers surveyed thought advertising was better or much better (creatively) than a year earlier, and 26% thought advertising was more honest than a year earlier.

Only 13% of respondents thought advertising was worse or much worse in terms of honesty.

If advertising's reputation has improved, so has its financial standing. Advertising executives and observers agree that the industry should maintain a steady growth rate through this century. "Advertising has never been healthier," says Robert J. Coen, senior vp at McCann. "Since 1976, advertising has been growing each year at a rate faster than the economy." Mr. Coen predicts advertising expenditures in the U.S. will increase this year 13.8%, to $85.4 billion. Worldwide advertising industry revenues will exceed $150 billion in 1984 and will reach $287 billion by 1990, he says.

The American Assn. of Advertising Agencies believes that personnel requirements for the industry will continue to increase, with 120,000 people employed by the year 2000, a 17% jump from 1981.

There are other encouraging signs. Direct marketing has seen revenues more than double from $60 billion in 1975 to $150.3 billion in 1983, according to the Direct Marketing Assn. By the turn of the century, the DMA predicts that one in every four consumer dollars will be spent on mail order sales.

It is probable that a good portion of that advertising revenue could come from products that don't exist now. Technology already has created a whole new advertising category called the personal computer. Advertising expenditures for personal computers grew from $93 million in 1981 to $400 million in 1983, and are expected to reach $600 million this year, according to David Simons, president of Digital Video Corp. There is no doubt that technology will continue to provide exciting products to be marketed and advertised. High on everyone's list are robots, which soon could be sold as essential pieces of home equipment.

Government regulations, cut back severely during the Reagan administration, also have opened many new areas for competition. Years ago, who could have imagined that consumers would be bombarded with ads for financial services? Yet the Publishers Information Bureau estimates that financial services advertising spending—including banks, brokers, mutual funds, savings and loan associations, credit cards, life, casualty, fire and other types of insurance—in six media (magazines, supplements, network and spot tv, network radio and outdoor) has increased from $197 million in 1972 to nearly $628 million in 1983.

1984
Projections to note

- Worldwide ad spending —$150 billion
- U.S. ad spending —$85.4 billion
- Ad spending for the personal computer industry (including software and accessories) —$600 million
- Software industry revenues —$3 billion

In addition, deregulation in the drug area will continue to bring to the market many new over-the-counter medications previously available only through prescription, making them eligible for consumer advertising.

Sudler & Hennessey, Young & Rubicam's medical and health services agency, three years ago set up a consumer unit to handle this new business; this year it expects to achieve $30 million in billings from a single assignment, Parke-Davis' Benylin cough syrup.

And there are other products and services that will be advertised for the first time.

William Gibson, Sudler & Hennessey president, anticipates a boom in the health service area as companies rush to fulfill the needs of a generally aging population. By 2025, 58.6 million Americans will be 65 and older; that will represent 19% of the population, or more than double the number of Americans in that age group now.

McCann's Mr. Coen points out that the traditional top advertising categories—food products, cosmetics and apparel—will continue to be the largest revenue producers through this century. Both Selling Areas-Marketing Inc. and Dancer Fitzgerald Sample, which track new products, call the current rate of new product introductions healthy.

In 1983, 1,803 new products were introduced, compared with 1,510 in 1982, according to Marty Friedman, editor of DFS' "New Product News."

Ad spending by the top 10 over two decades of growth

1960 (million)		1970 (million)		1982 (million)	
1. General Motors Corp.	$168.5	1. Procter & Gamble Co.	$265.0	1. Procter & Gamble Co.	$726.0

If the business climate is providing corporations with a wide array of opportunities, it also is presenting as many challenges. Facing a more educated consumer, marketers now have no choice but to improve their operations.

"I am of the school that says the marketing concept is the essence and the driving force of all business," says Robert Seelert, group vp, General Foods. "The concept of marketing is meeting consumer needs. Everyone is in that business, but the package goods companies have honed those skills and focused on that orientation better than anyone else." He says those skills can be learned by corporations in other industries. "Those who don't measure up will find their business fading away."

Already the landscape is littered with products that never stood a chance of succeeding because they were not backed by sound marketing plans. Some of these casualties have occurred in the personal computer industry. Mr. Weir of Temple University singles IBM out for praise as a computer marketer that did it right. The company delayed the introduction of its personal computer until its marketing program was in place.

Other high technology industries are discovering they must become marketing experts to succeed. "The computer software industry is virtually void of marketing talent," says C. Rowland Hanson, vp-corporate communications at Microsoft Corp., a major software company based in Bellevue, Wash. But that's beginning to change.

Mr. Hanson is representative of the type of talent the software industry is seeking. After stints with General Mills and Carnation Co., he was vp-marketing for Neutrogena when he was approached by Microsoft's owner, Bill Gates. "I am basically a package goods marketer, and there is no doubt that is why I was recruited by Microsoft," Mr. Hanson says.

Growth in the software industry has been nothing short of incredible. Mr. Hanson cites a statistic from Dallas-based market researcher Future Computing that estimates industry revenues will reach $3 billion this year, a 600% increase over 1981.

While the industry's growth will continue, Mr. Hanson says an increasing number of competitors means the pie will be sliced into thinner pieces. Marketing skills, therefore, will become even more essential, he says. And from Mr. Hanson's perspective, the industry has a lot of work to do. "This industry does not understand positioning, market research techniques and how to interpret and apply those results," he says.

Software companies *will* be spending more of their marketing dollars on advertising, industry executives indicate. Personal computer marketers already have found print and direct mail to be the most efficient means of reaching those who own personal computers. "Print does the best job of educating the consumer and providing the benefits of the products you're selling," says Jim Ellerbrake, senior vp-management supervisor at Dancer Fitzgerald Sample, San Francisco, the agency for Grid Systems and its Grid Compass, a high-end portable microcomputer.

Of course, huge advertising expenditures alone cannot buy success. Dallas-based Texas Instruments spent $13.8 million in 1983 on tv commercials for its personal computer, a 334% increase over 1982, according to the Television Bureau of Advertising. Yet those spots, starring Bill Cosby, were not enough to move equipment off retail shelves. Ultimately, Texas Instruments withdrew from the personal computer market.

"Advertising is only part of the marketing task," Mr. Levitt says. "The whole thing has to be symmetrical, consistent. Advertising is not the tail that wags the marketing dog, and marketing is not the dog that wags the advertising tail."

All new products are faced with the same challenge. The consumer must be told about the item or service in terms he can understand. "Advertising has to deliver a discernible message to the proper audience," says Mr. Stephens.

As the marketing universe expands, the number of people employed by U.S. ad agencies also will grow—by 17% between 1981 and the end of the century, according to American Assn. of Advertising Agencies projections.

Marketing

(Continued from Page M-7)

The challenge may be greater with a new product or service that is unfamiliar to the consumer. These products often can be explained by linking them to products the consumer already knows about. "With a videocassette recorder, for example, the consumer already is familiar with a tape recorder and a tv set," Mr. Levitt says. "It's understandable."

With other products or services, the task is more difficult. "The hardest thing about high-tech products is educating the people about what the products are going to do for them," says Walter E. Ulrich, president of Walter E. Ulrich Consulting, Houston. Mr. Ulrich gives high marks to Federal Express. "The company committed a tremendous amount of advertising dollars to get across the concept of sending a document overnight," he says. "It was extremely effective."

Harvey Stuart, owner of Fone Booth, a New York retail store, says there is a dearth of consumer information from companies marketing telephones. As a result, Mr. Stuart and his sales staff spend a major part of their time telling consumers what they can and cannot do with regard to owning telephones.

The financial services industry is one that is responding to the consumer's desire for more information. "We are dealing with a new generation of self-propelled investors who feel much more confident about making their own choices," says Victor Kramer, vp-marketing development for Fidelity Investments, Boston.

Consumers now want to shop around before they invest and no longer believe they must pay top dollar to get top quality. One result has been a proliferation of discount brokers and other financial advisers. Mr. Kramer estimates that this year $50 million will be spent on advertising by companies that did not exist before or existed in different forms.

Fidelity Investments, which has two primary lines of business, discount brokerage and mutual funds, does not limit its marketing efforts to advertising. Mr. Kramer says the company emphasizes its 800 telephone number and has recruited a large team of specially trained people to answer phone queries.

Although there is a plethora of computer ads, some ad executives would agree with Mr. Stephens that "there's a confusion over computer advertising. This is leading to consumer complaints and false and misleading advertising."

While the high-tech companies struggle to learn about marketing from food and cosmetic companies, the consumer package goods industry will be faced with challenges of its own. "We're dealing with a much more segmented world," says Mr. Seeiert of General Foods. "The challenge for businessmen is how to meet that diversified set of needs with a business system that can also earn a return on investment, when the inherent scale of meeting segmented needs is not the same as it was for mass market items."

The push to meet those segmented needs has resulted in a spate of new products that have crowded some food and cosmetics categories. Ira Madris and Bruce Nelson, executive vps-creative at McCann-Erickson, have coined the term "wardrobe of products" to describe this trend. "There used to be 14 cigarets; now there are hundreds," Mr. Nelson says. "The cereal section of a supermarket now takes up a whole aisle. People have options they didn't before. So if you're coming with a new product in an area where there already is consumer satisfaction, you have to be different to be noticed."

Marketers also are being pressured by the supermarkets. "There's a certain groundswell of opinion that the stores aren't big enough to accommodate the front-runner and the me-tooers," says Alan Miller, vp-sales services manager for Selling Areas-Marketing Inc.

Many in the advertising industry welcome the chance to demonstrate their creative skills. "We place ourselves in the position of the consumer and must show how this product is meaningful," Mr. Nelson says. For example, McCann-Erickson was given the task of promoting Sony Corp.'s new 1-in. screen tv in the crowded electronics entertainment category. "We called it the me-tv and showed that it was a personal tv you could watch all by yourself," Mr. Nelson says. "People understood the concept and the brand sold out this fall."

Everyone has his own guesses about where the future tests of marketing and advertising creativity will be.

Mr. Levitt of Harvard says Wall Street and law and accounting firms in New York are asking him, "How should we market ourselves?"

"In professional circles, marketing used to be a dirty word," notes Ms. Metcalf of Arthur D. Little. "But in today's society, professional services have a greater need to market themselves. They are slow to come to that conclusion, and our company is probably no exception."

Ms. Metcalf says she also believes that the educational community increasingly will turn to marketing to students.

Mr. Ellerbrake of DFS nominates the video phone as a hot new product. "It would not be hard to sell because it isn't hard to operate, and the benefits are easy to see."

Messrs. Nelson and Madris of McCann-Erickson say new services and industries will be created by President Reagan's commitment to build a space station. In addition, they see new businesses being created to cater to an aging population.

Whatever the predictions, one thing is clear: Marketing expertise will be an even more valuable skill in the future. "The future will be a period of significant change and challenge to manufacturers," says Mr. Seeiert of General Foods. "It is a time to be bold and take advantage of that change. Those who don't adapt will find themselves falling by the wayside." ■

What marketers see in their crystal ball

- Countdown to shorter commercials—20 seconds, 15 seconds.

- Tv commercials for computer software.
- Marketing by professional companies—legal, medical, account services that previously shunned the limelight.
- Advertising by colleges and universities to attract students.
- Increased migration of package-goods experts to high-tech companies.

- Popularity of print media by high-tech companies to better describe their products.

- Products and services created by U.S. space program.

- Gradual acceptance of other advertising media—videotex, home computers, movie theaters.

- Greater emphasis on creativity to distinguish product in a crowded field.
- Products and services aimed at the over-65 population as the baby boom generation ages.

Looking to the year 2000

How will advertisers reach their audiences in the future?

There seem to be more questions than answers as advertisers and agency executives wrestle with rapidly changing challenges and needs. According to some experts, not too much will change in the media world between now the year 2000, but the goal of holding down costs will make alternative media forms more attractive and important to marketers.

Agency people charged with selecting advertising vehicles will have to be even more sophisticated in their marketing knowledge, executives agree. Allen Banks, executive vp-media director at Dancer Fitzgerald Sample, says, "The choices available to advertisers seem to be increasing exponentially. Someone can't just make a decision by sitting at a calculator punching in numbers."

Network tv will remain the dominant mass medium, agency executives say. Yet, if its audience continues a pattern of erosion, and if production costs continue to rise, advertisers will end up paying more to reach fewer people.

"After 35 years of being a growth medium, tv is becoming a mature medium," says Marvin S. Mord, vp-marketing and research services at ABC. "It will cost more to purchase network tv in the future and deservedly so. It is still the only way you can run a message for Wendy's and have 50% to 75% of the population instantly aware of 'Where's the beef?' "

One solution for the higher costs expected might be a move to shorter, and thus, less expensive commercials. Currently there is concern in the advertising community about the possible rise of the 15-second commercial and the ensuing clutter that would cause. But future cost concerns may force shorter commercials to become the norm.

"Sixty-second commercials used to be standard, now it's 30s," Mr. Nelson says. "What about a four-second commercial?" he says; "Those who have grown up in front of the tv can accept more images."

Mr. Mord agrees viewers are capable of absorbing more information more quickly, but he sees 15 or 20-second spots more likely than shorter versions.

There are many products, especially high tech ones, that would not lend themselves to such short spots. Longer infomercials, once touted as a major selling point by cable channels, would be more appropriate for selling products that need more explanation, ad industry executives say. "The infomercial has never taken off, and cable has built its programing around the 10-30-60 format," says David Simons, president of consulting group Digital Video Corp.

Apple has created interest in its Macintosh personal computer through tv commercials—most notably its dramatic preview "1984" execution—but the company also has depended on a lengthy magazine insert to explain the product. Many experts believe the print media will continue to benefit from the competition not only among computer manufacturers but also from companies marketing financial services that need in-depth description.The Newspaper Advertising Bureau puts 1983 financial services advertising spending in newspapers (including supplements, preprints, r.o.p.) at $595.8 million.

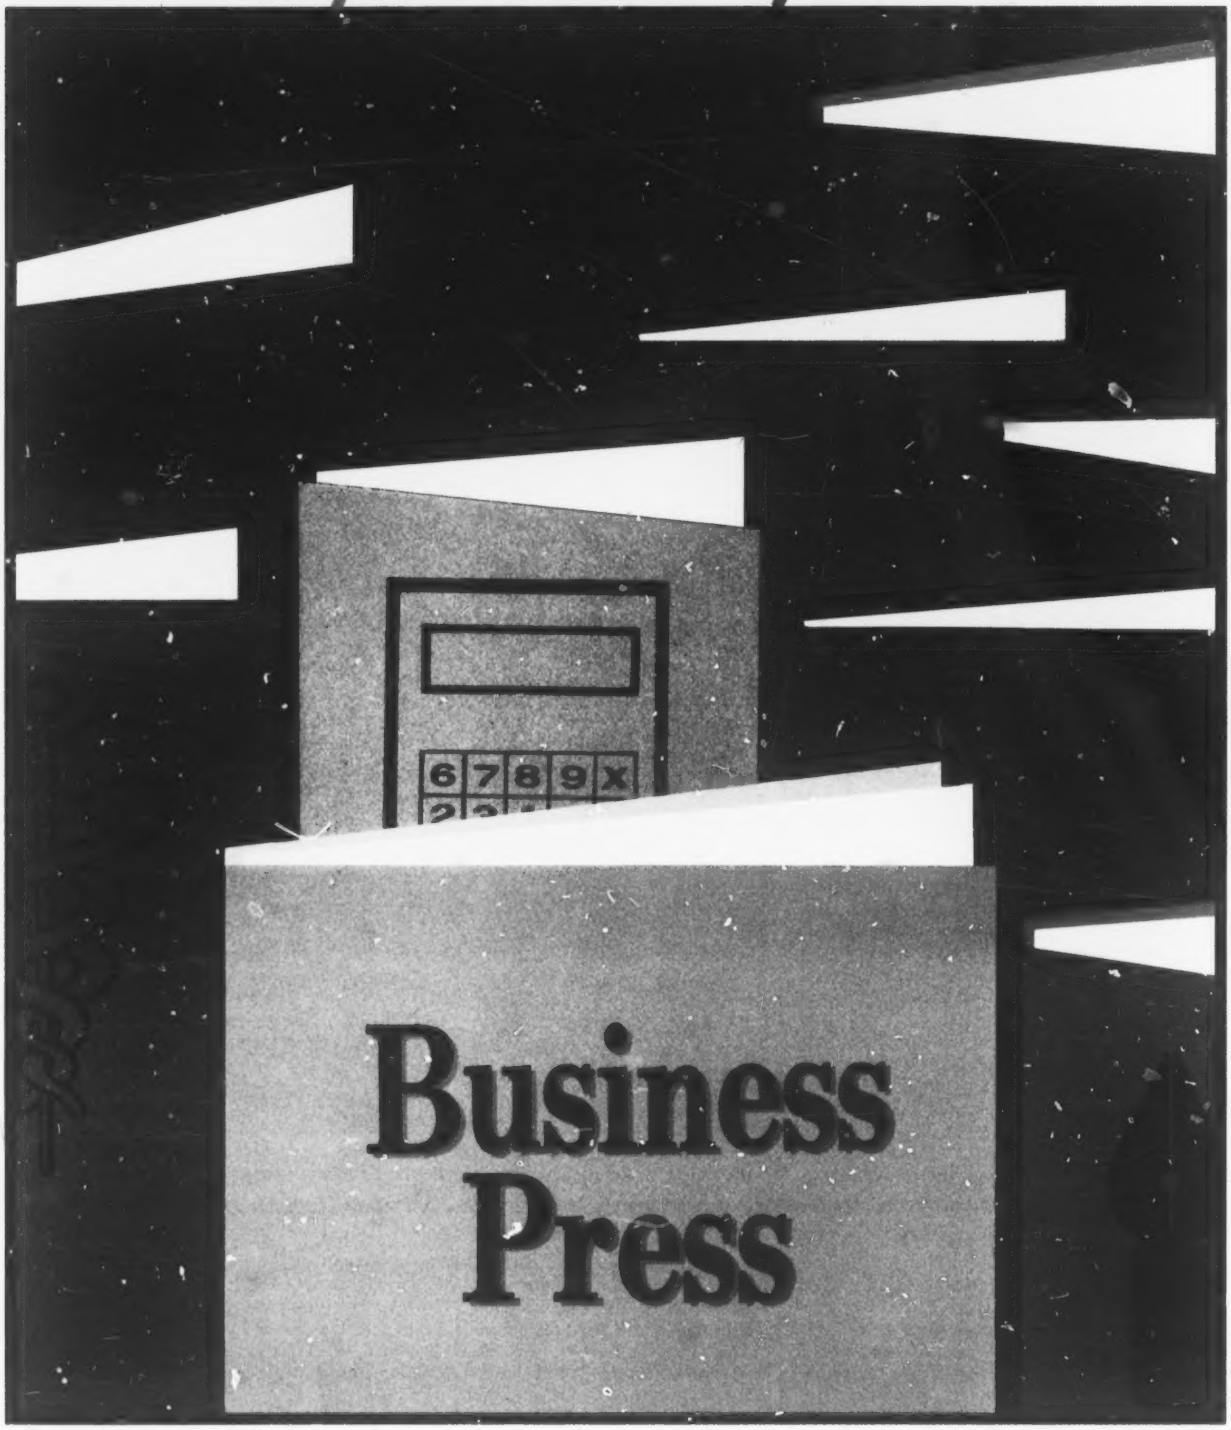
Like cable tv, magazines and newspapers are not doing their best to exploit the situation, some observers say. "Newspapers have the opportunity to make themselves an attractive medium for personal computer advertising," Mr. Simons says. "Yet, few newspapers are taking advantage of this."

Those in financial services actually complain about a lack of adequate advertising vehicles. "We have run out of media," says Victor Kramer, vp-marketing development for Fidelity Investments in Boston. "We run three to seven ads a week in the *Wall Street Journal*, two ads in every issue of *Money* and several in the Sunday *New York Times*," he says. "We are doubling and tripling up in our efficient media because there hasn't been much change in available media."

Somewhere down the road, most experts believe that new forms of advertising will begin to have an influence. Videotex will be one such new medium, although Mr. Simons warns that videotex first must sell itself as a service and not as an advertising vehicle. Mr. Banks says he believes that videocassettes, home computers and movie theaters could become future candidates for such advertising.

Whatever the combination, it seems certain that advertisers increasingly will look to adjust the media they are using. "Ten or 15 years ago, if you had a daytime and prime time tv package, and [ad schedules in] four leading women's magazines, you had tremendous reach," says Robert Seelert, group vp at General Foods. "But today there would be a lot of people that combination would not reach. There is an inherent need for us to broaden the set of marketing vehicles we have access to. That's a challenge to all marketers." --*C.C.*

Special Report



Jeffrey Toth

Responding to needs in a specialized way

By John Maes

The business press "caters to leaders of business, commerce and professions. It demands a special breed of editors. They have to be curious about what makes this society tick, and back this curiosity up with facts and hard research." This is how Edgar Grunwald, former *Business Week* managing editor and longtime adviser to business and consumer publications, described this segment of the publishing world at the American Business Press winter conference in New York last month.

The old term "trade press" is fast becoming anathema to an industry made up of an estimated 2,700 nonconsumer magazines. Another term used to characterize this portion of the news media these days is "healthy" because it's gaining ground on all fronts—more readers, more advertisers and more money in the bank.

> **"The business press, or specialized press, is the healthiest segment of journalism . . ."**
>
> *—Benjamin Baldwin*

"The business press, or specialized press, is clearly the healthiest segment in all of journalism today," says Benjamin Baldwin, a professor of journalism at Northwestern University's Medill School of Journalism, Evanston, Ill., and a specialist in the business press.

Financially, business magazines had a slack year in 1983 because of the recession, but they managed to weather the storm, reports the American Business Press, a trade association for specialized magazines. Ad pages dropped 2%, from an estimated 1.74 million to 1.71 million between 1982 and 1983.

Bridging the 'society book' image

By Catherine Warren

Long before the space shuttle, the silicon chip and the laser captured the technological spotlight, the Pyramids, Britain's Parliament and the Brooklyn Bridge stood as brilliant examples of man's engineering feats. Those who constructed civilization's first buildings, roads, bridges and dams were civil engineers and, as such, were the first practicing engineers.

> **"We wanted to emphasize the excitement of the new civil engineering field, particularly in the area of high technology."**
>
> —***David Dresnia***

The American Society of Civil Engineers, founded in 1852, speaks to about 90,000 of today's civil engineers in its monthly magazine, *Civil Engineering.*

The magazine, located in an austere building near the United Nations in New York, is described by its publisher, David Dresia, as "a business-to-business type of publication designed to be of use to the practicing engineer."

The practicing engineer's ranks include structural, geotechnical, environmental and civil infrastructure design engineers who work on the construction of commercial, industrial, institutional and public works projects.

Because civil engineers hold the final purchase approval of products, equipment and materials, the impact of their decisions is felt in the $100 billion engineered construction market. *Civil Engineering's* March issue contained ads for steel columns and beams from Bethlehem Steel Corp., bridge pavement materials from Armco and geotextiles from Hoechst-Roussel Pharmaceuticals, Du Pont and Amoco Oil Co.

The biggest challenge for *Civil Engineering*, according to its staff, is to overcome the second-class citizen image associated with "society books."

Civil Engineering's affiliation with the ASCE puts it in the society publication category. An industrywide stereotype looks upon a society's publication as less competitive than commercial publishing ventures. After all, such a magazine is part of a nonprofit organization, its readership is assured through its membership and its costs often are paid partially by members' dues. In addition, many magazines are criticized editorially for merely serving as a house organ, publishing members' research papers and announcing meetings.

"The word on many society books is that they are poor, but *Civil Engineering* is an exception to the society book image," says Gene Cronin, Bethlehem Steel's media-administrative director. His company advertises eight times a year with mostly color spreads at a cost of $6,000 each because Bethlehem wants to reach civil engineers, not contractors.

To put a respectable distance between *Civil Engineering* and other less highly regarded society publications, Mr. Dresia attests that 90% of *Civil Engineering's* costs are paid for by advertising sales. Also, to free *Civil Engineering* from the duties of a house organ, 15 scholarly research journals are published each year by the ASCE to house members' papers, and a monthly newspaper reports on the association's news, he adds.

In January, 1983, *Civil Engineering* underwent a complete face lift—its first in more than 10 years. "We felt the magazine looked stodgy, and we wanted to emphasize the excitement of the new civil engineering field, particularly in the area of high technology," Mr. Dresia explains.

Indeed, this "stodgy" image appears to be one that has clung to the civil engineering field as a whole. "Civil engineering is not the glamor stuff," says K.A. Godfrey Jr., the magazine's editor, who holds a degree in civil engineering as well as journalism. Mr. Dresia candidly states that civil engineering's technology has not been evolving as rapidly as it has in other engineering disciplines, a fact that has contributed to the decline in college enrollment in civil engineering programs.

But, he points out, ASCE's membership continues to increase each year. He also sees the technology gap narrowing: "Like everything else, civil engineering is becoming more high-tech oriented."

Specialized

(Continued from Page M-15)

Ad revenues, which totaled $2.5 billion in 1983, were down 6% from the year earlier.

But with the economy now resurgent, ABP president Thomas H. King predicts a "banner year" for 1984. He forecasts that ad pages will rise 4%, to 1.78 million, and ad revenues will jump 12%, to $2.8 billion. Meanwhile, mergers and acquisitions by big companies will continue to strengthen publications that might otherwise founder under smaller publishers, he says.

There are several reasons for the business press' rise to prominence, observers say. First, the entire nature of the U.S. work force is changing. It's becoming more professional, with people entering more sophisticated, higher technology areas requiring them to have more specialized information.

"There's more of a need for specific magazines," says Robert Earley, a group publisher for Harcourt Brace Jovanovich Publications and past president of the American Society of Business Press Editors. "That's why the business press continues to grow. The popular media just can't provide various professions with the type of information they need to do their jobs."

The computer industry probably provides the best example, he says. Mr. Earley's company has just started *Peanut*, a magazine especially designed for operators of the IBM PC jr.

Says Mr. King of ABP: "There have got to be some 220 magazines related to the computer field on the market today, whereas three years ago, there were only about a dozen."

However, it is not information demand alone that has drawn more readers to specialized magazines. Editorial quality and competition among publications has increased dramatically during the past several years.

Business press editors no longer can slap together a magazine from a few black-and-white photographs and columns of press releases hawking new products and services and expect success. Specialized magazines today must show journalistic enterprise in writing, editing, design and graphics, says Mr. Baldwin. "The day is gone when you can publish a few drab display ads and glue them together with just a few articles and expect people to read it—the competition is too keen."

That's why more college trained professionals are being hired as editors and writers by business publications, he says.

In addition, journalism graduates, realizing that only limited job opportunities exist in the general news media, are turning to the specialized press for careers, but only slowly. "Most journalism students still want to go to work for '60 Minutes,' the *New York Times*, the *Washington Post*, *Newsweek* or *Time*, and the business press still gets neglected. There's a long way to go," Mr. King says.

An effort to attract more prospective employes from journalism schools is under way. A business press fellowship, the first of

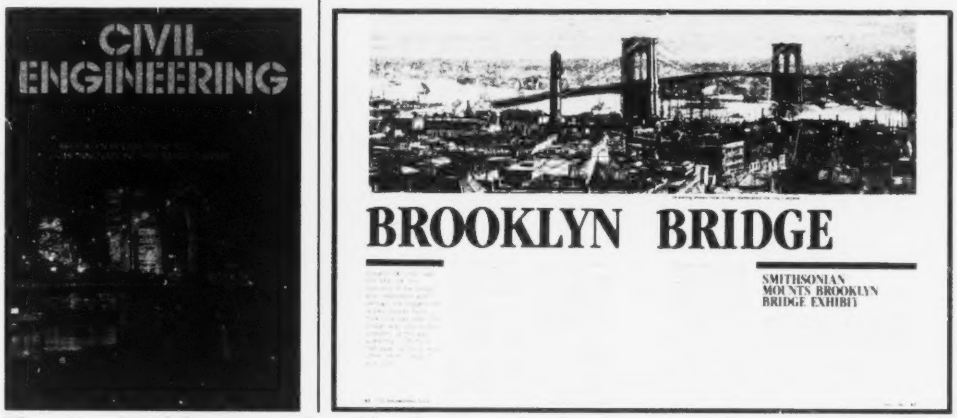
The magazine's new format was designed to reflect the field's more modern image. Consultant Steve Phillips, the designer of *Discover*, *Folio* and *Ms.* magazines, gave the magazine a more open, visually appealing format in its layouts and in its increased use of photos and original art. The cover's logo also was made larger and its color varied from issue to issue.

A new column, "Forum," serves as a guest editorial page, reflecting the more issue-oriented concerns that the rest of the editorial pages have taken. As an example, two recent issues dealt with the question of who was responsible—the civil engineer or the steel structure company—for poorly designed connections between steel beams and columns that caused the collapse of the lobby in Kansas City's Hyatt Regency Hotel and the Mianus River bridge in Connecticut. Largely as a result of these articles, a joint committee was formed by the ASCE and the American Institute of Steel Construction to resolve the responsibility issue.

Although there are more staff-written articles than in past years, members continue to contribute the majority of *Civil Engineering's* editorial content. No more than three of the 10 to 12 monthly features are written by the magazine's staff, Mr. Godfrey notes. Staff-produced articles generally are much broader than those from members.

"I think we would weaken the magazine if we went too far from the members writing on their areas of expertise. It's our guts," he says. He does, however, believe that *Civil Engineering's* staff-and-member writing mix has given the publication a "hybrid" personality. "The standards of excellence are fuzzier; we often feel like we stand alone," he says.



The new visual format employed by the magazine has increased the use of photos and artwork, such as in this cover and spread about the Brooklyn Bridge.

The most compelling issue of the 1980s, Mr. Godfrey says, is the country's aged and decaying infrastructure. The urgent need to replace highways, bridges, sewerage systems and other public works has overtaken the environmental issues of the 1970s.

This September's *Civil Engineering* issue, like that of last September, will address the problem of the rehabilitation and reconstruction of America. Last year's best-read article was concerned with the financing of public works projects and a counterpart is planned for this year's issue.

Indeed, a lot of money is needed in the next decade to repair and rebuild. In the transportation area alone, U.S. airports will need $4.2 billion a year and railroads between $8 billion and $9 billion a year. Mass transit could require $4 billion a year, and highways could need at least $27 billion annually, writes James Brian Quinn, a noted professor of management at the Amos Tuck School of Business Administration, Dartmouth College, Hanover, N.H., in the March issue of *Civil Engineering*.

"The modern world may sink giggling into the sea, playing with its electronic toys. But history has shown that the dreams of humankind are ultimately written in its permanent civil structures," he stresses.

About 50% of *Civil Engineering's* readers are consulting engineers working on public and private industry projects. The majority of these professionals run and operate their own business, according to Scott Armstrong, advertising sales manager. Another 15% to 20% are public works engineers. The rest are contractors, utility companies, members of private industry, academics and suppliers of construction material and equipment.

Because the publication pursues business-to-business advertising, its readers are identified to potential advertisers by where they work, what their involvement is in the marketplace, what they specify and what they purchase, Mr. Armstrong says. *Civil Engineering* considers its closest competition McGraw-Hill's *Engineering News Record*, a weekly news magazine, and Technical Publishing's *Consulting Engineer*, a monthly magazine. Mr. Cronin of Bethlehem Steel buys *Engineering News Record* as part of his two-publication buy (*Civil Engineering* is the other) to reach the civil engineer.

"*Engineering News Record* is the prime book. It's the bible in the field of construction engineering," Mr. Cronin says. *Consulting Engineer*, although praised as a good publication by Mr. Cronin, is not used for his company's advertising because "it covers other disciplines in the consulting engineer field as well as civil engineering."

The concern with the nation's infrastructure and the resultant rebuilding may help the troubled steel industry, which saw a sharp decline in sales in the past two years, according to Mr. Armstrong. In his analysis, "The steel business is still soft and will never be where it once was." Mr. Cronin says it's up to the government to impose steel import quotas if the industry is to survive.

In addition to pursuing more of its traditional advertising, *Civil Engineering* plans to become more aggressive in its pursuit of high-tech advertising. "The computer age has hit the civil engineer," Mr. Dresia says. The March issue displayed ads from Texas Instruments, Hewlett-Packard, Software Arts, Computer Vision and Celestial Software.

As part of a vertical buy in eight to 10 varied engineering publications, Hewlett-Packard advertises 12 times a year in *Civil Engineering*, says Jack Peters, advertising program manager of Hewlett-Packard Business Development. "It's a logical outgrowth for us; we're interested in providing complete tools from distance measuring equipment to portable computers for civil engineers."

Civil Engineering is working on a buyer's guide, which will appear for the first time in its December issue. The guide will cross reference manufacturers with their product listings and include a section for brochure and catalog inserts. In a few years, the buyer's guide will be a 13th issue, Mr. Dresia says.

The magazine also is talking to other engineering societies to see if their publications are interested in putting together a network through which consumer advertising may be pursued in the future.

In the next month or so, the magazine will mail a marketing research questionnaire to a selected readership from nine or 10 other engineering publications. "It will help us determine where our niche in the marketplace will be," Mr. Dresia says.

The total circulation of the network would be about 750,000, he says. Consumer and corporate advertising will be pursued, but cigaret and alcohol ads will not be accepted.

---

its kind, has been set up this year by Geyer-McAllister Publications, New York. The fellowship will enable a visiting professor to guest lecture at Northwestern University on job opportunities for students in the business press area.

Mergers and acquisitions have further strengthened the specialized press. Of particular interest is the entry of foreign players such as United Newspapers, a British company that recently acquired Gralla Publications, publisher of 14 titles, for $45 million.

"Almost everyone in this business will tell you that he's looking to acquire a magazine," Mr. King of the ABP says. "There's a lot of activity in the merger area with a lot of well-funded companies that are merger-minded. We're going to see a lot more of this."

He says he believes that the recent acquisition by Harcourt Brace Jovanovich of three plastics industry publications owned by Industry Media of Denver probably will improve those publications. "Harcourt Brace will be able to bring greater money and people resources to those magazines."

Cleveland-based Harcourt Brace claims to have turned the fortunes of a number of flagging magazines it has acquired from small operations. For instance, *Beverage Industry*, bought in 1982 with only 658 ad pages, rose to 780 ad pages last year, a company spokesperson says. Another, *Food & Drug Packaging*, was acquired and rose from 556 ad pages in 1982 to 758 last year. In 1982, Harcourt Brace bought *DVM/The Newsmagazine of Veterinary Medicine* and since has raised its circulation from 30,652 in 1982 to 33,083 last year.

"These magazines were given all the amenities a larger company could provide: A bigger sales staff and a bigger and better circulation operation," the spokesperson says.

Computerized information services also could increase business press revenues when the systems are developed. Although most of them are in the experimental stages or offer little more than informational indexes, the potential exists for this type of "on-line development," says Ken Noble, a media analyst with Paine Webber Mitchell Hutchins, New York.

With such computer systems, subscribers could receive current information regarding their industry and read it on computer terminals without having to wait for each edition of the magazine.

"I don't mean to overplay this because it's largely experimental," Mr. Noble says. "But there's considerable belief in the potential for the on-line type service. In time, it could grow."

There's little doubt that the business press is constantly reshaping and redefining itself, not only in terms of sophisticated services to its audience, but editorially as well.

Says Mr. King, "The editorial product has to get better. There is so much competition from all the other media. It's a constant struggle for share of mind."

GF wins in coffee price suit

Washington—A unanimous Federal Trade Commission ruled Friday that coffee price wars in the 1970s were evidence of healthy competition, rather than predatory behavior by General Foods Corp.

In a decision that leaves GF entirely in the clear, FTC chairman James C. Miller III wrote: "The principal effect of the heated rivalry between Folger and Maxwell House has been to reduce the prices consumers pay for coffee and promote product quality."

The case was triggered in 1976 after General Foods responded to Procter & Gamble's introduction of Folger's coffee in eastern markets with a spate of price reduc-

BMW sues as auto ads tout performance

By RALPH GRAY

Detroit—Legal briefs are waving like checkered flags here as auto marketers race into comparative advertising for their performance cars.

Case No. 1: BMW of North America has sued Ford Motor Co. over advertising claiming that the Ford Thunderbird Turbo Coupe "outhandled" the BMW 633CSi.

A sidelight to the case involves *Car & Driver*. The buff book ran the tests that, when advertised in a Ford corporate ad, prompted the suit, filed last week in U.S. district court in New York. The magazine is one of the prime chroniclers of performance and handling tests and receives much advertising on the subject.

Case No. 2: General Motors is asking the Federal Trade Commission to ease restrictions on GM car-handling ads so the auto maker can "get on even terms with our competition."

That these cases have become issues in the auto industry illustrates the rise of the newly compet-

Baseball shuts out McDonald's logos

By ROBERT RAISSMAN

New York—The presidents of baseball's American and National Leagues have ordered players to stop wearing wristbands carrying the McDonald's Golden Arches logo.

The order, sent to all baseball team administrators, cited a Major League Baseball rule that reads, in part, "No part of the uniform shall include patches or designs relating to commercial advertisements."

Donald Fehr, acting executive director of the Major League Baseball Players Assn., said he was looking into the situation to see whether players' rights have been violated by the presidents' directive.

Sources said each league president gave McDonald's permission to set up a program—which included the wristbands—in support of the company's Ronald McDonald House All-Star Team. McDonald's wants at least one player from each major league team to participate. The players' likenesses would be used to raise funds and the players could be involved in co-op programs. The players also would visit the houses, where parents can stay with children who are undergoing treatment at nearby hospitals.

The conflict over the use of the logos is being treated gingerly by the leagues. On one side, the leagues fear that the McDonald's logo could open the door for players to sell off other parts of their uniforms or equipment to other advertisers (AA, April 26). To deny players that right could put the league in the position of preventing players from earning their full potential livelihood.

Other potential problems also abound. For example, a player might wear sweatbands from a beer company whose chief competitor is the exclusive tv sponsor of the team's games.

Paul Schrage, McDonald's exec vp-chief marketing officer, told Advertising Age the company had been "concerned" the wristbands might be viewed as commercialization, "and that's why we took the idea first to the commissioner's office and then to the Major League [Baseball] Players Assn."

But Chuck Adams, a spokesman for the office of baseball commissioner Bowie Kuhn, said the wristbands never were sent to the commissioner's office for final approval. Instead, McDonald's sent the bands directly to the players.

It was a player who initiated the tie between McDonald's and Major League Baseball. Steve LeRoy, a McDonald's spokesman, said San Diego Padre first baseman Steve Garvey met with the presidents of both leagues to have the wristbands approved. Mr. Garvey, who also heads the San Diego-based Garvey Marketing Group, brought the idea of involving players in Ronald McDonald House to McDonald's in January.

The Padres are owned by the survivors of

New strategy uses 'pop' celebrities

Diet Coke broadens its reach

By STEWART ALTER

Coca-Cola USA, Atlanta, is launching new tv commercials for Diet Coke that represent an increasingly aggressive strategy for the brand. With more advertising dollars behind it than had been planned for this year, the brand will be positioned more fully as a mainstream soft drink.

The revised strategy, developed within the last month, is the result of Diet Coke's having overtaken 7UP as America's third-largest soft drink. Within this time, 11 new commercials have been shot, some of which will begin appearing this week or next. The $30 million budget for the brand has been revised upward, some say by more than 50%. And Diet Coke advertising will be appearing for the first time in print, outdoor, movie theaters and cable tv, at least on MTV.

From the time it was introduced into New York in the summer of 1982, Diet Coke's positioning has been broader than that usually associated with diet drinks. Women aged 18 to 34 still were the primary target, but the "Just for the taste of it" theme and inclusion of men in the commercials were meant to bring in male drinkers as well. As the brand moved to $1 billion in sales in its first year, it attracted a broad spectrum of consumers. This broadening is being pursued further in the new spots.

For the most part, the new approach still includes the use of celebrities that has characterized the ads since the beginning. A new campaign was launched about a month ago with a broader range of mostly younger celebrities than before, but the new spots extend that further and in different directions than had been originally planned. But "Just for the fun of it" remains the theme line.

"We want to be at the leading edge of celebrities, a kind of *People* magazine of the air," explained Malcolm MacDougall, president and director of creative services of SSC&B:Lintas USA, Diet Coke's agency.

One new commercial includes singer Kim Carnes and "Weird Al" Yankovic, whose "Eat It" videotape parody of Michael Jackson's "Beat It" has been very hot. Pepsi-Cola, of course, recently signed Michael Jackson for commercials.

Older and more traditional celebrities are included as well as more far-out ones; famed pilot Chuck Yeager appears in a commercial that also includes Christie Brinkley, while actor James Coco appears in the Kim Carnes and "Weird Al" spot. Said agency chairman Kenneth Robbins, "We are now saying that this is a drink for anyone who wants to choose a soft drink."

Mr. MacDougall, who envisions the current 6% share of market rising soon to 10%, said, "This shows how far we think Diet Coke can travel in different segments of the population. In other words, there are no segments."#

PepsiCo sends Michael Jackson to school. See Page 82.

last minute news

Kodak breaking Trimprint instant line effort

Rochester, N.Y.—Eastman Kodak Co. tonight will break a multimedia campaign for its instant camera and film line, recently renamed Trimprint. Themed " 'The other camera' like no other camera," the campaign stresses Kodak's Trimprint film system that allows pictures to be removed from their backing. Tv spots and ads in general interest, women's and children's magazines support. Budget is undisclosed; last year Kodak reportedly spent $4 million to $5 million in measured media on its instant system. Young & Rubicam handles.

Nantucket snares Namath for underwear line

New York—Nantucket Industries has signed Joe Namath for a line of Namath men's underwear to be marketed in department stores. Terms of the contract call for a six-figure guarantee. Agency not disclosed.

A-B kicks off Bud Light flight during derby

St. Louis—Anheuser-Busch breaks the first of its two Bud Light spots tied to its Summer Olympics sponsorship during Saturday's telecast of the Kentucky Derby. The spot, which shows two farmers who stop work to watch a runner carrying the Olympic torch, carries the theme "Discovering the best in all of us." A second spot breaks in July during the telecast of the games. NH&S/USA, Chicago, is the agency.

'SI' Olympic program generates $6.4 million in ads

New York—*Sports Illustrated* has closed its *Official Olympic Souvenir Program* with 330 total pages, of which 167 are ad pages, yielding $6.4 million in revenue. The program goes on sale around July 1 at $7.95 with a guaranteed circulation of 1 million.

CBS plans 'Honor' fight

By DIANE MERMIGAS

CBS will continue to challenge the credibility of "A Matter of Honor," a new book criticizing a 1982 network documentary on Vietnam, by following author Don Kowet on every step of a cross-country promotion tour next month.

The network has designated George Crile, the documentary's executive producer, to debate Mr. Kowet in print and broadcast interviews about the book, in what is being characterized as the second phase of CBS' massive defense campaign launched a week ago.

Macmillan Inc., in the meantime, plans a $45,000 promotional blitz of the new book, which will be ushered in on its formal publication date May 18 with a new advertising campaign.

The New York publishing company, which in a press release last week reaffirmed its support of the book, could not say how many of the initial 50,000 copies printed of "A Matter of Honor" have been sold. The book purports to tell "the full inside story," including "the motives and techniques" that went into the show's production.

CBS began what Macmillan calls an "unprece-

BK fires off $40 million ad salvo

By SCOTT HUME

Burger King is mounting a fresh attack in its Battle of the Burgers and is adding an old foe.

The latest salvo begins today when the No. 2 burger chain breaks new comparative tv spots. The emphasis again is on "broiling vs. frying," the issue that first ignited the battle in September, 1982. This time, the campaign also will name Wendy's, as well as McDonald's, a Burger King spokesman said.

Burger King has committed $40 million to the new campaign over the next few months, an amount roughly half its total spending on network and spot tv during all of 1983. J. Walter Thompson USA, New York, is Burger King's agency.

Under an out-of-court agreement after the original "broiling vs. frying" campaign, Burger King had avoided naming Wendy's in subsequent comparative campaigns. But Wendy's sales success from its "Where's the beef?" spots apparently has persuaded Burger King to take on the No. 3 chain again.

Meanwhile, the company confirms it is testing a [illegible]-

Jackson good, but Clara stands out

By SCOTT HUME

Pity Michael Jackson.

He has gold records, an armful of Grammy awards, legions of frantic fans. His Pepsi-Cola tv commercials are so popular the soft-drink company has taken to running notices in newspapers' daily tv sections telling people when the spots can be seen (AA, April 23).

So why pity Michael Jackson?

adWatch

Because if you ask the average consumer to name the first advertisement that comes to mind, Michael still is overshadowed by Clara Peller. And she doesn't dance nearly as well as Michael.

The race for consumer awareness these two unlikely competitors have been running since February isn't even close anymore. Michael's been moving pretty fast, but Clara's way out in front.

Who would have guessed she'd set a new track record?

Of a random sample of 1,251 adults surveyed last month, 254, or 20.3%, named Wendy's "Where's the beef?" spots as the first advertising to come to mind from among all they'd heard, seen or

Hoge rolls up his sleeves

By WILLIAM GLOEDE

James Hoge, sans sportcoat, sleeves hiked to his elbows, stuffs his cigar into an ashtray on his desk and prepares to feast on a sandwich and soda brought in from the *Daily News* cafeteria. He mumbles facetiously about how the cigar piques one's appetite, then begins questioning the interviewer on the arcane subject of printing press conversions.

A former reporter, bureau chief, editor and publisher for Chicago's *Sun-Times*, Mr. Hoge, 48, has come home to New York to run the *Daily News*.

Through "mutual explorations" that "seemed to make more and more sense to both sides" as they progressed, the Tribune Co., Chicago, tapped Mr. Hoge to breathe new life into its New York City tabloid (AA, March 19).

Mr. Hoge, a journalist who has climbed the ladder to newspaper executive, admits that of all the positions he has held in the newspaper business, his favorite was that of city editor at the *Sun-Times*. "Pound for pound, it may be the best job in this business," he said.

Interviewed during his second day on the job as publisher, Mr Hoge made it plain that he has yet to develop an actionable battle plan for the *News*.

"I came here with fresh eyes and an open mind," he said. "I don't have a fixed plan in my head."

He faces more than a few problems as he settles into his new post. The paper recently has had some difficulty prodding two of its premiere columnists, Jimmy Breslin and Earl Caldwell, to write. Thanks largely to the absence of Earl Caldwell's column since April 4, the *News* building recently was picketed by a public interest group called "Committee for a Free Press." The group alleges that Mr. Caldwell's column was spiked at the behest of New York Mayor Ed Koch over the columnist's support

USFL lets clock run on tv pact

By ROBERT RAISSMAN

NEW YORK—The United States Football League is still debating whether to accept ABC-TV's $15 million offer for broadcast rights to the league's 1985 games.

Negotiations over rates and terms of the contract have been going on since January and progress continues, said Jim Byrne, a USFL spokesman. "We are still attempting to arrive at an equitable settlement," he said.

The negotiations between ABC and the USFL have been intense and conducted almost daily, sources said.

The USFL, in refusing to immediately accept ABC's renewal offer, may be trying to prolong the negotiations until the end of the season when the tv audience ratings will be in, sources said. If the games garner higher ratings than last year's, the USFL could in turn ask for more money. And if the ratings lag, the league could still accept ABC's offer.

The deadline for completing the deal is also part of the negotiations, Mr. Byrne said.

Meanwhile, a group of USFL team owners in recent weeks has been pushing for the league to

(Continued on Page 78)

Apple aims for the top with IIc

By BOB MARICH

San Francisco—Apple Computer believes there's room for only two at the top of the personal-computer industry. With the help of the Apple IIc, unveiled here April 24, the company believes it can remain a solid No. 2.

"Nobody remembers the No. 3 brand of anything," John Sculley, Apple president-chief executive officer, said after the unveiling. And nobody, including Apple, is forgetting that IBM rules the personal-computer roost.

Mr. Sculley, who a year ago joined Apple from PepsiCo, believes Apple has assured itself the coveted second spot for the foreseeable future. Its advantage, or so it claims, is marketing savvy and a hefty advertising budget to build a presence that will assure it shelf space at computer retail outlets.

But Apple's estimated $50 million over-all advertising budget in 1984 has taken a toll on the company's bottom line.

Marketing and distribution expenses at the $1 billion company leaped 68% for the six-month period ended March 30. Apple corporate profits were off by the same proportion in that period.

Apple appears to be tightening its hold on the No. 2 spot—ahead of Tandy Corp.'s Radio Shack—powered by its successful Macintosh computer introduction in January and the promise of its new IIc, a $1,295 portable model that's part of the Apple II computer family.

Macintosh and the IIc both figure to sell about 350,000 units this year, according to analysts.

The new IIc has received good marks from analysts. "For 1984, Apple will clearly dominate the high end of the home market," predicted Clive Smith, an analyst at the Yankee Group, the Boston-based market researcher.

This is the forecast in part because IBM's PCjr, also targeted for home use, is so far experiencing soft sales, after causing a sensation leading up to its introduction. Dataquest, a San Jose market research company, originally estimated sales of 270,000 units in 1984, but is revising that downward.

Apple sells briskly to small businesses, although IBM dominates the big-business segment. Commodore International dominates the lower end (less than $1,000) of the home-computer market.

Apple is breaking a $15 million introductory ad campaign for the IIc, a compact, 7½-lb. computer.

The IIc can use most of the 10,000 software programs developed for the Apple II family, which has sold nearly 2 million units since being introduced in 1977, more than any other personal computer.

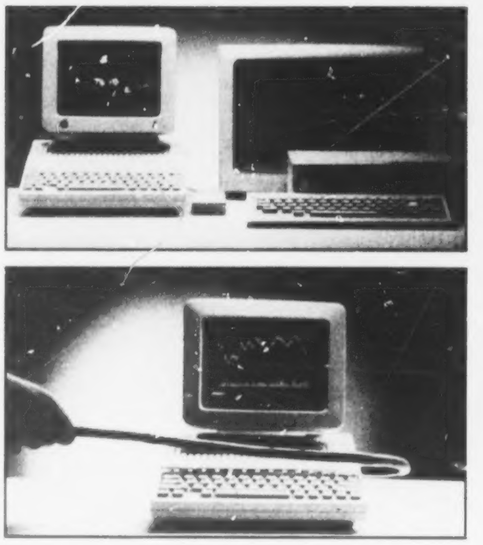
Software availability and advanced technology are the cornerstones of all IIc advertising.

Ads also make frequent use of humor, including print and radio ads aimed at children and teen agers, many of whom use Apple computers in school.

Network tv ads for IIc will be followed in June and July by an estimated $7 million second wave of network tv for Macintosh, Apple's more expensive personal computer introduced in January.

Apple will promote both computers in ABC-TV's coverage of the Summer Olympics.

An eight-page insert, explaining the IIc in detail, is set for June in six national magazines, including *Newsweek* and *Time*.#



Spots for Apple's IIc compare the number of components necessary to operate its competitor—"junior"—with its compact design. A gloved hand holding a cane, echoing IBM's Chaplin character, chooses the IIc by hooking it out of the frame. Chiat/Day, Los Angeles, handles.

S&H urges FTC to end cash-redemption rule

Washington—Sperry & Hutchinson Co. has asked the Federal Trade Commission to kill part of a 1973 consent settlement requiring it to redeem its trading stamps, if a customer prefers, with cash.

S&H says it is at a competitive disadvantage because it suffers out-of-pocket losses if stamp books are redeemed for $2 cash. If the clause is dropped, it said, it will pass savings along to consumers by reducing the number of books required to get merchandise prizes.

With merchants turning to sweepstakes, games, coupons and other forms of promotion, stamp sales in constant dollars have dropped from $913 million in 1965 to $438 million when the settlement was signed in 1973 and $184 million in 1983. It adds up to a competitive market where consumers who object to merchandise-only redemptions have ample choice in selecting places to buy, S&H said.

The Supreme Court, during an early phase of FTC's case against S&H, challenged the commission to use its "fairness" power to deal with trade practices.

In its motion, S&H says the subsequent negotiated settlement with FTC was intended to deal with unfair relationships between S&H and "stamp redemption centers" and was not based on any finding that a merchandise-only redemption policy was unfair to consumers.#

Low response kills Four A's Dallas meet

Dallas—The board of the American Assn. of Advertising Agencies' Southern Region has canceled next month's regional annual meeting, which was to have been the first official gathering of the association's Southwest and Southeast regions that were combined last year.

Citing a lack of interest in the meeting, which was to have been held at the Mandalay Four Seasons Hotel in Las Colinas, near Dallas, officials said only 26 registrations had been received.

Coincid[illegible], the Southwestern Assn. of Advertising Agencies has slated its annual Ira DeJernett Workshop for the same period, May 16 to 19, in El Paso. Robert J. Burke, SAAA executive director, said that gathering now has about 30 registrants, and another 50 or more are expected during the next three weeks, when most members register.#

corrections & clarifications

- Doyle Dane Bernbach inadvertently was omitted from the Top 15 agency world groups chart (AA, April 23, P. 58) and should be No. 11 with gross income of $199 million and billings of $1.32 billion.
- A $500,000 advertising and promotional campaign for Electronic Mall, a joint home shopping effort between CompuServe and L.M. Berry & Co. (AA, April 16, P. 8), is handled by Sive & Associates, Cincinnati.
- A headline on the National Magazine Awards story (AA, April 26, P. 5) should have read, "Conde Nast wins 3 awards."
- Rosemary McMurtry's name was misspelled in a Comings & Goings item (AA, April 23, P. 8).
- The Media People items on Robert O'Sullivan, circulation director of the *Philadelphia Inquirer*, and Jeffrey Grinspan, director of marketing and promotion, Montcalm Publishing Corp., New York, were inadvertently combined (AA, April 23, P. 38). They should have appeared separately.
- Taylor & Silverman, a New York-based pr shop, handles only pr for Pony Sports & Leisure, contrary to an earlier item (AA, April 23, P. 12). Damian Bisch & Partners continues as PS&L's advertising agency.#

TRUSTEE

Top Executives of Major U.S. Corporations Read TRUSTEE

Why?

Because they're *also* governing board members of hospitals.

TRUSTEE is the only magazine written exclusively for these ultimate decision makers in the complex area of hospital governance.

TRUSTEE explains how hospitals work. What the latest pricing regulations mean. Why hospitals are facing competitive pressures, and how hospitals can survive in the changing health care environment.

They read **TRUSTEE** because. . .while knowledgeable business executives and professionals. . .hospital governance is a wholly different world. And trustees must know all they can, as they have the *last* word on capital expenditures in hospitals.

If you do business in the $152 billion hospital market, hospital trustees must know about your products or services.

Reach more than 48,000 hospital trustees every month in **TRUSTEE** magazine. A fully paid publication.

Upcoming **TRUSTEE** Advertising Opportunities:

June, 1984
Corporate Restructuring
(closes May 10)

September, 1984
Capital Finance
(closes August 10)

Butter blends spread out

By JANET NEIMAN

Disappointing results in the still-immature butter/margarine blend category have not inhibited new-product introductions and expansions of existing products into additional markets.

But food-industry observers are waiting to see if the new and expanding entries, coming from such major marketers as Kraft Inc., Land O'Lakes and Unilever, can bring vitality to the estimated $65 million category.

Glenview, Ill.-based Kraft made its debut in the category with new Sheffield Farms dairy blend, introduced into Huntington, W. Va., Miami and Richmond, Va., test markets last fall. The product, containing 75% fat, is marketed in packages of quarter-pound sticks and in tubs, and in lightly salted and unsalted versions.

Land O'Lakes is introducing a pound tub of salted Country Morning Blend and a package of two half-pound tubs in both salted and unsalted, which will be marketed nationally except on the West Coast.

Shedd's, a former Beatrice Foods unit recently sold to Unilever, has had ButterMatch, a 20% butter blend, in three test markets (including Chicago) since last year, and recently expanded it into other test markets, including Portland, Ore.

Several other marketers also have blends on the market. Beatrice alone has three such products: Golden Farms Blend, marketed in Columbus/Cincinnati, Denver and Louisville/Lexington; Keller's Golden Blend, marketed in Philadelphia and upstate Pennsylvania; and Hotel Bar Blend, marketed in the New York metropolitan area.

Green Bay, Wis.-based Lovett Creamery has half-butter, half-margarine Butter-Up, the leading blend in Wisconsin.

Aside from growing competition in the margarine and spread categories, additional rivalry is possible in the blend category as well. Nabisco Brands, whose premium Fleishmann's margarine and low-price-brand Blue Bonnet margarine already compete with Kraft's Parkay margarine, is one possible candidate; last fall, in fact, Nabisco entered into three test markets Baker's Blend from Blue Bonnet (AA, Oct. 3), a combination with soybean and cottonseed oil formulated to create a professional-tasting product for home-made baked goods.

The recent entries in the category follow by nearly three years the Land O'Lakes introduction of Country Morning Blend, a two-item line (salted and unsalted) of butter and margarine blend in sticks, now marketed in about 85% of the country (excluding the West Coast). Country Morning Blend, the leader in the category, has 40% sweet cream butter.

The blend category was virtually nonexistent before Arden Hills, Minn.-based Land O'Lakes brought out Country Morning Blend; in the last year alone, ton volume is up 68.5% and dollar volume is up 75.1%.

But marketers admit they expected stronger, faster growth. "The volume everybody projected just hasn't shown up," said an insider at one company that markets a blend. "The segment has not developed to the degree that makes real expansion worthwhile."

Several industry sources agreed that in large part the category was intended to give marketers and retailers the same or higher gross profit margins as butter or higher, and higher volume than butter, with less cost for the marketer. But consumers have rejected butter-size prices for products that are part margarine. "The correct price point has not been found yet," said another marketer.

Sources say Kraft's principal strategy is to develop a product and price niche between butter and premium margarine. Sheffield Farms' has only a small amount of butter, and its price, at about $1.19 a pound, is far lower than Country Morning Blend's $1.60, which is close to the approximate price of $1.79 for butter.

Despite its price differential, retailers in the Sheffield Farms test markets say that while the line is performing acceptably, it is still not matching the sales of Country Morning Blend.

But Kraft has another reason to be interested in the blend market. One source said market surveys indicate the growth in blends is coming at the expense of margarines, not butter. By positioning itself in the blend category, Kraft might be able to hang on to any losses in its Parkay brand from users trading up to blends.

With the exception of Land O'Lakes, marketer support for the butter/margarine blends has been minimal. That could change as marketers try to repel both Kraft's effort and Land O'Lakes' defense.

Sheffield Farms is said to be backed with a hefty tv and magazine campaign positioning the line as "more than regular margarine because it contains butter," according to the company. The advertising theme, via Needham, Harper & Steers, Chicago, is "Butter up with Sheffield Farms."

A revised campaign from Land O'Lakes will include a new round of tv beginning in late May, print in women's magazines in June, freestanding inserts in June and September and on-pack couponing, expected to begin next month. An executive at the company said the new effort, via Campbell-Mithun, Minneapolis, will be a continuity campaign, retaining the company's focus on a buttery taste, now expressed in the "Butter idea" theme and the "Tastes like butter 'cause it's made with butter" tag.#

McCulloch buzzing on networks

By JENNIFER PENDLETON

LOS ANGELES—McCulloch Corp. here, which is diversifying into lawn and power equipment for the first time, is returning to network tv in May after a four-year absence (AA, April 26).

The Los Angeles-based chain saw marketer's new campaign, backing McCulloch's new string trimmer line, features the company's established "Billy and Barney Beaver" characters, but also introduces a new "Mr. Mac" spokesperson.

Along with the whimsical talking beavers—the same characters that appeared in McCulloch's chain saw commercials in the mid-1970s—the macho Mr. Mac points out that the company's string trimmers are able to go where lawn mowers can't.

The commercials will run on major sports programing.

The company also will be running ads in magazines such as *Better Homes & Gardens* and *Mechanix Illustrated*.

The campaign is the first from J. Walter Thompson USA, Los Angeles, which succeeded Benton & Bowles, Los Angeles, as McCulloch's agency last November (AA, Nov. 14).

It is also the company's first major advertising effort since it gained its independence from its parent of more than 10 years, Black & Decker Manufacturing Co. In April, 1983, the company broke the ties with the Towson, Md.-based power-tool giant when private investors bought the company in a leveraged buyout.

While from 1979 to 1981 McCulloch was a network tv spender, over the past two years the company has limited its efforts to spot buys in selected markets. Sources estimate that McCulloch's annual ad budget will rise to $3 million this year.

McCulloch, which seesaws for the leading position in the U.S. chain saw market with Homelite, is expanding into related lawn and power equipment to spur growth.

While 1983 shipments of gas-powered chain saws were 1.5 million—the industry's first annual increase since 1979—the category is expected to grow at a relatively anemic 4% to 6% rate this year.

Seeking greater opportunity, explains McCulloch director of advertising Doreen D. McIntire, the company is expanding into faster-growing related-product categories.

According to the Portable Power Equipment Manufacturers Assn., Bethesda, Md., gas-powered monofilament trimmers and brush cutters will grow at a 10% rate in 1984. Estimated shipments of such products in 1983 were 1.6 million—a 25% jump over the previous year.#

Jolly Rancher may ride herd on new brands

WHEAT RIDGE, COLO.—The Jolly Rancher-Asher division of Huhtamaki Group's Leaf Inc., which is now embarking on a new ad campaign (AA, April 23), also may expand its line beyond hard candies.

The company, which Beatrice Foods sold to Huhtamaki late last year, is looking at soft, chewy candies and the nutritional candy business, including granola bars, as ways to expand in the candy industry, said Robert Harmsen, president of the division.

Its current line consists of 14 flavors of hard candies, packaged various ways, and several types of candy canes. Adding soft candies would put Jolly Rancher in more direct competition with its major rival, E.J. Brach & Sons, Chicago.

Such diversification of its line would not be Jolly Rancher's first venture with items other than hard candies. Years ago, the company also marketed chocolate candies.

Huhtamaki is investing heavily in the Jolly Rancher business, increasing its ad budget "dramatically" from the low levels it had hit under Beatrice, Mr. Harmsen said.

The new campaign, which began with a radio commercial that broke about a month ago in 11 major markets, is targeted to both adults and children, using the theme, "Jolly Rancher's new big flavor."#

Coffee market still cool

By JOHN L. MAXWELL JR.

Coffee consumption continued to drop in 1983. As in the last few years, the public's preference for cold and sweet drinks opposed to hot drinks is causing this decline.

Coffee drinking by all age groups was down 2.6% in 1983 versus 1982. The largest decline (21.2%) was registered by 15-to-19-year-olds, while 30-to-39-year-olds and 50-to-59-year-olds showed year-to-year consumption increases of 0.8% and 5.8%, respectively.

Retail prices continued their decline in 1983. The price of 16-oz. cans of regular coffee fell 2.4%. However, the average price of instant coffee edged slightly higher. Since October of 1981, the International Coffee Agreement has been in force. The basic reason this agreement seems to be working when so many others have failed is that it is supported by both producing and consuming countries. This has helped to control the volatility of green coffee prices and ultimately the price at the retail level.

The trend toward decaffeinated products continues to grow. Every major soft-drink producer now has at least one caffeine-free product on the market. Ground decaffeinated coffee is achieving a growth rate of approximately 15% per year, while the total ground segment grew 2% in 1983. Despite this growth, ground decaffeinated products still have less than half the penetration of soluble decaffeinated products.

Another area that has shown excellent growth over the past several years is the flavored segment. A few years ago this area was growing at about 9%, but more recently it has been expanding at close to 20%. General Foods has the major share here.

Looking at the various companies, General Foods nearly maintained its market share in 1983, showing slight declines in both regular and instant coffee.

Procter & Gamble increased its share of the regular market by 1.3%, but was flat in the instant area.

Nestle's over-all share (instant coffee) was up slightly, and its Taster's Choice decaffeinated posted a good increase in share.#

Mr. Maxwell is with Lehman Bros. Kuhn Loeb, New York.

AdWatch

(Continued from Page 2)

read. That shattered the previous adWatch record of 90 first mentions (7.2%) set only last month, also by Clara and Wendy's.

Pepsi was named first by 81 consumers in March, a very impressive figure and twice the number usually needed to rank an ad No. 1.

For the record, the other ads that finished in the top 10 in awareness last month were, in descending order: Coca-Cola; political advertising; Ford; McDonald's; Burger King; Miller/Miller Lite; Budweiser/Bud Light; Chevrolet.

The question most frequently asked about the popularity of the Clara Peller and Michael Jackson ads—and most often asked by envious competitors—is whether they sell the celebrities or the product. Do teen agers know Michael Jackson is representing Pepsi? Has "Where's the beef?" translated into "Where's the nearest Wendy's?"

Good indications that these celebrities also have provided strong brand support are found in awareness scores within the product categories.

Pepsi has been trying to dislodge Coke from the No. 1 spot in soft-drink advertising awareness since November, 1982, the last time Pepsi held the top spot. What it has lacked, apparently, was Michael Jackson. In February's adWatch, Pepsi nudged ahead by a narrow margin (28% of first mentions to 25.5% for Coke).

Last month, 38.8% of adults who were asked to name the first soft-drink ad to come to mind named Pepsi, a 10.8-percentage point increase over February's score. Coke's awareness, meanwhile, suffered a 5.8-point drop to 19.7% of first mentions in March.

That gave Pepsi nearly a 20-percentage point lead over Coke last month, after trailing Coke by five points in January.

The turnabout in the fast-food category is even more dramatic.

For the 12 months of 1983, McDonald's averaged 43.3% of first mentions; Burger King averaged 18.5%, and Wendy's, 5.2%. Their 1-2-3 order of finish in 1983 changed only once, when Hardee's pushed into the No. 3 slot in February.

Two months ago, Wendy's awareness jumped 6.8 points to 14.5%, providing the first real challenge to champion burger battler Burger King, which had slipped 5.2 points to 16.3%.

Now Wendy's has passed Burger King and appears poised to challenge the previously unassailed leader, McDonald's.

Last month, 28.5% of consumers recalled Wendy's advertising first, a 12.2-point increase. McDonald's score fell 8.5 points to 30.8%, while Burger King dropped 3.4 points to 11.1%, its lowest score since it launched the Battle of the Burgers in September, 1982. Worse, it dropped to the No. 3 spot for the first time.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of adults to name the advertising that first comes to mind in a variety of product and service categories from all they have seen, heard or read in the last 30 days.

Last month, 1,251 consumers were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly samplings is considered statistically significant and attributable to more than sampling variations.

Among movers in other categories:

- The largest—and perhaps most surprising—drop in awareness last month was Apple's 11.3-point plunge in the **computer** category. While the memorability of its introductory campaign for the Macintosh line may have faded, Apple has maintained a heavy print presence in the past months. Its 20.6% share of first mentions in March was still good enough to retain the No. 1 spot, however.

IBM kept its hold on the second spot with an 11.7% share of first mentions, while Commodore remained No. 3 with 6.6%.

- Another leader that saw its margin of supremacy slip a bit last month was Lipton in the **tea** category. It dipped to 45% of first mention from 50.4% in February.

But nearly all tea advertising experienced some slippage in awareness last month. The big winner was the response "None," which came to mind first for 40% of respondents, compared with 34% in February. March just may be a bad month for the tea market, falling between the hot-tea and iced-tea seasons.

Salada moved into the No. 2 spot with 3.7% of mentions, while Nestea dropped to No. 3 with 3.1%.

- Worth noting are last month's scores in the **beer** category. Coors moved into a tie for the No. 2 spot (with Miller) with 9.6% of first mentions. Category leader Budweiser captured 13.3% of responses.

Coors' gain can be traced to the heavy advertising support it has put behind introduction of its Premium and Light brands in the Southeast. In that region, Coors' advertising had the highest awareness of any brand last month.

For more information, contact Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: 402-489-0351.#

Marketers such as Real Fresh see Conoffast packaging as a cheaper, lighter alternative to cans.

Real Fresh to use Conoffast packs

By JENNIFER PENDLETON

The first U.S. food marketer to introduce a product in the revolutionary Brik Pak aseptic package (AA, May 15, '81) soon will put itself on the food-marketing map again.

In 45 to 60 days, Visalia, Cal.-based Real Fresh will introduce Real Fresh brand puddings and juices in a new plastic Conoffast aseptic packaging that some say may make metal cans obsolete.

Real Fresh is said to be the first of several food companies introducing products in this new cup-style plastic packaging. Two of the other companies said to be contemplating such a move are Esmark's Hunt-Wesson Foods and R.J. Reynolds Industries' Del Monte Corp.

Real Fresh introduced Brik Pak to the U.S. three years ago. Like products packaged in Brik Pak, food packaged in the new plastic aseptic packaging will stay fresh for long periods without refrigeration.

Initially, the company will introduce the five-flavor Real Fresh pudding line and three-flavor 100% juice line in the western U.S.

By year's end, company president Jody Graves predicted, Real Fresh will be out with a line of single-strength soups in microwave-ready Conoffast packaging.

With Conoffast, food marketers can consider a whole range of new products previously packaged in heavy, and more expensive, metal cans, Mr. Graves said.

Dart & Kraft's Kraft already markets yogurt in a nonaseptic version of the new Conoffast cups.

Real Fresh is formulating its ad plans. Normart Advertising, Fresno, Cal., is the agency.

Continental Can, Stamford, Conn., makes the Conoffast packaging. It acquired the U.S. rights from Erca, the French developer of the technology. Like Brik Pak, developed by Tetra Pak International, the Swedish parent of Dallas-based Brik Pak Inc., the plastic aseptic packaging has been used widely in Europe for many years.

Frank Mechura, general manager of Continental Can's Conoffast division, said the new plastic packaging is less expensive than cans and its cost to manufacturers is said to be half that of metal.#

ABC mulls partner in ESPN deal

By SUSAN SPILLMAN

NEW YORK—ABC Video Enterprises, which this week became sole owner of Entertainment & Sports Programming Network (AA, April 26), is considering taking on a minority partner in ESPN.

Herb Granath, president of ABC Video Enterprises, said, "We've already been bombarded with offers." Partners could include a multiple cable systems operator, an advertising agency or a major sports advertiser.

ESPN becomes the only cable venture ABC Video solely owns. Sources speculated that the $202 million cash ABC will pay Texaco Oil for ESPN (in addition to about $30 million ABC paid for a 15% interest in the cable sports network in January) will force ABC Video to find a partner. ABC Video so far has lost about $80 million and ESPN about $100 million in five years.

As expected, ABC bought Texaco's 85% interest in ESPN this week. It paid $188 million in cash for the 85% of ESPN that Texaco controlled, after a reported first offer of $170 million, and $14 million for uplink and satellite transponder facilities.

Texaco inherited 70% of ESPN in February when it acquired former owner Getty Oil for $10.1 billion. Another 15% of ESPN was held by William Rasmussen, the network's founder, and his family, who will share in the proceeds from the sale.

The deal places a value of $237.5 million on ESPN, up $37.5 million from the network's value in January. Mr. Granath said the increase was due largely to ESPN's adding 300,000 new subscribers per month.

Mr. Granath said he did not expect any major changes in ESPN's programing or executive officers. The network will remain based in Bristol, Conn.#

Insatiable

New Diet Coke spots will feature a broader range of celebrities as Coca-Cola USA seeks to expand the brand's franchise (AA, April 30). "Weird Al" Yankovic and James Coco are among those in the spots by SSC&B:Lintas USA.

Aussies filling ad niche

U.S. stumbles at China's wall

By DENNIS CHASE

Although President Reagan spent much of his China trip touting the U.S. free enterprise system, the blossoming Chinese advertising industry is reaching out to Australia, rather than the U.S., for training in Western-style ad methods.

China now boasts 168 state-owned ad agencies with $120 million in billings. In 1979, there were virtually no agencies.

Several months ago, the Chinese government created the China Advertising Assn. to "encourage competition" by "making advertising grow rapidly."

But the most serious move occurred last month, when China invited the Advertising Federation of Australia, which represents ad agency executives, to China.

The government is considering a proposal by the Australian delegation, which included representatives from BBDO and N W Ayer agencies in Sydney, to train the Chinese in Western-style advertising and arrange a symposium on advertising there (AA, April 16).

Despite numerous visits from and ties to U.S. agencies dating back to 1979, China chose Australia as its window to the West. "We heard over and over again how the Americans overwhelmed the Chinese with their size," said Bruce Cormack, AFA director, after returning from China. "America flubbed it in a way by not going back after initial visits and tracking the Chinese system."

Mr. Cormack said the Chinese

(Continued on Page 5)

Liqueur tries charm

By GAY JERVEY

NEW YORK—B&B liqueur is starting its first new ad campaign in more than three years—one designed to bring charm to the brand's staid image.

The estimated $6 million to $7 million effort, the first since Benedictine Marketing Services was formed last year, departs dramatically from the previous ad stance, which opted for standard bottle and glass shots and was themed "Living well is the best revenge."

Created by Epstein, Raboy Advertising, the new print ads—which break May 15 in a dozen consumer magazines including *Bon Appetit*, *Cosmopolitan* and *Omni*—are themed "Share the warmth of B&B, the delicate balance of Benedictine and fine brandy." The company also will use outdoor boards.

The ads' tag lines play on alliteration, with the first simply saying "Be and beloved." Pictured are a man and a woman in smiling embrace, holding glasses of B&B.

Richard C. Bland, president of Benedictine Marketing Services, said future executions include "Be and bewitch" and "Be and begin."

"B&B has always communicated elegance and prestige," Mr. Bland said. "Now we're trying to make it more approachable. We want to attract new users who may have been previously put off by the brand's image."

In addition to B&B, Benedictine Marketing Services handles Benedictine liqueur and Pippermint Get. Julius Wile & Sons, Lake Success, N.Y., is exclusive sales agent for Benedictine Marketing.#

Here's what FTC is 'up to'

WASHINGTON—The Federal Trade Commission told a small California gas-additive marketer that it can't use the phrase "up to 15%" gas savings unless "an appreciable number of consumers" can "reasonably expect" that result under normal driving conditions.

These additional insights into what FTC expects in the way of prior substantiation for advertising claims were included in a consent settlement with California-Texas Oil Co., which is a small Southern California company that has sold AWECO Mileage Extender through supermarkets in 11 western states.

The FTC said mileage savings claims must be substantiated by "competent and reliable tests," and ads must disclose material qualifications or limitations of the tests. The tests must not be described as "scientific" if that is not true, FTC added.

The FTC charged that few, if any, consumers extended their mileage by 15% under normal driving conditions.#

Tapers love soaps

By SUSAN SPILLMAN

NEW YORK—Twenty-three per cent of all videocassette recorder owners tape at least 21 programs off the tube every month, according to A.C. Nielsen Co.'s new 258-page projectable home video study released May 2.

Conducted among 1,179 vcr owners between November and January, the study reports that soap operas, the largest single genre, account for 30% of all recordings off tv, followed by movies at 17%.

"All My Children," largely because it airs five days per week, accounts for 6% of recordings, the largest number of any regularly scheduled show. However, ABC's "The Day After" was recorded by more households than any other individual show. The made-for-tv movie was taped by 25% of the Nielsen sample.

Network programing accounted for 74% of all taping, followed by independent-station programing and pay tv at 8%.#

Libel rules eased

WASHINGTON—New ground rules on libel suits, established by the Supreme Court this week, give more breathing space to media critics of products and business practices.

In a decision described by experts as the first significant High Court victory for media in a libel suit in more than a decade, the justices told appeals courts they are expected to look behind "actual malice" findings of trial judges and juries.

On the basis of their review, the justices then set aside a lower-court verdict that Consumers Union was motivated by "actual malice" when it criticized Bose Corp.'s new stereo sound system.

The decision is expected to create wider freedom for rating services and others to speak freely about product performance and deficiencies.

Beyond its impact on product criticism, however, the decision is hailed by experts as a signal that appeals courts will be expected to give closer scrutiny to multi-million-dollar libel verdicts.

Media lawyers expect new procedures emerging from the decision will represent a barrier against the tide of libel suits that have been directed at media generally.

In the past, with reviewing courts refusing to second-guess trial judges and juries on whether "actual malice" occurred, media have had only limited opportunity to upset expensive verdicts awarded to popular celebrities and causes.#

Software marketers try tv ads

LOS ANGELES—Two personal computer software marketers are poised to begin advertising on tv, believed to be a first for the growing category.

Ashton-Tate, Culver City, Cal., will kick off a spot tv campaign in late July around the Summer Olympics and the Democratic convention.

Dancer Fitzgerald Sample/Southern California handles the estimated $4 million account.

Ashton-Tate, a public company with sales of $40 million for its last fiscal year, is using tv to build brand awareness for Framework, a

Peter W. Allport looks back at his 24-year post as president of the Assn. of National Advertisers, a position from which he will retire in June.

Special Report

Grocery Marketing

15 New product success can be all in the timing

Most successful new products have caught the leading edge of a trend, such as health-consciousness. But along with this must come extensive research and much attention to marketing details.

18 The name's the same

New products are appearing in the marketplace wearing the familiar cloak of tried-and-true names, such as Hershey's chocolate milk and Dole Fruit 'N Juice bars.

30 Personalities pitching products

Putting a person's name on a product, such as Famous Amos and Frank Perdue, implies a dedication to quality and also imparts a certain personality to the product.

Page M-52

39 Convenience foods: Recipe for no-guilt cooking

Some new grocery products are designed to ease the consciences of people who don't want to put a lot of effort into preparing dinner.

52 Gourmet popcorn business popping

Orville Redenbacher launched the growing market with his gourmet popcorn. Since then, the lid has been blown off the gourmet popcorn business with the addition of a variety of flavors.

To our readers

Paths sometimes cross in funny ways. Take our art director, Geof Shives, and this week's cover artist, John Pirman, for example. They both were in the same graphics design program at Kent State University in Kent, O., and they graduated in 1979. Then they parted ways. John went east to New York where he worked in several ad agencies and did illustration work. He finally set out on his own as a free lance illustrator.

Geof headed west to Chicago and after several design jobs finally landed at ADVERTISING AGE 2½ years ago as art director of the Magazine section in its beginning stages. His first assignment was to design the Magazine that debuted in its current form in February, 1982.

Somewhere along the line, Geof and John got in touch with each other again, and the result have been several Magazine covers executed by John. One, on the July 26, 1982, Marketing to Women special report, was included in *Print* magazine's Regional Design Annual.

Other Magazine covers by John have been on last year's Research Business Review and Premiums and Promotions reports.

L'Agence—Yvon C. Dihe, art director

A recent commission

John Pirman's work also has appeared in *Fortune, Madison Avenue* and *PC World.*

The medium in which John has worked in the past is cut Pantone paper—solid colored, differently shaped and individually cut fragments of paper arranged in a design, but Geof says that John has begun working in a medium new to him, air brush. This week's Grocery Marketing cover is a combination of cut paper and airbrush.

John is just one of many artists Geof works with, but it's nice when two college chums are reunited on a professional basis.

Reaching the gay market

Thank you for your excellent article, "Reaching the gay market" (March 26).

One inaccurate statistic was included in your profile of the *Advocate.* The article refers to a 1982 readership survey showing an average household income of $25,000. The 1982 survey was not of the *Advocate* readership but rather of the gay market in general. The *Advocate* readership survey, taken in 1983, reveals an average household income of $45,000.

Michael McMahon
Account Executive
Advocate
New York

Bravo to Lynn Berling-Manuel for reporting on the recognition of the gay market. I take exception to Ms. Berling-Manuel's report that gay women "... have more of the accoutrements of a 'traditional' household .. which means they would be the targets of more conventional advertising as well."

To the contrary, no one word, least of all, traditional, can describe the diverse nature of lesbian lifestyies. The lesbian market may just be the least likely to be captured by conventional advertising. Can it logically be assumed that lesbians relate to the conventionally portrayed woman in advertising who is endlessly patronized in her quest for male attention and approval? What can and does get the attention of the growing numbers of upwardly-mobile, higher-income lesbians is quite simple: Images of women as confident, proud, happy, successful and self-made are attracting the respect and brand-loyalty of a fertile source of lesbian consumer dollars.

Name withheld
(lesbian member of
the advertising community)
San Francisco

It was with a mixture of pleasure and disappointment that I read the feature on "Reaching the gay market." I was pleased to see such substantial and honest coverage of the interest that major advertisers are showing in this affluent market, but I was disappointed that your writer failed to accurately portray the methods a company should consider using to reach this market. Indeed, the article covered almost exclusively the *Advocate* and its marketing arm, Avanti.

While the *Advocate* is certainly a very significant advertising vehicle to use in reaching the gay consumer, it is not the only way. Your writer obviously did not spend much time researching this subject before beginning her interviews or she would certainly have called my company, Rivendell Marketing Co., for its input.

Rivendell has been in business for more than five years offering marketing consultation, publicity, and promotion and promotion services to major companies wishing to reach the gay market. In addition, Rivendell serves as an advertising representative for about 125 gay magazines and newspapers from all across the country—more than 100 of which are locally or regionally based.

I have been interviewed and quoted extensively on the subject of gay markting and even in your own publication (Oct. 6, 1980, issue). In fact, Rivendell ran a full page ad in your last annual directory issue (Sept. 8, 1983)—an ad that produced controversy for many following weeks in your letters to the editor column.

Joseph Di Sabato
President
Rivendell Marketing Co.
New York

We wish Ted Ross lots of luck in his plans to market Wilde's beer in the gay market. Our own 10-year experience in gay marketing leads us to believe that his will be a successful venture.

However, we must burst his bubble of enthusiasm on one count. His tv advertising for Wilde's beer are not the "first ever openly gay television commercials in America." That distinction is reserved for tv spots aired in 1975 to promote Lambda Rising, a leading gay and lesbian bookstore. In fact, as far as we can determine, the Lambda Rising spots were the first gay-oriented commercials to be aired on tv anywhere in the world.

It may hearten Mr. Ross to know that even though these were very low-budget spots, they worked wonderfully. I hope Mr. Ross has similar good results with his Wilde's beer spots.

L. Page Maccubbin

Gourmet popcorn business popping

By Hortense Leon

The same marketing mentality that gave us spaghetti made out of soap, oranges that are really candles, and a chocolate pizza is giving us popcorn that tastes like jalapeno peppers, tacos, watermelon and excellent popcorn.

> **"We think that people respond to quality, and most of the product on the shelves so far has been poor."**
>
> *—Vern Ryles*

It all started with Orville Redenbacher. His gourmet popping corn entered the market under his own name in 1972 and under the aegis of Hunt-Wesson Foods in 1976. Mr. Redenbacher's claim to fame is that his corn is lighter, fluffier, more tender and bigger than ordinary popcorn. He also boasts that his popcorn has few hard, unpopped kernels.

With Mr. Redenbacher's pure popcorn deliciousness well established, it was only a matter of time before the all-American snack was altered again. About five years ago, flavored gourmet popcorn came on the scene in a big way. Although at first the only place where you could get more than a few of these new flavors was the popcorn shop, a few started showing up on grocery shelves too.

In 1979, Poppers Popcorn, a popcorn company based in Portland, Ore., brought out a new line of spicy popcorn sealed in foil bags. According to Vern Ryles, president, the sour cream and onion and cheese and spice flavors were introduced in the late 1970s and early 1980s.

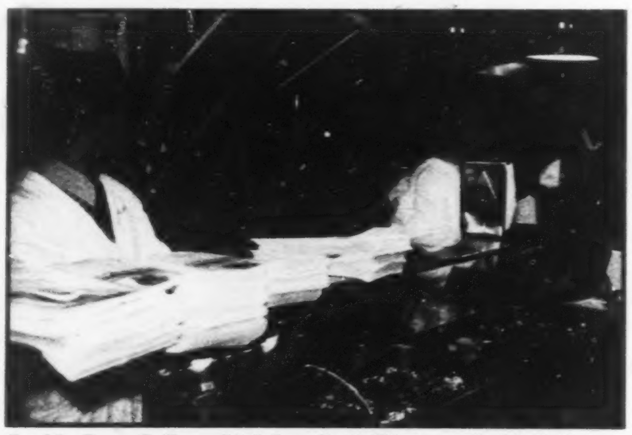
"Our decision to switch our emphasis from concession supplies to retail packaging at the time was due to the fact that we felt that we could make our strongest contribution in this area. Given the fact that people have always liked popcorn, and its popularity has increased over the last several years, we believe that popped popcorn should account for more than 2.2% of the almost $6 billion bagged snack food market (chips, pretzels, puffs, popcorn—wholesale). We think that people respond to quality, and most of the product on the shelves so far has been poor," Mr. Ryles says.

Apparently Poppers is doing something right. Mr. Ryles says the company's growth rate for 1983 was 40%. Recently, Poppers has been introduced into the Midwest. Dallas is opening up now; New England is scheduled for the fall, and in late 1984 or early 1985, Atlanta will be introduced to Poppers.

Ovaltine Products, Villa Park, Ill., which in January combined with three other companies to form Sandoz Nutrition, is thinking of expanding its product line. No newcomer to the popped popcorn business, Ovaltine has three products in this category already—Fiddle Faddle, Screaming Yellow Zonkers and Poppycock, a gourmet item.

"We are considering some new flavors, but more conventional ones than, let's say watermelon. They are being market tested now," says Norman Olson, marketing director-consumer products division. He says the company avoids most off-the-wall flavors because "items you sell to wholesalers and to the chains have to have good sales velocity to justify the space in the warehouse as well as on the grocery shelf. Unusual flavors might sell in a gourmet shop, where people are specifically looking for them, but in a grocery store, they may sit on the shelf."

Grocery chains may not be carrying raspberry, butterscotch and pina colada popcorn, but the popcorn section is beginning to bulge. Borden Inc., maker of Cracker Jack carmelized popcorn with peanuts, brought out Cracker Jack popcorn, an unpopped gourmet product, in the second half of 1982. But not all popcorn companies are changing their marketing plans. American Pop Corn Co., Sioux City. Ia., maker of Jolly Time popcorn, isn't doing anything different in its marketing approach since the advent of flavored popcorn, says Jim Fowler, vp-marketing. Yet Jolly Time is reaping the benefits because it supplies the flavored shops, which are springing up everywhere.



Jack's Corn Cribs, which has Jack Klugman behind the operation and the counter, offers a variety of gourmet-flavored popcorn in shops in 21 states.

Popcorn shops aren't new. According to Nick Caras, vp-marketing of Karmel Korn Shops, headquartered in Rock Island, Ill., that chain has about 250 shops in 44 states and has been in business since the 1920s, establishing franchises in 1969. Karmel Korn Shops has had gourmet flavors in its operations manuals since 1929, he says, but it has been up to the individual operator to use them. "The franchisees have 50 to 60 flavors at their disposal, should they want to use them," Mr. Caras says. Yet it has only been the last three or four years that chocolate, taco, Amaretto and cherry licorice have been offered to customers.

It was the new kids on the block that made an impact on the flavored popcorn-shop market first.

Jerry Hammer, a movie producer and creative designer, and his partner, Jack Klugman of

Hortense Leon is a free lance writer who discovered a new use for strawberry-flavored popcorn.

THE CORN POPPER

Corn Popper franchises are found in 35 states, and if Charlie Bird, founder of Corn Popper, has his way, there soon will be a franchise in England.

Popcorn demographics

Production

In the past decade and a half, U.S. popcorn sales nearly have doubled, while total U.S. population has increased only about 17%.

1968	333 million lbs.
1983	618 million lbs.

Most of the world's popcorn production is concentrated in the U.S. The biggest producing states are Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Missouri, Nebraska and Ohio. Popcorn is now a $1 billion industry, with sales at $200 million in grocery stores; about $700 million in leisure establishments (excluding bars and restaurants but including 30% to 35% of that amount in movie theaters); and the balance as popcorn confections/specialty items.

Consumption

Americans now consume popcorn at an annual per capita total of 42 qts., making a U.S. annual total popcorn consumption of 9.9 billion qts. About 70% is eaten in the home; 30% outside the home. About 90% of all unpopped popcorn sales are for home consumption.

Technical

For greatest popability, ideal moisture range is 13% to 14.5%, with 13.5% ideal. Good popcorn gives the popper 98% popped and only 2% unpopped kernels. Kernel expansion ratios ranging from 35-to-1 to 38-to-1 are considered good, but newer hybrids may swell 40-to-1.

Data supplied by the Popcorn Institute, Chicago.

Orville Redenbacher gave the gourmet popcorn market a push with his lighter and fluffier popcorn.

"Quincy" and "Odd Couple" fame, operate a group of these establishments called Jack's Corn Cribs, based in New York. Charlie Bird, a retired executive of Mars from Dallas is the owner of the other big chain, called the Corn Popper.

Mr. Hammer says he doesn't have an ad agency for his company yet, but his own pr acumen is considerable. He reports getting coverage for his new business on ABC's "20/20" and "Good Morning America" and on network news and cable networks. He also is working on a print advertising campaign that should be out in about six months.

While Jack's Corn Cribs is most famous for its New York location, Mr. Hammer is taking his show on the road. There are franchisees in 21 states and a number of foreign countries, including Bali, Denmark, Hong Kong, Japan and Singapore. The flavors offered in each of these countries reflect the local cuisine. For example, in Japan sushi-flavored popcorn is being discussed, while *nori*-flavored (a kind of seaweed) is a reality.

Mr. Bird also has an impressive line of flavors and a presence to match. He gives this account of the origins of his growing new business:

"I had just retired from Mars and in order to supplement my income, I bought a little popcorn company from a friend of mine. Then my wife said to me, 'Why don't you make some chocolate popcorn?' I did. Then a big guy came into the store and wanted jalapeno. I told him, 'Come back in two weeks.' I thought he was kidding. But he came back, so again, I said, 'Come back in two weeks' and then we had it ready for him."

In the past 2½ years, Mr. Bird has set up franchises in 35 states, and Alaska is being negotiated. England also is on the drawing board, although Mr. Bird won't say much. In honor of the occasion, he is working on a new flavor—vinegar and salt, reminiscent of fish and chips. For the Far East he will have octapus and seaweed.

In contrast to this exotica, Corn Popper specializes in pure Americana, with red and white dominating and a "flavor board" offering 32 flavors, one-upping Baskin-Robbins. Mr. Bird says he also chose this number because it is good for quality control.

Mr. Bird says his machines can pop 320 gals. of corn an hour and cook up to 20 seasoned flavors or seven sweet flavors in the same time. Most of this popcorn goes into cans, some of which are hand-painted by local artists.

Jack's Corn Cribs are smaller, more intimate places than Corn Popper; there are fewer cans, although the ones available feature the store's red-checked awning.

Corn Popper has emphasized local advertising, including newspaper ads, some radio time, and so-called "good citizen" promotional efforts. Vic Evans, the only franchisee in Chicago, says he sells popcorn to nonprofit organizations such as schools holding fundraisers.

A lot of people are watching the development of this new kind of food franchise, many with a skeptical eye. Some say they are afraid the popcorn shops will prove to be a fad.

Andrew Kostecka, specialist in charge of franchising for the U.S. Department of Commerce and author of a report called "Franchising in the Economy 1982-1984" put out by that department, says, "Although I'm not concerned that flavored popcorn shops are a fad, I don't see a mass market for the product. It is a novelty and therefore it will have limited growth. The popcorn shops that are successful will be in shopping centers where there is a high volume of traffic. You need a lot of impulse buyers for this kind of business."

New, Proven In-Store Ad Medium Dramatically Impacts Awareness and Sales.

SUPERCLOCK lets you command exclusive consumer attention in more than 3,000 high volume supermarkets nationwide. Available now in over 25 of the top 50 markets, SUPERCLOCK gives advertisers the chance to make that all important last impression when shoppers are making 65% of their buying decisions.

SUPERCLOCK is an impressive 2' x 7' illuminated display, combining a backlit advertising area with an informative clock. Mounted eight feet off the floor to dominate the main aisle and highest traffic areas, SUPERCLOCK insures advertisers of high visibility and multiple in-store exposure to all shoppers.

Independent research documents a dramatic 25% increase in supermarket sales for a product that added SUPERCLOCK to the media mix. Brand awareness in the same study increased 18%. In short, SUPERCLOCK works. And not just for 30 seconds…SUPERCLOCK works all day, every day the store is open.

Available on a national, regional or test market basis, SUPERCLOCK is the ideal way to reinforce radio, TV or print campaigns. Whether you're introducing a new product, fortifying your market share, or need to boost brand wareness, SUPERCLOCK is a smart buy. And, a rotate program enables you to obtain greater market saturation in a cost-efficient manner.

To find out more about how SUPERCLOCK can help you get your share of the $200 billion supermarket market, call today…or see us at the FMI Convention in Dallas, Booth 832.

Nissan gripe adds to sag in tv sports

By JAMES P. FORKAN

New York—Further evidence that tv sports faces waning popularity among advertisers has surfaced in the form of a Nissan Motor U.S.A. feeler to ABC-TV, seeking relief for up to half its $30 million commitment to "Monday Night Football."

ABC sales execs declined comment, but Advertising Age has learned from several sources that the Carson, Cal.-based Nissan, despite a three-year NFL sponsorship commitment (chiefly for Datsun cars), had hoped to free up some of its hefty NFL commercial time for other programing.

The auto maker and its agency, William Esty Co., New York, had maintained that having half the number of units per Monday-nighter would not appreciably hurt reach and frequency levels.

However, ABC reportedly countered that Nissan would have to lose its import auto exclusivity in return. For exclusivity, Nissan had to order 10 30-second spots in each Monday game, sources said. At more than $1.8 million per game, Nissan's 16-Monday buy approaches $30 million for this fall.

So Nissan will remain a full sponsor of "Monday Night Football" (perhaps also to insure its position in next season's Super Bowl game, to be carried by ABC). But the auto maker has put ABC on notice that the charge for that position is more than it

Christian Moerlein
Cincinnati Select Beer

Christian Moerlein is a unique classic beer brewed by America's great small brewers in Cincinnati. Brewed in the traditional way, with clear water, two row barley malt and the famous Hallertau hops. It is one of the few American beers that is brewed with no adjuncts and no preservatives. Christian Moerlein is a pure and natural beer.

Only the best quality ingredients are used in the brewing of this superior beer: Two row barley malt for a smoother, richer flavor and Hallertau hops for the special Christian Moerlein bouquet. But, perhaps the most important ingredient of all is the care, patience and pride that only the highly skilled brewmasters of a small brewery can provide. That is why Christian Moerlein drinkers all over the country refer to it as:

Quite simply-a better beer

High-end Hudepohl

Christian Moerlein is Hudepohl Brewing's attempt to crack the superpremium beer market. *(See Page 2.)*

Greyhound, Trailways in price battle

By SARAH STIANSEN

Greyhound Corp. and Trailways Inc., the two major national bus companies, are introducing new fares and new advertising, which may ignite a competitive pricing struggle.

The new Greyhound ads are an attempt to reposition the Phoenix-based carrier as a low-cost travel leader, said Terry Underwood, vp-marketing, Greyhound Lines. The company does not normally stress fares in its advertising, but since trimming 17% from its wage and benefits obligations after resolving a drivers' strike, the company can now afford to pare its fares.

Both Greyhound and Trailways are heavily dependent on June, July and August travelers. Their summer pricing—effective today—could trigger more fare cuts among regional bus companies, affecting the entire bus industry.

Greyhound's "New lower fares" ad campaign breaks today on spot tv and spot radio in major U.S. markets. Trailways, continuing with its "Low fares everywhere" campaign, will fire off new ads next week to announce a "Kids ride free" program and a reduction of its various ceiling fares to a single $99 fare nationally, a spokesman said.

Greyhound's fare reductions vary by market and apply to selected schedules.

"With new, lower fares, we'll be in a better position to attract more riders," said one marketing official at the carrier. Greyhound hopes to carry more than 50 million passengers in 1984.

Its new campaign is "addressing an economic niche that was once owned by Greyhound. . .we don't

ITT plugs into personal computer market

Tempe, Ariz.—ITT Information Systems, a unit of $20 billion ITT Corp., is jumping into the personal computer market. Campaign will break May 15 with national print and May 19 with spot tv ads for its computer. A major campaign is expected to include network tv. Analysts assume the advertising is for Xtra, a unit ITT unveiled to the trade recently. The move puzzled analysts because little is known of the product and distribution remains a question. Ad Resources handles.

Perkins picks Marsteller for $5 million account

Memphis—Perkins Restaurants has named Marsteller Inc., Chicago, to handle its account, spending about $5 million. It replaces Chuck Ruhr Advertising, Minneapolis, which was terminated last month, and had held the assignment for nearly 20 years.

(Continued on Page 8)

P&G rolling out via Always

Cincinnati—Procter & Gamble makes its long-anticipated national return to the product category of feminine protection pads May 14. That is the day P&G begins the rollout of its new Always pads.

The company abandoned such products nearly three years ago when it pulled its Rely tampons off the market amid medical controversy.

After a promising year of test-marketing Always in Minneapolis and parts of North Dakota and South Dakota, P&G is moving with full force into a burgeoning and highly segmented product category rife with established competition. Category sales are estimated at $850 million.

Johnson & Johnson, considered the leader in the category previously with 50% market share, offers beltless pads under the brand names of Stayfree, Sure & Natural, Carefree, body-contoured Silhouettes and individually wrapped Assure pantyliners.

Kimberly-Clark's brand is New Freedom, and Tampax offers Maxithins. Each of the brands includes a variety of sizes and scented and unscented products.

New products can be expected from P&G's product neighbors, too.

Kimberly-Clark, for instance, has expanded its New Freedom line to include a "thin supermaxi" superabsorbent pad expected to be distributed nationally by July, a company spokesman said.

P&G officials will not discuss market potential but acknowledge that the beltless pad product category continues to be fast-growing and very competitive.

The hot competition is expected to produce extensive sales promotions and more aggressive adver-

Pizza Hut drops FCB

By SCOTT HUME

In a surprising move, Pizza Hut on Friday terminated its eight-year relationship with Foote, Cone & Belding, Chicago.

Pizza Hut vp-advertising Dave Ropes cited "creative differences" as the reason the advertising committee had voted to pull the $20 million national account from FCB. He said dissatisfaction with agency creative executions had been voiced "over time" by both company and franchise operators.

An FCB executive who asked to remain anonymous expressed surprise and shock at the dismissal. He said "differences over how to extend the 'Hometown Pizza Hut' campaign" introduced in 1980 probably led to the breakup.

The executive admitted the relationship between the two "has had its ups and downs." Pizza Hut's decision to retain FCB in April, 1980 (on the strength of the "Home-

AmEx spots play stump the viewer

By ROBERT RAISSMAN

If puzzles are irresistible, American Express has found a way to get Americans to watch—really *watch*—its new 60-second tv commercials that broke Sunday night on ABC and NBC.

First, you set the bait by burying clues to historical questions in your commercials. Second, you write a clever full-page teaser ad and run it in the newspapers. Then you sit back and watch what happens.

"The idea of the puzzles is to increase the power of the commercials," said Jerry C. Welsh, AmEx senior-vp public affairs, communications and marketing services.

More than that, the $2 million campaign for American Express Travel Related Services—running over two three-day flights in May—is really two games: One for AmEx employes and one for tv viewers at large.

There's a $20,000 round-the-

Miller yanks its 'super'; Hudepohl takes chance

By SCOTT HUME

Miller Brewing has pulled its Special Reserve brand from test, citing softness in the superpremium beer market.

A spokesman for the Milwaukee brewer confirmed the brand's demise, explaining that Special Reserve "did not meet expectations because of the declining [superpremium] category."

Hudepohl Brewing, however, is showing more faith in the category. The Cincinnati brewer last week moved its Christian Moerlein superpremium brand into selected markets west of the Mississippi for the first time.

In Special Reserve's case, Leo Burnett USA, Chicago, handled advertising during the 25-month test. Burnett now has other interests that center on Miller. The agency, along with Chiat/-Day, Los Angeles, is involved in a review for the $50 million Miller High Life account.

Miller reportedly still is reviewing the presentations made by those agencies as well as incumbent Backer & Spielvogel, New York. Sources close to Miller believe that should B&S lose out to Burnett or Chiat/Day, it would relinquish only creative and remain agency of record for media buying.

The brewery's Special Reserve had an uneven test-marketing history. It was pulled from test once before but had been thought to be getting a better reception this time around (AA, Sept. 26).

Miller has moved the brand in and out of markets, with the most recent test sites including Charlotte, N.C.; Austin, Tex.; Burlington, Vt.; Phoenix; Cincinnati, and Sacramento.

Consumers had received Special Reserve favorably, but the "decline of the category made it unwise to continue" testing, the Miller spokesman said.

Market conditions are working against the category, industry observers agree.

"It's a difficult time to be entering the market with a superpremium," said Montgomery Securities analyst Manny Goldman. The recession has caused many beer

London shops lauded for D'Arcy rescue role

By BRIAN MORAN

Thanks to offers of refuge from competitors such as J. Walter Thompson and Royds, the London office of D'Arcy MacManus Masius reopened May 1, reporting negligible damage after an almost total shutdown during the two-week Libyan embassy siege.

"Other agencies rallied around us incredibly quickly," said Alan Clark, managing director of DMM, who likened the charitable spirit around embattled St. James Square to the London blitz of World War II. "It was very touching."

Compounding DMM's difficulties during the standoff was an outcry of protest from feminist groups over an allegedly sexist message in a Hoover vacuum cleaner ad from the agency.

D'Arcy's offices, next door to the Libyan embassy, were evacuated April 17 when the embassy was besieged following the shooting of a policewoman during a demonstration. Embassy personnel barri-

Republic starts review

MINNEAPOLIS—Struggling Republic Airlines, apparently believing it needs an aggressive new marketing approach, plans to conduct an agency review that will include incumbent Campbell-Mithun.

The airline said its search would be conducted this month but didn't name any candidate agencies.

In a signal that marketing will be one of his top priorities, Republic president Stephen Wolf informed C-M of the review on May 2, a week after he was promoted from exec vp.

C-M president William Dunlap said the airline president told him the agency "has done an excellent job but that he's reviewing all aspects of the airline."

Campbell-Mithun, which has had the $30 million Republic account for the past 28 months, has centered its campaign on a "Dear Republic Airlines" theme. The campaign is designed to publicize customer satisfaction and reinforce employe pride.

Republic serves 120 cities from several hubs. Its over-all passenger load factor fell 8.1% to 50.3% in the first quarter of 1984. It did, however, earn a profit on operations of $18.5 million for the quarter, though interest payments created a net loss of $4.1 million.

The airline now wants to position itself more distinctly, perhaps capitalizing on its underdog role, being among the smaller national carriers, sources said.

Such a change would mean an abrupt shift in C-M's ad campaign strategy. But the agency has some powerful advantages in its attempt to keep the account. Mr. Wolf "thinks it's an advantage to be in town," Mr. Dunlap noted.

Unless Republic splits up the account, there appear to be no available Twin Cities agencies big enough to service the airline single-handedly. About 60 of C-M's 450 employes work on the account, and C-M's Twin Cities office has billings of about $200 million. The Twin Cities' second-largest agency is Bozell & Jacobs, whose Dallas office has American Airlines.

Two other large national agencies have offices here: Grey Advertising, which handles Northwest Airlines, and BBDO, Delta Airlines' agency.

That would leave Republic with the option, if it dropped Campbell-Mithun, of hiring a national agency willing to open an office here.#

American Advertising Federation executives warn that a pending Senate bill requiring country-of-origin disclosure in textile ads could open the door to demands on other industries. *See Page 10.*

Ted Turner, the cable tv mogul, says ABC weakened itself by paying too much for the Entertainment & Sports Programming Network. *See Page 14.*

Diversifoods is aiming for widespread home-delivery service in its Godfather's Pizza restaurants over the next few years. That's just one goal of the company that its executives promise will be "managed much like a successful investment portfolio." *See Page 28.*

CORPORATE CLOSEUP

Cuisinarts Inc. grinds up its competition with its strength in the upper reaches of the food-processor market. Cuisinarts' president, 70-year-old Carl Sontheimer, says he worries most about his own business, and lets his competitors mind theirs. *See Page 4.*

INTERNATIONAL

A cultural sponsorship boom is on in Italy, and it is common these days to see well-known corporate names as patrons of the arts. Last year, the La Scala opera house in Milan collected about $95,000 from 11 companies for the restoration of its facade. *See Page 54.*

Procter & Gamble is on the prowl in Germany and Brazil. Sources report P&G is on the verge of acquiring a local food or beverage company outright or buying a large share of one. *See Page 54.*

Newsweek is embarking on an unusual move in Australia that in one swoop will boost it into the same league as *Time*, the biggest foreign newsweekly in that country. *See Page 56.*

VIDEOTECH

CBN Cable Network believes that advertisers can get more for their bucks by combining CBN and rival cable superstation WTBS in buys. CBN's research shows an efficient cost per thousand homes for those who combine the two. *See Page 62.*

The latest Hollywood premiere, set for May 12, won't showcase a new star or a blockbuster summer film. It will show off digital sound, a new, reportedly better way to record movie sound. Hardware marketers and studios joined forces to make a 30-minute demonstration film, "Digital Dreams." *See Page 66.*

COMING THURSDAY IN Magazine

William F. Buckley writes that all the advertising time and space presidential candidates can buy isn't nearly as influential as tv coverage.

Premiums and Promotions: Airlines and grocery stores alike turn to giveaways to promote their products. While incentive expenditures reached almost $10.5 billion in 1983, some believe promotions are shortchanged creatively. *In special report.*

U.S. News eyes new bidders

By STUART J. ELLIOTT

NEW YORK—As they gather today, employe shareholders of U.S. News & World Report Inc. are wondering: "Are we getting a new boss?"

The company's regular annual meeting is being held in Washington, but circumstances are anything but regular. That is because the process by which the publisher of *U.S. News & World Report* put it up for sale is reaching a conclusion.

Morgan Stanley & Co., the investment banking company handling the transaction, has narrowed a list of interested bidders to a list of serious contenders.

Although a complete roster is not available because few of those involved will talk on the record, it is believed the finalists—whose bids must be binding—include:

- Gannett Co. The limousine of chairman Allen Neuharth was spotted in front of the U.S. News office in late April.
- Malcolm Forbes. The wealthy owner of *Forbes* was seen in the company's building last week, in deck shoes and shorts, according to one report.
- Hearst Corp. A spokesman de-

Census sees steep rise in shop growth

WASHINGTON—Graphs mapping the growth of the advertising industry recall steep mountain grades. What's more, ad agencies have made that climb in full gear.

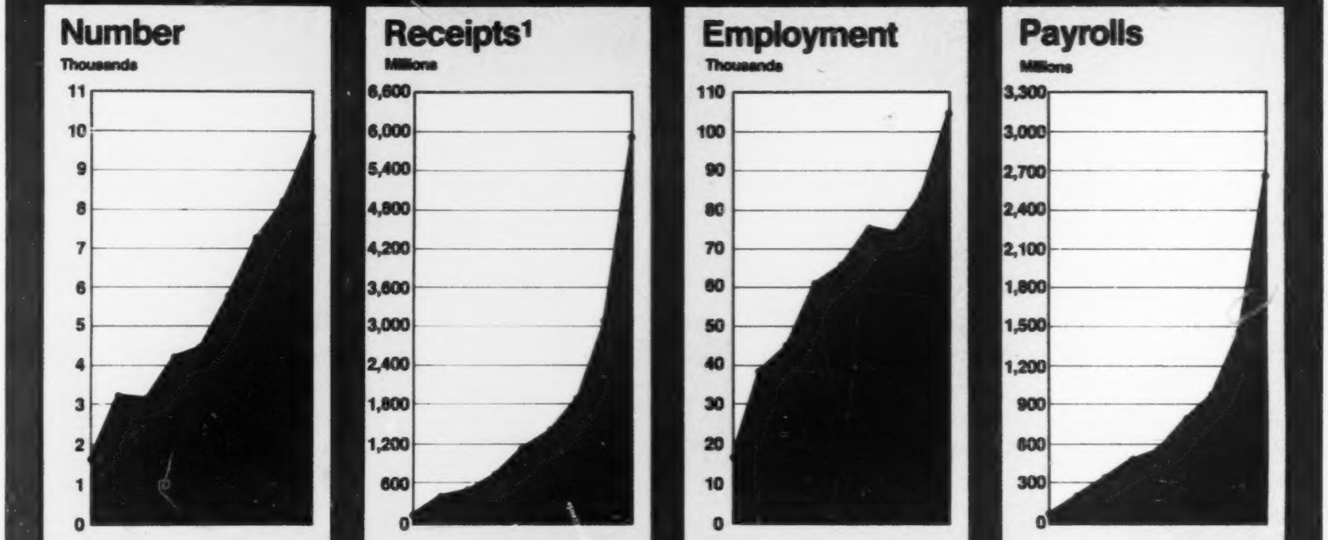
Compare statistics (at right) recently released by the Bureau of Census' survey of American service industries that trace figures from 1939 to 1982:

- The number of ad agencies increased about six times.
- Agency receipts grew 60 times.
- Employment, reflecting the growth in numbers of agencies, increased more than six times.
- Payrolls also showed an eye-opening growth rate, increasing nearly 50 times in the 43 years.

If receipts per agency could be one measure of productivity, that too showed remarkable growth. In 1939, the average receipts per agency were about $60,000. The comparable figure in 1982 stood around $588,000.#

Vital statistics of advertising agencies, 1939 — 1982

Ad agency receipts, employment and payrolls tracked by the Bureau of the Census through nine industrywide censuses beginning in 1939. Receipts include commissions on media materials and services as well as pr and service fees.



Number

1939	1,626
1948	3,279
1954	3,267
1958	4,240
1963	4,459
1967	5,747
1972	7,188
1977	8,089
1982	9,995

Receipts[1]

1939	$97,000,000
1948	$395,000,000
1954	$519,200,000
1958	$772,648,000[2]
1963	$1,024,500,000[2]
1967	$1,365,300,000[2]
1972	$1,831,536,000
1977	$3,168,560,000
1982	$5,822,664,000

Employment

1939	16,936
1948	38,739
1954	45,607
1958	61,327
1963	65,555
1967	75,412
1972	74,566
1977	82,515
1982	105,319

Payrolls

1939	$54,000,000
1948	$194,000,000
1954	$307,800,000
1958	$462,345,000
1963	$583,661,000
1967	$782,918,000
1972	$961,562,000
1977	$1,467,071,000
1982	$2,618,668,000

[1] Receipts include commissions on media, materials and services; public relations and service fees and other receipts.

[2] Projected by Advertising Age from census data for agencies doing 98% of the media billings in 1958 and 1963 and 84% in 1967. Census Bureau published receipts totals for those years had been a gross receipts figure which included media billings. This was never officially recomputed to be consistent with the net receipts basis used from 1939 to 1954 and restored in 1972.

Murphy elected chairman of POPAI

FORT LEE, N.J.—Thomas V. Murphy, president, Design Productions, Upper Saddle River, N.J., has been elected chairman of the Point-of-Purchase Advertising Institute. He succeeds Douglas H. Ballinger, exec vp, Pacific Lithograph Co., San Francisco.

Fifteen executives have been elected directors of POPAI. Elected to three-year terms were Timothy Battles, director-national retail stores, Seven-Up Co., St. Louis; Lawrence M. Buescher, president, Bish Creative Displays, Northfield, Ill.; Gerald A. Conway, president, Fasteners for Retail Co., Cleveland; John G. Frank, vp, AMD Industries, Chicago; Patrick H. Joyce, president, Patrick H. Joyce & Associates, Des Plaines, Ill.; Richard Leeds, president, Thomsom-Leeds Co., New York; Allen B. Marks, vp, Pacific Lithograph Co., San Francisco; Robert C. Ringer, national merchandising manager, Martlet Importing Co., Great Neck, N.Y.; Walter Roosli, president, Rapid Mounting and Finishing Co., Burlingame, Cal.; Irwin S. Rubin, vp, Trion Industries, Wilkes-Barre, Pa.; Joel Spector, president, JoMar Displays, Newark, N.J., and Ben Weshler, president, Display Systems, Maspeth, N.Y.

Elected to two-year terms as directors were Janet Paris, account exec, Henschel-Steinau, Englewood, N.J., and Jack Scheckowitz, exec vp-marketing, Dauman Displays, New York. Named to a special one-year term was Edward A. Powell Jr., president, Miller Manufacturing Co., Richmond, Va.

Citing an increasing shift of market control from advertiser to retailer, increasing media diffusion, more localized promotions and better measurement capabilities through UPC codes and scanners, Mr. Murphy predicted point-of-purchase advertising may reach $9 billion by the end of the decade.

It hit the $6.25 billion mark in 1983, up from $5.9 billion in 1982. Sales promotions in 1983 were $71.1 billion, an average increase of 12%.#

Masinick & Oberlin agency starts in Farmington Hills

FARMINGTON HILLS, MICH.—Masinick & Oberlin Advertising opened offices at 31800 Northwestern Hwy., 48018. Agency principals are Jay Masinick, president, and Kim Oberlin, chairman. The agency projects a first-year billing of $1.5 million on accounts in Detroit and Los Angeles.

New Leone shop opens

LAGUNA HILLS, CAL.—Former Castle Entertainment vp-marketing Michael Leone and his wife, Patti, have opened Leone & Leone Ltd., a marketing and communications agency here, located at 25411 Cabot Rd., 92653.

Nets, sponsors won't give up on gold

An Advertising Age roundup

Corporate sponsors, weighing the Soviet decision to pull out of the 1984 Los Angeles Olympic Games, are standing firm in support of their multi-million-dollar commitments.

At the same time, broadcasters here and abroad, professing no sense of panic, are reviewing their contracts to ward off the possible effects of the Soviet Union's intention to pull out from the summer extravaganza in Southern California.

With huge sums invested in the games, corporate sponsors, which have no escape clauses in their Olympic deals, said they are not making any changes in their ad plans.

"We'll have to see how permanent it will be," Roone Arledge, president of ABC News & Sports, said of the pullout. Mr. Arledge and others suggested that the Soviets, who attributed their action to fears for the security of their athletes, still may be willing to reach some kind of agreement to ensure their attendance. All nations have until June 2 to decide whether they will participate.

ABC is paying $225 million to the Los Angeles Olympic Organizing Committee for the rights to broadcast the games.

Mr. Arledge, interviewed at the ABC affiliates meeting in Los Angeles, acknowledged that ABC has a "de-escalator clause" in its contractural agreement with the LAOOC that would lower the rights fees should a boycott occur.

Jake Keever, vp-sales, ABC-TV, said the network has sold $428 million in Olympic advertising, leaving only 2% of available time unsold.

"There are no parts of the [ad contract] agreements that call for adjustments if any teams do not participate," he said.

In Europe, the broadcast picture was clearer. The Soviet withdrawal will "certainly mean a substantial reduction" in the European Broadcasting Union's payment for telecasting the event, according to Regis de Kalbermatten, secretary general of the EBU.

But the exact amount of the reduction from the $19.8 million EBU has paid for the rights—the highest it has ever paid—will have to be negotiated with the International Olympic Committee, Mr. de Kalbermatten said.

"And we're not pressing them at the moment," he commented. "I think they have

Esty loses W-L work to JWT, Bates

MORRIS PLAINS, N.J.—Warner-Lambert's consumer products group has severed its longtime relationship with William Esty Co., which loses an estimated $16 million in billings to two other W-L shops, J. Walter Thompson USA and Ted Bates Advertising/New York.

Thompson emerges as the chief beneficiary of Esty's misfortune as it picks up Schick blades and razors, Personal Touch women's shaving system, Clorets gum and mints and Lifestyle prophylactics. Combined billings on those products are in the neighborhood of $14 million.

Ted Bates Advertising which, like Esty, is a subsidiary of Ted Bates Worldwide, gains Listermint mouthwash, whose ad spending in '83 was roughly $2 million. W-L gave no explanation for severing the relationship.#

Coppertone

Slip into something Coppertone

In what it calls the ultimate boy-meets-girl fantasy, Coppertone's outdoor board model comes alive, slips into an admirer's car seat and the two motor off. Set against the backdrop "Slip into something tan," the spot was created by Warwick Advertising, New York.

P&G acts fast on pain reliever

By PAT SLOAN

After possibly one of the shortest market tests in its history, Procter & Gamble is moving national with Encaprin, an arthritis pain reliever that will get as much as $35 million to $50 million in advertising and promotion.

Introduced to retailers Feb. 3 and put into a Tucson test May 3, Encaprin is P&G's latest bid to gain a major hold on the $1.2 billion analgesic market, in which its Norwich-Eaton Pharmaceuticals division holds a 4.5% market share after breaking a national campaign for Norwich aspirin (AA, March 19).

According to Drexel Burnham Lambert's senior vp Hercules Segalas, Encaprin is only phase one for the Cincinnati company. "I've just reviewed several of P&G's latest patents and there are a number of more sophisticated products coming in this area," he said.

Although Mr. Segalas would not say what products might be next for P&G, other sources believe P&G entries may include an acetaminophen that would go up against Sterling Drug's and American Home Products' recent nonaspirin entries, Panadol and Anacin 3.

"Although Norwich Eaton had Encaprin in the hopper before it was acquired by P&G in 1982, P&G has been studying pain relievers for 15 years," Mr. Segalas said.

Advertising and promotional funding for Encaprin will come from an estimated $325 million new-product budget which is above and beyond projected 1984 spending of $450 million for existing products. Besides analgesics, the new products include food and

Reinhard cautions on 'creeping greed'

By JENNIFER PENDLETON

RANCHO MIRAGE, CAL.—The arrival of 15-second commercials is not the result of technological advance but of "creeping greed." If it becomes the standard, "tv will become more of a reminder, a sort of electronic outlaw."

That's the opinion of Needham, Harper & Steers/USA chairman Keith L. Reinhard, who is to be the keynote speaker here Friday at the Western States Advertising Agencies Assn.'s 34th annual conference. More than 250 persons are expected to attend this year's meeting, May 10 through May 13.

Among his other comments:

- "Cable has been perhaps the most persistently unfulfilled promise of our decade. . .Recent statistics show a downturn of interest in cable—partly due to dissatisfaction with programing, partly to increased charges to customers."
- "Computer-generated graphics will change the look of advertising, just as surely as did the invention of photography."

Despite all the technological developments changing the marketing world, Mr. Reinhard says, "what really excites me is the people of our business who spend each

Sweet talk at FMI

By JANET NEIMAN

DALLAS—Products for the sweet tooth made a strong showing among the new items introduced to grocers at this week's Food Marketing Institute convention here. At the same time, marketers are lining up to add to the list of products using aspartame.

Hershey Foods Co. will use its Golden brand name—which first appeared on its Golden Almond bar—on a line of chocolate-covered candies in single-serve packages.

Golden Almond Solitaires, the initial item, will be introduced nationally next fall, to be followed by a pecan-bar extension of the Golden bar line.

Pillsbury Co. is readying fall introduction of refrigerated apple danish dough under the Pillsbury's Best label, a new name for refrigerated products.

Cinnamon roll dough also is scheduled to enter the market by Pillsbury for fall.

And Eskimo Pie Corp. is moving national with Eskimo Pie Bavarian ice cream rolls encased in a cylindrical sugar cone covered with chocolate.

Such activity belies continued consumer concern about nutrition. Timothy Hammond, senior vp of FMI, told members that 63% of consumers polled in this year's FMI-Louis Harris & Associates study said they were very concerned about nutrition, and 32% said they were somewhat concerned.

Concern over health and nutrition had been overshadowed by price factors because of economic uncertainty, "but now it is reasserting itself," Mr. Hammond said.

"It is certainly not a passing fad," he added. He cited the three main nutritional concerns as chemical additives, sugar content and

Conflict a hallmark for Y&R

By STEWART ALTER

It was a strange week for Young & Rubicam.

The agency learned that telephone calls and greeting cards present conflict in the mind of one client, but that canned spaghetti and noncanned pasta do not in the eyes of another.

As a result of picking up the $20 million-plus AT&T Communications long-distance phone call account two months ago, Y&R has lost the $40 million-plus Hallmark Cards business because the latter perceived a conflict.

Meanwhile, Y&R has lost some of its American Home Products, business to Cunningham & Walsh and Kornhauser & Calene as a result of gaining General Foods' Ronzoni Macaroni Co. account. However, it will retain AHP's Chef Boy-ar-dee canned pasta business, which

10 Strategic Marketing
10 Parting Shot

To our readers

As today's special report on premiums and promotions was being put together, several of the Magazine staff members did some reminiscing about memorable premiums. Cracker Jack and its ubiquitous little in-box prizes entered into the discussion almost immediately, of course, as did S&H Green Stamps. But then we began to wax nostalgic about some favorite items from our pasts:

- The plastic tops with a string that were in boxes of Trix cereal.
- The chart listing American Presidents that came with the purchase of a can of a now-forgotten brand of dog food. ("That's how I learned the Presidents," one staffer said.)
- The "walk-o-meter" you got by sending in Wheaties boxtops. For the uninitiated, that was a gauge you strapped on your belt and, after adjustment for your stride, measured how far you walked.
- Those submarines in Kellogg's cereal boxes that, when filled with baking soda, would sink to the bottom of a pail of water and then, as the soda fizzed, would rise to the surface.

For one staff member, the all-time favorite was the little comic strips that came inside packages of Bazooka bubble gum. "If you chewed a lot of gum, a *real* lot, you could get enough comic strips to redeem them for prizes. I got a softball, a bat and the first pocket knife I ever owned—which I still have."

But the topper was a story told by one colleague about his days at the University of Missouri: "Coca-Cola had a promotion in which pictures of pro football players were on the underside of their bottle caps. If you collected all 22 players from one NFL team—in our region it was the St. Louis Cardinals—you could get a free football.

"We took a magnet, attached it to a string, and went to every Coke dispenser on campus, fishing old bottle caps out of that hole under the opener. We ended up getting six footballs."

As if that weren't enough, he and his cohorts took the laces out of the footballs, replaced them with rawhide so they could be gripped better and sold them to fellow students for $5 each.

Now *that's* entrepreneurial spirit.

Letters

One of Tyler's Ten

We were pleased to see a Johnson & Johnson Child Development Products ad included in "Tyler's Ten" (April 2). However, it is unfortunate that Wunderman, Ricotta & Kline did not receive credit for developing this fine copy.

T.K. McCarter
Director of Marketing
Johnson & Johnson
Skillman, N.J.

Rance Crain on Pepsi spots

In the Rance Crain's column (Parting Shot, April 2), "Pepsi misses with Michael Jackson," he states that "Jackson is a Jehovah's Witness, and he doesn't smoke or drink (including soft drinks) and hardly even eats."

While all of the information may be true, I felt that the column might lead people to believe that Mr. Jackson doesn't drink (even soft drinks) or eat because he is one of Jehovah's Witnesses.

While it is true that Jehovah's Witnesses do not smoke, because it defiles the body, we certainly are not against eating or drinking (even alcoholic beverages) in moderation.

Even Jesus Christ himself drank wine. The apostle Paul told Timothy to "use a little wine for the sake of your stomach and frequent cases of sickness" (I Timothy 5:23).

Personally, I do not know if Mr. Jackson drinks Pepsi or not; I do know that there are other Jehovah's Witnesses who do.

Arlinda A. Davis
Indianapolis

Does he really drink Pepsi?

Is Rance Crain really that far behind the times? If Pepsi's Michael Jackson spots are ineffective, then I suppose the entire "Choice of a New Generation campaign" is not one of the most innovative and best produced on tv, either. Mr. Crain says that because the audience knows Mr. Jackson doesn't drink anything, Pepsi is wasting its money. Does Mr. Crain really believe that Marcus Allen and Ted Turner sit home sipping Diet Coke, "just for the taste of it"?

The Jackson "concert" spot catches the excitement of an actual Jackson concert while linking the Pepsi name to it in a new and different way. The adaptation of the hit song, "Billie Jean," is wonderful. Simply because Mr. Crain's daughters don't think the commercials are effective does not mean Pepsi is missing its mark. More likely Pepsi has realized not too many 45-year-old business executives are going to drink Pepsi anyway. Instead, it has set its sights on the post-baby boomers, the new generation of Pepsi drinkers.

Outdoor boards

I would like to clarify a statement of mine—rather, *half* a statement of mine—quoted by Renee Blakkan in "Reaching a growing market where it lives" (March 19). Ms. Blakkan, in quoting the latter part of what I don't doubt was a garrulous explanation, left the impression that I regard outdoor advertising to Hispanics as ineffective in any role save as reinforcement of messages from other media.

This was my point: a) English-language billboards are often intended to be "reminder" advertising, reinforcing a tv effort. b) Spanish-language billboards are often translations of English-language billboards. When both "a" and "b" are true of one campaign, and outdoor is the only Hispanic medium, the result is Spanish advertising that has nothing to reinforce.

Hence, when I spoke of advertisers using outdoor as "doing it on the cheap," I did not seek to denigrate the quality (or the expense) of an outdoor campaign. I meant to denigrate the logic of those who wish to solve the "problem" of Spanish-speaking consumers by merely translating the tag line of an English-language tv campaign and posting it in Spanish neighborhoods.

Without a plan, the carrots just dangle

By Ed Fitch

Ever since some unknown hansom cabbie hung a carrot in front of a horse's nose, premiums have been part of the stable of methods people use to exhort performance. Why? Because they work. That horse kept moving, working harder, the vision of a bonus bouncing before his snout.

Shortly thereafter, incentives were dangled in front of consumers' noses to motivate them to perform—performance in this case being to purchase a good or service, not to pull a wagon. But, like good draft horses, humans have clopped after these carrots at a fast clip.

Premiums are one of the oldest forms of promotion in the U.S., dating to about 1850. Those from within and without the industry also say the premiums used in the 1850s—and the methods by which they were selected—probably are not much different from those used in 1984.

In fact, the only things that seem to change when it comes to premiums are the industries that offer them and the premium techniques that are in vogue. Premium tactics swing in and out of style depending on their costs and marketers' and consumers' attitudes toward them. And markets roll in and out of premium cycles regularly, illuminating both one of their drawbacks—their susceptibility to the vagaries of unstable markets—and a strong point—their ability to act as a short-term, crucial crux for other consumer marketing efforts.

Although this area is given a sizable chunk of promotional cash (1983 incentive expenditures reached almost $10.5 billion, according to *Incentive Marketing*, slightly less than the amount spent for all direct mail efforts last year), it may be shortchanged when it comes to sophistication and creativity.

Telephones, tote bags and umbrellas are all available for the taking in promotions for cosmetics, magazines, banks, rental cars or almost anything else in the marketplace. Despite the rise in the amount spent on premiums, the number of ways in which this money is spent has hit a plateau. The general belief is that premium efforts are not given the creative emphasis afforded most advertising and promotional programs.

"Some people in the industry cannot visualize the creative potential for premiums or move beyond the dull, prosaic ways of the past," says Don Jagoda, president of Don Jagoda Associates, Syosset, N.Y. "Many premiums are very pedestrian. But there's room for innovation and creativity in any area, and this is no exception." Mr. Jagoda also says that because client companies are demanding creativity from those who handle their premium efforts, the field is becoming more professional.

However, it still has a long way to go in reversing a second-citizen status—whether it is justified or not—in the marketing world. Premiums often are perceived as peripheral ploys, employed only when a better idea for promoting a product isn't apparent. In the eyes of many marketers, the field is an untamed beast, not playing by the rules by which most advertising programs abide.

Airlines soaring with frequent fliers

By Kurt Hoffman

Some semblance of stability has returned to the air passenger industry—at least for the moment. Competing airlines no longer are slashing each other's throats for the lucrative transcontinental and winter Florida traffic. Although rate competition on these routes is stiff, a definite shift in marketing strategy has taken place: The frequent flier phenomenom.

> **"Business travelers had no brand loyalty. The choice of airlines was determined almost entirely by schedule convenience."**
>
> *—Julius Maldutis*

Before the emergence of the first frequent flier offering in 1981, the situation in the airline industry was particularly dismal. The initial chaos that followed deregulation in October, 1978, was exacerbated by a sagging economy and the resulting drop in vacation and pleasure air travel. The new free-market environment triggered a series of vicious rate wars that bled sorely needed capital from individual airlines, killing a few.

"The whole industry was going through a period of declining traffic, and we realized that the real challenge would be to hold or increase our share of the business travel market," says Bill Delahanty, director-commercial sales for Eastern Air Lines. "But we realized that rate-cutting alone wasn't going to work, simply because it could be duplicated by our competitors. If we had decided to change our fare from New York to Atlanta one morning, the other carriers serving that route would have changed their fares before the end of the day."

Similar sentiments were echoed by Chuck Stichweh, senior analyst-marketing programs for Delta Air Lines. "During the period Delta was pursuing discount fares full force, we were flying a heck of a lot of people and losing money."

The idea behind stemming that flow of money—the frequent flier program—is as simple as it is brilliant. Some programs are structured around the number of miles flown; others tally the number of times a passenger buys a ticket valued at more than a certain price. Fly so many miles or buy so many tickets, and you receive a ticket or upgraded ticket in return.

"Quite frankly, the Free Flight Plan allows us to give our frequent travelers an incentive award that has a relatively high retail value, but a minimal incremental cost to us," says Rick Moran, director-commercial marketing for Northwest Orient Airlines.

The concept has frequent travelers salivating like Pavlov's dogs. Some airlines boast as many as 1.5 million current players, and the figures are growing.

Although airlines readily welcome all travelers to their programs, marketing strategies generally focus on business travelers, who accounted for slightly more than half of the air passenger traffic in 1983. These passengers tend to be less cost-conscious than vacation travelers and often fly during weekdays instead of on heavily booked weekend flights.

Despite these bonuses, business travelers' traditional indifference toward airlines has been frustrating for carrier marketers. "Historically, business travelers had no brand loyalty. The choice of airlines was determined almost entirely by schedule convenience," says Julius Maldutis, transportation analyst at Salomon Brothers, New York. "Consequently, the initial objective of frequent flier programs was to take a portion of those very frequent business travelers who had no brand loyalty and convert them to United, Delta or whoever."

This assessment is accurate from the airlines' point of view, says John Zeeman, senior vp-marketing at United Airlines. "Our ultimate goal is to generate and maintain customer loyalty. We want people to choose our airline because they prefer United, not because of schedule or price. In essence, we're trying to differentiate our product."

American Airlines was the first to differentiate its product when it launched its AAdvantage program in May, 1981. This dramatic shift in strategy generated a marketing upheaval that has yet to settle, as competing airlines continually scramble to achieve parity or to best their competitors in the frequent flier arena. As Mr. Stichweh says, "In an oligopolistic situation, you've got to be pretty quick to respond."

Fueled by overwhelming public enthusiasm, the frequent flier programs have taken on lives of their own. Each participating carrier is scanning the market for new opportunities to enhance and stabilize its competitive posture, forming partnerships not only between airlines, but with other industries. The resulting mishmash of mileage

Overwhelming public enthusiasm has greeted the airlines' frequent flier programs, prompting them to search for new opportunities to gain that competitive edge.

Kurt Hoffman, a Richmond, Va.-based free lance writer, covers the transportation industry for a number of publications. He performed his interviews over the telephone, although he would have preferred to fly and build his mileage credits.

Carrots

(Continued from Page M-15)

For one thing, most companies want to know how well any marketing effort performed its assigned task. However, assessing the results and value of premium programs is a difficult and inexact science. Companies spend lots of dough on sometimes partially baked schemes without being able to tell how much the premium motivated the sale.

"The state of premium research is where advertising research was 20 years ago," says Marji Simon, director-research, Frankel & Co., Chicago. "No one has devised an inexpensive, practical, usable technique for measuring the effectiveness of ads, much less premiums."

The problems faced in evaluating premium programs are substantial. "The industry moves so fast that it's difficult to evaluate efforts regularly," Mr. Jagoda says. "Usually by the time one program ends, another has been launched and it's difficult to tell which motivated the sale." This, plus the fact that it's very difficult to set up any kind of control group and obtain followup figures from the client or industry involved, makes evaluative testing quite arduous, Ms. Simon says.

But, because of the competitiveness in the market, the emphasis is shifting more toward research. "To attract and keep clients, premium companies must back up their statements with quantitative data," Mr. Jagoda says.

John Caputo, executive vp of Glendinning Associates, Westport, Conn., agrees that more research is critical, but for another reason: "In light of premiums' impact on their respective markets, more work must be done to truly and accurately measure and evaluate premium programs."

Despite the need for better numbers, determining the outcome of a program primarily remains a subjective judgment, according to William Rotz, president of Rogers Merchandising, Downers Grove, Ill.

Both Mr. Rotz and Ms. Simon say they believe the best way to gauge a premium's effectiveness is through pretesting, employing focus sessions in target markets and performing moral intercept interviews. "Companies are spending a lot of money on premiums," she says, "so they must be bought and assessed more carefully. There is a definite need to design the right premium for the right audience. Premiums, like target audiences, should be segmented."

Ms. Simon uses an acronym—ACTION—to describe the intent of her promotional concept testing. "The premium effort should be appropriate to the product; easily comprehended by the consumer; reach the target market; be in keeping with the image of the company; fulfill the objective, and attain the norms or benchmarks established for the program," she says.

The objective often is not fulfilled because the company's intentions are not clearly established. The car rental industry, for example, waged a $50 million advertising and premium war without defining desired goals. The companies hoped to improve market share or the size of the market, but these positive

Source: *Incentive Marketing* *AA estimates credits accrued through luxury liner cruises, car rentals and hotel registrations boggles the mind.

One such comprehensive arrangement involves Eastern and Trans World Airlines. Travelers can use mileage credits from either airline to acquire awards offered by either program.

"We really wanted to make a major jump in our program and appeal to a much larger audience of frequent travelers," Eastern's Mr. Delahanty says. The challenge was to identify the right partner. In addition to the eastern U.S., Eastern offers service to the Caribbean, Mexico and South America. TWA's presence in the western U.S. and Europe could provide an added dimension for Eastern fliers, and vice versa.

"It's just a perfect match," Mr. Delahanty says. "We felt that TWA's route system to Europe would have a strong appeal to our players, both as a means of racking up mileage credits and as an award target. We also knew, and TWA confirmed it with research, that TWA players would love to have an opportunity to go to Mexico, the Caribbean or South America under the same circumstances. So we both had something to bring to the party."

The negotiations, particularly those concerning award redemptions, were a little sticky, Mr. Delahanty says. "For example, we didn't know if their half-million players would suddenly start redeeming their mileage for trips to the Caribbean this winter. We certainly didn't need to relinquish a lot of free tickets during the height of the tourist season. By the same token, they were understandably concerned about our half-million or so players getting turned on to Europe this summer.

"We tried different formulas to protect one another, but we eventually decided that we were willing to risk it if they were," Mr. Delahanty says. He reports that redemptions have been fairly equal so far.

The partnership doesn't end with the two airlines. Participants in Eastern's program also can earn mileage by flying British Caledonian, Scandinavian Airlines or a variety of commuter airlines. Hertz and General car rental agencies also provide qualifying mileage, as do Marriott hotels.

"We saw other programs spread and take in a larger chunk of the world, and we have to remain competitive," Mr. Delahanty says. The Eastern-TWA arrangement is not unique. United has 15 partners. Pan American World Airways' World Pass II program includes links with Sheraton and Inter-Continental Hotels as well as Hertz. The list goes on.

The frequent flier programs clearly are a boon to business and vacation travelers. But have they been a benefit or a burden to the airlines?

"We're absolutely certain that we've been achieving our objective of brand loyalty," Mr. Zeeman says. "People are choosing to fly United because they like our rewards, and we have a lot of research that indicates passengers are going out of their way to fly our airline."

Not all marketers respond quite as enthusiastically, but nearly all hold that the frequent flier programs have created customer loyalty. "For the time being, it appears that the programs are a successful promotional device both for Northwest and for the airline industry in general," Mr. Moran says.

Mr. Maldutis says the frequent flier programs have developed enormous brand loyalty. "Due to the lack of statistics and the variety of marketing factors involved, it's difficult to attribute growth or loss solely to the frequent flier programs. But American, United, Northwest and Delta's traffic levels have improved, at least in part because of the frequent flier programs."

The mere compilation of travel statistics for frequent fliers has provided a variety of side benefits for the airlines. No longer must carriers resort to shotgun advertising in the general media.

Equipped with computerized travel habits of hundreds of thousands of individuals, Delta can target specialized audiences through direct mail campaigns.

"Initially, the goal of our Frequent Flyer Program was to be competitive in the marketplace. The secondary goal was to identify our frequent passenger," says Kathy Field, a Delta account executive. Because the majority of business travel traditionally is booked through agencies, individual airlines had little customer demographic information.

"Our computerized system opens up a variety of promotional opportunities," Ms. Field says. "For example, when we have new partners, such as Marriott or Preferred Hotels, we can use direct mail communications to advise our frequent fliers who regularly visit cities where these hotels are located of the opportunity to boost their mileage through hotel patronage. This not only provides a service to our frequent fliers and our program partners, but it also serves to increase that customer's loyalty to our program."

Airlines also use this information to promote new or increased service or to encourage travel during slow periods. These promotions often are accompanied by double mileage bonus offers or similar enticements.

However, not all airlines have jumped aboard the frequent flier bandwagon. Charles J. Kreinar, director-sales planning for USAir, says the profits weren't worth the price for USAir.

"We didn't experience a significant loss of business over-all on our system due to the decision not to participate," he says. Although competitors eroded a

---

objectives were not reached because they were never identified as the primary results.

"Every premium program should be based in a very specific marketing strategy, defined by clear-cut promotional objectives," Glendinning's Mr. Caputo says. These objectives, he says, should reflect the company's desired goals, whether it hopes to increase sales volume, improve market share, heighten in-store merchandising profile or reinforce brand usage and image.

"If a premium tactic does not address a problem, then the marketer cannot expect it to have a positive effect," Mr. Rotz says. Mr. Jagoda concurs: "The first thing I ask any client is, 'What problem do you need to resolve?' Anyone who uses premiums must realize that premiums are a means to reach an end, not an end in and of themselves."

In selecting the means to meet the end, Mr. Caputo says, the marketer must understand the capabilities and dynamics of the

(Continued on Page M-48)

An American evolution

Frequent flier programs radically altered airline marketing strategies in the 1980s, but the genesis of the prototype program was more evolutionary than revolutionary.

Tom Plaskett, senior vp-marketing for American Airlines and founder of the frequent flier frenzy, says the company struggled with two questions: Is it possible to build brand loyalty in a commodity product like air transportation, and how can repeat patronage be rewarded without exposing American to the economic adversities of volume discounts?

The obvious first step for any reward program was to develop a mechanism to monitor individual travel. American directed its data processing talent toward that goal in mid-1980. "We didn't know what we were going to do with it, but we knew that any effective program would have to have a reliable tracking mechanism," Mr. Plaskett says.

"Then we began to think about the specific concept of the program—whether we were going to track total mileage, travel dollars or travel frequency, for example. We selected a mileage-based system," he says, "and then we had to determine the actual mileage between all service points and program this data into our computer system."

All that remained was to define the awards and develop and implement the marketing and promotional plans.

"So it was really a building-block, stepping-stone type of approach," Mr. Plaskett says. The sum of these efforts, dubbed the American AAdvantage, was unleashed on an unsuspecting public in May, 1981.

> **"But once the decision was made to go ahead with the program, everyone pulled together and made it work."**
>
> *—Tom Plaskett*

He admits that some American officials were concerned that the program would be viewed as corporate discounts. Others were afraid that competitors that lacked the ability to respond with a similar program would adopt a competitive tack, perhaps negating American's offering.

"There was a lot of discussion and issue examination, and some modifications were made. But once the decision was made to go ahead with the program, everyone pulled together and made it work," Mr. Plaskett says.

"We saw it as an economic opportunity, not an economic risk. We were fairly confident that the program was going to attract a great deal of attention initially, and we would see an immediate share shift and increase in our market share as a result."

According to Mr. Plaskett, American's head start gave the company a significant competitive edge over other airlines. "Although we fully expected them to follow suit, we figured we had several months before our competitors could mount an effective program of their own," he says. "But one of the great strengths of our strategy was that once a player was locked into the program, it was very difficult to switch to other programs without losing the benefits they already had gained with us."

Mr. Plaskett likens the program to the trading stamp promotions that raged for years. "All we've done is replace the toasters with the most sought after reward today: Travel. And it's become the biggest and most successful marketing program in the business." —*K.H.*

Strings attached to free flights

Uncle Sam has bad news for frequent flier award winners. The old adage that there's no free lunch holds true as far as "free" airline tickets are concerned, at least in the eyes—and computer banks—of the Internal Revenue Service.

Three scenarios were presented to "Big Brother" for evaluation:

- A federal employe accumulates enough mileage credits through work-related travel—paid for by the federal government—to earn a round-trip ticket to any location the airline serves.

Is he free to use the ticket for personal travel?

No, according to a Justice Department tax division official. "Any free tickets, advertising giveaways or items of that nature become the property of the federal government, and the traveler is required to turn them in."

- An independent businessman is under a six-month contract with the Defense Department. The contract requires weekly travel and is set up on a costs-plus-contract basis (fixed contract fee plus expenses). After four weeks, the contractor accumulates enough mileage to earn a round-trip ticket. But instead of using the ticket for additional contract-related travel, he gives it to his wife for a weekend jaunt to the Bahamas. Was he obligated to apply the ticket to additional contract-related travel?

> **"Any free tickets . . . become the property of the government, and the traveler is required to turn them in."**
>
> *—tax official*

Yes, according to an official in the IRS accounting division. He now must reimburse the federal government for the retail value of the round trip to the Bahamas.

- A hard-working free lance writer living in Richmond, Va., finally earns enough segment credits through business-related travel to get a round-trip ticket, which he uses for a weekend in Cancun. However, he deducted the initial travel costs for the qualifying mileage as ordinary business expenses on his 1099 tax form.

Is the "free" round-trip ticket a taxable item?

Sort of, according to an IRS tax service representative. "This ticket would be viewed as a reimbursement, regardless of whether he uses it for business or pleasure," the official says. "The proper procedure would be to list his actual travel expenses on the 1099 form, then credit as a reimbursement the retail value of the flight to Cancun."

As to whether the "free" ticket would be taxed if the traveler accumulated the qualifying mileage through nondeductible pleasure travel, I didn't even bother to ask. One can take only so much bad news in a given day. —*K.H.*

Companies find a winner in dealer incentives

By Mary McCabe English

The insides of most consumers' kitchen cabinets are beginning to look like a Hollywood movie set gone berserk. Annie, Punjab, Gargamel, Smurfette, Snoopy, Woodstock, Darth Vader, Luke Skywalker—they may all be lurking in there. They are the visible remnants of a hundred fast food binges and as many halfhearted attempts by parents to ensure their kids' love by getting just one matched set of *really in* glass tumblers before they are no longer *really in*.

These consumer-targeted purchase incentives are the most obvious. But, behind the scenes, marketers are spending even more on sales and dealer incentives—either merchandise or travel prizes—to attain specific, predetermined goals, most frequently to increase sales volume or new accounts, improve morale or support new product introductions.

Total incentive spending—consumer, sales and dealer—increased 6.8% in 1983, reaching $10.4 billion, according to a recent report published in *Incentive Marketing*. However, the report says, "Given the inflation rate . . . the results indicated a measurable growth for the first time in several years."

The numbers look to be more notable this year. Surveyed executives "expect to see about a 10% rise in dealer promotion this year, pushing total volume over $2 billion," *Incentive Marketing* says.

Murray Elman, *Incentive Marketing* publisher, traces the growth generally to an increased emphasis on promotion activity. "People today are basically realizing that they have to promote if they want to move their products in an increasingly competitive marketplace," he says.

As for the relative merits of consumer vs. sales vs. dealer incentives, Mr. Elman says: "I don't try to isolate one because I think generally they tend to work in concert with one another."

Karl M. Sooder, vp-marketing at Barq's Inc., maker of Barq's root beer, New Orleans, agrees. Barq's is doing significantly more consumer promotion to complement its trade incentive programs, he says. "We believe we get multi-effectiveness this way," Mr. Sooder says, adding that Barq's realizes "anywhere from a 5% increase to a much higher percentage increase when we orchestrate these total promotions."

> **"People today are basically realizing that they have to promote if they want to move their products . . . ."**
>
> *—Murray Elman*

According to Mr. Sooder, Barq's has been doing merchandise and low-end travel incentives for the past three years. But, he says, nothing in the past compares with the magnitude of the current campaign, which involves sending 150 qualifying bottlers to the Acapulco Princess Hotel for three nights and 20 or 30 top winners on a three-day Princess cruise. The company upgraded the campaign prizes as a direct result of increased competition in the soft drink market.

Says Mr. Sooder, whose company logs annual sales of about 19 million cases in 30 southern, western and midwestern states, "The amount of competition that exists for bottler attention to the various products he's carrying is incredible. In the last few years, that competition for [the bottler's] time has increased substantially." So the company anticipates a boost in dealer incentives in 1985, he says, especially in light of the "positive results we're seeing in 1984."

Jeffrey Brooks, director-advertising for Sony Corp. of America in Park Ridge, N.J., is also enthusiastic about the positive effects of an incentive program. Sony ran an incentive campaign in its car stereo division last year, resulting in 48 U.S. distributors winning one-week Club Med getaways. And although Sony's past incentives have been basically consumer-oriented, he says, the success of the Club Med campaign has paved the way for a similar one this year.

"Our product line is so expansive and diverse, an incentive program allows us to single out certain products for special attention when necessary," Mr. Brooks says. Incentives energize the entire trade chain, he adds, both during and after the campaign.

"I think the fact that we're repeating the program this year is a testimonial to its success," Mr. Brooks says. "The distributors that returned from last year's trip are now such advocates of Club Med that they're helping promote this contest."

The Magnificent Adventure

Barq's is breaking new ground with the magnitude of its cruise campaign for 150 bottlers.

Andre G. Abbate Jr., executive director of the Society of Incentive Travel Executives in New York, says the use of travel as an incentive has other positive repercussions.

"An incentive trip brings together the peers of an organization, many of whom have never met face to face. It gives them the opportunity to meet in a very favorable setting and develop interpersonal relationships, which is good for the organization as a whole because it leads to more of a family feel within the corporation," he says.

And, speaking of family, Mr. Abbate says by including spouses in most incentive trips,

companies often make that spouse more tolerant of longer hours on the job.

Nonetheless, according to *Incentive Marketing's* report, merchandise still outstrips travel in corporate expenditures for sales and dealer incentives.

Merchandise expenditures for dealer and sales incentives reached $3.1 billion in 1983, the magazine reports, compared with dealer and sales travel expenditures of more than $1.2 billion.

However, regardless of the type of prize, Marilyn Friedel, vp of Morse Marketing and head of Promotions for Industry in Chicago, says today's incentives share a common thread of increased sophistication. "There are so many new areas in technology and computers . . . that have added a tremendous value factor," in terms of incentives' effectiveness as marketing tools, she says. Ms. Friedel offers the telephone industry as an example of technology and market appeal meeting with perfect timing to create an ideal incentive.

Louis Haugh, a managing director with Westport Marketing in Westport, Conn., identifies incentives' increasingly creative and upscale applications as prime factors in their success as motivational tools.

"The rule used to be a prize structure whereby a salesman or dealer would earn points to win a toaster. Now, a toaster doesn't cut it anymore. What does are travel and upscale prize structures that allow people to acquire things they wouldn't normally go out and buy, things that feed the imagination," Mr. Haugh says.

Spokesmen for the incentive houses that frequently package incentive programs bear this out from the supplier side.

"The fact is, today people can buy almost anything from anybody . . . an absolute multitude of choices [are] available in almost any area you can think of," says Jim Dittman, head of Dittman Incentive Marketing in New York.

"As a result, the people who are succeeding [in packaging incentive programs] are offering merchandise that's fresh and imaginative.

"As for travel incentives, as they are used more and more widely, people are beginning to understand the importance of creating a program that will be remembered as an extraordinary experience," he says, "and not just another walk through London . . . new uses, not just new destinations."

It's also important to match the reward to the task, says Mr. Dittman, who is also director-education for SITE. By way of illustration, he describes the reaction of the dealer who's asked to do 20% more volume over six months in exchange for a low-end Caribbean vacation.

"This same dealer reads the New York Times and knows that he can go to the Caribbean for $400, so he says, 'you're crazy . . . you expect me to do all that for $400?' " Mr. Dittman says. "You have to create a travel experience that [the dealer] cannot duplicate . . . or offer merchandise of a high quality that mirrors the quality of what you're asking that person to perform."

From the perspective of the company underwriting such rewards, incentive programs should be effective marketing tools that generate business and aren't just another expense of doing business, Mr. Dittman says.

For this reason, it is crucial that incentive planners match each campaign to specific goals and then tie those goals to a carefully designed rules structure, he says.

Incentive Marketing's editors note that the basic measure of a

Direct Mail Effectiveness Without The High Cost

Any media expert will tell you that the most effective advertising medium is direct mail. They'll also tell you it's the most expensive. But maybe they don't know about Val-Pak.

You save, dramatically, by sharing the cost of postage and handling with a group of non-competitive advertisers together in the same envelope. Your message is included in mailings that are already scheduled . . . in over 200 key markets in the U.S. and Canada. But cutting costs isn't the only miracle we perform.

Val-Pak can give you 100% penetration of your market with virtually no wasted coverage. You can reach as few as 10,000 households or as many as 90,000,000 homes annually. This kind of targeting makes Val-Pak ideal for couponing, test-marketing or co-op advertising with your retailers.

And, on the subject of couponing, Val-Pak consistently delivers a high redemption rate with very low misredemption.

So if you thought only a miracle could make direct mail practical . . . look into Val-Pak. We've got a packetful.

Incentives

(Continued from Page M-43)

program's effectiveness is "sales dollars reasonably attributable to the promotion. . . . The average sales increases for the [companies represented in the *Incentive Marketing* survey] in 1982 came to 11.5%, in 1983 to 14.2% and this year they anticipate an average of 16.9%."

Mr. Dittman says he believes the use of trade incentives will continue to increase for a combination of reasons.

"Number one, I think people recognize that price cutting is a suicidal approach and that incentive programs are, in effect, a positive form of motivation vs. the negative tonality [of] price cutting," he says.

"Trade incentives add value to the way your product is perceived.

"Second, with today's technology, there's less and less differentiation between products; at the same time there are more and more goods to sort out. And I think as the amount of differentiation continues to decline, the use of incentives will increase as a means of putting back some of the difference.

"Also, and this is particularly true of travel incentives, you get a great deal of residual value when you offer an incentive to your salespeople or dealers. It's not so much having been in Paris as the good memories associated with time well spent with a gracious host." AA

Travel awards take off

More than $1.2 billion was spent on sales and dealer incentive travel during 1983—numbers that make this market very appealing to a lot of folks in the business of accommodating travelers.

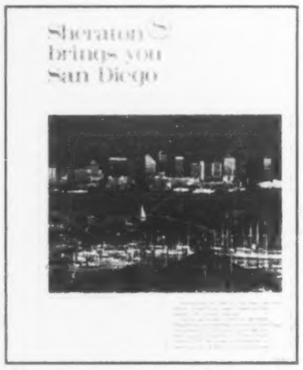
"Incentive travel has reached a level of sophistication that makes it an awfully attractive focus for a lot of companies," says Bob Dauner, director-incentive sales at Hyatt Hotels in Chicago.

"The very nature of the incentive program means the client wants to ensure that everything is done well. As a result, expenditures are usually greater for food and beverage, special accommodations, special programs . . . . Also, there's normally more discretionary spending involved," he says.

More and more hotels are beefing up their sales forces to tap into this lucrative offshoot of dealer incentive programs. Meridien Hotels, for example, opened an incentive department in April, 1983, a move that resulted in an estimated 100,000 room nights for the chain as of December, 1983, according to Maureen O'Hanlon, who opened the new office in her former position as Meridien's New York-based director-corporate and incentive sales.

"In the hotel industry, this is a substantial amount of business," Ms. O'Hanlon says, noting that the largest single chunk of the 100,000 room nights came from 9,000 people booked into Meridien's Paris branch, which is a consistently good incentive draw because of its location.

Nancy K. Sobol, manager-incentive sales for Sheraton Corp. in Chicago, says, "Over the last five years, Sheraton—worldwide—has seen a 20% to 30% annual increase in incentive-related business. The fact that not all of our hotels are located in destinations that are attractive to incentive groups pulls the figure down. The incentive increase for our resort properties could be 50%." The boom in incentive travel has been noticed by more than hoteliers, however.



San Diego is positioning itself as an appealing incentive travel destination—and Sheraton is helping.

In the past couple of years, San Diego has joined the expanding ranks of U.S. cities attempting to position themselves as appealing incentive destinations. A steady incentive trade can offer a solid base of financial revenue for a city and its businesses, according to Dave Wilbern, national sales manager for the San Diego Convention and Visitors Bureau.

"We found that as recessionary times hit us, association meetings dropped off drastically, although corporate meetings held on and even improved," says Mr. Wilbern, who also has worked for the Phoenix promotion board. "And, over-all, corporate, and particularly incentive meetings spend more money than association meetings." The San Diego spokesman figures the city's incentive business has grown 30% to 50% in each of the past three years. "This is partially due to the fact that the U.S. dollar doesn't have the strength abroad that it used to have," he says.

People are reconsidering where they spend U.S. dollars and are looking for value for their money, "and we want to make sure they know what a good value San Diego is," Mr. Wilbern says.

Warren B. Schatzle, vp-sales for the Nassau-Paradise Island Promotion Board, estimates that incentive travel to that destination has increased about 10% annually in recent years and probably accounts for 3% of its group market. "You're talking about millions and millions of dollars," Mr. Schatzle says when asked to translate these percentages to dollars.

"We have a very strong sales force, and we're constantly cold-canvassing, looking for new business. Our performance is outstanding, and we have a high percentage of repeat business," he says.

Outstanding performance is the ticket expected to win some 150 Barq's root beer bottlers cruises and/or hotel stays on the Mexican Riviera this October. Rick James, head of group sales for Princess Cruises, which will accommodate the Barq's winners, says such trips account for about 10% of the Los Angeles-based company's business. "It's a hard number to pin," he says, "but, obviously, it's a meaningful share." —*M.M.E.*

"THANK YOU, BUGS BUNNY."

Hiring Bugs Bunny* to appear in their famous "Thank You Paine Webber" commercials proved to be one of Paine Webber's most sound investments.

The campaign achieved record awareness and retention yielding an increased share of the lucrative family investment market.

Dialing

(Continued from Page M-46)

dials your girlfriend, your minister, your bartender, your bookie—whatever.")

Jewel bought the phones wholesale, at about 35% off retail. "If Jewel breaks even, they'll be delighted," Mr. Wien says. "The whole idea is to increase traffic. If a store does $100,000 a week and the phones increase traffic 20%, that's a lot of money."

Besides timing, Mr. Wien attributes the apparent success of this promotion to the recognition of the Cobra name and the quality of the product. "It's the next best phone to Western Electric," he says.

Cobra, manufactured by Dynascan Corp. of Chicago, has been marketed as premiums for eight years, starting with citizens' band radios. The company probably has moved more premium phones than any other maker. In recent months, you could get a Cobra for buying Cella wine, Polaroid cameras, $10 of gas at West Coast Texacos and an appliance at Polk Bros. stores in Chicago.

All told, Cobra's biggest premium item is its $15 one-piece phone. "We sold 1.5 million of those last year, and I estimate that maybe 10% of that was as premiums," says Frank DiLeo, Dynascan president.

Compare that with the premium effort of AT&T. In 1983, less than 1% of the company's phone sales came through premiums, says Carol Earle, national sales manager for special markets. "We're just beginning to develop the premium market, although we do consider last year a pretty good first year." In 1984, AT&T expects to sell between $4 million and $6 million worth of premium phones, she says.

AT&T phones have been offered as premiums at supermarkets, banks and in auto showrooms. (Ford used them as internal sales incentives, and Cadillac awarded them as prizes in drawings.) Ms. Earle also cites the biggest premium promotion of all, *Time's* offer of a free phone with a new subscription. Time Inc. won't discuss the campaign.

One of the prime reasons AT&T hasn't done more premiums, Ms. Earle says, is the price of its product. The early stage of the phone premium binge has been dominated by inexpensive phones, which she calls "Yokohama mamas" because of their Oriental origins. "Our problem is that the quality of our product makes it an expensive premium," Ms. Earle says. "Our least expensive phone is $30."

According to most industry observers, however, the popularity of the bottom-of-the-line phones will drop as attention shifts to automatic dialers, recording phones and the like. "A lot of the $9.95 or $15.95 phones you saw last year will no longer be used in the premium area," ITT's Mr. Gervolino says. "The basic phone as a promotional device is dying. People will want better quality phones, exotic phones, phones with alarms and calculators and radios."

In other words, the freshest premium idea in years may need those tired old standbys after all. Just imagine: Deep inside some laboratory, a team of scientists could be putting the final touches on the ultimate premium—a Trimline that cuts costs *and* steak. AA

Carrots

(Continued from Page M-17)

various types of premiums. A self-liquidating premium is not the same as a free-in-the-mail offer and should not be expected to have the same result.

"Self liquidators won't have a measurable effect on business," Mr. Caputo says, "and people who expect more out of them than they can possibly deliver haven't defined their objectives and tactics properly." This type of premium is very popular now because it is a no-cost event, Mr. Caputo says. But what the marketer saves in cost may be at the expense of impact.

High value, free-in-the-mail efforts on the other hand, carry a high cost, but they deliver tremendous impact, according to Mr. Caputo. A $5 premium item mailed to a targeted prospect can pull an incredible response, he says. Another beauty of the high-value premium is that the perceived value of a $5 premium may be $20 or more, depending on how much it would cost the consumer over the counter. "This allows a marketer to make a dramatic proposition to a consumer," Mr. Caputo says.

On-pack, in-pack and near-pack premiums also can be quite expensive. "Although the discount offered for these powerful business building devices can be quite low," Mr. Caputo says, "these premiums are usually tied into large-scale offerings, which inflates the over-all expense." A cereal brand may offer only 10 cents off with purchase, but if the program helps move 5 million boxes of cereal, the investment in the program can become substantial. In addition, the number of marketers that can use this tactic is limited because of the logistics of in-store displays and redemption efforts.

Another stumbling block faced by food marketers is that as premiums pervade a market, consumers may become desensitized to them. "This factor, along with misredemption problems, could cut back the number of coupon plans," Ms. Simon says. "Premiums must increasingly be perceived as a good value."

She sees consumer acceptance of sweepstakes and contests rising, however, because "times are tough on the middle class and people are looking for ways to make it big."

But the surest tactic to achieve the desired results of most premium efforts is not a premium at all.

"If you want to generate product trials and movement, nothing beats a price cut," Mr. Jagoda says. "If the competition cuts prices, you probably will respond with a price cut because you've got to fight fire with fire. But remember, a price cut is a price cut is a price cut. It offers no real value."

The ravages of a price war can devastate a company's revenue picture and market position. A well engineered premium program can build business without severely slashing into profits, say premium suppliers.

"The best premium is the kind that rewards a consumer for making a multiple or repeat purchase," Roger's Mr. Rotz says. "By stimulating repeat purchases, you can build a continuity to the business, remind consumers of the product you are promoting and develop and advance the image of the company."

Price wars cannot accomplish the variety of goals premiums can achieve, say promotion experts, and for this reason premiums will remain a mainstay in companies' marketing arsenals. "Like in baseball, a company should have a change of pace," Mr. Jagoda says. "Premiums provide variety, and most important, they add value to the product offering and allow a company to merchandise and glamorize both the product line and the incentive." AA

Gillette
BRUSH PLUS
FOR A SUPERIOR SHAVE
REFILLS AVAILABLE

Gillette puts the brush back in shaving in tv spots for Brush Plus, combining shaving concentrate and brush in one.

Gillette in a lather for all-in-1 brush

By GAY JERVEY

Gillette Co., in its effort to give the American male the smoothest shave around, will take that daily ritual one step further this fall with the introduction of Brush Plus, an all-in-one brush and shaving-concentrate system.

Brush Plus, which the company predicts will create a niche all its own, will be supported by $13 million-plus in advertising and promotional support, which the company believes to be the largest financial commitment in shave-cream history. Of that, $9 million—a figure that tops the collective 1983 spending of shaving-preparation marketers—will go into tv and print ads themed "Brush Plus. . .for a superior shave."

The Brush Plus entry follows the late '83 introduction of Gillette's Foamy gel, which, according to Gillette, has exceeded initial sales expectations. It has also spurred competition in a category known neither for risky innovations nor high ad budgets, the company said.

Both Foamy gel and Brush Plus are seen as critical moves for the company's personal-care division, which flew into the 1980s on the successful launches of such female-oriented brands as Silkience and Aapri, but has found such brand popularity hard to maintain.

Although the division recently made headway with Bare Elegance, a moisturizing liquid shower soap, and Body Flowers, a body cologne aimed at younger women, Gillette has faced frustrating maturation in some product cycles. As such, it is seeking new-product opportunities both for men and women.

Five years in development, Brush Plus—due on retailers' shelves

Pullout by Colgate another blow to Esty

By BRIAN MORAN

William Esty Co., already reeling from the loss of Warner-Lambert's consumer group, was dealt a second severe blow last week when Colgate-Palmolive walked away from its longtime relationship with the agency.

The exit of the two accounts boosted Esty's loss in billings to nearly $30 million in a single week.

Esty handled an estimated $13 million in measured media last year to advertise three Colgate brands, which are moving to two other Colgate shops, Young & Rubicam and Foote, Cone & Belding. Also last week, Esty's loss in the severed Warner-Lambert relationship, which came earlier in the week, amounted to $16 million in billings (AA, May 10).

Spokesmen for both Colgate and Warner-Lambert said they soured on Esty because the agency lacks an international presence. Both companies are seeking greater brand expansion overseas. Many U.S. agencies, including smaller, regional shops, have been scrambling to set up overseas links to serve multinational clients they may have (AA, May 10).

Another reason for the shifts centers on Colgate and W-L's goal of consolidating their agency activities to deal with a smaller stable of shops. Many other leading package goods advertisers are doing likewise.

Additionally, both companies recently installed new management teams, and the standard agency review following such moves helped bring about Esty's losses, sources said.

Foote, Cone & Belding will reap most of the benefits from the Colgate move, picking up Fab laundry detergent and Ultra Brite toothpaste. Combined billings on those products are roughly $9 million.

In 1983, Fab detergent received a total of $5.5 million in ad support, up from the $3.4 million spent in 1982, according to Leading National Advertisers. Ultra Brite toothpaste, which has steadily been losing market share, had $3.5 million in support in 1983, down from $4.5 million a year earlier.

Young & Rubicam gained Ajax dishwashing liquid, whose ad spending in 1983 was about $4 million.

In W-L's case, the company moved its Schick blades and razors, Personal Touch women's shaving system, Clorets gum and mints and Lifestyle prophylactics to J. Walter Thompson USA. Combined billings on those products are in the neighborhood of $14 million. Ted Bates Advertising/New York, which, like Esty, is a subsidiary of Ted Bates Worldwide, gained Listermint mouthwash, whose ad spending in 1983 was about $2 million.

Colgate's move places all of its major brands with the

No moves seen until Olympic deadline

ABC execs wait it out

An Advertising Age roundup

ABC-TV sales executives spent last week making quiet calls to reassure advertisers that their $428 million in Summer Olympics chits still will be worth the money—at least until June 2. That's the deadline for the Soviet Union and other Communist-bloc countries to announce formally their intentions to attend or boycott the games.

In the remaining three weeks before the deadline, the debate in the advertising world will revolve around whether the Soviets actually will stay away from the games and, if they do, what impact that will have on the prestige and tv ratings of the Olympics.

There are divergent schools of thought. One says the absence of the Soviets will reduce the competitiveness of the games and ABC's ability to promote the games as a "Protectors of Freedom vs. the Evil Communists" confrontation. Another maintains that without the Soviets, American athletes will win more gold medals, will produce more marketable heroes and will feel no shrinkage in tv ratings, since the Olympics will truly be an American spectacle.

A third camp—something of an amalgam of the first two—predicts the Soviets will extract some foreign-policy concessions from the U.S. and then attend the games. As a result, ABC will be able to exploit heightened American consternation at the Soviets, boosting ratings beyond even the most optimistic projections.

At stake, though, is much more than the $428 million being spent on tv coverage of the games. Corporate sponsors and advertisers last week professed to be standing firm behind their commitments to the games and to tv coverage (AA, May 10). But many may be worried that games without the Soviets—not to mention the East Germans, Bulgarians and others who have said they are not coming—could jeopardize the impact of the more than $1 billion being spent to promote advertisers' Olympic tie-ins.

Furthermore, the outcome of the '84 summer games will affect the value and desirability of the '88 Summer Olympics set for Seoul, South Korea, a site with even greater political liabilities

New pitch for 'Mac' wristbands

By ROBERT RAISSMAN

The Garvey Marketing Group will present new versions of McDonald's wristbands this week to the presidents of Major League Baseball's American and National Leagues.

The effort represents an attempt to keep alive the promotion for Ronald McDonald House.

John Boggs, a spokesman for Garvey Marketing Group, said the San Diego-based company will offer the baseball league presidents three alternatives—sticking the Golden Arches logo directly into the band on a plain background and getting rid of the McDonald's red color; reducing the size of the arches, or instructing players to wear the smaller Ronald McDonald House logo on the top of the band rather than on the bottom.

"We hope this will satisfy the powers that be," Mr. Boggs said. "It would be a shame if this program was halted."

Both leagues and the baseball commissioner's office have treated the conflict over using the logo like a hot potato. Although they recognize that McDonald's intentions are well directed, the leagues fear that the logo could open the door for players to sell parts of uniforms or equipment to other advertisers (AA, April 26).

But to deny players that right

May be only net segment to get hefty increase

Upfront focus on news

By DIANE MERMIGAS

Advertiser, agency and network executives last week began unusually early huddling over proposals to buy network news time in the 1984-85 season.

Although the networks probably will not get the hefty 15% to 18% rate increases for news they are requesting, news is the only daypart next season expected to deliver double-digit increases over last year.

Daytime, which also is on the verge of breaking early, is expected to deliver about a 9% increase in upfront rates. Although the networks reportedly are preparing to ask for between 11% and 13% increases in daytime upfront rates, many major daytime advertisers and their agencies say they will stand firm against paying such high prices and will resist rushing into early buys.

The networks also are looking for double-digit increases in prime time, but upfront rates are not expected to soar beyond 9% over last season.

Unlike past seasons, news and daytime upfront selling at CBS, ABC and NBC are preceding the prime time market, which also is expected to break early, just after Memorial Day. A number of advertisers consider network news an efficient way of offsetting the increasingly high cost of prime time.

General Foods, Warner-Lambert and Richardson-Vicks were among the major advertisers who last week began negotiating their proposals for upfront network news buys, according to sources.

Broadcast Advertisers Report identifies the three companies as heading a list of 10 advertisers who collectively contributed 25% of the $518.8 million in advertising time purchased on network news programs in 1983 (not including prime time news magazines or ABC's late-night "Nightline"). That list also includes Anheuser-Busch, American Telephone & Telegraph, General Motors, American Home Products, Sterling Drugs, K mart and Whirlpool.

Leo Burnett USA, Chicago, actually kicked off the activity several weeks ago. It caught the networks off-guard with an estimated $25 million news buy on all three networks next season for four to six of its clients. Among them were Kellogg and Maytag, sources said.

The Burnett clients each reportedly increased their

Chevy sprints to minicars

By RALPH GRAY

CHEVROLET
New Sprint. It loves to run.

Firming up a small-car image is integral to Chevrolet's Sprint debut.

SEDONA, ARIZ.—Chevrolet's Sprint, the new minicar set to debut May 31 in nine western states, is carrying heavy marketing baggage.

"We want to sell image, not just hardware," said Thomas A. Staudt, Chevrolet general marketing manager, at a recent press conference here.

With that in mind, Chevrolet has a multifaceted marketing strategy for the Suzuki-made two-door car:

- The three-cylinder car, by getting a jump on the new minicar category, is aimed at heading off a fleet of Japanese one-liter engine cars expected to be introduced.
- By introducing the Sprint in the West, Chevrolet is fighting the imports in a region where they are particularly strong. Chevy is attempting to reestablish both its image among small cars and the entry-level niche it maintains in the General Motors family.
- The car is the first of three front-wheel-drive cars in Chevy's attack on the small-car market.

The introduction of the Sprint will bring only 17,000 units to the market because of import restrictions (also the reason it is limited to the nine-state region). By contrast, Chevrolet's current small car, the Chevette, recorded more than 175,000 new-car registrations in 1983.

The Sprint, introduced in Puerto Rico in April by the GM Overseas Distribution Corp. (AA, March 12),

Food marketers add new morsels

DALLAS—Some well-known food marketers, their reputations built in specific product categories, are testing their pull in new areas of the supermarket.

A handful of brands—names like Hormel, ConAgra's Home Brands, Fleischmann's—were on the exhibit floor at the Food Marketing Institute convention last week with products slightly out of character with their familiar brand personalities. And there were other companies, products not yet in hand, that hinted at coming forays in new areas.

One company moving out of its traditional niche is Geo. A. Hormel & Co., the Austin, Minn.-based marketer of fresh and processed meats. Hormel is extending its Light & Lean label, already used on some of its newer meat products, to new categories: Aspartame-sweetened gelatin mix and hot cocoa mix.

Although the company has marketed those products as private-label items, it never has had its own brands. The cocoa mix is now testing in the upper Midwest; the gelatin is soon to follow.

Ultimately, the company plans to use an umbrella campaign for the Light & Lean line, to extend its name recognition to the newer

Soft sales quiet boom for pay tv

By SUSAN SPILLMAN

NEW YORK—The boom in pay tv isn't very loud these days.

According to the most recent figures released by industry analyst Paul Kagan, only 685,000 pay tv units were sold in the first quarter of this year, compared with 1.5 million during the same period in 1983 and 1.5 million in 1982.

"The decline is fairly universal throughout the industry and across all pay tv services," said Tom Willet, vp-marketing, Continental Cablevision.

According to Art Dwyer, vp-marketing for Cox Cable, "The pay business has been relatively unstable for the past five quarters. What you're seeing is a leveling-off period in which people are finding out they don't need several pay services, especially when they are so heavily duplicated. The industry is going to have to start realizing that it's difficult to create a demand when you don't have the product. The marketplace is speaking out."

John Charlton, senior vp-marketing, programing and sales, Warner Amex Cable, said he hoped recent attempts by pay tv services to differentiate their prod-

Average for 1983	414	482	485	340	323
Change over 1982	+12%	+13%	+10%	+14%	+12%

By ROBERT COEN

The advertising industry and the U.S. economy both advanced at a rapid clip during most quarters of last year, final figures show.

The nation's gross national product rose 7.7% in 1983, while advertising revenues again grew faster than the economy by posting a 13.9% gain. Expect more of the same in 1984, with ad revenues again rising by about 14% to more than $86 billion.

In the opening months of 1983, it was evident that the U.S. economy would be fighting its way up from the recession depths of 1982, but the extent of the recovery generally was underestimated.

Caution on predictions

The advertising industry also expected a fairly good year. But because ad budgets had held up so well in 1982, despite the bad economy, there was considerable caution about predicting another series of large gains until 1984, when the elections and the Olympics would contribute to above-average promotional activity.

But by spring, 1983, the economy was expanding at the fastest pace in nearly a decade. Despite record ad budget increases in the previous year, the advertising industry again outpaced the economy in 1983 for all quarters of the year with only minor deviations for a few media during isolated periods of the year.

Final figures for 1983 spelled out the strength of the economy and the even greater prosperity for the advertising industry as the combined spending by both local and national advertisers rose to about $75.9 billion.

Upturn in classified ads

The largest dollar gains in advertising spending came from a sharp upturn in classified newspaper advertising linage and a return to much stronger advertising and promotional activity by local retailers, whose business had been slumping since spring, 1980.

The consumer helped tug the economy out of the recession, and the anticipation of much better retail sales volume encouraged retailers to lead the upturn in higher 1983 advertising activity.

While local retail advertising activity soared in 1983, there also were sizable gains in media spending in many major national advertising categories. Automotive, apparel and entertainment advertisers increased their budgets by more than 20% in 1983.

The advertisers of beer, computers and financial services continued to offer new products and services supported by fatter advertising outlays.

Modest national ad increase

In total, national advertisers increased their spending by 12.5% in 1983—a relatively modest increase only in contrast with the local advertising gains of 15.7%.

The amounts spent for advertising may seem large but they are really very modest compared with the approximately $2.2 trillion consumers spent for the goods and services that these advertising budgets supported.

The economy has been advancing at a record pace in the opening quarter of 1984, and most of the media are reporting significant ad gains vs. their year-ago levels.

The biggest percentage gains in ad spending in 1984 are expected for the broadcast media, which will be getting their usual hyperstimulus from the quadrennial upturn in advertising activity from the elections and the Olympics.

Double-digit gains expected

Most of the other media also are projecting double-digit advertising revenue gains this year. The dramatic improvement in classified newspaper linage should last through most of 1984 despite the upward pressures on interest rates that could curtail some real estate and help-wanted listings.

Newspaper ad revenues also should continue to benefit from the growing optimism of retailers and other local marketers that use that medium importantly for distribution of sales and promotional information.

The ever-improving outlook for corporate profits should begin to lead to a reappearance of a lot of corporate image and advocacy advertising programs that have been trimmed in the past few years.

Not only has advertising grown faster than inflation, but it has significantly outpaced the nation's economic growth in each year since 1976. Despite recessions in 1980 and 1982, advertising as a percentage of GNP has increasd every year since 1976. Although total advertising in the U.S. is measured in

Tv spots lack daring: FCB exec

By PAT STRNAD

SOUTHFIELD, MICH.—A dearth of daring has made American tv advertising a wasteland for innovation and originality, says an executive with experience in both the U.S. and British ad industries.

U.S. advertisers "use formula instead of original ideas," said Leonard Sugarman, executive creative director at Foote, Cone & Belding Communications, New York. Nearly all U.S. tv advertising is formula-ridden, he charged, adding, "American advertising has lost its daring and is running scared."

Mr. Sugarman made his remarks at a creative seminar here sponsored by the American Assn. of Advertising Agencies.

In Britain, advertisers have more confidence in their agencies, while in the U.S. agencies often are regarded—and perform—as mere suppliers, he said.

"American advertising is obsessed with research strategy, and it takes daring to be original. Innovative advertising rarely tests well," Mr. Sugarman said.

Products are "being researched to death," agreed Jack Frakes, exec vp-exec creative director of Ross Roy Inc., Detroit. "I don't want eight ladies in a shopping center to tell me if I have an arresting headline. I can figure that out for myself. . .Advertising isn't necessarily a team sport all the time."

Mr. Frakes was part of a panel of top creative directors who reacted to Mr. Sugarman's contentions.

Chuck Felt, vp-co-creative director, Young & Rubicam, Detroit, agreed: "To get outstanding ads, you have to be creative and die a little to get it through the creative process. We can't walk away from our responsibility of selling our creative work."

"If you give a client the opportunity to make a safe decision, he will. But we don't give the client an opportunity. The blame [for bad advertising] rests squarely on all our shoulders," said Bill Lane, exec vp-executive creative director of J. Walter Thompson Co., Detroit.#

'Tribune' promo offers free classified job ads

CHICAGO—The *Chicago Tribune* is planning to run a "Get a Summer Job" promotion making available free, five-line classified ads for students.

The promotion may run one to three times between May 14 and June 1 in one of the paper's six zones.

The *Tribune* tried another such promotion in 1982, offering free ads to any job-seekers.

A follow-up survey found that more than 70% of those placing ads received calls from prospective employers.#

Economy

(Continued from Page 62)

billions of dollars, it is still relatively small at slightly more than 2% of the total economy.

Advertising is expected to grow faster than the economy in most years for the rest of this century. The general upward trend is explained by growing affluence, the expanding number of women in the labor force and other factors that have increased the use of mass advertising as a marketing tool.

For example, in 1982, a recession year, advertising as a percentage of GNP increased more than in any other recession year in memory. In fact, in most past recessions, advertising usually declined as a percentage of GNP.

But for the first time, in 1982 advertising was used to move backed-up inventory (rebates), to fill seats on deregulated airline flights and to air special promotions for hotels and resorts at a time when vacancy rates were going up.

High interest rates and fear of losing "share of market" have motivated marketers to promote aggressively especially when total market sales begin to soften. These trends are likely to continue for years as a greater proportion of consumer spending goes to heavily advertised discretionary goods and services.#

media people

O'Hearn adds exec vp title

ST. PETERSBURG, FLA.—John. H. O'Hearn, 46, general manager of the St. Petersburg *Times* and *Evening Independent*, has added the title of exec vp following the early retirement last month of John B. Lake, 63, formerly exec vp-publisher. The publisher's title has been retired. In addition, Andrew Barnes, formerly managing editor, moves up to editor and president. Those titles had been held by Eugene C. Patterson, who remains chairman.

During his career at the newspaper, Mr. Lake chaired several newspaper industry committees, most recently the research and production committee of the American Newspaper Publishers Assn.

Other people moving:

Edwin Phelps Jr. to vp-deputy director, new-business planning and operations, a new post, *Reader's Digest*, Pleasantville, N.Y., from vp-director, magazine circulation. Succeeding him is **Ronald Cole**, formerly subscription sales manager.

Liberta Abbondante to circulation director, *Success*, New York, one of a series of changes being made as HAL Publications assumes management of the magazine, from fulfillment director, Gruner & Jahr.

Stephen Traiman to director-promotion and special events, a new post, CES Publishing Corp., New York, from vp-executive director, Recording Industry Assn. of America and its RIAA/Video division.

Wendy Sherman to corporate advertising manager, a new post, *The Economist*, New York, from manager-consumer goods and travel advertising, *Vanity Fair*.

Maureen Klinges to associate advertising director, a new post, *Muppet*, New York, from sales rep.

John Condon to exec vp, a new post, Times Mirror Magazines, New York, from vp-assistant group publisher, CBS Magazines.

Elio Agostini to vp-marketing, *Houston Post*, from publisher, *Edmonton Sun*, both published by Toronto Sun Corp. Mr. Agostini succeeds **Harry Hayes**, who retires from the *Post* June 30 after 24 years with the paper. At the *Edmonton Sun*, Mr. Agostini is succeeded by **Patrick Harden**, formerly general manager.

Richard J. Warren to publisher of *Bangor Daily News* from assistant publisher; he continues as the paper's editor. His father, **Richard K. Warren** moves from publisher to chairman of the executive committee of the Bangor Publishing board, a new title. No successor was announced for the assistant publisher's position.

Janis Drew to the new post of associate manager, *Omni*, Los Angeles, from account exec.

Wesley D. Rolfe Jr. to Alaska manager, *Alaska Construction & Oil*, Anchorage, from account exec, Snohomish Publishing Co., Everett, Wash., succeeding **Laurie Bissell Whitley**, who left.

Alfred Reed to market manager-import automotive advertising, *Business Week*, New York, from publisher, McGraw-Hill's *Chemical Week*, succeeding **Walter Buchleitner**, recently named *BW's* associate advertising director. Succeeding Mr. Reed is **Charlton Calhoun III**, who continues as vp-publisher, process industries markets sector.

Richard Khaleel to vp-president, a new post, software group, Scholastic Inc., New York, from senior vp-account group supervisor, Wells, Rich, Greene, in charge of the Atari computer and software accounts. Also, **Al Froio** to national sales director-software, a new post from trade sales manager, Scholastic's book group.

Glenn Rosenbloom to eastern advertising manager, a post vacant for some time, *Sports Afield*, New York, from New York manager.

Marion Aaron to eastern sales manager, a new post, *Us*, New York, from account manager. Also joining *Us* as account managers are **Jennifer Cole**, formerly account manager, *Co-ed*, and **Nancy Switkis**, formerly account manager, *New York Daily News*.

Paul John Dean to editor-in-chief, *Cycle World*, Newport Beach, Cal., from editorial director, *Cycle Guide*, succeeding **Allan Girdler**, who resigned.

Laurence Cohen to publisher, *Corporate Meetings & Incentives*, New York, from advertising director, *Chain Signs*, succeeding **Michael Leeds**, who left.

Howard Clutterbuck to vp, a new post, Medical Economics Co., Oradell, N.J., in addition to his posts as publisher, *Diagnosis*, and vp, Medical Media International.

Rudy Bauser to U.S. advertising sales director, *Vision*, Chicago, from Midwest sales director, succeeding **Ron LaVilla**, who left the company.

Bill Congdon to marketing manager, a new post, *Golf Digest*, Norwalk, Conn., from account exec in the New York office.

Gary Gyss to national sales manager, a new post, *PDR/Physicians' Desk Reference, PDR for Nonprescription Drugs, PDR for Ophthalmology, Drug Topics Red Book* and *Red Book Update*, Oradell, N.J., from senior account manager, *Medical Economics* and *Medical Economics for Surgeons*.

Bill Reilly to New York advertising sales manager, *Newsweek*, New York, from automotive imports industry manager, succeeding **Virginia Mueller**, named category group marketing manager.

Cheri Blum to Southern California regional sales manager, a new post, *Personal Software*, Los Angeles, from advertising sales manager, *Micro Discovery*.

Brian Doyle and **Don Wilson** to senior account supervisors, *Food & Wine*, New York, from, respectively, account manager-marketing and sales, *Good Housekeeping*, and sales rep, *Family Circle*.

Phyllis Sparrow to account manager, a new post, *Working Woman*, New York, from account exec, Family Media.

Ernestine Grant to classified advertising manager, a new post, *Field & Stream*, New York, from classified display manager.

Eileen Rivkin Byrnes to associate publisher-advertising, a new post, *Mother Jones*, San Francisco, while continuing her duties as western advertising manager.

David Troath to director-telecommunications, a new post, Newsweek Inc., New York, from telecommunications manager, Mattel Toys, Hawthorne, Cal.

Amanda Boe to account manager, a new post, *American Health*, New York, from sales rep, *Pensions & Investment Age*.#

Workshop zeros in on high-tech market

New York—The need for swift positioning in the fast-paced high-technology field; the risk factors inherent in high tech's rapid growth rate, and the specific marketing techniques required in the field will be covered at the Advertising Age Creative Workshop Aug. 19 to 22 here.

Larry Kerr, corporate marketing communication manager, Intel Corporation, will discusss the importance of strong positioning: To establish a product, set product standards before the competition does and sustain the product during its life cycle.

"A company has to be extremely swift in identifying and establishing position and has to move out quickly before the position is no longer relevant," Mr. Kerr maintains.

In substantiating the need for rapid positioning, he will identify a number of companies that entered the market a year ago and since have been ousted by even newer entries. Mr. Kerr will explain how to forestall that possibility by recognizing what product attributes consumers want and then positioning the product to mirror such attitudes.

Through this plotted positioning by which a company, in effect, tells the consumer what is important, the product "becomes the benchmark against which others are measured," he maintains.

The combination of fierce competition and shortened product life cycle that distinguishes high-tech marketing will be covered by Howard Anderson, president-director, Yankee Group. Noting that high-tech marketing and the real world are two different things, he will list the lessons high-tech marketers must learn in order to be successful.

"Many high-tech marketers don't know what they're doing or why," he said.

Mr. Anderson says the major mistake high-tech marketers make is ignoring a basic principle of brand marketing—the distributor. "Too many companies go around their distributors and, consequently, lose position and share."

Referring to the increasing fight for decreasing shelf space, Mr. Anderson emphasizes the need for a new breed of marketer—one who knows both high tech and brand management and can integrate the consumer marketing with the challenges of a new marketplace.

These are two of more than 40 sessions offered that cover a cross-section of industries, including financial, service, package goods, consumer durables, retail and business-to-business, as well as creativity in print, radio, tv, cable and direct marketing.

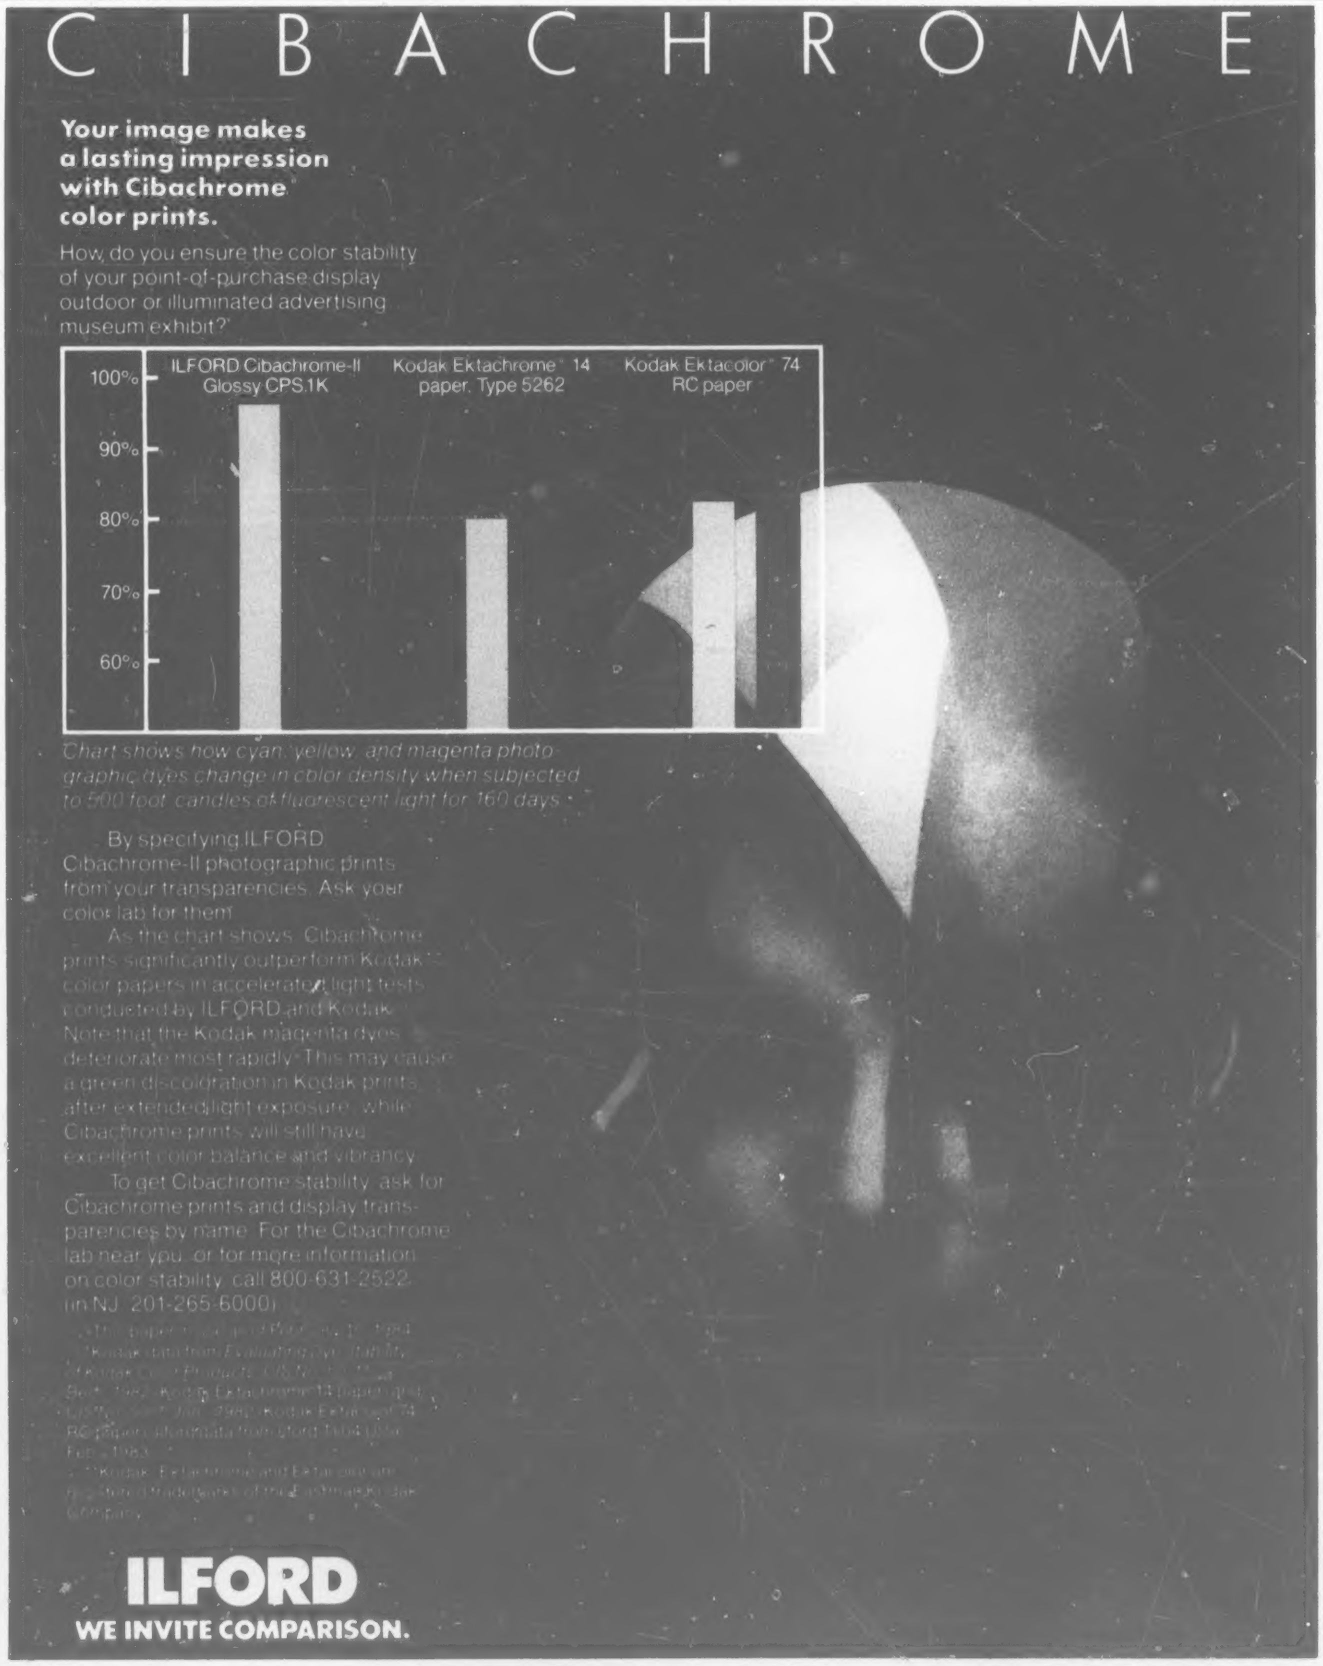
Foreign Agency issue addenda

The following additions and corrections refer to the recently published Foreign Agency Income report (AA, April 23).

Vickers & Benson Cos., Toronto, 1983 gross income of $8.6 million and billings of $55.7 million compared with 1982 figures of $8.1 million and $53.3 million; **Publicidad Artefilme,** Bogota, Colombia, 1983 gross income of $496,448 (AA estimate) and billings of $3.3 million. Figures for 1982: Gross income $1.4 million (AA estimate) and billings of $9.1 million.

Corbin Compton Ltd. figures for the main Caribbean office in Port of Spain, Trinidad, and another office in Bridgetown, Barbados, were reversed. Trinidad gross income and billings for 1983 should read $1.2 million and $7.7 million, respectively. Figures for the Barbados office were $309,575 and $2.2 million.#



CIBACHROME

Your image makes a lasting impression with Cibachrome color prints.

How do you ensure the color stability of your point-of-purchase display outdoor or illuminated advertising museum exhibit?

Chart shows how cyan, yellow, and magenta photographic dyes change in color density when subjected to 500 foot candles of fluorescent light for 160 days.

By specifying ILFORD Cibachrome-II photographic prints from your transparencies. Ask your color lab for them.

As the chart shows, Cibachrome prints significantly outperform Kodak color papers in accelerated light tests conducted by ILFORD and Kodak. Note that the Kodak magenta dyes deteriorate most rapidly. This may cause a green discoloration in Kodak prints after extended light exposure, while Cibachrome prints will still have excellent color balance and vibrancy.

To get Cibachrome stability, ask for Cibachrome prints and display transparencies by name. For the Cibachrome lab near you, or for more information on color stability, call 800-631-2522 (in NJ, 201-265-6000).

DDB stars step in for Austrian

By STEWART ALTER

NEW YORK—Doyle Dane Bernbach International has turned management over to executives responsible for major billings growth at its star operations, DDB/West and DDB-London.

Barry E. Loughrane, 51, is new president and chief executive officer, succeeding Neil R. Austrian as top officer of the worldwide agency. John L. Bernbach has been named president of its newly created international division.

Mr. Austrian, 44, left to become chairman and ceo of Showtime/The Movie Channel, though as a major DDB stockholder, he remains on the agency's board.

Under Mr. Loughrane's stewardship, DDB/West billings doubled to $83 million between 1978 and 1983. DDB-London's billings doubled to $60 million in the two-and-a-half years it's been run by Mr. Bernbach, agency founder William Bernbach's 40-year-old son.

Mr. Loughrane also remains president and ceo of U.S. operations, a title he picked up in 1982.

As part of the same reorganization, Robert G. Pfundstein, 47,

Best Foods axes D'Arcy from roster

By JOHN J. O'CONNOR

ENGLEWOOD CLIFFS, N.J.—CPC International's Best Foods division severed its relationship with D'Arcy MacManus Masius this week when it moved a trio of brands, with combined ad spending of $13 million, to Dancer Fitzgerald Sample.

At the same time, Best Foods moved the $11 million Hellman's/Best Foods brand mayonnaise and spreads account to Ogilvy & Mather from DFS. The move also involved several unidentified new products. O&M had joined the Best Foods roster after Best acquired C.F. Mueller Co., which O&M had been handling.

David R. Newstadt, CPC corporate vp and president of Best Foods, said the decision to leave DMM was not due to "dissatisfaction with the work that they have done for us."

He noted that as a result of an evaluation it was decided that there were "mutual benefits to be achieved by consolidating to just two agencies—DFS and O&M."

The three accounts that DFS gained this week are Mazola oil, Golden Griddle pancake syrup and Karo syrup. Mazola's support exceeded $9.3 million in 1983, according to Leading National Advertisers. Next came Karo, with spending in excess of $2.5 million, and Golden Griddle, $1.2 million. The move also reunites Mazola oil with Mazola margarine, which DFS has handled for some time.

Other Best Foods products that DFS has are Argo/Kingsford cornstarch, Mazola No-Stick, Sahara bread, Mrs. Fanning's Bread & Butter pickles and Skippy peanut butter.

Another Best Foods agency, Young & Rubicam, has the $6 million Thomas' English muffins account, which DMM had handled.

The removal of DMM is another indication of the trend by major national advertisers to pare agency rosters. William Esty Co. last week was dealt a similar blow by both Colgate-Palmolive and Warner-Lambert (AA, May 10, *et seq.*).#

A-B rushes LA across the U.S.

By SCOTT HUME

Anheuser-Busch next week will begin a national rollout of its LA low-alcohol beer, a brand it introduced into test only last month.

Under a two-phase distribution plan the nation's largest brewer said is mandated by capacity limitations, LA will be introduced to 65% of the U.S. between May 21 and June 4. The rest of the country will get distribution in the fall.

At the same time, Heileman general counsel Randy Smith said the La Crosse, Wis., brewer planned to expand distribution of its Blatz LA and Carling Black Label LA brands to most major markets by mid-June. Both will be nationally available this year, he said.

Stroh Brewery, Detroit, revealed no immediate plans for moving its Schaeffer LA brand beyond its Houston test market.

Print advertising for A-B's brand will begin the week before LA is introduced to market. Television and radio support will begin the week of introduction. All will carry the theme "For the way you live today. . .LA," used in initial test-marketing (AA, April 23). D'Arcy MacManus Masius, St. Louis, handles.

An A-B spokesman said network buys for LA will begin the third or fourth week of May, with advertising for other A-B brands substituted in markets where LA will not yet have been introduced. He declined to estimate total ad spending for the brand introduction.

By becoming the first national marketer of a low-alcohol beer, A-B, St. Louis, may be hoping consumers will identify low-alcohol beer with its LA brand even if the courts rule other brewers may use the initials. To foster that awareness, A-B could add LA to

(Continued on Page 5)

Fiat to pick B&B?

By CLAIRE WILSON

MILAN—Fiat is planning to consolidate its entire $118.4 million worldwide advertising budget with a single agency, and the leading candidate so far is Benton & Bowles, sources say.

These sources expect B&B to gain the account first in Europe, where Fiat works with different agencies in each country, and then other regions of the world. B&B already has the lion's share of Fiat's $59.2 million advertising budget in Italy.

Fiat, which did all its advertising in-house until 1982, "doesn't want to create a global image or have a single campaign that is valid for each market," said Ruggiero Mazzini, a Fiat international advertising official. Mr. Mazzini said improving account service and saving money in the future are the main reasons for the change.

In the U.K., Ogilvy & Mather was forced to divest itself of a majority share of Davidson Pearce when that agency won the Fiat account, because of O&M conflicts with Ford.#

Lipton decaf goes south

By GAY JERVEY

Thomas J. Lipton Inc. this summer will move its decaffeinated tea entry into the South, promoting it as an iced-tea drink in tv spots that will not feature Lipton spokesman Don Meredith.

Lipton vp-beverage division Jerry Boyks said the decaffeinated iced-tea ads, though not formally approved yet, will follow the tack of test spots created by Lipton agency SSC&B. Those ads feature a couple who has discovered "the

(Continued on Page 5)

Tab uncorks sweetener switch

By NANCY GIGES

NEW YORK—Tab, a major diet soft-drink holdout in switching to an aspartame formula, finally is making its move.

At a press conference here May 16, Coca-Cola announced that the reformulation will be touted in a heavy multimedia campaign with the theme "Let's taste new Tab."

Once the leading diet cola, Tab sank to third place when Coca-Cola debuted the now highly successful Diet Coke.

Diet Pepsi remains the second-leading diet cola.

While Tab's business has been hurt drastically, it still is estimated to be about a $100 million business for Coca-Cola, one that the company is hoping to salvage with broader, distinct positioning from Diet Pepsi and even Diet Coke. The brand is described as having a cleaner, crisper, drier taste than competitive brands.

By midsummer, Coca-Cola hopes the new formula will be in 80% of the country. Network tv is scheduled to break on ABC during the Summer Olympics. A full range of print, couponing, in-store sampling and point-of-purchase programs also are planned. The campaign cost is expected to exceed $30 million.

Tv spots by McCann-Erickson show a variety of consumers drinking Tab, including a female athlete, mothers and working couples, as a voiceover repeats "Let's taste new Tab." The famous hourglass is shown in at least one of the three new spots.

The company also has updated packaging, using a dark magenta background with red pinstripes. Caffeine-free Tab continues to be sold in silver-and-white cans. Flags on both note that the cola is now sweetened with a blend including NutraSweet, the G.D. Searle & Co., Skokie, Ill., brand of aspartame.#

6 Marketing the Olympics

The 1984 Summer Olympics in Los Angeles have been plagued by political and commercial strife even before the start of the games in July. The Soviet announcement of withdrawal from the games was only the most recent controversy, joining the debate over commercialization, sponsorships and exclusivity, security and product endorsements by athletes.

12 Surveying entry-level training programs at agencies

A survey of the largest U.S. ad agencies found several training programs in account management and media departments but a lack of much formal training in creative and research.

Special Report Research Business Review

15 Management shifts shake up 1983

The U.S. marketing/advertising research industry, marked by changes in top management, reported an 11.3% increase in revenues in 1983 over 1982. The 35 top companies had gross worldwide revenues of $1.291 billion.

41 Nielsen plots a path for the future

A.C. Nielsen Jr., retired chairman-chief executive officer of A.C. Nielsen Co., issues a call to reduce the cost of marketing—the riskiest component of advertising.

43 How the research job market shapes up

Research professionals with two to five years of experience who can both analyze and verbalize research results are in great demand.

46 Slamming syndicated data

Sonia Yuspeh, president of the American Marketing Assn., says syndicated segmentation schemes are too simple, too remote, too rigid and too unreliable.

48 One entrepreneur's legacy

In more than 40 years in the research industry, Henry Brenner has touched many lives.

DEPARTMENTS

4 James Brady
4 Words from Gartner
10 Strategic Marketing
10 Parting Shot

To our readers

The concept of Advertising Age's midweek edition was put to the test last week when news broke May 8 that the Soviets had announced they were boycotting the 1984 Summer Olympics in Los Angeles.

It was 11 a.m. Chicago time Tuesday and the news side was approaching its final deadline for the May 10 edition when the boycott news came. Immediately, all bureaus went into action to learn the details and ramifications of the announcement.

Files came in from Geneva, a team of reporters from our Los Angeles bureau met with ABC affiliates to find out what was in store for the network, while other West Coast reporters tracked down Los Angeles Olympic Organizing Committee members. Other reporters across the country contacted Olympics sponsors to learn their reactions to the news.

The news operation also quickly acted to tear up the front page that was in the works to accommodate the breaking developments, and they added a news page for the related stories.

While this flurry of activity was taking place on the news side, Magazine was not standing idly by. We were able to work on our Olympics package that begins on Page M-6 to make changes that would give it as much currency as possible given our deadlines.

As I write this, stories are being readied for the May 14 issue that will bring us up to date on Olympics-related reactions and events that have occurred since May 8 and how they affect sponsors and the media.

In a large sense, this was our first real test of how reactive to breaking news Advertising Age can be in its new twice-weekly frequency.

As Rick Gordon, managing editor, says, "Our entire staff—reporters in all our U.S. bureaus, our foreign correspondents, our editors—was mobilized in the span of just 30 minutes, and the first elements of our story began to arrive in Chicago less than an hour after the Tass announcement hit the news wires. It was breathless, down-to-the-wire journalism, just the sort we had in mind when we decided to add our midweek edition."

Letters

Marketing to women

I was intrigued by your Marketing to Women report (April 2). But what struck me most was the observation that the Ford Motor Co. used an appeal to the upscale woman in a Thunderbird ad.

I'm here to tell you that marketing to women still has a long way to go. Recently the Ford Motor Co.—which has suddenly discovered direct mail—sent me a followup letter and "questionnaire" after I responded to an earlier questionnaire (what make of car do I own, demographic information, future car buying plans, etc.). The followup package contained a letter asking for my further "help"; it directed me to go to my local Ford dealership and try out a Ford, then fill out yet another questionnaire.

Also in this package were two pamphlets, one a reprint of a 1912 pamphlet aimed at women, the other its 1984 counterpart, "What Every Women Should Know Before Buying a Car."

Several things disturbed me about Ford's attempt. The first was its attempt to enlist me as an immediate prospect when my earlier responses suggested I was not. The second was the deceptive use of the "questionnaire." The third? I was not aware that women needed an entirely separate bank of knowledge before buying a car.

As a copywriter, I appreciated Ford's mailing, especially the two brochures. I will keep them as a reminder of how *not* to write copy to women. How did I chose my 1980 Honda? By looking it up in *Consumer Reports.*

Who does the waxing?

Gloria Steinem's article (Commentary Corner, April 2) on the role of the sexes in advertising made some interesting points about the need to show more couples doing things together around the house, as well as showing women in a better, more realistic light. However, I also think that the same goes for men in advertising. I think it would be refreshing to see more ads with men waxing floors, dusting or doing the laundry themselves—*without* needing to be "rescued" by their "smarter" wives. Today, with more women working, it is possible that the man knows more about taking care of the home than his wife.

At least if men do more of the housework—and are shown doing it—it will allow their wives to be able to be the seductresses they're "supposed to be."

Leslie Rosenberg
Fort Lauderdale, Fla

Powerful message

Congratulations on your Critic's brutal attack of R.J. Reynolds' public service ad (Critic's Corner, April 2). I congratulate you with some bitterness. I feel you have done a great misjustice to this ad and R.J. Reynolds by not mentioning the ad's good points. Does the heading attract the reader's attention? Does the copy, through entertaining subtle humor, urge the reader to read on? I think so. Does the copy end with a powerful message, one that promotes R.J. Reynolds as being socially responsible? Yes.

The tobacco industry takes its "licks" from just about every social organization in the U.S. You can't blame R.J. Reynolds for trying to better its image in the public's eye, in fact, it should be commended for its originality.

I am not an advocate of cigaret smoking by any means. I don't even smoke. I'm simply an admirer of imagination and creativity—this ad has both.

A blessed relief

I am getting tired of people taking off after James Brady. Now it's his politics. My understanding is that a columnist can say anything he pleases about anything, short of libel. The reader is free to agree, disagree, not give a damn, skip his column, or all of the above. Brady is a blessed relief with his wit, charm, and sophistication because AA is mostly deadly serious and humorless. I do wish, however, that he would use one of the photos of himself taken by John Weitz, now on exhibit at the Museum of the City of New York ("New York Faces"), rather than the unflattering one that heads his column.

Fewer sponsors—but greater impact

This report on the Summer Olympics was produced by Advertising Age*'s Los Angeles bureau.*

Even before the apparent Soviet withdrawal and the subsequent withdrawals of other Eastern Bloc nations, the 1984 Summer Olympic Games in Los Angeles appeared to be like a house of cards. The use of the 1984 games as a political forum was a given.

Long before the shocking announcement that the Soviets wouldn't be coming it was evident that the politicizing of the Olympics was inevitable.

But politics aside there were and continue to be security, traffic, smog and other potential emergencies. Now, without the Russians, more than ever, the house of cards simile is valid.

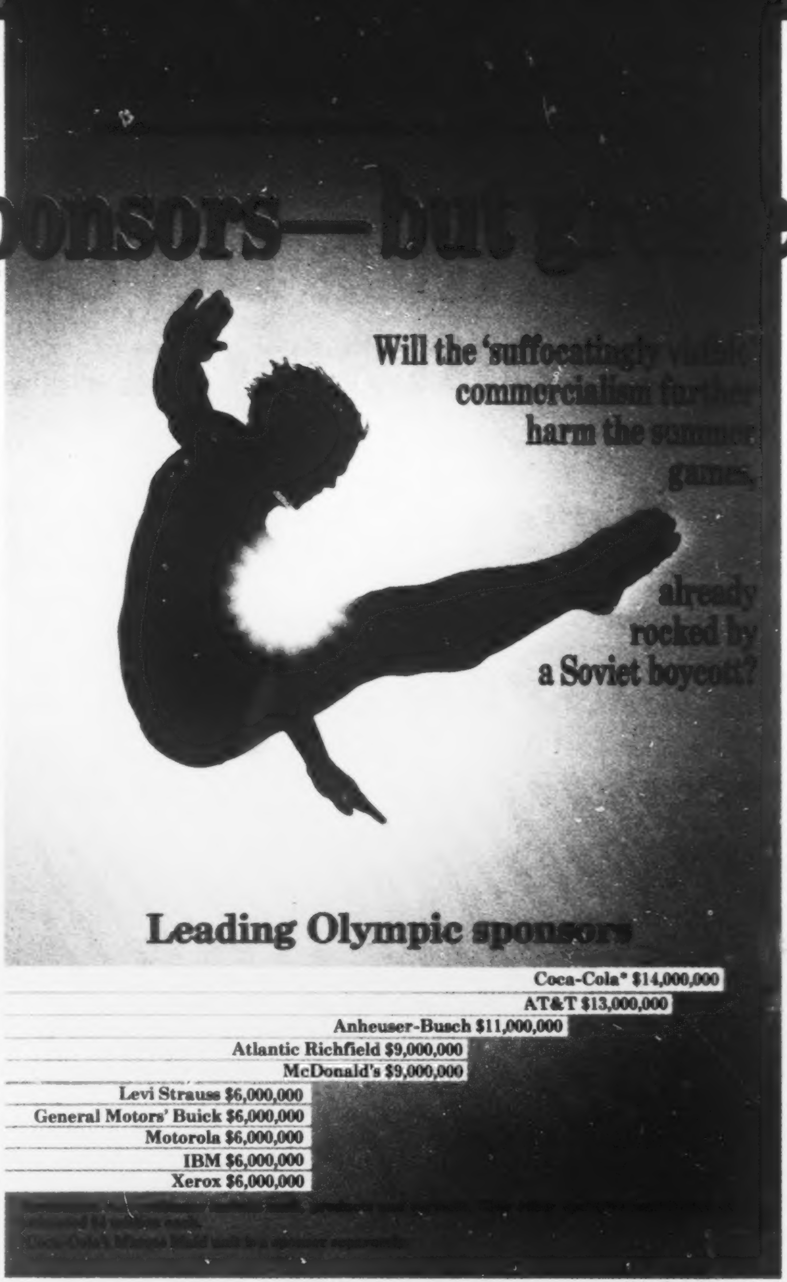
And until the Russian pullout, Peter Ueberroth, Harry Usher and other Los Angeles Olympic Organizing Committee members and staff people did a superb job of holding the house of cards together.

Mr. Ueberroth, president of the committee and soon to be Major League Baseball commissioner, strives for and demands excellence. Mr. Usher, the general manager, and his staff have prepared meticulously. They've had an overwhelming financial and logistical challenge, and they've met it until the Russians said *nyet*.

Yet private enterprise's involvement seems to be working.

However, critics remain concerned about the commercial aspect of the games, despite the fact there will be far fewer commercial sponsors than at recent previous games. Commercialism is still suffocatingly visible, from seat cushions, caps and calendars to phones, Christmas cards and beach towels.

It apparently had to be this way. Taxpayers in Southern California made it clear they didn't want to put government money into the Olympics. Blame it on the 1976 Montreal Olympics. The cost of those games was $1.2 billion and left the city a reported $1 billion in debt. The Soviet Union is said to have spent about $9 billion staging the 1980 Summer Olympics; their deficit is unknown.



Index Stone International

The pledge for the '84 Olympics is that the games will be conducted at no cost to local taxpayers. All of the financing will be private.

The games are being run as the product of a commercial company. Ironically, what the LAOOC is doing and attempting to prove, former International Olympic Committee president Lord Killanin says, might in the past have been construed "to be against the Olympic principles, if not actually against the rules."

Lord Killanin refers to the commercialism and the contracts into which the LAOOC has entered. To produce a financially secure Olympics, the committee has turned mostly to corporate America. Companies, including Atlantic Richfield, McDonald's Corp., Southland Corp. and American Telephone & Telegraph, have contributed money, material and services in return for the right to say in their advertising and marketing that they are supporting the Olympics.

That type of tie-in concerns the Assn. of European National Olympics Committees. The organization has drafted a resolution that, while sympathizing with attempts by the Los Angeles committee to provide the funding, stresses "the potential danger which lies in commercial and business influence to the detriment of sport and its organization."

Peter Ueberroth

But the commercial effort has its supporters. "We read all the time that the system doesn't work in this country," Mr. Ueberroth told ABC-TV's "20/20." "Well, this is an example of the system working."

Keeping it working through the two week Olympic period is going to be a challenge. As just one of several still shaky underpinnings for the games, a local tv station, KNBC, recently revealed street gangs are gearing up for the Olympics.

The station reported that some gang members consider the games "open season" for robberies and muggings, with both foreign tourists and local spectators possible victims.

Finally, there is the essential question as to whether the price paid for a commercial Olympics is worth it. The tv audience for the 1984 Winter Olympics in Sarajevo, Yugoslavia, was disappointing, causing ABC to provide advertisers with free ad time to compensate for low ratings.

An ABC News telephone poll last year of 505 people suggested that most respondents didn't know who the official LAOOC-sanctioned sponsors are of the 1984 Summer Olympics.

—Morrie Gelman

What price exclusivity?

The corporate Olympics is on trial in Los Angeles. The charge of excessive commercialism sits atop the 1984 Summer Olympics like a nuclear mushroom cloud threatening to obliterate every good thing in its path.

"We are a private company and are as commercial as you can get," says Daniel D. Greenwood, vp-corporate relations, the top sponsorship and licensing executive of the LAOOC.

No government—federal, state or local—is responsible for financing the 1984 Summer Olympics. Sponsors and licensees are responsible for 30% of the games' $500 million budget. They're the cornerstone of the plan to have the private sector finance the games. Without them, Mr. Greenwood says, there would be no Olympics.

Yet the cloud lingers and even grows, it seems, as the July 28 start of the games draws closer. A persistent grumbling from Olympic corporate sponsors, expected to provide $142 million in cash, goods and services, is turning to louder expressions of discontent about being undercut, about ripoff, about "exclusivity" not necessarily being exclusive.

Though they've paid dearly for what they understood to be a privileged and exclusive franchise, some sponsors designated by the LAOOC find competitors are locking up alternative sponsorships offered by the U.S. Olympic Committee, which fields the U.S. team for every Olympics, or similar tie-ins with a myriad of individual sport federations.

The exclusivity complaint is only one of a number charging the games with overcommercialization.

Maybe the loudest squawk is that the Olympics structure is trying to squeeze the last drop out of corporate sponsors, licensees and suppliers.

"There are as many ways to skin the cat as you can think of," says Alan Easton, vp-corporate affairs, Miller Brewing Co., Milwaukee.

Here's one way to skin the corporate Olympics cat: While Anheuser-Busch paid an estimated $11 million for the Los Angeles committee's beer sponsorship, arch rival Miller spent just $3 million to become official sponsor of the U.S. Olympic Committee's training center.

Miller since has developed a strong Olympic image through a tv campaign featuring heart-tugging vignettes of struggling athletes in run-down schoolyards who are catapulted to Olympian triumphs after stops at the USOC training center.

Miller also is a sponsor of ABC-TV's Olympic coverage. The brewer and other major ABC Olympics sponsors can use a special network tv logo that resembles the well-known Olympic symbol—five intertwined rings.

Then there's the example of Fuji Photo Film USA, New York, photo film products sponsor of the 1984 games. The risk by Fuji is considerable. Fuji's recent annual ad spending of $5 million pales against Eastman Kodak's $90 million budget, and Fuji is investing a large portion of its advertising budget in the Olympic sponsorship.

It may be paying off. Giving a clue as to why advertisers plunge into the murky waters of corporate sponsorship of the Olympics, Bill Lawrence, marketing director of Fuji film, says: "What it's done is given us a certain credibility" with con-

Robert Bersin

When Fuji got Olympic film sponsorship, Kodak countered by landing the U.S. track and field team.

Management shifts shake up 1983

By Jack J. Honomichl

The U.S. marketing/advertising research industry ended 1983—a year characterized by changes in top management—with an 11.3% increase in revenues over 1982, according to ADVERTISING AGE's 10th annual review of industry performance.

After adjustment for inflation—3.2% in 1983 according to the Department of Labor's Consumer Price Index-U monthly average—the industry's so-called "real growth" rate was 8.1%, a considerable improvement over the comparable figure for the four previous years, but still well below the heydays of 1975-78 when real growth exceeded 10% yearly.

The industry's "real growth" rate was 8.1%, an improvement over . . . the four previous years.

This year's list, expanded to 35 top U.S. companies from 30 and including five newcomers (Gallup Organization, Admar Research Co., Mediamark Research, Simmons Market Research Bureau and Management Decision Systems), had gross worldwide revenues of $1.291 billion, with 25.9% coming from operations outside the U.S. As usual, the giant A.C. Nielsen Co., with research revenues of $463.6 million, dominated the list, and its relatively weak performance, hurt by a strengthening of the U.S. dollar overseas, detracted from the industry's performance.

The industry's growth, based on domestic operations ($956.3 million in 1983), was 15.6%. The overseas volume grew just 0.6%, and that was influenced most directly by Nielsen's overseas operations, which account for about 52% of the company's

Top 35

(Continued from Page M-15)

total research revenues.

Generally, the larger the company and the more diversified its services, the better it did in 1983. The smaller the company and the more dependent it was on ad hoc survey research, the relatively poorer it did in 1983.

Three of the top 35 companies—Walker Research, Market Facts and Burke Marketing Services—made numerous changes in their organizational structure and top management during 1983, and eight companies appointed either a new president, chief executive officer or chief operating officer.

One of the top companies (ASI Market Research) was purchased by a nonresearch company, and three companies (Market and Research Counselors, Westat, ASI) acquired other research companies. Three companies (Burke, IMS International, ASI) divested some of their research properties.

To make sure these acquisitions did not inaccurately inflate the industry's growth rate calculations, the revenue changes for individual companies were calculated as follows: Assuming company A bought company B in 1983, the revenues of both for all of 1982 and 1983 were combined, and that base was used to calculate a rate of change. The specifics of these acquisitions are contained in the 35 individual company profiles that follow.

This year's top 35 organizations own and operate data collection facilities that, in addition to representing a huge capital investment, have an awesome capacity to gather data. In the U.S., the companies combined have central WATS telephone facilities with about 2,450 interviewing stations, about 60% of which are equipped for computer-assisted interviewing; fixed mail panels totaling 640,000 households; diary-type purchase panels totaling 50,000 households; 27,500 households in purchase panels linked to UPC scanner systems; permanent test market data collection systems in 50 markets, and 22 mall operations.

This annual roundup profiles the top executives who run our largest commercial research companies.

First, top management of the top 35 is overwhelmingly male; there are only three women (Judith S. Corson, partner in Custom Research; Lorraine C. Scarpa, president of Data Development Corp., and Florence R. Skelly, president-chief executive officer of Yankelovich, Skelly & White). Ages of top managers range from 36 (Gian Fulgoni, president of Information Resources Inc.) to 82 (George H. Gallup Sr., chairman of the Gallup Organization). The average age is 50.5, and 16% of these leaders are still in their 30s.

Surprisingly, only about half of the top managers have postgraduate degrees, and only 11% have doctorates. Five per cent did not graduate from college, and 44% stopped with an undergraduate degree (although many of those have done some postgraduate work).

The northern Midwest attracted a large portion of the executives for their postgraduate work. Big 10 Conference schools are most common, along with some of the big independent universities in the area, including Notre Dame and the University of Chicago. Of advanced degrees, the master of business administration is most common. Eleven per cent of the top executives obtained part of their education in European universities. The vast majority of top managers have spent almost all their working career with the company they now head.

In 14 of the top 35 companies this year, the executives report to themselves. They are owners (or part owners) of privately held companies. The rest report to a parent company or stockholders; 21 of the top 35 companies are either public companies or subsidiaries of larger companies, most of which are public. Of the list's total revenues of $1.3 billion in 1983, only 19% was attributable to privately controlled companies.

Following are the individual company profiles, which outline the company's traditional services, announcement of new services, any other changes that occurred in 1983—and changes that are expected in 1984.

How the top 35 U.S. research companies compare with the top 35 U.S. advertising agencies

	Top 35 U.S. advertising agencies*	Top 35 research companies**

The Nation's Top 35 Market Research Companies

1 **A.C. Nielsen Co.**, Northbrook, Ill. Public company traded over the counter; founded in 1923. Research revenues in 1983 were $463.6 million, up 7% from 1982.

For the 12 months ended Nov. 30, the world's largest marketing/advertising research organization had gross revenues of $689.8 million, of which 67.2% was from research operations in 25 countries from Greece to South Korea.

(To put that number into perspective, Nielsen's research-only revenues of $463.6 million were $49.6 million *more* than the world gross income of the largest U.S. advertising agency, Young & Rubicam.)

Total A.C. Nielsen Co. research revenues were divided as follows: $368.4 million, or 79.5%, from the marketing research group (a 4.7% increase over 1982), and $95.2 million, or 20.5%, from the media research

Source: ADVERTISING AGE study

group (a 17.4% increase over 1982).

During 1983, the media research group expanded the national Nielsen Television Index meter sample from 1,250 to 1,700 households. It also expanded its NHI cable network service and, before the end of 1984, plans to expand its local market meter panel to three additional areas: Washington, Dallas and Boston.

Henry Burk
A.C. Nielsen Co.

Nielsen's marketing research group provides basically custom and syndicated measures of product movement at retail on a national and local-market basis. The group does about 65% of its business outside the U.S., and for the second consecutive year, this portion of the total operation was hurt by foreign currency exchange problems. As chairman-chief executive officer Arthur C. Nielsen Jr. said in his annual speech to stockholders, "Five years ago, our overseas earnings accounted for 34% of the total. In 1983, they had dropped to 10%." The company showed a $1.6 million loss on foreign currency translation and exchange during its fiscal year 1983, ended Aug. 31.

During 1983, Arthur C. Nielsen Jr., son of Nielsen's founder, announced his intention to retire. Henry Burk, 57, took over as chairman-ceo May 1, moving up from executive vp-president of the marketing research group. Mr. Burk studied at the universities of Zurich, St. Gallen and Freiburg in Switzerland and has a degree in economics. N. Eugene Harden, 49, a graduate of Lawrence University, continues as president-chief operating officer. Richard W. Vipond replaces Mr. Burk as president, marketing research group, and James D. Lyons continues as president, media research group.

2 **IMS International**, New York. Public corporation traded over the counter; founded in 1954. Research revenues in 1983 were $137.5 million, up about 8.2% from 1982.

Of this worldwide conglomerate's total revenues of $205.6 million in 1983, about 67% was from its market research division. (To calculate growth rate, the bases for '82 and '83 were adjusted to reflect the divestment of Trendex, a survey research subsidiary, in mid-1983; growth was calculated for both years minus Trendex volume, estimated at $2.8 million in 1982.)

Of 1983 research volume, about $51.7 million, or 38%, was from the IMS subsidiary in the U.S., IMS America, Ambler, Pa., up about 16.2% from a year earlier. The balance was from IMS operations in 56 foreign countries, and this was up about 2.2% from a year earlier.

Lars H. Erickson
IMS International

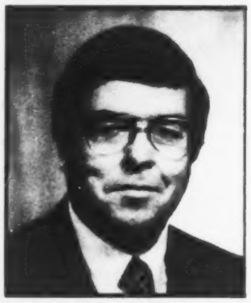
IMS market research division activities are divided into pharmaceutical audits, reports on the sales of ethical (and in some cases proprietary) pharmaceuticals collected from panels of drugstores; medical reports, based on information collected from panels of practicing physicians who report on the diagnosis and treatment of patients; other audits, syndicated audits of purchases made by hospitals and cosmetics and toiletries purchases in 14 countries; sales territory reports, share of market in the pharmaceutical market by client sales regions; custom ad hoc studies and surveys in such industries as cosmetics, veterinary pharmaceuticals, medical supplies and equipment, office equipment and agriculture.

The market research division of IMS employs about 2,000 fulltime salaried workers.

Lars H. Erickson, 49, is chairman-president-ceo, IMS International. He received his MBA from the Stockholm School of Economics. Serge Y. Okun, 37, is president of the U.S. subsidiary and is also a vp of the parent company. He is a graduate of the National School of Statistics and Economic Administration in Paris.

3 **Selling Areas-Marketing Inc.**, New York. Subsidiary of Time Inc.; founded in 1966. Revenues in 1983 were estimated at $99.5 million, up 17% from 1982.

SAMI amalgamates warehouse withdrawal data to produce continuous movement data on thousands of individual package goods items sold through food stores. This is done separately for each of 48 marketing areas. (Three areas will be added in 1984, meaning that SAMI reporting will be available in 86% of total U.S. all-commodity volume.)



Carlyle C. Daniel
SAMI

In addition, SAMI operates three minimarkets, each with 2,500 household panels where purchases can be recorded at point of sale via UPC scanners. Sales and service of this system, called SAMSCAN, is handled by the test marketing group of Burke Marketing Services. The SAMSCAN markets combined form the new SAMITRAC service, to which clients can have access on an individual product category basis. Also, in 1983, SAMI launched a service called SIS (Supermarket Information Service); it allows companies in the European Economic Community to buy an overview data package from the main SAMI system.

SAMI has 403 fulltime salaried employes in three U.S. offices. Carlyle C. Daniel, 53, a graduate of Lynchburg College, is president.

4 **Arbitron Ratings Co.**, New York. Wholly owned subsidiary of Control Data Corp.; founded in 1949. Revenues in 1983 were $94.2 million, up 17.3% from 1982.

Arbitron produces tv, radio and cable tv ratings in domestic local markets by using mail diaries and electronic meters. Surveys in 210 tv markets ac-

(Continued on Page M-20)

Arbitron Ratings Co.

Top 35

(Continued from Page M-17)

counted for 53% of the revenue; 47% was from measurement of 257 radio markets. (This is a 16.1% increase for tv over 1982 and a 19.7% increase for radio.) Arbitron customers include radio and tv stations, advertisers and their agencies.

Tv revenues were affected by expansion of the Arbitron Television Meter Service into five new markets: Philadelphia, Dallas-Fort Worth, Washington, Detroit and Miami. Houston and Boston will be added in 1984.

In 1983, Arbitron introduced Target AID, a computer-based system that merges ratings data with information on consumer life styles. This allows stations to develop a profile of tv or radio audiences by standard demographics. AID is integrated with two systems that segment population data by life-style clusters: ClusterPlus from Donnelley Marketing Corp. and PRIZM from Claritas Corp.

In 1984, Arbitron will introduce a new computer-based system called Arbitrends, which will deliver ratings to radio stations over microcomputers.

Arbitron has 956 fulltime employees in eight U.S. offices.

Theodore F. Shaker, 62, is chairman-ceo, Arbitron, and a vp, Control Data. He attended Colgate, Northwestern and New York universities.

During 1983, A.J. (Rick) Aurichio, 47, was named president-chief operating officer. He is a graduate of Fairleigh Dickinson University.

(Continued on Page M-24)

Move

(Continued from Page M-18)

end" operation. It will be if we demonstrate to management that we have more than binary powers of thought and analysis that tell us why as well as what.

In the advertising agency business, we live or die according to standards that are defined in one word: Creative. If an ad works, it's creative. Our biggest department, the one with the most interesting, ornery, involved, original, artistic and hirsute individuals, is called Creative, with a capital letter. And while Creative can make the computer do magic tricks in producing tv graphics, you don't get creative ideas with binary thinking.

Let's let some of that iconoclastic creativity rub off on market research people. Let's take all that wonderful data and ability to compress time that the computer gives us and let it help rather than overwhelm us. Let's analyze both sides of the brains of the public we want to know, and let's use both sides of our own brains to develop strategies to reach people.

The crucial role for market research today is to help shape strategic direction. Our input, delivered face-to-face and with personal forcefulness, can and should influence major company decisions. We are the people who should be counted on not only to ascertain and report trends in the marketplace, but also to chart the corporate course that will take advantage of them. The knowledge we gain of consumers' wants and needs must be shaped into understanding and then into recommended action on meeting those needs.

This can be hard work. It requires that we be business-oriented first, people-oriented second and research-oriented third. It demands that we get out into the marketplace, that we converse with human beings like human beings, that we probe beyond the limits of structured questionnaires, that we use the computer as a complement rather than a substitute for firsthand knowledge.

The job demands that we integrate our information, our experience, our human insights and creativity, even our gut feelings and put them on the line in the board room. And, maybe when we're in there, we should throw away our notes and printouts and tell it as we see it, off the cuff.

If we are there, forceful and face-to-face with upper management, what we say stands a good chance of being heard and respected. If research is relegated to the back shop, by the time our opinions get through the chain of command, they will sound and look a lot different from the way we wanted.

That's what research people risk losing if we let the computer take over for the human personality and mind. Eight hours at the screen of a computer will never give us the leverage or the ability to contribute what 10 minutes in the board room can offer.

The back room spawns information. The board room is an arena for ideas. Ideas move a business.

Management needs the best of us in the board room. Our ideas give perspective to theirs.

We are a key link in the chain of developing strategy for a corporation, a product or both. When management operates from a consensus derived from bright people experienced in various business disciplines—including research—it has the best shot at producing good results.

The computer market research community is doing a fine job. It has its star analysts. We need them increasingly. But for most of us, our futures may be decided by our talents, our persuasiveness, our insights and our answer to the question of where we want to work: The back shop or the board room. ■

ON-AIR
LAB
The Closer You Look,
The More You Find To Like.

Other on-air commercial testing services are just now starting to offer some of the advanced features that have been available from Westgate Research's ON-AIR LAB for years. But ON-AIR LAB continues to offer you the state-of-the-art product. Look closely and see why.

A Bigger Share of Each Respondent
Instead of sharing your test with as many as five other clients, as you might with other services, you'll be one of only three clients with ON-AIR LAB. This means respondents have twice the time and twice the attention span to answer questions about your commercial. And, you have a greater opportunity to customize your test and add special questions.

WATS Interviewing Consistency And Control
Callback interviews are conducted from our WATS center by a single, trained interviewing staff. You are assured of the same high quality and consistency of interviewing in your on-air commercial tests that you demand in your other telephone studies.

"Smart" Diagnostics
One of our diagnostic measures tells you how well a commercial performs the critical task of linking the impressions it projects with the sponsor's name. Another tells clients with strong, on-going campaigns whether people are recalling their campaign or the specific test commercial. Still others provide information about main point interpretation, overall viewer opinion of the commercial and specific likes and dislikes.

A Persuasion Measure That Doesn't Compromise Your Recall Test
Our unique, post-exposure persuasion measure doesn't require respondents to express brand preferences prior to viewing, eliminating the risk of viewers becoming brand sensitized and influencing commercial recall.

Confidential Markets For Top-Secret Testing
Sometimes you don't want the whole world to know you're testing a commercial for a new product or a new campaign. ON-AIR LAB makes available confidential markets where your commercial test is unlikely to be monitored and reported.

ON-AIR LAB continues to advance the state-of-the-art in commercial testing while maintaining the best absolute dollar value, as well. You'll be pleasantly surprised at how much lower our cost is than that of other services. To take an even closer look at ON-AIR LAB, just write or phone for our free brochure.

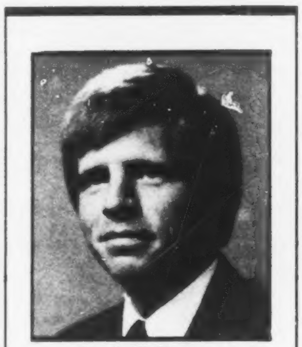
5 **Burke Marketing Services**, Cincinnati. Employe-owned corporation; founded in 1947. Revenues were $60.1 million in 1983, up 18.2% from 1982.

This conglomerate consists of Test Marketing Group, a unit consisting of what was AdTel and Market Audits, which markets and services, through a joint venture, SAMI's SAMSCAN service; Burke Marketing Research, which specializes in pre- and post-tv copy testing and custom survey research and which recently announced a new tv copy testing system called Selector and a new "state-of-the-art" eye movement research service, an outgrowth of what was the Telcom service; BASES, which specializes in market modeling; Burke Canada, a wholly owned subsidiary that accounted for about $1.7 million of BMS' 1983 revenues; Professional Services, which conducts research educational seminars, and Burke International, a joint venture with the German company Infratest, in which Burke owns a 5% interest. (Infratest, in turn, owns a 5% interest in BMSI.)

Another business subsidiary, National Retail Services, was divested during 1983. National Retail Services revenues from both 1982 and 1983 were omitted in calculating Burke's growth rate.



Jack E. Brown
Burke

In April, Burke announced extensive changes in its marketing and organizational structure; 10 top executives were involved *(see Page M-54)*.

Burke has 430 fulltime salaried employes in 40 offices in the U.S. A central WATS phone center in Cincinnati has 117 stations, 100 of which are equipped with cathode ray tubes.

In 1983, Burke launched a joint venture with Infratest and the Gartner Group called COMTEC, a syndicated database covering a number of high-tech categories. Also, Burke closed the Telcom subsidiary operation in Teaneck, N.J., and moved the operation to Cincinnati.

Jack E. Brown, 39, is chairman, Burke Marketing Services. He attended the University of Cincinnati.

Richard L. Lysaker
Audit & Surveys

6 **Audits & Surveys**, New York. Privately held corporation; founded in 1953. Revenues in 1983 were $31.9 million, up 28.9% from 1982.

A&S includes the following U.S. units: Survey division (custom ad hoc surveys); test audit division (local-market store audit programs); national total-market audit division (syndicated store audit programs); retail census of product distribution (annual study of U.S. retail store population); government research division (a Princeton-based survey group that does studies for federal agencies), and CTIS (for Central Telephone Interviewing System, a 125-station CATI facility outside Philadelphia that offers telephone

IOWA'S BEST TEST MARKET

*The Wall Street Journal, 11/27/83; Pg. 38.

Shuffling of top managers

An extraordinary amount of change took place in the upper management of top U.S. research companies over the past 15 months. In addition to key appointments noted here, two companies—Market Facts and Walker Research—reshuffled their entire management teams. *(See individual company profiles for details.)*

- **Henry Burk** to chairman-chief executive officer of A.C. Nielsen Co.
- **Richard W. Vipond** to president, marketing research group, A.C. Nielsen Co.
- **Verne B. Churchill** to ceo of Market Facts (in addition to president, a post he held previously).
- **A.J. (Rick) Aurichio** to president-chief operating officer of Arbitron Ratings Co.
- **Elmer L. (Jack) Taylor Jr.** to president of Marketing And Research Counselors (M/A/R/C). He maintains his post as chief operating officer.
- **James E. Sammer** to president-chief operating officer, Walker Research.
- **Lorraine C. Scarpa** to president, Data Development Corp.
- **William H. Lewellen** to president, Maritz Market Research.
- **James J. Findley** to manager, consumer research division, Management Decision Systems.

(Contined from Page M-24)

field and tabulation services).

Not included are revenues from other organizations in which A&S or its principals have a financial position: A&S Latinoamerica, Total Market Index in Canada and Integrated Computer Systems.

Richard L. Lysaker, 51, a graduate of the University of Minnesota, is president, A&S. Solomon Dutka, 60, founder of A&S, is chairman. He received his Ph.D. from Century University.

7 **Market Facts**, Chicago. Public company traded over the counter; founded in 1946. Revenues in 1983 were $28.4 million, up 8.4% from 1982.

Revenues for this research conglomerate do not include those of a half-owned subsidiary, Market Facts Canada, which in 1983 had revenues of about $5.4 million.

Market Facts' U.S. operations include: the Consumer Mail Panel, a fixed mail panel expanded to 200,000 households in '83; Consumer Opinion Forums, six shopping mall interviewing facilities, two of which were opened in 1983; Marketest Store Audit Services, seven permanent market setups for controlled store tests and test markets; WATS telephone interviewing centers (three locations) with a total of 109 stations, and focus group facilities.

Verne B. Churchill
Market Facts

Market Facts has 720 fulltime employes (440 of whom are salaried), and client service offices are located in Chicago, New York, Washington and Los Angeles.

Market Facts in 1983 underwent an extensive management reorganization: President Verne B. Churchill in August added the ceo title, and Gregory J. Spanga assumed Mr. Churchill's former post as chief operating officer. In addition, Market Facts appointed a new executive vp, four new senior vps and three new vps. Jack Abrams, the former ceo, resigned as vice-chairman and director.

Early in 1984, Market Facts entered into a licensing agreement with PMRI, a Canadian company, for U.S. rights to market an unusual system called TRACE to evaluate tv commercials and entertainment material.

Mr. Churchill, 56, has an MBA from the Indiana University business school. David K. Hardin, 56, chairman, received his MBA from the University of Chicago.

8 **Marketing and Research Counselors**, Dallas. Subsidiary of Allcom Inc., a closely held public corporation; founded in 1965. Research revenues were $26.9 million in 1983, up 12.6% from 1982.

E.L. (Jack) Taylor
M/A/R/C

This survey research company, which emphasizes the application of computer technology to marketing research, set up two new divisions in 1983 and acquired Trendex, a Westport, Conn., survey organization that produces a syndicated buyership study produced from a national probability telephone sample by 2,250 local-market interviewers. (M/A/R/C revenues have been adjusted to reflect Trendex volume for both calendar 1982 and 1983, and the 12.6% gain is calculated on that combined base. The 1982 base also was adjusted to reflect the divestiture of M/A/R/C mall operations sold in 1982.)

The National Neighborhood Panel, a new concept in panel use for data collection that M/A/R/C started in 1982, was expanded to 70,000 households

Marking corporate milestones

Several of this year's top 35 companies are celebrating significant anniversaries in their corporate history:

- **Yankelovich, Skelly & White** marked its 25th anniversary in 1983.
- **Ehrhart-Babic Associates** celebrates its 25th anniversary in 1984.
- **The Gallup Organization** marks its 50th year in 1984.
- **Mediamark Research Inc.** celebrated its fifth anniversary in January, 1984.
- 1983 was the 60th anniversary of **A.C. Nielsen Co.**
- **NPD Group** marked its 30th anniversary in 1983.
- **Custom Research Inc.** celebrates its 10th anniversary in 1984.

Top 35

(Continued from Page M-26)

Zip code clustered around local field supervisors in 24 markets. Plans are to increase to 100,000 households in 1984.

Also in 1983, M/A/R/C set up Local Market Network, an online network of independent field services equipped with CRTs and communications equipment in 16 markets; established ACRS Inc. to lease software, and launched Syntactics, a software development division.

M/A/R/C has 261 fulltime salaried employes plus 212 hourly staff members in 10 U.S. offices. The central WATS phone facilities have 240 stations, all CATI equipped.

William E. Lipner
NFO Research

President of Allcom Inc., chairman-ceo of M/A/R/C is Cecil (Bud) Phillips, 59, a graduate of Southern Methodist University. E.L. (Jack) Taylor, 57, has been president, M/A/R/C, since May, 1983. He has an MBA from the University of Texas.

9 **NFO Research**, Toledo, O. Wholly owned subsidiary of AGB Research Group, PLC; founded in 1946. Revenues were $26.8 million in 1983, up 21.6% from 1982.

NFO has 675 employes, 330 of whom are fulltime salaried, has branch offices in New York, Chicago, St. Louis, San Francisco and Greensboro, N.C.

NFO's main business is a fixed mail panel, which was expanded to 240,000 households in 1983. Mail purchase panel operated through NFO's TRAC syndicated research division offer the share of intake panel (consumption of all beverages); men's tailored apparel study; home furnishings tracking service; women's tailored apparel study, and the personal home computer and videogame study.

NFO operates two telephone interviewing facilities with more than 200 interviewing stations, about 112 of which will be CRT-equipped by year's end.

Early in 1984, NFO formed a new company in New York, NFO International Research, specializing in European research for American multinational companies.

William E. Lipner, 37, is president-ceo of NFO. He holds a bachelor's degree in business administration from the University of Toledo.

Tod Johnson
NPD Group

10 **NPD Group**, Port Washington, N.Y. Privately held corporation; founded in 1953. Research revenues were $24.8 million in 1983, up 15.3% from 1982.

The NPD Group, which has 540 employes, 279 of whom are fulltime salaried, is divided into NPD Research Inc., a 13,000-household national diary purchase panel specializing in package goods and more than 25 local-market panels with about 47,000 households; NPD Special Industry Services, purchase panels specializing in such product classes as toys/games, textile/apparel, petroleum products, sports equipment and records/tapes; CDR/CREST Enterprises, a panel reporting on meals eaten away from home and also providing custom research and consulting to the food-service industry; Home Testing Institute, a fixed mail panel of 130,000 households, and OPOC Computing Co., an electronic data processing service bureau. (OPOC revenues are not included in the NPD research revenues.) A sales/service office is located in Rosemont, Ill., and a new office was opened recently in Houston.

During 1983, NPD started Toy Retail Sales Tracking Service, which captures movement data via point-of-sale cash register information. Point-of-Sale Tracking Service recently was introduced for the apparel industry. Also, in 1983, NPD combined its Petroleum Market Index service with the services of Auto-Facts Inc. of Houston to form a new unit known as NPD Auto-Facts.

Joseph A. Hunt
Westat

Founder, chairman and joint owner of NPD is Henry Brenner, 69. President-ceo is Tod Johnson, 39, who holds an MSIA de-

The 1984 Sourcebook of Zip Code Demographics
The 1984 Sourcebook of Demographics and Buying Power for Every Zip Code in the USA.
CACI

Send no money. 15-day free trial offer.

You risk nothing. If you aren't completely satisfied, simply write cancel on the invoice and return the Sourcebook within 15 days. No questions asked.

Here's what you get for every Zip code in the U.S.:*

- Exclusive 1984 and 1989 forecasts of key demographic characteristics—including distributions of family and household income, age and race; population and household counts.
- Unique buying power indexes for major consumer products and services.
- Business statistics by Zip.
- 1980 and 1970 key Census characteristics.
- Rankings and national indexes by key variables.

We accurately measure consumer spending for major products and services.

These products and services are available in 16 retail store types and three types of financial institutions. Our buying power indexes are based on national consumer surveys and the ACORN™ Market Segmentation and Targeting System and SITE•POTENTIAL® systems which have been used by thousands of satisfied clients.

Our Zip code boundaries are current.

There have been over 26,000 changes in Zip code boundaries since 1980, so we constantly update them to give you key data for *today's* Zips.

Our update methodologies are state-of-the-art.

We update and forecast more key demographic variables for more time periods more accurately than any other source. That's because we rely on local data sources and sophisticated demographic models. Our methodology is published in the Sourcebook and is also available on request.

Only $695.
You save thousands of dollars!

Incredibly, this 1,600 page Sourcebook costs just $695. On computer tape, the same data would cost over $10,000. And if you ordered Zip code data individually, you'd pay $10 per Zip. That means you're getting all 36,700 U.S. Zips for the price of just one city or even one county!

gree from Carnegie-Mellon University.

11 Westat, Rockville, Md. An employe-owned corporation; founded in 1961. Revenues were $23.6 million, up 24.9% from 1982.

Westat, which gets about 85% of its revenues from survey research projects done for federal agencies, made news in 1983 by buying Crossley Surveys, a New York marketing research company. (Westat revenues have been adjusted to reflect Crossley volume for both calendar 1982 and 1983, and the 24.9% gain is calculated on that combined base.)

Westat's 220 fulltime salaried professional staff was an increase of about 12% over '82—in part because of increased federal spending for survey research and the company's expanding commercial marketing research base. In addition, Westat has an average parttime staff of 450 involved in telephone interviewing (75 stations), survey processing and national field studies.

Westat president-ceo is Joseph A. Hunt, 48, who has an MS degree from Massachusetts Institute of Technology. Edward C. Bryant, 68, the founder of Westat, is chairman; he has a Ph.D. from Iowa State University.

12 Information Resources Inc., Chicago. Public company traded over the counter; founded in 1977. Revenues in 1983 were $21.3 million, up 71.5% from 1982.

The main business of this fast-growth company—which in March, 1983, offered a block of its common stock to the public—is the BehaviorScan system, a group of eight minimarkets (four of which were opened during 1983) that are equipped for advertising and control store testing. In each BehaviorScan market, the service captures product movement data via UPC scanner equipment; collects purchase data from a panel of about 2,500 households via the use of identification cards that tie in with point-of-sale UPC scanners; alternates tv advertising over cable tv to groups of preselected households, and collects other measures of in-store merchandising/promotions.

Gian Fulgoni
IRI

The other major Information Resources service, called the Marketing Fact Book, provides access to a database of purchasing activity on a large number of package goods product classes. Starting in 1983, clients were offered access to this database on an on-line, interactive basis via a system called PROMPT.

IRI has about 357 fulltime salaried employes and 60 parttimers. The company has begun consolidating its Chicago operations into one building near the Loop.

President-chief operating officer is Gian Fulgoni, 36, who has a master's degree from Manchester University in England. Chairman-ceo is John Malec, 39, a graduate of the University of Wisconsin.

13 Maritz Market Research, Fenton, Mo. Wholly owned subsidiary of Maritz Inc.; founded in 1973. Revenues in 1983 were $19.9 million, up 7.6% from 1982.

Maritz, which has 183 fulltime salaried employes, is dividedinto two operations. One provides custom and syndicated market research services from divisional offices in Detroit, Toledo, St. Louis, Minneapolis and Los Angeles, with emphasis on automotive and agricultural industries. In addition, Maritz is involved in research in the food and beverage, healthcare, telecommunications, financial and recreation industries.

William H. Lewellen
Maritz

The other segment of Maritz is Quality Controlled Services, a network of 16 mall interviewing locations that do mall intercepts, focus groups, central and WATS telephone interviewing, taste tests, mail surveys and door-to-door interviewing. There are three WATS interviewing centers with 123 stations, all CRT-equipped.

William H. Lewellen, 53, became president in March, 1984. He has an MS degree from St. Louis University.

Robert J. Lavidge
Elrick & Lavidge

(Continued on Page M-32)

We cure future shock.

Presenting the wrong results . . . because you've asked the wrong questions . . . of the wrong population? It's easy for research to go off target. That's why Chilton Research Services plans with expert care to be sure we know exactly **where** to look, exactly **how** to listen, and exactly **what to do** with what we see and hear.

We design the most effective scientific sample. We identify the study objectives. We build questionnaires to get information that can produce results. And when it comes to data analysis, we have the most sophisticated tools and computerized procedures in the hands of experts.

Do research any other way and you'll be caught unprepared for the future.

If you need to get the right information to make strategic decisions on products from high electronics to bubble gum, give us a call.

Diagnosing the present is the best way to ensure a healthy future.

A good reputation is the best recommendation.

- **ABC News/ *Washington Post* Polls.**
  Public opinion surveys are conducted for ABC News and the *Washington Post.* On short notice — one hour to a half day — Chilton Research gears up for overnight turnaround of data on Lebanon, Grenada, the elections, even AIDS. The surveys use CATI, and a national probability computer-generated sample. Results are frequently reported on Nightline and Good Morning America.
- **Manufacturer Determines What Hispanics Drink.**
  An awareness and usage study is conducted annually among eligible Hispanics in top Hispanic population centers utilizing a telephone interview. Using an Hispanic Household Sample procedure developed by Chilton Research, telephone households are computer generated at the exchange level. All interviews are in Spanish.
- **N.Y. Stock Exchange Gains New Insight Into Investors.**
  A two-phase survey was undertaken to determine the incidence of stock ownership and to develop a profile of individual investors. In Phase I, computerized telephone interviews were conducted with a national sample of households to obtain information about ownership of stock by each member of the household. One adult shareholder was randomly selected to take part in Phase II, a mail phase of the project. This methodology enabled CRS to screen households on a national basis, and to collect detailed projectable data.

Top 35

(Continued from Page M-31)

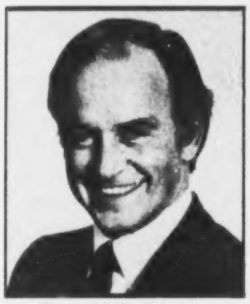
14 Elrick & Lavidge Inc., Chicago. Wholly owned subsidiary of Equifax Inc.; founded in 1951. Revenues were $19.2 million in 1983, up 16.9% from 1982.

E&L has two separate operations: Elrick & Lavidge, which specializes in survey research for consumer and business-to-business clients, and Quick Test Opinion Centers, a network of 17 shopping mall interviewing sites, eight of which were equipped for conducting computer-assisted personal surveys during 1983.

E&L operates six major telephone interviewing centers, two of which are part of the AT&T TELSAM system. The four facilities not committed to TELSAM have 100 interviewing stations, 52 of them CRT-equipped. There are 145 fulltime salaried employes in three sales/service offices in Chicago, Atlanta and San Francisco and 25 offices throughout the U.S., 20 of which are equipped with focus group facilities.

President-ceo of Elrick & Lavidge is Robert J. Lavidge, 62, who has an MBA from the University of Chicago.

15 ASI Market Research, New York. Wholly owned subsidiary of IDC Services; founded in 1962. Research revenues were $17.9 million in 1983, up 9.8% from 1982.



Gerald Lukeman
ASI Market Research

In August, 1983, ASI was purchased by IDC, a Chicago-based service bureau that does custom electronic data processing for a variety of entertainment and advertising industry clients. Also, in 1983, ASI sold its research company subsidiary in Hong Kong. In January, 1984, ASI purchased Teaman/Lehman Associates, a full-service marketing research company in Norwalk, Conn. (T/L revenues are not included.) About $300,000 of ASI's 1983 revenues came from outside the U.S.

ASI specializes in controlled audience pretesting and on-air (Recall Plus service) testing of tv commercials, custom research projects, focus groups, testing of print ads and evaluation of entertainment projects, including pilots for tv and movie films. The company operates a 75-station WATS telephone center in Los Angeles and has approximately 350 fulltime salaried employes.

Later in 1984, ASI plans to introduce APEX, a new advertising research system that will utilize cable tv to provide recall, persuasion and full diagnostics, all obtained in the home under natural viewing conditions.

Frank D. Walker
Walker Research

Gerald Lukeman, 52, a graduate of Dartmouth College, is president.

16 Walker Research, Indianapolis. Privately held company; founded in 1964. Revenues in 1983 were $15.9 million, up 25.8% from 1982.

This survey research company, which is the descendant of a local field service company founded by Mrs. Tommie Walker Anderson in 1939, had an eventful 1983.

In addition to an extraordinary revenue gain, Walker underwent a major reorganization and named a new president, four new senior vps and six new vps.

Walker has 930 employes, of whom 216 are fulltime; of those, 93 are salaried. In addition to the home office in Indianapolis, there are direct data collection facilities in New Jersey, Florida, Texas and Arizona, and a variety of interviewing services—including telephone, mall intercept, prerecruited central location and mail—are offered. Walker operates more than 200 telephone interviewing stations, the majority of which are outfitted for CATI.

Chairman-ceo is Frank D. Walker, 49, son of the company's founder. He is a graduate of DePaul University. James E. Sammer, 45, became president-chief operating officer in October, 1983. He received his MBA from Michigan State University.

17 Louis Harris & Associates, New York. Wholly owned subsidiary of Gannett Co.; founded in 1956. Revenues were $13.5 million in 1983, up 11.6% from 1982.

Thirty per cent of the volume comes from subsidiaries outside the U.S.—Louis Harris International, headquartered in London, which handles research projects in 60 countries, and Louis Harris France, Paris. U.S. revenues were up 13.2% from 1982, thanks in part to an extensive research program conducted for the national rollout of Gannett's *USA Today*.

Louis Harris' U.S. operation is organized into 16 divisions specializing in distinct markets, such as telecommunications, computers, healthcare, banking and financial services, public policy and corporate affairs, and automotive. Multiclient surveys track corporate, financial and public leadership opinion on current issues.

Five Louis Harris divisions and the National Center for Telephone Research, a CATI-based telephone interviewing facility with 84 positions, are located in New York. Other divisions are based in Washington and in a new office in San Francisco.

Gilbert Barrish
Chilton

Chairman-ceo is the company's founder, Louis Harris, 63, whose syndicated column appears in 172 newspapers; he is a graduate of the University of North Carolina at Chapel Hill. President-chief operating officer is Humphrey Taylor, 49, a graduate of Cambridge University in England.

18 Chilton Research Services, Radnor, Pa. Wholly owned subsidiary of American Broadcasting Co.; founded in 1957. Revenues were $13.4 million in 1983, down 17.3% from 1982.

This survey organization does custom ad hoc marketing and social science research for industry and federal agencies. While a significant number of CRS surveys utilize mail or face-to-face interviewing, the majority of the surveys are conducted by telephone via one of the industry's largest and most sophisticated CATI systems, which has on-line sample control and interactive cross tabulations. This system has 165 stations and is tied into Chilton's twin IBM 4341 computers.

CRS has 142 fulltime salaried employes.

Director of CRS is Gilbert Barrish, 44, a graduate of Temple University with a BS in economics.

Florence R. Skelly
YSW

19 Yankelovich, Skelly & White, New York. Wholly owned subsidiary of Reliance Group; founded in 1958. Research revenues in 1983 were $13.3 million, down 1% from 1982.

About 76% of YSW's 1983 revenues of $17.4 million were attributable to marketing and social research for industry, governmental agencies and media—most notably Time Inc. publications, including *Time* and *Fortune*. About 5% of YSW research revenues are from outside the U.S.

Basic survey activities are organized along client category lines: Consumer marketing, new products, policy planning, human resources, government and industrial marketing. Two

Our business is understanding people.

Market research. It's much more than the gathering and analysis of data. It's understanding people and their attitudes. How they think and feel. What makes them react. And what doesn't.

Market research is also understanding the needs of one other group of people—our clients. At Maritz Market Research we work closely with you. One-on-one. From start to finish. We study and discuss your specific research goals. And then, we custom-design a program which will produce the answers you need to solve marketing problems and reach viable decisions.

Our six regional offices make Maritz Market Research easily accessible, so we can work with clients in-person, face-to-face. We feel it's important to offer the personalized attention you'd expect from a much smaller company. But we have the nation-wide resources of a big firm, with a large staff of senior level professionals, and extensive data collection capabilities: 18 nationwide interviewing and product testing centers, including 3 long distance CRT WATS Centers.

We offer study design, sample design, data collection and analysis. And we do it for a broad spectrum of market categories—Automotive, Restaurants, Health Care, Packaged Goods, Financial Services, Home Appliances, Telecommunications and Agriculture to mention a few.

We're interested in what makes people tick. Because that's the real bottom line in market research. Phone us at any of our regional offices and ask for a portfolio which describes more fully the entire range of our research capabilities.

(Continued from Page M-33)

of the company's most widely used services are Monitor, tracking surveys of special social segments, and Laboratory Test Market, a market simulation facility widely used by package goods marketers for new product appraisals. Central telephone interviewing facilities have about 200 stations.

There are about 200 fulltime salaried employes at YSW, and, in addition to the home office in Manhattan, there are offices in Stamford, Conn., and Newport Beach, Cal.

Founder and chairman of YSW is Daniel Yankelovich, 59, a graduate of Harvard University. President-ceo is Florence R. Skelly, a graduate of Hunter College.

Thomas A. Ehrhart
Ehrhart-Babic Group

20 Ehrhart-Babic Group, Englewood Cliffs, N.J. Privately held corporation; founded in 1958. Research revenues were $12.5 million in 1983, up 5% from 1982.

The Ehrhart-Babic Group specializes in "in-store" research via three services: E-B Custom Research, which does controlled store tests including minimarkets, trended or projectable sales measurement studies, weekend audits and product purchases; National Retail Tracking Index, which conducts syndicated retail observational studies in 110 major markets on more than 8,000 food, drug, mass merchandisers, convenience and hardware/home outlets, and National Liquor, Wine and Beer Index, which provides distribution information quarterly in more than 2,600 off-premise outlets and semiannually in more than 3,100 outlets.

In 1984, E-B will launch Automotive Aftermarket Tracking Service, which will report nationally and regionally projected sales data from more than 500 auto supply stores and mass merchandisers.

The founders of the Ehrhart-Babic Group are its chairman, Thomas A. Ehrhart, 59, a graduate of Pace University, and its president, Louis J. Babic Jr., 51, a graduate of Boston University.

Jerry Rosenkranz
DDC

21 Data Development Corp., New York. Privately held corporation; founded in 1960. Revenues in 1983 were $12.1 million, up 2.5% from 1982.

This research organization, which has 130 fulltime salaried employes in four locations, included the following units in 1983: DDC; Central Location Testing; New York Conference Center, and Telephone Centre, which has 60 interviewing stations.

(As of April 1, 1984, DDC no longer held an equity position in Central Location Testing; it became a separate company.)

DDC is a full-service, custom research company emphasizing strategic research and its proprietary products. Its services are COMBO (product testing); COPY II (copy strategy development), and ADOPTER (pretest market measurement model). ADOPTER is a joint venture with Edward Tauber, a faculty member at the University of Southern California Graduate School of Business.

Lorraine C. Scarpa became president of DDC in January, 1984. She joined the company from Heublein Inc., and she holds a Ph.D. from Johns Hopkins University. Jerry Rosenkranz continues as chairman, and Joseph Goldstein as ceo. Both are 48 and graduates of the City College of New York.

Richard McCullough
Winona Research

22 Winona Research, Minneapolis. Privately held corporation; founded in 1953. Revenues were $11.8 million in 1983, up 4.4% from 1982.

This full-service survey research company has 125 fulltime salaried employes in three offices—Minneapolis, Phoenix and San Francisco. In early 1984, it opened another office in Dallas, and an East Coast office is planned for July. The Phoenix site houses a WATS line and

In 1983, Winona divested its two mall operations in Minneapolis and Phoenix.

President of Winona Research is Richard McCullough, 40, a graduate of the University of Minnesota. He is also serving as chairman of the Council of American Survey Research Organizations.

Irwin Miller
Opinion Research

23 Opinion Research Corp., Princeton, N.J. Wholly owned subsidiary of Arthur D. Little Inc.; founded in 1938. Revenues in 1983 were $10.8 million, up 5.9% from 1982.

Opinion Research, which has 167 fulltime salaried employes, maintains four branch offices. They are located in Chicago, New York, San Francisco and Washington.

The company provides survey research, analytical and consulting services, with emphasis on the following: Market research, corporate relations, modeling and simulation, cable and video, financial services, telecommunications, government research, public opinion research and employe studies.

In addition, Opinion Research periodically conducts several shared-cost surveys—the Investment Community Survey, the Corporate Reputation Survey, the Business and the Media Survey, the Public Opinion Index, the Marketing Index and Caravan (omnibus) Surveys—among the general public and business executives.

Richard Hochhauser
Harte-Hanks

Chairman-ceo is Irwin Miller, 55, who has a doctorate from Virginia Polytechnic Institute. President is Harry O'Neill, 55, who has a master's degree from Pennsylvania State University.

24 Harte-Hanks Marketing Services Group, River Edge, N.J. The parent is a public company traded on the New York Stock Exchange. Marketing Services Group was founded in 1975. Revenues were $11.7 million in 1983, up 11.8% from 1982.

This research conglomerate, put together by a large Texas-based publishing company, Harte-Hanks Communications, consists of the following units: RMH Research, a full-service survey research company specializing in communications/media research; National WATS Services, a telephone interviewing facility with 75 stations (some equipped with CRTs during 1983); Tele-Research, specializing in tv copy testing; TRIM, specializing in controlled store tests, and Urban Data Processing, a Burlington, Mass.-based electronic data processing service specializing in custom processing of census data for marketing uses.

During 1983, the East Coast operations of RMH, National WATS Services and Tele-Research were consolidated in River Edge, N.J.

Harte-Hanks Marketing Services Group has 75 fulltime salaried employes in four offices.

President of Marketing Services Group is Richard Hochhauser, 39, the founder of RMH Research. He holds an MBA from Columbia University.

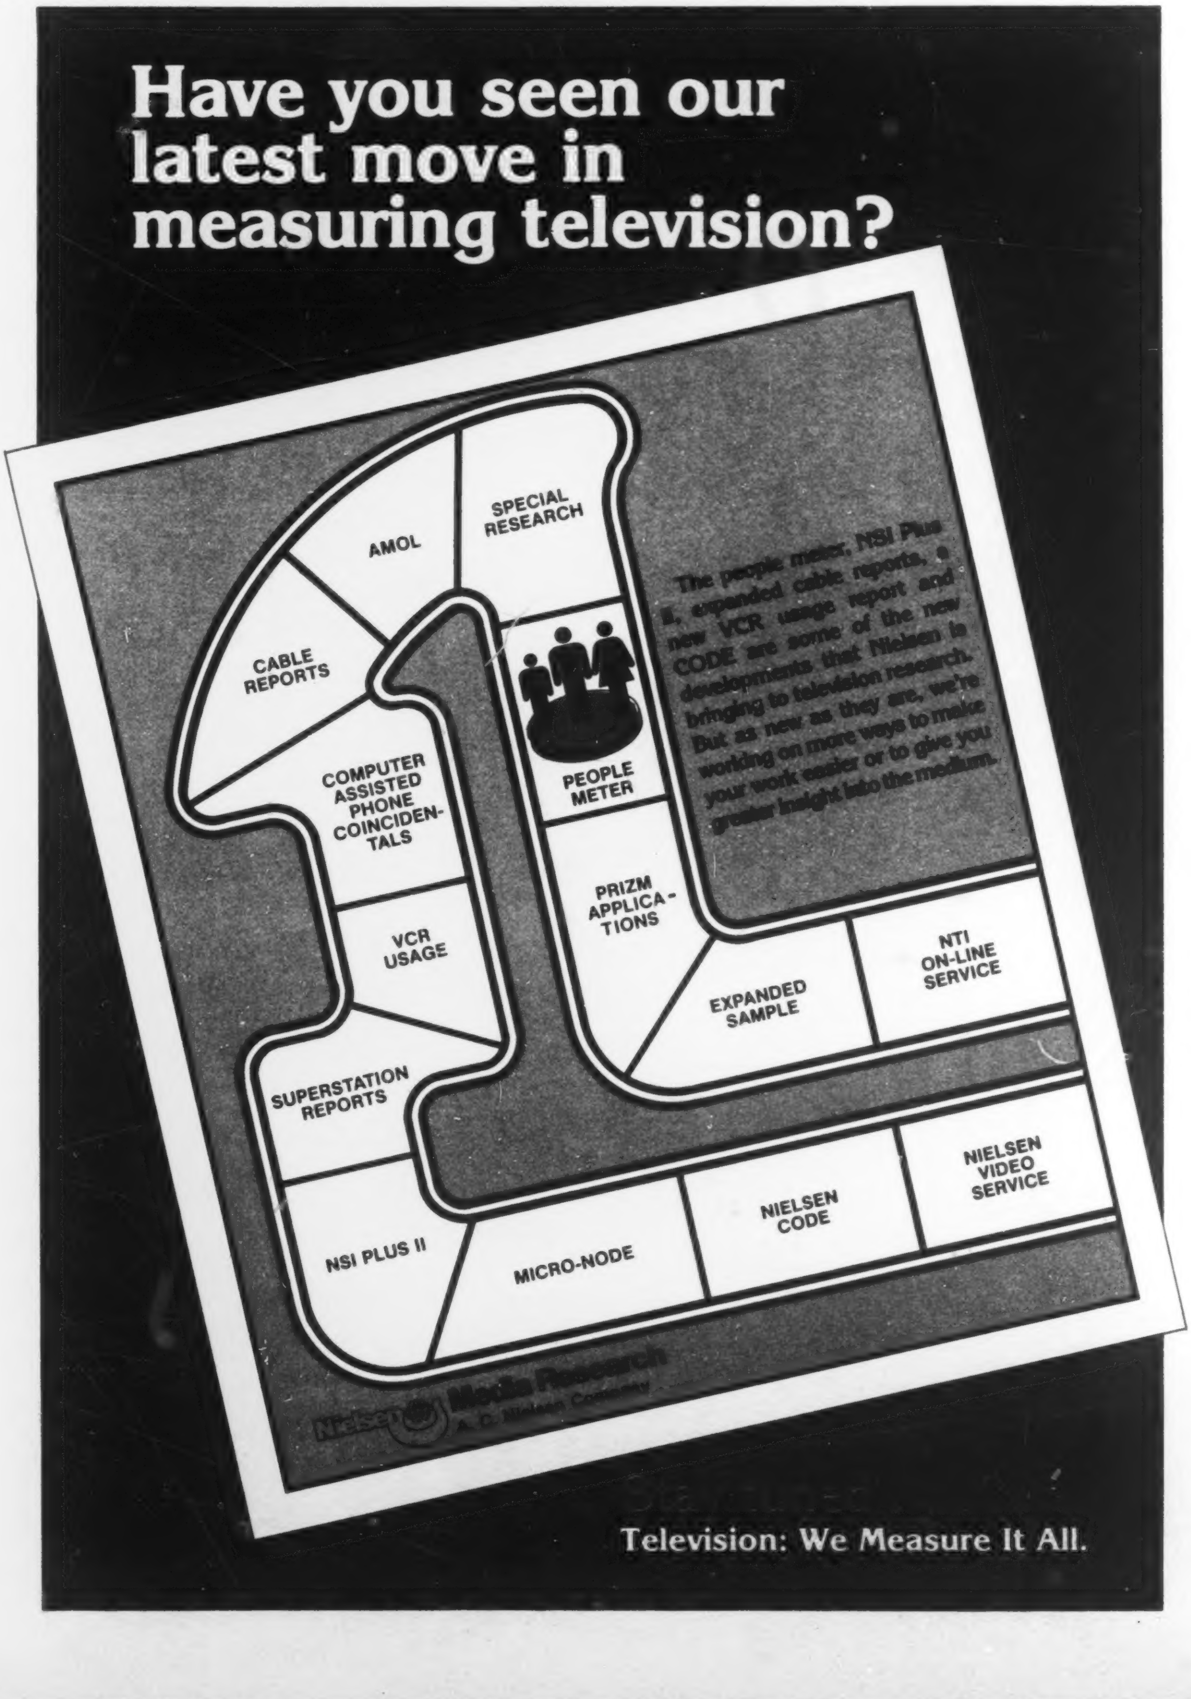
Frank S. Stanton
SMRB

25 Simmons Market Research Bureau, New York. A subsidiary of JWT Group; founded in 1978. Revenues in 1983 were $10.3 million, up 11% from 1982.

This survey research/databank organization was created in 1978 through the merger of W.R. Simmons & Associates Research and Axiom Market Research Bureau. W.R. Simmons was founded in 1952.

The main segment of SMRB's business is the annual Study of Media & Markets, which surveys 19,000 adults. Data are collected on media consumption, product purchasing behavior and demographic classification of the respondent, including the VALS Lifestyle battery. Data from this annual study also are merged with a Dun & Bradstreet databank to create a service called ClusterPlus, which can be used

(Continued on Page M-36)



Have you seen our latest move in measuring television?

The people meter, NSI Plus II, expanded cable reports, a new VCR usage report and CODE are some of the new developments that Nielsen is bringing to television research. But as new as they are, we're working on more ways to make your work easier or to give you greater insight into the medium.

Television: We Measure It All.

Top 35

(Continued from Page M-35)

to geographically pinpoint key market segments.

Further, data from the annual study also are used to supplement tv and radio audience measurements developed by Arbitron Ratings Co.

The balance of SMRB's business comes from its Custom Studies Division, which does ad hoc survey work for a variety of media and nonmedia clients and includes an omnibus survey called ECHO.

Every two years SMRB conducts syndicated studies of the teen age and college student markets as well as audience studies in 40 top newspaper markets and for outdoor advertisers. It also conducts an annual study of Yellow Page usage.

Bernard Ruderman
Decisions Center Inc.

There are 110 fulltime salaried employes at SMRB.

President-ceo is Frank S. Stanton, 54, who has an MA degree from the University of Pennsylvania.

26 Decisions Center Inc., New York. Privately held corporation; founded in 1965. Revenues were $8.8 million in 1983, up 5.2% from 1982.

DCI, with offices in New York and Rochester, N.Y., has 106 fulltime salaried employes. The company is made up of Decisions Center, Qualitative Decisions Center, DCI International, Murray Hill Center (a focus group facility) and Facts Center, a WATS interviewing facility (recently expanded from 63 to 90 interviewing stations).

Harold M. Spielman
McCollum/Spielman

DCI specializes in survey research—concept and product tests, copy research, tracking and trade studies and large-scale market and strategy studies.

DCI is managed by three partners: Bernard Ruderman, 52, who has an MS from Pennsylvania State University; Bernard Levine, 58, and Steven Roth, 38, both of whom received their MBA degrees from New York University.

27 McCollum/Spielman Research, Great Neck, N.Y. Privately held corporation; founded in 1968. Revenues in 1983 were $8.5 million, up 19.7% from 1982.

McCollum/Spielman activities are divided into two divisions. The communications division does qualitative/effectiveness measurement of tv, radio and print advertising utilizing closed-circuit interviewing systems in 12 cities.

The associates division includes Child Research Services, tests of commercials, programs, packaging, product concepts among children; Syndicated Services, a large-scale annual tracking study of health-appearance concerns, attitudes; Kidstuff, a data source of information for marketing to children, and Special Services, custom ad hoc surveys of the adult population for a variety of marketing, image, awareness/usage and political purposes.

Henry D. Ostberg
Admar Research Co.

In late 1983, McCollum/Spielman opened a Chicago office and introduced its first systematic product-field advertising effectiveness audit in the automotive field. In early 1984, the associates division relocated from its offices in New York City to the headquarters building in Great Neck.

McCollum/Spielman now has sales/servicing representatives in Chicago, Los Angeles and San Francisco. There are 75 fulltime salaried employes.

McCollum/Spielman's chief executive officer is Harold M. Spielman, 57, who received his BBS degree from the City University of New York. President is Donald H. McCollum, 60, who has an MA degree from the University of Denver.

28 Admar Research Co., New York. Privately held corporation; founded in 1960. Revenues in 1983 were $8.5 million, up 30.8% from 1982.

Admar specializes in tracking surveys, product testing and advertising studies, employing research programs copyrighted by the company. One such service,

Tell us your research problem. We'll do the rest.

In the nearly 40 years we've been in business, we've assembled just about everything necessary for us to handle your research needs faster, better and more cost-efficiently.

Today, this industry-leading panel research facility consists of ■ A staff of over 600, equipped to conduct all phases of as many as 2,000 customized mail and telephone surveys a year; ■ The largest pre-identified consumer sample universe in the nation (250,000 households); ■ 200 telephone interviewing stations, including nearly 100 terminals for state-of-the-art computer assisted interviewing; ■ A Professional Services staff to design and statistically analyze your NFO survey; ■ A latest-technology interactive software system employing the most powerful and versatile super mini-computers used for research today; ■ The TRAC Division, a syndicated research operation presently monitoring five major industries; ■ NFO Research International, a New York-based service operation to arrange research abroad through the worldwide facilities of AGB Research.

To put us to work for you, call your nearest NFO office today.

Marshall Greenberg
National Analysts

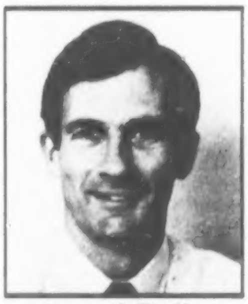
efficiency (the ability of advertising to reach a maximum number of consumers per dollars spent, compared with competitors) and its effectiveness (the ability to increase purchase interest).

Admar and three subsidiaries —Market Trends Inc., Amherst Research Group Inc. and Consumer Interviews Inc. (a central WATS phone facility with 28 interviewing stations)—have 60 fulltime salaried employes.

President-ceo is Henry D. Ostberg, who received his Ph.D. from Ohio State University.

29 National Analysts, Philadelphia. Marketing and survey division of Booz, Allen & Hamilton; founded in 1943. Revenues were $7.3 million in 1983, up 10.6% from 1982.

National Analysts focuses on strategic business decisions, using both qualitative and quantitative market research techniques. It specializes in market segmentation, tradeoff analysis, multi-variate modeling, focus group interviewing and litigation support. The professional staff (75 fulltime employes) are assigned to specific areas: Telecommunications, financial services, pharmaceuticals and medical equipment, automotive and package goods. About 80% of National Analysts' revenues come from not-for-profit institutions, government agencies and universities. National Analysts has a branch office in New York.



James J. Findley
MDS

Marshall G. Greenberg, 48, president, has a Ph.D. in mathematical psychology from the University of Michigan.

30 Management Decision Systems, Waltham, Mass. Privately held corporation; founded in 1967. Research revenues were $7.2 million in 1983, up 8.5% over 1982.

Of total MDS revenues of $25 million in 1983, 29%—or $7.2 million—was attributable to the consumer research division, the main business of which is the ASSESSOR simulated test market service that induces purchase in a laboratory retail store, exposes target group respondents to proposed tv copy and tracks repurchase.

In addition, MDS' consumer research division provides a complete range of services to assist the marketing and development of new products, the newest of which is DEFENDER, a model and market measurement system for determining the best response to a competitor's new product.

George H. Gallup Sr.
Gallup Organization

The consumer research division has 34 fulltime salaried employes in Waltham, Chicago and San Francisco.

Newly appointed manager of MDS consumer research division is James J. Findley, 39, who has an MS degree from the Sloan School of Management at Massachusetts Institute of Technology.

31 The Gallup Organization, Princeton, N.J. Privately held corporation; founded in 1935. Revenues in 1983 were $6.7 million, up 24% from 1982.

This survey organization, founded by the famous pollster George H. (Ted) Gallup Sr., whose syndicated newspaper column, Gallup Poll, appears in 100 newspapers, specializes in quantitative attitude and public opinion research. About one-half of this work is custom ad hoc. The rest comes from annual syndicated surveys in the area of financial services, package goods and video. Data collection is through face-to-face interviewing (national sample, 360 primary sampling units and about 50,000 personal interviews a year) and a WATS telephone facility with 60 stations.

There are 104 fulltime salaried employes in two Gallup buildings in Princeton.

In 1936, Mr. Gallup started a worldwide affiliate network of survey companies that were allowed to use the Gallup survey methodology and name. Today, that network is present in 35 countries and its activities are coordinated by Gallup Interna-

Drowning in data?
Chart your course.

Are you drowning in data that's hard to read and even harder to understand?

Chart your course with the Presentation and Business Graphics package (P.B.G.) by GANESA. With P.B.G., you transform columns of numbers into easily understood charts and graphs. Cumbersome statistical data becomes useful information, ready for you to analyze, display and present.

Designed for the IBM PC and compatible computers, P.B.G. works with your own data and all popular spreadsheets and databases. This superior graphics software is unique in its speed, ease of use and the flexibility of its display options.

Menu-driven, you can learn to use P.B.G. in less than an hour, create graphs in minutes and edit them in seconds. Everything from bar charts to population pyramids can be previewed on your monitor, assembled into a slideshow presentation with test screens or produced as report-quality graphics by plotter or camera.

At only $395, you'll be amazed at what P.B.G. can do for you and your data. For a dealer nearest you, call or write GANESA today. *GANESA also offers STATMAP, a data-driven marketing, statistical and demographic mapping package.*

George H. Gallup Sr., 82, is founder and chairman; he has a Ph.D. from the University of Iowa.

President/co-chief operating officer Andrew Kohut, 41, is a graduate of Seton Hall University. Co-chief operating officer is Leonard A. Wood, 44, who has an MBA from Rider College.

Judith S. Corson
Custom Research Inc.

32 Custom Research Inc., Minneapolis. Privately held corporation; founded in 1974. Revenues in 1983 were $6.4 million, unchanged from 1982.

This custom survey research company has five divisions: Consumer Research; Medical Research Bureau; Custom Business Research; Custom Research Telephone (central telephone WATS interviewing facility, CRT-equipped, with 36 stations), and Corporate Services. There are 65 fulltime salaried employes and branch offices in Union, N.J., and Chicago. CRI opened its Chicago office opened in 1983.

William J. Wilson
Starch INRA Hooper

During 1983, CRI launched two new services: CRITERION, for screening and developing new product concepts, and Tutor, a system that allows clients telephone access to Custom Research Inc. computers so the clients can develop required cross-tabulations from their own offices.

CRI is managed by two partners: Jeffrey L. Pope, 43, who received his master of business administration from the Kellogg School of Management, Northwestern University, and Judith S. Corson, 41, a University of Minnesota graduate.

33 Starch INRA Hooper, Mamaroneck, N.Y. Public corporation traded over the counter; founded in 1923. Revenues were $6.3 million in 1983, up 2% from 1982.

Revenues for this survey research company include a wholly owned subsidiary, the Roper Organization, but have been adjusted to reflect the divestment of another subsidiary, Daniel Starch Canada Ltd., in August, 1983. About 7% of SIH revenues come from outside the U.S.

SIH, best known for print ad and print media audience research, in 1983 launched a new syndicated service, FARMS (for Farm Audience Readership Measurement Service), which documents readership of farm magazines. In 1984, SIH will start a pilot study to determine the feasibility of doing a continuous large-scale print media audience study throughout Latin America.

About 150 fulltime salaried employes are located in SIH's two offices. Early in 1984, SIH acquired its main office building, a 19,000-sq.-ft. structure in Mamaroneck. The company has planned extensive renovation of the building.

chairman of the INRA network of affiliate companies in 31 countries.

34 Market Opinion Research, Detroit. Privately held corporation; founded in 1941. Revenues were $6 million in 1983, down 10.4% from 1982.

Timothy Joyce
Mediamark

This survey research company is organized into the following divisions: Consumer and industrial, media, social, information systems and political.

Since Market Opinion Research is active in political polling for a large number of Republican senatorial, congressional and gubernatorial candidates and 1983 was not an election year, revenues were off compared with 1982, an election year.

Three divisions—consumer, media and social—were up from 1982 levels.

During 1983, Market Opinion Research developed a software package to integrate survey and nonsurvey information into a database that can be run on a client's computer.

One application: Matching attitude data established in a survey to census demographic data to identify high-potential target areas.

Market Opinion Research has 290 employes, 90 of whom are fulltime salaried, located in four offices, including one in Toronto.

Chairman-ceo is Frederick P. Currier, 60, who received his MA degree from the University of Illinois. The president is Robert N. Teeter, 45, who received his MA from Michigan State University.

35 Mediamark Research Inc., New York. Subsidiary of Mills & Allen International PLC; founded in 1979. Revenues were $5.8 million in 1983, up 28.3% from 1982.

Mediamark, with 24 fulltime salaried employes, operates a syndicated media/product research service based on personal interviews with 20,000 adults each year regarding their exposure to advertising media. They also supply information on consumer products, brands and services they buy via a leave-behind questionnaire.

Magazines, advertising agencies, advertisers, broadcasters and cable networks subscribe to MRI's 25 reports each year. MRI provides on-line access to its databank.

Mediamark also produces three special reports each year based on a two-year database: A business-to-business report; the Upper Deck (affluent market), and reports relating to each of the top 10 local markets, including data on newspapers and broadcast stations.

Early in 1984, Mediamark opened a sales and service office in Chicago and introduced a new page exposure (per issue, per reader) service for consumer magazines.

Timothy Joyce, 50, is chairman-chief executive officer; he has a Ph.D. from Cambridge University in England. Alain J. Tessier, 50, is president-chief operating officer; he has an MA degree from the University of Notre Dame.

Ten research companies that almost made the list

Publication of a list of the top 35 marketing/advertising research companies raises the question of which companies would be next in line.

Here is a list of those marketing/advertising research companies that most likely would follow if the list had included the top 45 (not necessarily listed in order of size of revenues):

- **AHF Marketing Research**, New York.
- **R.H. Bruskin Associates**, New Brunswick, N.J.
- **Burgoyne Inc.**, Cincinnati.
- **Decision/Making/Information**, Santa Ana, Cal. (during election years).
- **Kapuler & Associates**, Arlington Heights, Ill.
- **MRCA Information Services**, Stamford, Conn.
- **Frank N. Magid Associates**, Marion, Ia.
- **Oxtoby-Smith**, New York.
- **Research Systems Corp.**, Evansville, Ind.
- **Response Analysis**, Princeton, N.J.

Elrick and Lavidge
meets your research needs

the right people,

THE OPINION CENTER

the right facilities...

in the right locations

At Elrick and Lavidge, our professional staff has the marketing experience and know-how to plan, implement, and analyze a research project. But the work of even the best people is only as good as the interviewers, facilities, and locations to which they have access. That's why we've developed our own network of research facilities in more than 20 locations, so one local contact can provide you with the best facilities and field staff possible.

Elrick and Lavidge facilities include mall interviewing centers throughout the U.S. equipped for computer-assisted face-to-face interviewing, computer-assisted telephone survey (CATS) centers for nationwide and local telephone interviewing, focus group facilities, and more (see chart). Our staff of over 500 full and part-time employees, assures you of uniformly trained and supervised interviewers, even when a project involves many locations.

These extensive resources mean we can handle all, or any part of your research project. And one Elrick and Lavidge representative, in any of our full-service offices, coordinates everything, from start to finish.

Skyrocketing revenues

By Jack J. Honomichl

Several U.S. research organizations are becoming conspicuous for their fast growth in recent years, running far ahead of their peers and inflation.

It takes two lists to do justice to this subject. One is limited to companies where growth was internal. The other accounts for conglomerates put together via acquisitions.

These lists used 1979 as a base, and dollar revenues in 1983 have been compared with that year. The listings have been limited to organizations with revenues in excess of $5 million in 1983, partly because there is no reliable data on smaller companies. Even if there were, percentage changes could be volatile because of the small bases.

Given that, based on historical records of 45 major organizations (research revenues only), here are the lists:

No. 1, no matter how you figure it, is Chicago-based **Information Resources Inc.**, which started business in 1979 with revenues of $400,000. Revenues in 1983 were $21.1 million. Just calculating the growth on that one seems foolish. It's more than 5,000%!

The balance of the "internal growth" Top 10: (2) **Research Systems Inc.**, 176% (estimated); (3) **NFO Research**, 153%; (4) **Audits & Surveys**, 128%; (5) **Walker Research**, 127%; (6) **Arbitron Ratings Co.**, 114%; (7) **Market Opinion Research**, 107%; (8) **Marketing and Research Counselors**, 105%; (9) **The Gallup Organization**, 97%, and (10) **Selling Areas-Marketing Inc.**, 83%.

To put those numbers into perspective, using 1979 as a base year, a company would have had to grow 37% by 1983 to stay abreast of inflation.

The torrid acquisition pace has been of special interest in recent years. In large part this was because of the building of research conglomerates by large outside corporations in addition to one research company buying another. Here are the five most conspicuous examples of that phenomenon:

- **Harte-Hanks Marketing Services Group**. In 1979, Harte-Hanks Communications owned one research property, RMH Research. RMH revenues in 1979 were $1.8 million. Harte-Hanks went on to acquire TRIM, Tele-Research and Urban Data Processing. This group had revenues of $10.7 million in 1983, a 494% increase.
- **Winona Research**. In 1979, this Minneapolis-based research company had revenues of $4 million. It then acquired Research Information Center from Greyhound Corp., almost doubling its volume. Winona revenues in 1983 were $11.8 million, a 195% increase.
- **Elrick & Lavidge**. This Chicago-based survey company had revenues of $7.1 million in 1979. Then followed a merger with the research operation of its parent, Equifax Inc., Atlanta, and the acquisition of Quick Test. Revenues in 1983 were $19.2 million, making an increase of 170%.
- **Maritz Market Research**. The original research operation of this St. Louis-based company, Maritz Inc., had revenues of $7.4 million in 1979. Subsequently, Maritz acquired Quatra Marketing Research, Minneapolis; Houlahan/Parker Marketing Research, Los Angeles; Clare Brown Associates, Garwood, N.J., and Rogers National Research, Toledo. Total revenues of this group in 1983 were $19.9 million, an increase of 169%.
- **The NPD Group**. In 1979, NPD Research had revenues of $9.7 million. Later, the Home Testing Institute was merged with what is now known as The NPD Group, which in 1983 had revenues of $24.8 million, an increase of 156%.

If we merge these two lists, we get the 10 fastest growing organizations *(see table)*. It's a mixed bag. Five of the 10 grew via acquisition.

Only three are in the New York area. The rest are headquartered around the country—Toledo, Minneapolis, Indianapolis, St. Louis and Evansville, Ind. Two are located in Chicago. ■

Ten fastest growing research organizations

Revenue growth 1979 to 1983

1. **Information Resources Inc.**	—
2. **Harte-Hanks Marketing Research Group**	494
3. **Winona Research**	195
4. **Research Systems Corp. (ARS)**	176*
5. **Elrick & Lavidge**	170
6. **Maritz Market Research**	169
7. **The NPD Group**	156
8. **NFO Research**	153
9. **Audits & Surveys**	128
10. **Walker Research**	127

Why Coke delayed on reformulating Tab

By NANCY GIGES

The official word is that Coca-Cola Co. waited to reformulate Tab—and watched new Diet Coke cannibalize its sales—because it wanted the market to stabilize.

The company announced last week that Tab (until Diet Coke came along, the No. 1 low-calorie soft drink) will be repositioned nationally with a new formula containing aspartame as well as saccharin (AA, May 17). Ad spending, according to Sergio Zyman, senior vp-marketing, will be competitive with Diet Pepsi, estimated at about $50 million.

While Mr. Zyman offered the official rationale for holding off on the reformulation, he admits there's been a longstanding saying in Atlanta, "Don't mess up my Tab."

It has been known for some years that many consumers abhor the taste, but since the brand performed so well for so long and several key decision-makers in Atlanta also were Tab fanatics, there has been a lot of resistance to changing a winning product. Despite its fall from the No. 1 spot, it still is a $100 million seller for Coca-Cola.

Mr. Zyman readily admits that in Tab's 21-year history "we've turned off more people than we turned on. A lot of people took a sip, made a face and said, 'Yuk!' They never tried it again. It was a brand that polarized people very much."

What finally persuaded management to make the move was extensive research suggesting that the company had nothing to lose. Studies by Coca-Cola showed greater preference for Tab when it was indicated it contained NutraSweet, G.D. Searle & Co.'s brand of aspartame, than in blind taste tests of old Tab and new Tab.

The introductory plan includes heavy couponing and sampling, using some sophisticated promotions.

Let's Taste New Tab!
Tab

New spots entitled "Let's taste new Tab" include segments with men and invite direct comparison with Diet Pepsi. Agency is McCann-Erickson.

Big spenders inspect ACTV's new system

By TOM BAYER

ACTV, the interactive tv system designed to revolutionize tv-watching, will be unveiled today at the system's Port Washington, N.Y., studio, where a steady stream of network, advertiser and agency officials have been quietly viewing its capabilities.

Sources indicated that Procter & Gamble has expressed some interest in being involved with ACTV, but neither Procter & Gamble nor ACTV would confirm talks are under way.

Sears, Roebuck & Co., Chicago, though, has reportedly expressed definite interest in participating in the consumer research and testing phase ACTV will soon enter with at least two unidentified cable tv systems.

ACTV president Lionel Schaen said that Prudential-Bache Securities, New York, has begun efforts to fulfill the company's financing needs with a private placement. The company hopes eventually to go public, he said.

Earlier, ESPN president Bill Grimes had confirmed ESPN was talking to ACTV about using the interactive technology on ESPN.

It is ACTV's intention to license its technology to various networks

N.Y. dailies OK SAU deal

By WILLIAM GLOEDE

The American Assn. of Advertising Agencies' newspaper committee has accepted, somewhat begrudgingly, a compromise on standardizing advertising units with the *New York Daily News* and Long Island, N.Y.-based *Newsday*.

The new Standard Advertising Unit system is scheduled to become effective for national and regional newspaper advertising July 1.

The compromise agreement was necessary because both newspapers have a narrow page width divided into a six-column advertising format. Other daily tabloids either have or will convert to a standard five-column format developed by the committee. The *News* and *Newsday* could not accept the five-column format without making multi-million-dollar modifications to their printing presses.

Under the agreement, both the *News* and *Newsday* will accept SAU sizes, but some of those sizes will be floated in the paper's six-column advertising formats—with advertisers paying for the float space. The two tabloids are the only major-market newspapers in the industry in which the SAU sizes will not fit established column widths.

One committee member, who would not speak for attribution, said the compromise represented the committee's effort to "try and make the best of a difficult situation." He explained, "These aren't papers out in Podunk. They're very important papers in a very important market." Daily circulation of the *News* is 1,375,000; *Newsday's* is 533,400.

Because some SAU sizes will run wider than the newspapers' column widths, neither will be able to quote SAU inch rates. Rather, each SAU size will have a rate of its own, stated in a cost-per-unit, with the cost of the float included in the rate for the specific SAU sizes that will not fit the six-column format.

In the *News*, the worst fit will be one-column SAU ads, which will require 33% more paid space than the ad itself will occupy. A four-column SAU ad will require 12½% float. But, according to Raymond Cyrgalis, SAU project coordinator for the *News*, 75% to 80% of all SAU ads will fit within the paper's advertising format.

For its retail advertisers, or national advertisers who

Lehman link with Frank now shaky

By ROBERT RAISSMAN

New York—Lehman Bros. Kuhn Loeb's year-old corporate campaign, once expected to continue after the company's recent merger with Shearson/American Express, has been axed.

At the same time, Shearson execs have been meeting to decide the fate of Albert Frank-Guenther Law, the agency for the $5 million Lehman Bros. account.

That agency's position appears tenuous at best in view of the appearance last week of a spread ad in the *New York Times* and the *Wall Street Journal*. The ad touts the capabilities of the newly merged Shearson Lehman/American Express. McCann-Erickson, Shearson/American Express' agency, created the ad.

Cathleen Stewart, senior vp-director of consumer marketing for the new company, declined comment on the agency situation but said that Lehman's corporate campaign, although successful, had outlived its purpose.

"We have this new company now and what we want to do is put the two companies under the Shearson Lehman umbrella," she said.

The merged company will break

(Continued on Page 96)

Sunbelt cities lead growth

WASHINGTON—The "super metros" are growing again, according to new Census Bureau estimates that show 36 metropolitan areas with populations of at least 1 million.

By mid-1982, according to the bureau, Charlotte, N.C., had joined the select group as the 36th in the "more than 1 million" category. The bureau is predicting that Salt Lake City-Ogden will be No. 37 when estimates for 1983 are completed this summer.

The 36 super metros account for 111 million people, 48% of the national total.

From 1980 to 1982 they grew by 2.2%, slightly below the rate for the country (2.3%), but faster than in the 1970s, when their combined growth was well behind the national rate.

Bureau experts have not decided whether the new data pinpoint a trend toward growth in and near large cities or merely reflect short-term factors such as the recent recession.

Among the super metros, Houston-Galveston, Atlanta, Tampa-St. Petersburg-Clearwater, Phoenix, Norfolk-Virginia Beach-Newport News and San Antonio all moved up in rank.

Houston-Galveston, with an 11.5% gain, displaced Washington from eighth; Atlanta forged ahead of Baltimore to take 15th; Tampa-St. Petersburg-Clearwater moved up two slots to 20th, ahead of Denver-Boulder, which remained 21st, and Cincinnati-Hamilton, which dropped from 20th to 22nd.

Phoenix became 23rd, changing places with Milwaukee-Racine; Norfolk-Virginia Beach-Newport News moved into 30th, passing Indianapolis, and San Antonio, now 33rd, advanced past Providence-Pawtucket-Fall River.

Among the leaders, Los Angeles, No. 2 with 11,930,000 people, had a 3.8% growth rate and an increase of 432,000 from 1980 to 1982, the largest growth of any metro area.

New York, with 17,589,000, remained firmly in first place, with a growth rate of 0.3%, compared with a decline in the 1970s.

Chicago, third with 7,974,000, had a 0.5% growth. Philadelphia-Wilmington-Trenton, fourth with 5,713,000, registered a 0.6% gain compared with declines in the 1970s, remaining ahead of San Francisco, fifth with 5,515,000 and a 2.7% gain.

All the fastest-growing areas were in the South or West *(see accompanying chart)*.

The estimates showed that Milwaukee and St. Louis, both population losers in the 1970s, were holding their own, while Detroit, Buffalo, Cleveland and Pittsburgh still showed indications of dropping populations.#

IBM's PCjr misses market

WESTLAKE, CAL.—PCjr, the International Business Machines computer targeted for home use, is experiencing soft sales because it is neither fish nor fowl, concludes J.D. Power & Associates.

The market research company said PCjr "undershot the business-use market in capabilities and overshot the home-use market in price," after surveying 200 computer dealers.#

Top 50 metropolitan areas, 1982

The continued growth of the Houston area stands out in the latest census figures of the nation's top metropolitan markets. *Figures represent metropolitan statistical area. *Source: U.S. Census Bureau*

Worn oil grinds your engine's life away at 200 strokes per second.
New life-saving fluid eases the grind.
Goodwrench Motor Oil
Mr. Goodwrench

Mr. Goodwrench now selling oil

GM Parts is seeking to capitalize on the Mr. Goodwrench name with its first marketing of a GM-branded consumer-use item. D'Arcy MacManus Masius handles. *(See story on Page 26.)*

Colgate joins shift to pump for dentifrice

By NANCY GIGES and GAY JERVEY

New York—Colgate-Palmolive, latching on to what may be a growing trend in the dentifrice market, is rolling national with a pump-dispenser toothpaste under its Colgate brand name.

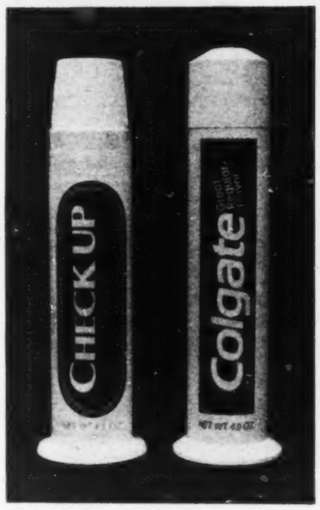
Colgate's move comes on the heels of Minnetonka's Inc.'s national introduction of Check-up, a pump-dispenser toothpaste supported by a $20 million ad campaign that broke May 14 (AA, May 14). With the $30 million that sources expect Colgate to invest in its product, a $50 million ad battle could be expected this summer.

In addition, further competition is likely to come from both Lever Bros., already working on an Aim pump-dispenser product, plus Procter & Gamble. Analysts and trade sources expect P&G to follow quickly with a line extension of Crest.

In introducing these new products, dentifrice marketers hope to maintain the momentum they gained through the gel extensions introduced in recent years.

Colgate's product has been testing in Minneapolis—Chaska, Minn.-based Minnetonka's backyard—since August, but tv commercials were tested in Bakersfield, Cal., even earlier (AA, July 18). In Minneapolis, the pump dispenser gained a 5% market share but has since fallen back to about 2%, sources report.

Rollout plans call for the product to go into the New York market first this summer, to be followed quickly by national expansion.



Colgate's new pump dispenser will go up against Check-up brand from Minnetonka Inc.

The $30 million in ad support the company plans during the introductory period matches the 1983 measured media spending for all Colgate toothpaste lines, according to Leading National Advertisers.

Colgate, with a 22% market share, holds the No. 2 slot nationally among toothpastes. P&G's Crest is the unquestioned leader with 35% of the category. Other brands and their shares are Beecham's Aqua-fresh, 11%; Lever's Aim, 10%; Lever's Close-up and

Upfront pace quickens

New York—The network tv prime time upfront market is expected to break this week, coming at least six weeks sooner than in recent years and apparently matching the dizzying pace already set in news and daytime upfront sales.

However, advertisers and agencies remain adamant that prime time prices will increase only between 4% and 7%, by far the smallest price hikes in recent years. Last year, prime time upfront prices jumped about 11% over 1982-83, when prices soared about 16% over the previous season.

The networks report that at least four agencies and media-buying services, including Paul Schulman Co., New York, and Western Media International, Los Angeles, have submitted plans for upfront prime time, the first step following the screening of fall pilots in the negotiating process. The networks this week will put prices against the submitted plans and the annual dickering will commence.

Paul Schulman, president of Paul Schulman Co., the network tv-buying arm of Gardner Advertising on behalf of client Ralston Purina, said that while he was "nowhere near wrapping up prime time [upfront buying]" he did hope "to make some strides" this week.

Mr. Schulman, who traditionally places the first upfront buy every year, added, "I know what I want to buy and where I want to be."

The explanations from network and agency officials for why upfront prime time will move so early this year range from the "big event distractions" of the summer (the Los Angeles Olympic Games and the political conventions) to the rush in news and daytime sales in this year's scatter market and next season's upfront sales. Networks also report advertiser budgets for next season are ahead of last year.

"The amount of the budgets in all three dayparts [daytime, news and prime time] are all way up," said Jake Keever, vp in charge of sales, ABC-TV Network. He said upfront news is "almost over" and daytime is as much as three-quarters sold out.#

Court serves A-B the rights to 'LA'

By SCOTT HUME

Anheuser-Busch has won Round 1 in the "LA" beer trademark battle.

Judge Roy W. Harper of federal district court in St. Louis last week permanently enjoined Stroh Brewery, Detroit, from marketing its low-alcohol brand under the Schaefer L.A. name, ruling in favor of Anheuser-Busch's contention that the LA brand name for its low-alcohol beer is a protectable trademark.

Judge Harper, hearing a suit and countersuit between A-B and Stroh, noted in his ruling that A-B already has spent $8.5 million advertising and promoting the LA brand and "has committed an additional $13 million to network tv" advertising this summer. A-B,

Geers Gross laces up $5 million Bass account

Wilton, Me.—G.H. Bass & Co. has moved its $5 million-plus account to Geers Gross Advertising after successfully completing a project assigned seven weeks ago to develop a women's shoes campaign. Lord, Geller, Federico, Einstein is the previous agency. New York-based Geers Gross will move Bass into tv advertising for the first time this fall. Also, the women's shoe line advertising will be tied together visually with the men's line ads in magazines this summer.

Most strikers return to work in Las Vegas

Las Vegas—The culinary and bartenders' unions ratified an agreement Friday with 11 hotels and resorts in Las Vegas. Workers are slated to return to their jobs May 29. That settlement will leave less than 1,800 of the original 17,000 strikers still out. Three properties continue to be struck.

Reiser shop expected to get Pizza Hut division

Wichita, Kan.—Pizza Hut is expected to move its estimated $3 million-to-$5 million Pacific division account to Reiser Williams DeYong/Cunningham & Walsh, Irvine, Cal. Previous agency is W.B. Doner & Co., Los Angeles. The action comes amid Pizza Hut's review of its $20 million national account (AA, May 24). Foote, Cone and Belding Communications, Chicago, previously had that account.

Hart adds spots via Cal. shop

By JENNIFER PENDLETON

Los Angeles—Presidential hopeful Gary Hart, in a close race with Walter Mondale in the June 5 Democratic primary in California, last week named Santa Monica-based political ad specialist Zimmerman, Galanty & Fiman to direct a $500,000-to-$600,000 statewide tv and radio ad campaign.

With Mr. Mondale already close to his mandated spending limit, Sen. Hart is waging one of his heaviest media campaigns in this "Yuppie country" state. Ads will begin May 30 and run through June 5.

Executives of the agency, who

MCI can save money over Bell's long-distance rates, claims Joan Rivers in a new MCI campaign.

Joan Rivers zaps Bell

By ROBERT RAISSMAN

MCI Communications is stepping up its celebrity campaign by unleashing the frenetic comedienne Joan Rivers in an assault on Ma Bell's long-distance rates.

The spots, created by Ally & Gargano, New York, have begun airing in a few markets but will be expanded to 100 markets by the end of this week.

Ms. Rivers' commercials are targeted for cities where MCI is beginning its marketing effort in advance of the arrival of "equal access," a federally mandated process through which local telephone companies are gradually upgrading their switches to provide carriers such as MCI with the same connections used by AT&T. MCI began an "equal-access" print campaign two weeks ago (AA, May 14).

In the spots, Ms. Rivers cranks her motor-mouth into overdrive, directing her acerbic wit at AT&T. "Have you heard AT&T's latest promise?" she says. "Now they're not just reaching out. They're reaching out in new directions. Oh, please! They are reaching out in the same direction that they always have: For your wallet. . .Alright? So take my advice, call MCI. They'll save you up to 30, 40, even 50% on long-distance calls to any phone in any other state from coast to coast and they'll keep their hands to themselves!"

The spots come on the heels of the recent airing of a Burt Lancaster commercial for MCI. Merv Griffin inaugurated the celebrity campaign. Gary Tobin, a spokesman for MCI, said two more unidentified stars will be introduced into the campaign.

"From the initial reaction we've had for Burt, Merv and Joan, we may stay with the three longer," Mr. Tobin said. "They seem to be doing very well."#

J&J sues FDA over ibuprofen

By NANCY GIGES

Johnson & Johnson's McNeilab Inc. has gone to court to stop Bristol-Myers and American Home Products from selling ibuprofen, the nonaspirin pain reliever approved by the Food & Drug Administration (AA, May 21).

As expected, J&J has sued the FDA in federal district court in Washington, charging that the agency made an arrangement regarding control of ad claims with the two companies before it would give them the green light to sell the drug over the counter.

J&J filed a citizen's petition arguing that the FDA has "no legal authority to make arrangements or agreements, whether on a voluntary or mandatory basis, to regulate the advertising for an otc drug."

For its part, Bristol-Myers said in an official statement, "This is not only an attack on the FDA, but also on the American consumer. It is an arrogant and unconscionable effort by J&J to keep an important new drug off the nonprescription pain relief market."

As the marketer of Tylenol, the leading analgesic in the $1.3 billion category, J&J could lose substantial business to these new brands, Bristol's Nuprin and AHP's Advil. Other companies cannot introduce ibuprofen products for a year, until the patent on the drug expires.

In its complaint, J&J says an arthritis advisory committee reviewing the appropriateness of otc marketing issued a conditional recommendation last fall that the drug was suitable if the FDA could regulate or control advertising. Its concerns were that ads may not clearly indicate the drug is unsuitable for certain patients, such as those who are aspirin-sensitive.

The lawsuit states that the commit-

Pillsbury cooks up microwave pizza line

By JANET NEIMAN

Pillsbury Co. is introducing nationally a four-item line of microwave pizzas to be followed by other Pillsbury microwave products now in the works.

The new frozen pizza, marketed under the Pillsbury label, is entering national distribution, except for the East Coast, this month. East Coast distribution begins in August.

Pillsbury Microwave Pizza—a single-serve item in sausage, pepperoni, cheese or combination sausage and pepperoni—is said to use a technology that provides a crisp crust. It cooks in 4½ to six minutes. Suggested retail price is $1.69.

The new item is the company's second nationally marketed product intended for microwave ovens. Pillsbury microwave popcorn,

(Continued on Page 66)

'GM feeling' is spreading

By JESSE SNYDER

DETROIT—General Motors may be putting its "mark of excellence" on a lot more than cars and trucks.

GM is moving to diversify by buying other companies and using its auto technology in other fields.

Its Delco Electronics division is already peddling pressure sensors, orginally developed for car controls, to monitor blood pressure, industrial boilers and aircraft controls.

That puts new meaning in the GM Parts ad slogan "Get that great GM feeling with genuine GM parts."

GM's Delco Remy division is producing a rare-earth alloy magnet that cuts the weight of engine-starter motors in half. Nonautomotive applications include industrial motors and generators and appliances.

GM's latest candidate for acquisition is Electronic Data Systems of Dallas, which could help GM with its internal computing needs. EDS' main business is proving programing for computer management systems—another possible outlet for the GM trademark.

With a cash value of $2 billion or more, based on stock price, EDS would be a major investment for GM. But the auto maker's cash on hand climbed to $9.13 billion at the end of the first quarter of 1984 and analysts have said they expect GM's available cash to grow to $12 billion by yearend.

GM is looking for an investment for its cash reserves, a solid company with a proven track record and good prospects, but one that would be salable if GM needed the cash for transportation needs later.

EDS would be part of the diversification effort. GM chairman Roger Smith has said he wants to enter other fields and expects that eventually 10% of GM's sales would be in nonautomotive areas.

Much of the speculation has concentrated on GM diversifying by buying whole companies. Recent nonautomotive acquisitions include Teknowledge, a small computer concern, and a 10% share of Philip Crosby & Associates, a quality-control consulting company.#

Celestial Seasonings drops DDB

By JENNIFER PENDLETON

Less than two months after it was purchased by Kraft Inc.'s retail food group (AA, March 26), Celestial Seasonings has ended its four-year relationship with Doyle Dane Bernbach/West, Los Angeles.

Keith Brenner, vp-marketing at the Boulder, Colo.-based herbal tea marketer, said the split, effective Aug. 1, reflects the company's need to reevaluate its marketing direction following the takeover by Glenview, Ill.-based Kraft.

But, said Mr. Brenner, that doesn't necessarily mean a Kraft agency will assume the business.

Mr. Brenner said he has drawn up a preliminary list of agencies from which he will select the finalists to compete for the Celestial account.

He said he hopes to select a new agency within the next two months.

Celestial now spends between $1.5 million and $2 million on advertising. But with the resources of Kraft behind it, that figure seems likely to rise.

Mr. Brenner, a longtime Celestial employe who held Celestial's top marketing position in the past, has been in his current post only

Discover Columbia is the theme of ads from Columbia Data Products, including this one comparing its personal computers with IBM's.

Major Always effort marks P&G's 'return'

By JANET NEIMAN

Procter & Gamble will begin an advertising and promotion blitz for its new Always line of sanitary napkins July 2, when it breaks a daytime and nighttime schedule of 30 and 45-second network tv commercials.

Concurrently, the company will begin a radio campaign targeted at teen agers and start a direct-mail sampling effort planned to reach 80% of all households where sanitary pads are used. Each sample will contain four maxipads and five pantyliners, plus a $1-off coupon good on any Always product.

The Always line of beltless pads, now being introduced nationally (AA, May 7), includes deodorant and regular versions of maxipads, thin maxipads, pantyliners and minipads.

Always is P&G's first entry into the feminine-hygiene products category since its Rely tampons were pulled from the market because of health and safety factors; the heavy advertising and promotion it will receive illustrates that the company is eager to re-establish quickly its presence in the category.

The company is asking the trade to "aggressively merchandise Always during its introduction."

"We want to get our fair share of category growth during the Always introduction," some trade materials say.

Drexel Burnham Lambert analyst Hercules Segalas estimates P&G will spend more than $100 million in advertising and promotion of Always.

Always will compete in the $540 million sanitary-pad segment of the estimated $870 million feminine-protection category with market-leader Johnson & Johnson, Kimberly-Clark and Tambrands.

According to George Adler, vp at Smith Barney Inc., J&J holds an estimated 48% of the market via its Stayfree, Sure & Natural, Carefree, Silhouettes and Assure pads. No. 2 in the category, with about 37% of the market, is Kimberly-Clark, marketer of Kotex, New Freedom, Kotex Anyday and Lightdays brands, followed by Tambrands, whose Maxithins brand comprises about 8% of the market.

P&G will support the broadcast effort with spread ads beginning in August issues of women's, fashion, dual-audience, teen and black consumer magazines. Those ads, comparing Always with "a leading maxi," emphasize the absorbency of the P&G Dri-Weave technology, saying it "keeps you cleaner and drier than any other maxi."

P&G is telling the trade its print ads "will deliver our performance advantage message because it is the only medium where we can fully discuss the clean/dry benefit."

The print campaign will focus on the maxipad although it refers to the availability of the other Always products. Page ads will follow the spread ads begin-

world news roundup

Sydney—USP Needham has sold its 50% interest in Standard & Hawkins to its Japanese partner, Standard Advertising, as part of an overall restructuring in Australia. The move makes S&H the first wholly-owned Japanese agency in Australia. USP also sold its 25% holding in Hyde Everett & Fuller, Melbourne, back to agency principals.

Taipei—Pillsbury Co. has signed a joint venture with Great Wall Enterprise Co., a food company, to produce food products in Taiwan.

London—Polaroid is replacing its U.S.-created advertising, featuring James Garner, with new British spots following a report that awareness of its cameras had dropped to 50%. The account moves from Doyle Dane Bernbach, New York, to DDB, London.

Geneva—Consumer groups from eight European countries are planning a campaign against West Germany's Milupa Co., which allegedly violated the World Health Organizations' baby-food marketing code.

London—Ponderosa Systems says it will open three more steak restaurants in the U.K. by the end of the year. Its first outlet opened three years ago. Bean Advertising is the agency.

Florence—Gucci has awarded its estimated $1.8 million fashion account to Troost Campbell-Ewald, Milan, which also will coordinate worldwide advertising. The account was previously handled in-house.

Madrid—Danis Benton & Bowles picked up more than $1 million in new business from Granjas Castello, a leading Spanish milk

Tuesday Team spots for President Reagan include this Statue of Liberty effort.

The vision of Reagan's America

Ad Age review

By FRED DANZIG

New York—If there's a reason the "reelect President Reagan" tv campaign is being likened to tv spots for Coca-Cola, it's that, more than anything else, they *are* Coca-Cola spots. Only the music is different. Mr. Reagan's ad hoc campaign agency, the Tuesday Team, has laced its commercials with stately, "Waltonfamilyesque" music instead of brassy, uptempo soft-drink jingles.

Creatively, the blend works. Imagine Norman Rockwell as art director. The Reagan spots are absolutely first-rate, so good they're scary. The eight glowing commercials—four 60s and their 30-second versions—are at once patriotic, soothing and optimistic. They occupy the middle ground as they tell voters that "President Reagan is doing what he was elected to do," ask "Why would we ever want to return to where we were less than four short years ago?" and boast that America is "prouder, and stronger and better" because in-

(Continued on Page 63)

Eastern, IBM ads are catching on

By SCOTT HUME

It took a little while, but two campaigns launched during January's Super Bowl telecast have caught on.

Showing the largest gains in Advertising Age's April adWatch survey were Eastern Air Lines and IBM. New campaigns for both advertisers debuted Super Sunday, Jan. 22 (AA, Jan. 23), and have been running since. Last month, when few people probably could recall the opposing Super Bowl teams, more consumers recalled the Eastern and IBM campaigns than had in the first few weeks after the game.

The IBM effort was the introductory campaign for its PCjr home computer.

The Chaplinesque "Little Tramp" character used in previous IBM advertising also appears in the spots for the new member of the family (initial spots showed him pushing a carriage).

Perhaps consumers just needed some time to get used to the new addition, but in April 14.6% of the

adWatch

1,250 adults asked to name the firstadvertising for computers that came to mind from all they had seen recently named IBM first. Many specifically named advertising for PCjr.

That response represented an increase of 2.9 percentage points over IBM's share in March, but wasn't enough to capture the No. 1 spot. Apple continued to lead in advertising awareness, being named by 23% of survey respondents. Com-

Total	43.6	39.9	42.4	38.7

By JOHN C. MAXWELL JR.

For the cold-cereal industry, 1983 was unusual.

For the year as a whole, units were up about 1%, but a good portion of this increase occurred in the last four or five months, when industry volume growth exceeded 2%. This brought total poundage for the industry for last year to about 2.1 billion.

Dollar volume was up about 8%, giving an increase to the industry to about $3.6 billion from $3.3 billion in 1982.

Individual company shares stayed fairly even compared to the previous year.

However, this, too, is misleading in terms of current shares, as Kellogg suffered in the first half but came back in the second half. Kellogg now holds somewhere in excess of a 38.5% share.

The General Foods story was the reverse, and it probably was under a 15% share by yearend. General Mills, Quaker Oats and Nabisco were all probably a touch weaker by yearend, while Ralston edged up slightly, helped by the success of Donkey Kong and Donkey Kong Junior products.

Kellogg's major dollar marketing thrust helped its Corn Flakes and Frosted Flakes, while adversely affecting the private labels. As General Foods' product portfolio is, to a degree, a mirror image of Kellogg's, it too was somewhat hurt by this.

A lot of Kellogg's growth related to its new Crispix product.

It appears that the current thrust of the industry is in the child segment, with Smurfberry, Pac Man, Strawberry Shortcake, Donkey Kong and Choco Crunch among the primary names. This ties in with the demographic tilt of the U.S., and consumption by children probably will be one of the more interesting growth areas for the next couple of years.

On a national basis, 87.4% of female homemakers report that they bought cold cereal within the last week, according to a 1983 report from Simmons Market Research.

Female homemakers most likely to purchase cold cereal have the following profile: 25 to 54 years old; employed parttime or not at all; household income of $10,000 per year or more, have children in the house 17 years or under.

Given the high rate of cereal use already achieved, we expect only modest growth in the cold-cereal industry.

The current baby boom, however, may have longer-term positive ramifications.#

State tourism ad spending to hit $47 million this year

WASHINGTON—New York and Florida will lead all other states in tourism advertising during the 1983-84 fiscal year, according to a nationwide study.

The U.S. Travel Data Center, which conducted the study, reports that tourism departments in 48 states will spend a total of $47 million on travel advertising, with New York's $5.3 million ad budget and Florida's $4.3 million ad program leading the pack.

Other large tourism advertisers include Alaska, $3.4 million ad budget; Michigan, $2.6 million, and Ohio, $2.5 million.

Tourism advertising budgets in all states increased an average of 14% over last year's allocations, the report says. Over-all travel and tourism development totaled $147 million, a 15% increase over 1982-83.#

AdWatch

(Continued from Page 3)

modore, with a 6.2% share of first mentions, held the No. 3 spot.

IBM's advertising for all models has much higher recall among men than women. The same is true for Commodore. Conversely, more women than men recalled advertising for Apple, Atari, Texas Instruments and Coleco computer products.

Employes are the stars of the Eastern advertising, which took off last month. The ads carry the "We earn our wings every day" theme. Tv spots show passengers pinning wings on Eastern employes to reward them for their excellent service.

Eastern's advertising came to mind first for 15% of the sample, a 3.9 point increase over March results. With that gain, Eastern landed in the No. 1 spot in the airline category for the first time since January.

United, whose Winter Olympics campaigns had flown the carrier into the top spot in February and March, received 10.9% of first mentions, almost 2 points below last month's 12.7% share. American moved up from the No. 4 to the No. 3 spot with a 9.8% share of recall.

Advertising recall for airlines shows more regional variation than is true in most other categories. Eastern's awareness gain largely came from respondents in the Northeast, where it claimed 23% of first mentions to United's 6%. In the North Central region, however, United has the largest awareness share (16% to regional No. 2 TWA). Eastern also captured the top spot in the South Central region with Delta No. 2. United and American are No. 1 and No. 2 in ad recall in the West.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of adults to name the advertising that first comes to mind in a variety of product and service categories from all they have seen, heard or read in the last 30 days.

Last month, 1,250 consumers were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly samplings is considered statistically significant and attributable to more than sampling variations.

What about those two unbeatable celebrity presenters Michael Jackson and Clara Peller, you ask? They remain where they have been since February: At the head of the pack.

Asked to name the first advertisement (of any sort) that came to mind, April's sample once again thought of dear Clara first. Wendy's share of first mentions was 19.3%, down a point from the March survey.

Advertising for the "New Pepsi generation" featuring that generation's biggest star, received 82 first mentions, good enough for a 6.6% share in April, the same as in March.

By the way, one respondent from among the 209 consumers age 65-plus surveyed said Pepsi's advertising was the most memorable.

Among noteworthy developments in other categories:

- The tight battle for advertising supremacy in the **coffee** category swung last month in favor of Maxwell House. Deadlocked in March with Folger's, Maxwell House's share of first mentions rose 2.8 percentage points to 24.8% in April. Folger's share dropped a point to 21%.

Still trying to close the gap in consumer recall are the No. 3, No. 4 and No. 5 brands, Sanka (6.5%), Hills Bros. (5.1%) and Brim (4.9%).

- Tide's advertising recall continued to slide in the **laundry products** category. After declining 2.8 points in March, Tide tumbled another 3.1 points to 22% of first mentions last month.

Still, Tide's commanding lead in advertising awareness remains. No. 2 Cheer's share rose 2 points, which gave it 6.4% of first mentions in April. All's 3.9% share kept it No. 3.

- The volatile **fast-food restaurant** category settled down last month, but the new order continued. McDonald's, with 32.5% of first mentions in April, remains within striking distance of the suddenly strong No. 2 Wendy's (28.7%).

Burger King continued to find itself in unaccustomed third place with 11.4% of mentions.

But Clara's been replaced by baked potatoes and salads. Burger King's "broiling vs. frying" attack is back. And McDonald's is preparing its new theme and bouncier jingle.

Watch this space.#

Kirin brews U.S. venture in research

By RUTH STROUD

Beer is not often associated with kidney cures. But one Japanese beer company plans to put its fermentation expertise to work manufacturing a hormone that will help in the treatment of kidney-dialysis patients.

Kirin Brewery Co. and Amgen, a Thousand Oaks, Cal.-based biotechnology company, have formed a $24 million joint venture for worldwide manufacturing and marketing of the hormone erythropoietin—or EPO. The hormone is crucial for controlling the production of red blood cells.

For Kirin, the world's third-largest brewer (after Anheuser-Busch and Guinness-Harp), the 50-50 venture marks a further expansion into pharmaceuticals.

In 1982, the company opened its own pharmaceutical research lab to develop therapeutic products and acquired an interest in a Japanese pharmaceutical company.

Kirin holds more than 60% of the Japanese beer market. As a result, the $4.3 billion beer, soft-drink and dairy products company's horizons have narrowed in that area. It views pharmaceuticals as an important growth industry.

Because many biotechnology products are, like beer, created through fermentation, the connection between the Japanese brewery and the American biotechnology company is a natural one, explained an Amgen spokesman.

Other American brewers also approached the Southern California company before it struck a deal with Kirin, he added.

The two companies plan several years of clinical testing and research before marketing EPO. Under terms of the joint venture, called Kirin-Amgen, Kirin will market the hormone in Japan, Amgen in the U.S. and both will share responsibility in other areas.

The worldwide market is projected at $100 million annually.#

FRIENDLY PERSUASION

LBS family programming doesn't just make sales for advertisers. It makes friends.

Sure, you can draw crowds with TV violence and titillation.

But advertising on exploitation programming runs the very real risk of associating your product with values that trouble more and more American families.

LBS doesn't deal in exploitation programs. It's simply not our business, and never has been.

We want families to enjoy LBS programs without embarrassment. Without worrying about what their kids are thinking. And without questioning the propriety of our advertisers.

From "Fame" to "Family." "The Greatest American Hero" to "America's Top 10." "Inspector Gadget" to "Heathcliff." "The Health Field" to "The New LBS Children's Theatre."

Plus American favorites from Colex, the joint venture of LBS and Columbia Pictures Television: "Gidget," "Father Knows Best," "Dennis the Menace," and many others.

You're reaching national audiences efficiently and effectively with your commercial schedules on quality LBS programs.

But that's not all.

You're making friends.

Marketers hope for life after 55

By SUSIE YANAGI

Los Angeles—American businesses hope to respond to the graying of the U.S. with an array of new products aimed at the one out of five Americans who is older than 55.

That point was made at a recent seminar sponsored by the University of Southern California's Business Institute on Aging. At the seminar, executives from Mattel Toys, Ramada Hotel Group, BankAmerica Corp., Carl Karcher Enterprises, Colonial Penn and Mature Outlook shared new-product plans and offered their ideas on marketing to older consumers.

Thomas Hatch, Mattel's vp-new business and product development, discussed Mattel's hopes to develop entertainment products for the over-55 set (AA, May 14).

Mr. Hatch said Mattel will not try to find new uses for existing items. He said the company is particularly interested in products associated with gardening, home upkeep and crafts. Mattel also is considering games incorporating reading and remembering.

For would-be maturity marketers, the important thing to recognize is that persons over 55 do not change their buying habits easily, noted Mr. Hatch. A person who has been buying an antacid product for 22 years, he said, is so set in his ways he often displays an almost "catatonic reach" in the store. "For a major manufacturer to come along and say 'Now we've got an antacid designed for you because you're 56,' it's got a tough road ahead," he said.

Other participants shared their insights. "The senior citizen has a large amount of discretionary money and time," commented Gail Brewer, director-specialty markets, Ramada Hotel Group.

To meet the needs of the older traveler, Ramada has developed training programs for employes that teach, for instance, how to recognize someone with a hearing loss and communicate with him.

Bank of America has developed oversize checks with larger print. It also offers check-guarantee cards, making it easier to cash checks.

Fast-food marketer Carl Karcher Enterprises plans to charbroil rather than fry more of its menu items at its Carl's Jr. restaurants, to meet the nutritional needs of the older market.#

A MORE PRESENTABLE RESEARCH PRESENTATION.

Enhance your role as a communicator with your own custom-designed Market Profiler. It's the fast way to tell your story to potential advertisers. Without the clutter or confusion of a standard research package.

The market Profiler digests pages of your market's data and focuses in on key demographic data. So you'll have a better chance of getting through to media planners and advertisers alike.

Give the Market Profilers to your sales staff, to aid them on presentations. Or slip them into your media kits to send to prospective advertisers. Either way, your prospects will appreciate how you turned reams of research data into quick reference material. And they'll often respond by placing more advertising with you.

To show you the effectiveness of the Market Profiler, we'll prepare a model sketch for you FREE OF CHARGE OR OBLIGATION. Simply call or write Kevin O'Brien at: 212-858-2917

Ad budgets workshop topic

New York—An insignificant advertising budget doesn't have to mean insignificant advertising.

At the Advertising Age Creative Workshop here Aug. 19 to 22, two sessions will address how to create effective commercials on a limited budget.

Richard Hall, vp at Griner/-Cuesta & Associates, maintains that many people do not know how to spend their production dollars effectively. The problem is compounded because no one wants to discuss cost.

In his session, "Why Do Television Commercials Cost So Much?" he will outline the steps that set realistic goals and lead to the successful production of commercials.

According to Mr. Hall, an agency often begins the creative process before a production budget is firmly established. This leads to inflated expectations on the part of the client.

A clear understanding of budget limits must be communicated from client to agency to production house in order to avoid wasted time and diminished agency credibility.

His session will cover what to look for when shopping for a production house and the different approaches to television production, depending on budget—including use of free-lance producers.

The case history of a low-budget, high-return radio campaign will be explored in "The Girl with the Molson Golden Laugh," led by William R. Hamilton and Lila M. Sternglass, both senior vps-creative directors, Rumrill-Hoyt Inc. They will detail the development of the successful Molson Golden ale campaign—a series of radio spots constructed around witty dialog.

Despite a modest budget, the radio campaign greatly increased sales and brand awareness, rocketing the Canadian beer from relative obscurity to a strong No. 2 position among all U.S. imports. Mr. Hamilton and Ms. Sternglass will reveal their marketing objectives and outline the creative process that led to the effective spots.

For information about these and other sessions, write to: Advertising Age Creative Workshop, 220 E. 42nd St., New York 10017, or phone toll free: 1-800-233-3435. In New York state, phone: (212) 210-0296. Telex: 64-0207.#

Liggett & Myers generic cigarets using fair logo

Durham, N.C.—Liggett & Myers has placed an official logo of the Louisiana World Exposition on its generic cigarets to tie in with the fair.

Gold Seal cigarets will be promoted as the official cigarets of the World's Fair, according to Roy Jorstad, national sales manager for private label and generics at L&M's sister company, Gary Tobacco Co. Bloom Agency, Dallas, handles the print campaign.#

Several shops off to fast '84 start

By STEWART ALTER

The upturn in the economy that began last year suggested that ad agency financial results would be on the rebound in 1984. In fact, the first-quarter financial results for the public ad agencies have been even stronger than anticipated.

Results were "very favorable, better than I expected in most cases," said Jerry Levine, vp, Merrill Lynch, Pierce, Fenner & Smith.

Dean Witter Reynolds vp Fred Anschel said, "Generally speaking, I think the results were better than expected, with some exceptions, among them being Doyle Dane Bernbach," he said. "This year is really shaping up as an outstanding one for the industry and for most major public agencies. The problem that arises at a time like this is to make sure you don't get carried away."

Gains in new business last year by Interpublic Group of Cos., Ogilvy & Mather, JWT Group and BBDO International helped those agencies to strong first quarters, just as the lack of it hurt Doyle Dane Bernbach International. Noting that the first quarter is not as important in generating earnings as the second and fourth quarters, Mr. Anschel said it still was good that some of the shops had "a nice leg up for this year."

As the accompanying chart indicates, BBDO, Foote, Cone & Belding, Grey Advertising and Mickelberry Corp. all registered revenue gains of about 25%, with O&M and JWT reporting 17% higher revenues in the first quarter of 1984, compared with the same period in 1983.

DDB showed a small revenue increase (6%), though net income rose 15%. Ally & Gargano, for whom the first quarter of 1984 is its third fiscal quarter, saw a drop in revenue and a loss in earnings.

Saatchi & Saatchi Compton Worldwide, not listed in the chart because it doesn't break down quarterly figures, showed results in line with most of the other public ad agencies. For the six months ended March 31, 1984, the agency reported a 38.9% hike in revenues to $86.6 million and a 117.5% boost in net earnings.#

Agency first-quarter results

Financial results indicate that 1984 should be an outstanding one for most agencies. *Notes: For Ally, January through March is third quarter; for all other agencies, it's the first. Lorimar/K&E fiscal quarter ends in late April; its figures have not been released yet. Saatchi has only half-year figures, October through March; no quarterly breakout is available. NM notes not meaningful.* Source: *Advertising Age.*

	Income $000			Revenues $000		
Agency	1983	1984	%	1983	1984	%
Ally	312	(160)	NA	32,537	28,162	− 13
BBDO	3,736	5,172	+ 38	57,756	71,861	+ 24
DDB	1,140	1,310	+ 15	44,125	46,672	+ 6

Affiliates

(Continued from Page 10)

after the session, virtually all seemed enthused about the prime time ratings prospects and pleased with the promos.

In other convention news:

- Mr. Sohmer delivered a heartfelt appeal for the holdout daytime affiliates to come through this summer. Citing the daytime ratings turnaround, he said, "We've earned better clearances, and we deserved [them]." With a full lineup of stations he said, "We'd be ahead of ABC and could be thinking about catching CBS."
- Raymond Timothy, NBC group exec vp, said, "We are taking steps to protect your franchise, not only with aggressive daytime plans, but with a prime time programing budget of $1 billion-plus." The programing includes not only series, but also 44 tv movies and 12 mini-series.
- In news, NBC is taking delivery on "millions of dollars worth of computer-graphics devices" for improving NBC News' on-air illustration of stories. One affiliate executive grumbled, "They should have done that years ago."
- Sports ratings in general are down at all three networks, NBC Sports president Arthur Watson told affiliates. "This is a stark reality, due to the fragmentation of audiences and overexposure," he said. On the positive side, NBC's baseball ratings are on the rise and the National Football League schedule shapes up "as our best in years," Mr. Watson said.
- The first series to come from the news division's aggressive new program development will be "Summer Sundays USA," said NBC president Larry Grossman. The program is due July 1 at 7 p.m. (ET) opposite CBS-TV's "60 Minutes" as a live 11-week show.#

Battles for the buck

Summer fun found in the marketplace

An Advertising Age roundup

It's Indiana Jones against the Gremlins, Coca-Cola versus Pepsi, even Trailways on the road with Greyhound. There'll be no summer doldrums as competition heats up from coast to coast in virtually every segment of the American consumer market.

With reports from bureaus across the country, ADVERTISING AGE here profiles some of the hottest battles for the buck that are occurring or are likely to occur this summer. New products, spinoffs, tie-ins and other promotions promise to keep consumers busy, whether in the movie theater or at the supermarket.

Screen wars: Steven Spielberg and George Lucas again expect to set a blistering **movie** box office pace. Mr. Spielberg is behind "Gremlins," via Warner Bros., while he and Mr. Lucas teamed for "Indiana Jones and the Temple of Doom," the Paramount Pictures sequel to "Raiders of the Lost Ark" (a summer hit of two years ago).

"Gremlins" opens next week, with related products to follow among 40 or more licensees, from toys to apparel.

In addition, Procter & Gamble Co., Scott Paper, Ray-O-Vac, Hardee's and nearly 20 other marketers will spend a combined $20 million on "Gremlins" tie-ins (AA, April 16, *et seq.*).

LJN Toys has licensed toy rights to characters from "Indiana Jones" *and* "Gremlins." P&G, besides its premium tie with "Gremlins," also will link up with "Indiana Jones" and "The Muppets Take Manhattan" (AA, April 30).

Here comes the sunscreen: Although Coppertone remains the undisputed leader in the $230 million **suncare products** market, a fight is shaping up for second place. Until the end of last year, Daytona Beach, Fla.-based Tanning Research Lab's Hawaiian Tropic had a clear claim to No. 2. If sales in all retail outlets are considered, Hawaiian Tropic is still ranked as the second-largest selling brand.

But nipping at its heels is Charles of the Ritz Group's Bain de Soleil. Sold mostly in

Ogilvy, Scali ring up Seagram V.O., Izod

By GAY JERVEY and NANCY GIGES

NEW YORK—Ogilvy & Mather and its subsidiary, Scali, McCabe, Sloves, have picked up $16 million in new business, with O&M adding the more than $8 million Seagram V.O. Canadian whisky account and Scali winning one of equal size, Izod/LaCoste sportswear.

Scali's selection ended a review that included 10 agencies. Izod/LaCoste, the General Mills sportswear division that has elevated the alligator to the pinnacle of preppydom, had been handled by Grey Advertising.

In awarding O&M's New York office its V.O. account, Seagram Distillers separated the brand from Warwick Advertising, which gained it in 1957 when the agency was then known as Warwick & Legler. Warwick & Legler was founded in 1939 with Seagram as a charter client.

Philip Beekman, president of Joseph E. Seagram & Sons, said the assignment was "consistent with our belief that our larger competitive whiskies might better be handled by other agencies—Seagram 7 Crown by Warwick, and V.O. by Ogilvy & Mather."

However, the switch culminates many months of courting by O&M at Seagram's Park Avenue headquarters. As a Seagram agency worldwide, O&M long has craved a domestic brand, sources said.

Warwick, however, is by no means out in the cold. In addition to such assignments as Seagram's 7 Crown, Crown Royal, Glenlivet scotch and Boodles gin, Warwick is awaiting a "major assignment" from Seagram in the fast-growing wine category.

Seagram's V.O. has been under mounting competitive pressure of late. In 1983, V.O.—which last year dropped its proof level from the standard Canadian 86 to 80, but not its price—slipped both in ranking and sales. According to figures compiled by industry analyst John C. Maxwell Jr., the brand fell from the fifth-best-selling distilled spirit to seventh, with sales declining 8.2% from 3.8 million to 3.5-million case depletions.

Indeed, V.O.'s change comes at a time when sales of most darker distilled spirits have sagged, mainly due to changing drinking habits. Furthermore, the pure Canadian imports have been feeling the heat from such Canadian bulk whiskies (those bottled in America) as Windsor Supreme (ranked No. 8) and Canadian Mist (No. 5), which offer consumers a less expensive alternative to the North Country taste.

National Distillers' Windsor Supreme has been the sharpest thorn in V.O.'s side. The company has been running a comparative campaign claiming Windsor's taste superiority over V.O. At one time, the campaign was scrutinized by the National Advertising Division of the Council of Better Business Bureaus and also was in danger of facing a legal challenge from Seagram.

The most recent ad said "Windsor Canadian beats V.O. . . .New taste tests prove it."#

Standardize ad rules, IUAA tells Europe

Direction urged for dbs

By LAUREL WENTZ

RIO DE JANEIRO—The International Union of Advertisers' Assn., which met this week here, is concerned that national direct broadcast satellite restrictions in Europe will hamper advertisers' use of dbs if countries refuse to standardize their rules.

The IUAA is pinning its hopes on a "green paper" distributed by the European Economic Community last week that calls for setting common standards for advertising beer and alcohol, for example.

So far, however, European governments have refused to harmonize their rules.

"The problem is the rules for advertising are not the same [throughout Europe]," said IUAA director Paul P. de Win.

"Whether advertising is accepted on Sundays or after or before 8 p.m.—it's all different," he said.

Hans Merkle, Procter & Gamble Co.'s West German-based manager for external relations, ticked off European restrictions on tv advertising that could undercut dbs:

- Some countries cluster commercials in a few long blocks rather than in small groups during natural breaks in programs.
- Restrictions on tv spots for "sensitive products" range from alcoholic beverages in France to pet food in Italy and sweets in the Netherlands.
- Tv spots are limited to specific parts of the day in Germany (before 8 p.m.), the Netherlands and France and banned on Sundays and some legal holidays in Germany, the Netherlands, Italy and Greece.
- Sponsorship on tv is allowed only in Italy and Luxembourg.

Rupert Murdoch's pan-European Sky Channel, transmitted to Western Europe, has been blacked out in West Germany on Sundays for the past month because the station carries advertising, prohibited in Germany on Sundays, Mr. Merkle said.

"This will go on for years," he said. "We'd be very happy if anything is in operation by 1990."

Kenneth Fraser, head of Unilever's worldwide marketing division, said: "If you're in the food business like us, what you can say [in different countries] about food and nutrition varies. . .We don't have that many brands that are international."#

Fair's marketing chief fired

By SHARON DONOVAN

NEW ORLEANS—Struggling with attendance that is half of what was expected, the 1984 World's Fair here has fired its marketing director and has put together a new promotional plan that includes hefty price promotions.

Jeffrey Stack, vp-marketing, was fired after refusing to resign. The former marketing vp for the Great America amusement park in Palo Alto, Cal. (formerly owned by Marriott Corp. but now owned by the city), said he is exploring legal options and refused to discuss the reasons for his dismissal.

Mr. Stack was responsible for all of the fair's marketing, including the $7 million ad campaign being handled by McDonald & Little, Atlanta.

Fair officials say they have instituted price discounts for season passes and late-night admission to make the fair a family attraction New Orleanians will adopt as their own.

Officials have said the fair needs 12 million visitors to break even on the six-month event. Recent daily attendance has been in the 30,000-to-35,000 range, half of what is needed. After two weeks, fair attendance was at 448,225.

The new season pass was reduced to $99 from $150; the daily pass for children has been reduced to $9.95 from $14.

"There are a lot of minority people in the community who can benefit from the price reduction," said fair president Peter Spurney. Complaints about the fair's prices from the business community, rather than low attendance figures, prompted the discounts, he said.#

Smith & Wesson aims its Mace at the public

Late nights and dark lots.
mace
just in case

"Just in case" is the theme of Smith & Wesson ads for Mace.

By ALLEN M. WIDEM

SPRINGFIELD, MASS.—After 16 years of selling its chemical Mace aerosol tear gas only to law enforcement and security agencies, Smith & Wesson is expanding into the public sector.

Test-marketing begins in late June in Columbus, O.; Kansas City, Mo.; Nashville; New Orleans, and Phoenix. Some $500,000 will be spent in broadcast and print advertising to introduce the product via supermarkets, pharmacies, hardware stores and discount outlets.

The five test markets' ads will, at the outset, include 30-second spots on a total of 12 tv stations plus print, both b&w and color. McKinlay Advertising, Simsbury, Conn., is S&W's agency.

The weapons market is maturing, said Roland Dowd, manager-new-product development for S&W, a division of Bangor Punta Corp. The move to sell Mace to the public is a natural marketing expansion for S&W, reaching out for people who have previously bought similar crime-deterrent products, he said. Those products have been manufactured by

Travel industry wary of tourism slowdown

Waikiki ad wave rolls in

By JENNIFER PENDLETON

A newly formed promotional organization representing Hawaii's most popular travel destination, Waikiki Beach, will start an estimated $800,000 advertising campaign this summer and has named Starr Siegel McCombs, Honolulu, to direct it.

The Waikiki Beach Operators Assn., formed six months ago by Waikiki hotel operators and businesses to raise funds to finance an ad drive promoting the area, named SSM after a review in which four other Hawaiian agencies took part. They were: Fawcett McDermott Cavanagh Brinck; Milici/Valenti; Ogilvy & Mather, and Peck Sims Mueller.

WBOA president Gordon Hentschel, claiming that hotel occupancy rates are now healthy, denied that the group was founded to counteract a tourism slowdown in Waikiki. But other Hawaiian travel industry sources said Waikiki's hotel and restaurant operators privately are concerned over the growing numbers of tourists who are choosing other Hawaiian destinations.

Mr. Hentschel said other local promotional programs, such as the Maui County Visitors Assn., are models for WBOA.

Mr. Hentschel believes ads will start in July. They will run throughout the mainland U.S. and in Canada.

According to a representative of the Hawaii Visitors Bureau, Hawaiian tourism is rebounding nicely from a recessionary 1982 and a flat 1983. In the first two months of this year, tourist traffic increased 15%, compared with the same period a year earlier.#

NCTA braces for convention

By SUSAN SPILLMAN

A variety of pressing issues will be addressed when more than 15,000 cable tv executives gather at the Las Vegas Convention Center June 3 to 6 for the 33rd annual National Cable Television Assn. convention.

In panel sessions and in corridors throughout the four-day event, cable operators and programers will ponder such issues as pay tv's softening sales, the pending cable deregulation legislation before the House of Representatives (H.R. 4103), combating theft of service and new competition from videocassettes.

According to NCTA spokesman Ed Dooley, the cable tv industry is "entering a new phase in which costly construction is winding down and we're turning more to serve the consumers."

While this decrease in building will help the cash flow of cable companies, many of which already have borrowed to the limit, it also means these companies will have to better market their services in older systems to maintain growth.

Partly because of a lack of new systems launching, the sale of pay tv units slid dramatically during the first quarter of this year. However, basic cable continues to grow, said Mr. Dooley.

The NCTA reports that basic cable now penetrates about 43% of all tv households and is expected to increase by the end of next year.

Even with cable tv expected to be in one out of two homes, operators still are looking hard for more incremental dollars.

One way they could keep up is to raise the price of basic cable service through H.R. 4103. If passed, the law

Good	48	51	48
Fair	28	26	30
Poor	9	8	8
Don't know	3	3	3
Mean score*	2.66	2.70	2.65

Television advertising quality

Thinking specifically about television advertising, how would you rate its over-all quality? *Source: SRI Research Center, Lincoln, Neb..*

Rating	November per cent	February per cent
Excellent	12	12
Good	45	43
Fair	27	30
Poor	12	12
Don't know	3	3
Mean score*	2.59	2.55

*Derived by assigning 4-excellent, 3-good, 2-fair, 1-poor

Ad quality good; believability low

CHICAGO—The public continues to rate the over-all quality of advertising as "good," but believability still is low among consumers, and they are becoming less satisfied with the accuracy of the advertising they see.

These are among the findings of the third nationwide study of the image of advertising conducted for ADVERTISING AGE by SRI Research Center, Lincoln, Neb. The studies were conducted among a national sample of more than 1,200 people in August and November, 1983, and in February of this year.

In the latest study, 11% of the public rated the over-all quality of advertising as excellent and 48% rated it as good. Another 30% rated advertising quality as fair, 8% rated it as poor and 3% didn't know. These figures have remained fairly stable in the three studies. On a scale of 1 to 4, the average across the three studies has gone from 2.66 to 2.70 to 2.65. That is on the low end of the "good" scale.

Among individual groups within the national sample, blacks rated the over-all quality of advertising significantly higher (2.86), while Hispanics rated it lower (2.25).

The over-all quality of tv advertising is rated lower (2.55) than the mean of 2.65 for all advertising.

When asked to compare advertising they are seeing now with advertising a year ago in terms of creativity, respondents gave creativity a mean score of 3.55—about halfway between "same" and "better."

This score was similar to two previous studies. Households with more than a $40,000 annual income rated creativity higher than did the other groups.

The public continues to rate the believability of advertising claims low. Using a 1-to-5 scale (from "totally believable" to "totally unbe-

Racing link keeps Grey staff in gear

By STEWART ALTER

Grey Advertising, New York, has formed a new unit, Grey Advertising Performance Group, designed to keep key account staff more informed about auto racing.

From Grey's point of view, racing is a sport to watch because it is on an upsurge.

"We're hitting a period where racing is becoming more popular, where the networks are giving it more time and where more people are attending races," said Bill Lucas, vp-management supervisor on the STP Corp. account at Grey.

Executives on the STP, AMC/Renault, B.F. Goodrich, Timex Corp., Canon USA and Holly Farms accounts at Grey met for the first time at a luncheon recently where they heard a presentation by STP-sponsored driver Richard Petty.

Mr. Petty noted that auto racing is a sport that depends on sponsorship and, in turn, provides promotional opportunities. "No other sport permits such commercial identification of company and product," he said.

STP's racing involvement has been quite heavy. Now other Grey clients also have been emphasizing this area. AMC/Renault has become increasingly involved in U.S. auto racing. And Renault intends to do "more and more" tie-ins with racing and to run more related advertising, said Grey exec vp Lou Maloof. B.F. Goodrich for the first time late last year began racing a car it built. At the same time, it introduced a new ad theme line, "We make cars perform."#

at presstime

Chiat/Day makes drive for Porsche account

LOS ANGELES—Chiat/Day here is among the agencies expected to make presentations this month for the $10 million Porsche Cars North America account. In addition, Pinne, Garvin, Herbers & Hock, San Francisco, will meet with the company next week to discuss handling the account. That agency has handled projects for Porsche since January.

Coleco begins new push for Adam computers

HARTFORD, CONN.—Coleco Industries begins a new ad push June 1 for its Adam Family Computer System. The effort will consist of page inserts in the *Boston Globe, Hartford Courant, New York Daily News, New York Times* and *Philadelphia Inquirer*. The ad also will run in the *Chicago Tribune* June 4 during the Consumer Electronics Show. A radio spot is scheduled to follow in New York, Boston and Philadelphia. The effort, part of Coleco's $10 million 1984 ad spending, is the first by Ketchum Advertising,/New York, which won the creative assignment earlier this

Baby-boom generation productive

WASHINGTON—The U.S. Census Bureau estimates that there were 17.8 million children 5 years old or younger on July 1, 1983, an indication that the baby-boom generation has reversed the declining fertility rate.

The 1.5 million increase since the April, 1980, census was a 9% gain, and brings the 5-and-under population to a 15-year high.

Total U.S. population was estimated at 234,496,000, up 7.4 million.

As the baby boomers moved through the life cycle, the 25-to-34 age segment, with 40.3 million, had an 8.3% gain; the 35-to-44 segment, with 29.5 million, was up 14.8%.

Seniors—those over 75—numbered 11 million, up 10.5%.#

Networks stake survival on ad revenues

By Jack Myers

It appears that advertising-supported cable tv has evolved into two distinct media, one adhering to broadcast-like qualities and the other fulfilling cable's original promise of appealing to diverse, highly segmented audiences. Senior agency and client executives confirm that ad-supported cable suffers from an identity crisis that threatens to destroy its long-term growth potential.

Almost all of the 18 major ad-supported cable programing services are suffering losses. Only Turner Broadcasting System, which owns superstation WTBS, Cable News Network and CNN Headline News, and CBN Cable Network are profitable; Entertainment & Sports Programming Network and MTV: Music Television promise black ink by year's end, and Financial News Network and USA Cable Network say profits are imminent.

Dennis Liebowitz, vp-media analyst, Donaldson, Lufkin & Jenrette, New York, says he believes that this is a transition year for cable networks. "More networks will soon cross the line into profitability. In 1985, we'll see profits growing, and by 1986, the industry will be profitable," he says.

While no one seems willing to predict that all existing cable networks will survive, many say they believe the worst is over. Fred Brandt, vp-media research director, Ted Bates Advertising/New York, sums up the industry attitude: "There were too many entries. Any time you have sensible, financially sound consolidation, it is beneficial."

Jay James, senior vp-video technology/programing, Doyle Dane Bernbach, New York, adds: "Networks will still have to struggle and tighten their belts. There may be more consolidations or failures, but we may also have new network introductions in a few years."

Cable executives say ad-supported cable network viewing equals more than 11% of broadcast network viewing, but cable generates only 5% of broadcast's ad revenues. Gerald Hogan, vp-sales, TBS, Atlanta, says, "In the day-to-day sales process, there is a real problem in the amount of money going to cable and our revenue increases *vis-a-vis* viewing increases." Cable's future as an ad medium will hinge on its ability to reverse this disparity.

> **"Money required for franchise building will be redeployed into programing . . . and advertising sales."**
>
> *—Arnie Semsky*

Despite cable's identity crisis and skewed revenue/viewership ratio, most executives agree that it will continue to grow. Cable "will take its place alongside other major media," Robert Daubenspeck, senior vp-national broadcast director, Foote, Cone & Belding, New York, says.

Also most cities now either are cabled or are being cabled, says Arnie Semsky, executive vp, director-media and programing services, BBDO, New York. "Money required for franchise building will be redeployed into programing, consumer marketing and advertising sales. We'll go from a hardware to a marketing-driven business. We're in that transition period now."

DDB's Mr. James says there will be greater penetration and channel capacity in the future. He projects ad revenues will leap for some cable networks, followed by growth and profitability on a network-by-network basis. Peter Spengler, vp-advertising services, Bristol-Myers, New York, agrees that "cable's brighter days are ahead. The marketing choices that cable makes available will have more meaning in the future."

But now, cable is concentrating on maturing and evolving into a business. Ronald Kaatz, senior vp, director-media resources at J. Walter Thompson USA, Chicago, says, "Cable is not a business of extremes; it's a business and it's being treated that way."

Its growth as an ad medium depends on the continued growth of gross viewing audiences, led by mass appeal networks such as superstation WTBS, CBN and USA Cable. Both general-interest cable networks and segmented networks can find a place in the market, Mr. Semsky says. "We need to support cable and give it a chance to mature and evolve at its own pace."

Agency and client executives say cable should concentrate on original programing, demographic and geographic audience segmentation and creative ad opportunities. These executives challenge the cable industry to recognize, support and sell these

(Continued on Page 32)

Jack Myers is president of the InfoMarketing Group, which has performed in-depth studies of the cable market for several cable organizations.

Pipeline

(Continued from Page 26)

forth, but we have never fully communicated why all of this might *matter* to an individual. Over time, the resister just quit listening. Our job is to get those potential subscribers to start listening again.

Last year, as we began to define the objectives of the Council for Cable Information's industrywide marketing campaign, we identified two critical factors: The need to establish a more aggressive identity and the need to adopt a new benefit-oriented sales strategy. We concluded that both needs could be met with messages that emphasized the consumer's positive *experience* with the product.

Some marketers contend that cable is primarily a local business and cannot take advantage of a national campaign that is based on user experience. However, people subscribe because cable offers more choice and convenience than standard tv. Every cable system can deliver that simple promise.

As we shift cable's identity from one of "more tv" to one of "selectivity, diversity and choice," we will build the foundation for new marketing approaches that will define specific benefits for specific groups.

A long-term, industrywide campaign should open up a new market for cable by cultivating more positive attitudes toward cable among nonsubscribers. Although the investment needed to open up this new market will not be as large as the one that brought cable into America's urban centers, it nevertheless will require a considerable commitment from all sectors of the cable industry.

Fortunately, the rewards of such a commitment promise to be substantial. Just a 10% increase in penetration of homes passed—not an unreasonable result for a sustained image-building campaign—could double the operating profits of many cable operators.

In less than a decade, our industry has provided the nation with an exciting new entertainment and information medium. Don't we owe it to our investors, our customers and potential customers and, perhaps more importantly, to ourselves to do the best possible job of telling the story of what we've created?

Many people, I expect, are waiting to hear from us.

Addressing the issues

Inevitably, an unprecedented collective marketing effort such as the Council for Cable Information's industrywide campaign raises certain questions. Those questions deserve answers.

- Will a user-benefit campaign really produce a measurable shift in attitudes?

It will if it's good, if it touches upon the right emotions and if we are patient. Ultimately, you have to believe in the power of advertising to affect consumer perceptions of a product. We do.

Our industry has never attempted anything like this, so our first approaches may need to be refined. The anticipated shifts will not occur overnight.

- Will the CCI campaign produce the returns that more direct sale-oriented campaigns typically yield?

I believe it will because it communicates with an audience that has been "left behind" by previous marketing efforts. We know, for instance, that while over-all awareness of cable is high, in certain heavily marketed communities, nonsubscribers' recall of cable advertising is low or nonexistent. They're simply not hearing us, and that's our fault.

- Does the CCI campaign make any sense given the various operational difficulties facing the industry?

We know that many nonsubscribers reject cable because of reported service problems. Obviously, progress in operations and marketing must go hand in hand. After all, increased receptivity to our sales message won't do us any good if we don't answer our phones, honor our installation appointments and keep our billing records straight.

But the cable industry *is* making progress in servicing our customers. Last year, independent studies by Opinion Research Corp., Benton & Bowles and International Communications Research reported about 90% of cable subscribers are "satisfied" to "very satisfied" with their cable service.

As recent growth moderates and companies invest more revenue in training employes and updating equipment, solutions to our service difficulties will become even more evident. We need to ensure that interested consumers are still out there once the solutions are in place.

Survival

(Continued from Page 30)

competitive strengths to agencies and advertisers. Substantial growth as an ad medium depends on directions and decisions taken by cable management on several key issues within the near future.

Battling internally, externally

Cable tv networks' willingness to compete against each other is tainting their efforts to become vehicles for advertising.

David Poltrack, vp-research, CBS/Broadcast Group, voiced the opinion of several advertising leaders: "Internecine warfare among cable networks doesn't help the industry."

Mr. Daubenspeck of FCB says, "There are so many cable networks, they're cannibalizing each other. We have 18 networks scrapping for a limited amount of dollars."

Another senior cable executive points to agency media planners and buyers, who he says "are not creating fair cable budgets and are pitting networks against each other for existing dollars. They are driving down prices, resulting in a blood bath."

The industry's best hope to reduce predatory competition may be to develop the total market—and the number of ad dollars allocated to it. "Cable networks have not been able to develop a solid foothold in the natural media buying process," Douglas Greenlaw, vp-sales, CBN Cable Network, says. "We have not been able to concentrate on developing new business. At our current level of sales, we're still going after shares of current cable business."

Clearly, internal battles cannot help the industry. But, says Robert Alter, president of the Cabletelevision Advertising Bureau, "Broadcasting has always been competitive—a supply and demand industry."

Mr. Alter senses "a growing feeling among networks that competition is counterproductive."

But if cable networks should avoid internal competition, where should they be focusing their competitive energies?

The CAB and several cable programers, most predominantly TBS, are taking on the broadcast networks and focusing their sales pitches to advertisers on cable as being an ideal supplement to the erosion of commercial network viewership. However, several ad executives question the long-term wisdom of cable's emphasis on gross numbers and the erosion issue.

"Cable is taking too much credit for erosion," says Jayne Zenaty, manager-cable research, Leo Burnett Co., Chicago. Erosion is a sign of many changes in the media environment. Cable just happens to be there, and it is part of the solution. Feathers get raised when cable presents itself as the *only* solution."

In selling itself as an alternative to network erosion, cable also may be positioning itself in a role it cannot satisfactorily fulfill.

Avrum Geller, director-marketing services, Block Drug Co., Jersey City, N.J., says broadcast tv advertisers primarily are dealing with mass audiences. "Cable still represents segmentation, and therefore is unlikely to get its corresponding share of mass dollars."

Although the erosion issue dominates cable's competitive efforts, the InfoMarketing Group, which surveyed 350 senior agency and advertiser executives, found that only one-third of those executives consider supplementing broadcast network erosion to be cable's greatest strength. More than 50% believe cable's real value is its ability to reach segmented audiences. Sixteen per cent identify sponsorship opportunities and infomercials as cable's most important offering, or, as Ms. Zenaty, says, "its qualitative attractiveness."

BBDO's Mr. Semsky says 99 of the top 100 advertisers use cable (General Electric being the lone holdout). He says cable's real competitive strength is to tailor the sale of ad slots to individual clients. "We can do things in cable that cannot be done in broadcast," he says. "The cable networks should be preaching this, not selling more of the same."

Ironically, cable's concentration on broadcast erosion may be aiding one of its more potent competitors. Although broadcast network audience erosion is an accepted fact, barter syndication and independent tv stations are viewed as the primary outlets for supplementing this loss.

"Cable has created the recognition of the need for alternatives by focusing attention on the erosion issue," Mr. Daubenspeck says. "But advertisers are looking for viable alternatives to network tv, and if syndication is a viable alternative, they'll turn to it. Cable has also promoted the growth of independents and syndication, by breaking up the monopoly of Channels 2 through 7 dialing and by enhancing the uhf signal.

"A few years ago barter syndication ratings weren't acceptable," he says. "Cable, with its .5 and 1 ratings, has become respectable, [but] advertisers have realized that 5 and 7 ratings are available through syndication."

CBS' Mr. Poltrack says cable's and barter's comparative effectiveness as complements to broadcast tv must be analyzed. "Both have their strong points, but they think they're in competition with network tv; they're really in competition with each other.

"Advertisers traditionally filled in their network buys with spot tv," he says, "and more recently began using cable, resulting in the initial infusion of cable revenues. Now dollars are going to barter syndication."

Most of the broadcast dollars being funneled to cable as a supplement to audience erosion are going to those cable networks that mimic broadcast. WTBS is a broadcast independent superstation and CBN Cable, Virginia Beach, Va., is programed like one.

Both are very effective in reaching broadcast-like audiences and both are profitable cable networks. Mr. Poltrack identifies ESPN's audience as being like broadcast sports' audiences, and CNN's as looking like broadcast news' audiences.

So the over-all ad revenue picture becomes even more unfocused. Barter syndication and some cable networks are competing effectively for cable dollars. But will only those cable networks that imitate broadcast tv networks survive?

Audience research holds the key

The cable industry appears convinced that the survival of its members depends on more research on the erosion issue, with the vast proportion of research dollars committed to A.C. Nielsen Co. household ratings.

Cable networks are being pressured into reaching the critical audience mass (15% of the total tv households) required to be metered by Nielsen. While Nielsen household data may help ad executives justify cable buys, it is apparently not enough to generate major defections from broadcast.

"Ratings give us information that a set is turned on and tuned into a specific network," says Ira Tumpowsky, vp-new media technologies, Young & Rubicam, New York. "After that, we have little to go on; little demographic information and little qualitative data. When you discuss selective environments, there has to be more qualitative information. The lack of information makes it difficult to assess cable's real worth."

Bates' Mr. Brandt disagrees: "With household information coming in on a regular basis for several networks, we can ensure that we are getting value for our dollars spent." Bates recently recommended that its clients update their budgets, shifting 15% of their media dollars to cable, instead of the previously suggested 5%, to supplement broadcast network erosion.

In general, however, ad executives concede that far more information is required before they confidently can make larger cable commitments. Gregory Blaine, director-new communications technologies, Foote, Cone & Belding, Chicago, has been outspoken in his belief that cable has sufficient documentation. However, he adds the ubiquitous caveat: "For the amount of money being committed."

To boost the dollar amount spent, cable networks need to be concerned on two fronts. First, revenues for the major cable networks probably won't come into line with viewing levels until more data is available. And, unfortunately, satisfactory research is unlikely in the near future.

Norman Hecht, president of Information & Analysis, a cable research company, pinpoints the problem as one of sample size. Current meter samples, he says, "are inadequate for the new media environment. With the average cable service generating small viewing audiences, agencies are being asked to make buying decisions with information based on very few metered homes. Information on what to buy in the cable universe and how to compare one service to another is inadequate.

"Agencies have to know the ratings," Mr. Hecht says, "and

the networks have to spend $250,000 and more each to generate the information. Agencies and networks have to ask what $250,000 could do in other forms of research."

Y&R's Mr. Tumpowsky recommends that the cable industry and agencies coordinate research efforts, buying data on an as-used basis and performing in-depth local market studies and combining them into a single national study. This process, Mr. Tumpowsky says, will serve the long-term needs of both national and regional networks plus local cable interconnects.

The broadbased cable networks are really in a tough position, Mr. Hecht says. "If they drop Nielsen, they lose what they've accomplished. If they don't get substantially larger sample sizes, they won't grow in proportion to their viewing levels."

The research problem is amplified for the selective-audience networks. If cable's mass networks are experiencing sales difficulties because of inadequate sample size, the inadequacy of data for targeted networks will be even more dramatic.

Mr. James at DDB says household ratings should be expected only of the programing networks that mimic the broadcast networks, such as CBN, USA Cable and WTBS. He holds that the other networks should be sold not on numbers, but on a target audience basis.

"Lifetime and ARTS & Entertainment," Mr. James says, "should not be evaluated on a household cost-per-thousand basis. We need better research to support these networks. Agencies can take advantage of the situation today, because with only household information available, we price networks using this information. We're able to buy selective audiences using mass audience cpms."

Mr. Hecht emphasizes the potential of people meters, which provide some insight into the quality of the viewership, as a possible solution to cable's research woes. "But people meters alone will not be enough without significant increases in sample size," he says. Mr. James adds that "we all recognize the need to go further, but we need more action from the cable networks."

Putting sales skills to the test

Cable's salespeople and management face a difficult challenge. "Cable has not been around long enough for its value to be firmly established," Mr. Alter, CAB president, says. "The law of ad nature brings advertisers to value and to audience. Cable offers value delivered and, therefore, it will continue to grow."

For now, however, Robert Sieber, vp-research, TBS, says, "A mature cable network sells 40% to 50% of its inventory; a starting network sells an average of 20%. Cost per thousand is low in an effort to increase the sellout. Our need is to increase demand."

The viability of cable's ad sales may be a matter of supply and demand. "The reason the broadcast networks can increase their prices," Mr. James says, "is to increase demand for a fixed amount of inventory. The way for advertisers to put a ceiling on broadcast cpm increases is to support the creation of more inventory. It is in the advertisers' interests to support cable networks."

According to InfoMarketing Group's research, ad leaders give high marks to cable salespeople and management for working hard to overcome some difficult obstacles. "Cable salesmanship is three to four times as good today as two years ago," Mr. Daubenspeck says. "There is nothing like adversity to sharpen sales tools, and the networks are trying hard to improve."

Most executives say they believe that cable management's broadcast roots created early problems for the industry. Mr. Tumpowsky says salespeople who brought to cable a broadcast mentality and hands-out attitude did their cable networks more harm than good. Selling broadcast slots is a system of order taking, says Block Drug's Mr. Geller, while selling cable requires a great deal of effort and skill.

David Moore, vp-sales, Lifetime, New York, wants to assure agencies that the networks *are* putting a lot of effort into developing their sales personnel's skills. "We're spending a lot of time educating our salespeople and developing sales skills. There's always room for improvement."

Richard C. Anderson, executive vp-corporate media and programing, Needham, Harper & Steers, New York, says there is indeed room for improvement. "Cable networks have to get down to a numbers-oriented sell in order to get revenues. Yet there is a much greater opportunity if salespeople had a better understanding of how products are marketed and how advertisers use media to market a product."

This claim that the sales efforts of many cable networks are marred by inexperience is echoed by Mr. Semsky. "Salespeople need to understand that advertising is a small part of a client's business. They need to learn more about our clients' businesses and the dynamics of agency and client relationships. "But," he adds, "there have been some very heroic sales efforts by cable networks."

Lloyd Werner, vp, Group W Cable Communications, New York, stresses creativity in his organization's sales efforts for the Nashville Network. Mr. Werner says that when he first started selling for the ABC Television Network in the early 1960s, "we had only 18-to-49 demographics when agencies were buying total adults only. We persisted and, eventually, the agencies recognized women 18 to 49 as their primary demo. We believe the future of advertising today is the integration of commercials into the viewing product.

"We'll continue selling creative opportunities and wait for the world to catch up to us," he says.

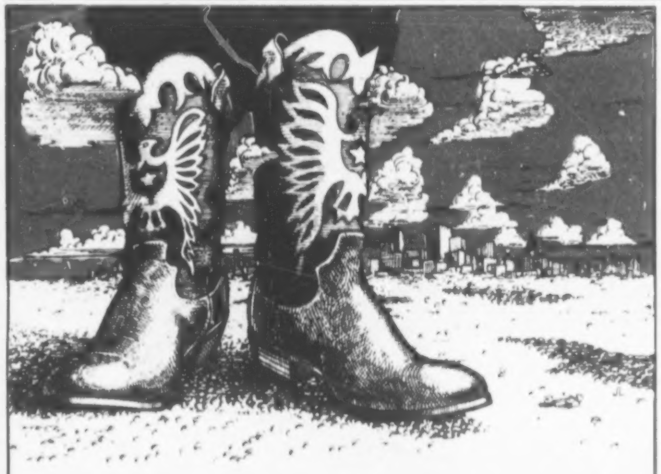
The Nashville Network has been particularly effective in bringing new advertisers into the medium.

Sales for the network are strong and, according to InfoMarketing Group's research, Group W's sales efforts are considered among the most innovative in the tv industry.

Fostering creativity

Advertising executives repeatedly mention cable's unusual and inherent strengths as the primary reasons they advertise in the medium. "Cable is creating a more compatible environment for many brands," Mr. Spengler of Bristol-Myers says. "Advertisers can afford to spend modest amounts of money helping to support the medium

(Continued on Page 38)



It used to be a tall order to catch the eye of the Texas market.
Not any more!

More of the eyes you want to catch are watching TCN—the Texas Cable Network. TCN is the perfect vehicle to target in on the specific audiences you want to reach and eliminate the waste of expensive mass appeal advertising.

Geared specifically to the Texas lifestyle and carried on major cable systems across Texas, TCN provides a variety of informational programming designed to reach upscale interest groups. With a subscriber base of more than 2 million Texans daily, TCN is a cost-efficient way to tap into the important Texas market.

Sure it's a tall order to catch the eyes of Texans, but now you can reach them on the network tuned in to Texas. . .TCN, the Texas Cable Network.

Long spots long shots that pay

Long-form commercials have attracted enough interest to justify a full 24-hour network devoted to commercials. The real curiosity is that viewers appear to be willing to sit and watch nothing but commercials.

Tested last year in Peabody, Mass., this network, called CableShop, already has been rolled out to several cities. Originally, satellite delivery was scheduled for 1986. Viewer reaction has been so positive, however, that Adams-Russell, the network's developer, has targeted national satellite delivery for this year.

Garth Hallberg, general manager, CableShop, says the network has undergone enough testing. "We tested for nine months in Peabody and six months nationally. It's time to become a real player in cable." Mr. Hallberg headed J. Walter Thompson USA's exploration of infomercials with CableShop and became sufficiently convinced of the network's potential to change careers.

"The research [conducted by Polaris Research Associates] is extraordinary," he says. "Originally, many advertisers viewed CableShop as a shopping channel. But it's an information network for traditional package goods and services advertisers." National research established that CableShop has high appeal among those who are aware of it and that "the effectiveness of CableShop infomercials on viewers' awareness, attitudes and behavior is remarkable."

More than one-third of cable subscribers viewed CableShop regularly, with 67% of these viewers watching three or more infomercials a month. The researchers also determined that the infomercials improved attitudes toward both well known and lesser-known brands.

Advertisers, though, are hesitating. Jay James, senior vp-video technology/programing, Doyle Dane Bernbach, New York, is "waiting for CableShop to be in more than 250,000 homes. It doesn't justify a lot of analysis, and clients are not eager to be a part of it."

Arnie Semsky, executive vp, director-media and programing services, BBDO, New York, says, "It will be a long time before CableShop will be used on a regular basis. It has a role, but taking the 30-second creative mentality to a two-minute mentality will take some doing. The messages have to be entertaining as well as informative." However, Mr. Semsky says MTV's short viewing bursts, which are gaining viewer acceptance, complement infomercial viewing.

Mr. Hallberg recognizes that CableShop's growth will be measured, but says he believes initial advertiser and viewer acceptance justifies rapid expansion. "We have to prove to people over and over again that people are watching, and that infomercials have a remarkable impact," he says. "We'll keep repeating our research and advertisers will see their own results." —J.M.

Survival

(Continued from Page 36)

and build franchise positions for themselves."

Mr. Tumpowsky says, "Young & Rubicam looks at cable as a selective audience medium in which we can position clients whose brand personality matches the personality of a specific network." Programs developed for clients and client-originated programing help to provide a prime link between product and medium.

Mr. Semsky says cable's creative opportunities are just now being recognized. "MTV has become a part of the culture," he says. "Young people are becoming attuned to watching television in short bursts. They are accepting heavy repetition and looking at very colorful, lively productions.

"CNN is changing habits as well, by introducing news 24 hours a day, as it's happening," he says. Mr. Semsky is "looking to create commercials that are compatible to the environment in which they appear."

This emphasis on creative opportunities supports Mr. Werner's belief that "cable seems to be the only medium left that allows advertising to be integrated into the programing. Cable brings a whole new perspective to the viewer, and agencies will have to respond with new and different advertising."

To integrate advertising into cable programs, agencies will need to be satisfied with the quality of that programing. The key to this, according to most agency executives, is the networks' ability to produce high quality original programing.

The original programing for WTBS, one of the profitable ad-supported cable services, has done extremely well, Mr. Tumpowsky says. CBN's current programing mix of movies and off-network product "attracts substantial audiences that generate advertising revenues," Mr. Greenlaw says.

Surprisingly, agency and client leaders express positive and optimistic attitudes toward cable programing. There "aren't enough great programs to fill up seven days a week," Mr. James says, "but they are certainly available. And the vertical programing networks are generally of consistent high quality and offer advertisers a real advantage."

Needham's Mr. Anderson says, "One of cable's early errors was that the industry totally overestimated advertiser response and overspent on programing. Now they are finding more sophisticated ways of spreading their investment costs.

"Cynicism," he adds, "says that programing will fall to the lowest common denominator. But that's not happening. Eventually, cable networks will truly give viable options to viewers and advertisers."

Localization wins and loses

National cable networks' difficulties in generating ad support are magnified dramatically for regional networks and local cable systems. However, most industry experts affirm that both will become major elements in the ad mix.

Some experts suggest that local cable advertising may become even more important than national advertising because of advertisers' need and ability to pinpoint audiences demographically and geographically.

"There is tremendous localization in the United States," Needham's Mr. Anderson says. "Markets are more unalike than they are alike. To work out marketing plans, we are often forced to seek common denominators, but we know [that] media work differently in different markets. Business is very local, and local and regional marketing opportunities are very exciting."

Most executives recognize major obstacles to local cable buying within the next few years. Only 20% of all systems accept ad inserts now, and, as Burnett's Ms. Zenaty says, "everyone thinks out-of-pocket costs are low, but the costs per thousand can be very large."

The lack of measurement and the inability to buy complete markets appear to be the major obstacles. "Pricing tends not to have the logic of the pricing of national cable networks," Mr. James says. "And there is very little local measurement worth anything."

The CAB's Mr. Alter says the industry is working on these problems. "Every major multiple system operator has made a commitment to build local sales. They have not thought about advertising as part of their local business, but they now see it as a revenue stream."

Ms. Zenaty says cable's viability as a local ad medium will hinge on interconnects, which must approximate the system advertisers use to place spots on local commercial tv. It also must be priced accordingly, she says.

Cable Networks Inc. is launching interconnects in several markets; Gill Cable has been successful in the San Francisco market for years, and CBS is creating an interconnect in the Chicago market. Other ad hoc interconnects also have been formed in several cities. However, national sales efforts are uncoordinated, and most observers believe the initial support for local cable will come from the retailing industry.

BBDO's Mr. Semsky points to $21 billion spent annually in local newspapers and says he believes local cable systems and newspapers will develop joint ventures, offering both circulation and advertising opportunities.

However, the "Electronic Media Report for the Retailing Industry," published monthly by the American Media Council and Retail Advertising Conference, says, "Television itself is a secondary medium for most retailers. Cable television, therefore, is not a high priority."

The newsletter makes an exception for MTV. "MTV could be considered a specialty medium for juniors' promotions. MTV is having a significant impact on the fashion industry."

Wendy Levine, media director for Bloomingdale's, sums up retailers' general attitude toward cable: "We have a limited budget for tv and don't believe we are thoroughly covering that medium yet. It's not practical to move into cable."

Another strong prospect for local advertising lies in the sports arena. Several new regional sports networks were launched recently and others have expanded into more markets. Although televised sports seems to be overabundant, most agency and client experts say they believe expanded sports coverage will help support the regional networks. According to BBDO's Mr. Semsky, "The more sports there is on television, the more viewers will gravitate to their local teams where interest is highest.

"Regional networks will be successful to the extent that they offer programing not available on broadcast networks," he says. "They also have the advantage of combining subscriber and advertising revenues." ■

4,750,

The rides are rolling across the U.S.A.

An Advertising Age roundup

Memorial Day is the traditional summer kickoff for theme parks across America. From Disneyland in sunny California to Dogpatch U.S.A. in Arkansas, the parks have begun their summer campaigns to make sure fun-seekers know there are attractions all season long.

King's Island, **Cincinnati**, for example, unleashed its King Cobra, a roller coaster you ride standing up. Thirty-second tv spots boasting "Ride it if you can stand it" are airing in Cincinnati, Dayton, Columbus, Lexington, Ky., and Louisville and run through June 10.

Print, outdoor boards and radio support, some featuring surrounding attractions, including the Jack Nicklaus golf course and King's Island Inn. Sive Associates, Cincinnati, is agency for the $2.5 million advertising campaign.

Kennywood Park, outside **Pittsburgh**, tapped Pittsburgh Steelers linebacker Jack Lambert to tout its thrilling message. Outdoor boards in 25 locations show Mr. Lambert upside down on a roller coaster. Tv and radio support, with the tv spots from last year being recycled; they show Mr. Lambert losing a battle with Kennywood's roller coaster. MARC & Co., Pittsburgh, is handling.

Bally Mfg. recently purchased Marriott's Great America in **Gurnee, Ill.**, northwest of **Chicago**, and put it under control of its Six Flags unit. Now called Six Flags Great America, it is promoting a new attraction, the White Water Rampage, with two 30-second tv spots that beckon "Get carried away at Great America." A 30-second radio spot supports. Smith Burke & Azzam, Baltimore, handles. Three additional 30-second tv spots are planned.

Great America is involved in a tie-in campaign with Coca-Cola, a promotion centered around the Rampage. The theme park offers prizes—including free tickets, buy-one-get-one-free tickets, season passes and discount admissions—in specially marked Coke containers.

Jack flips for One Price Sundays
Kennywood

Jack Lambert, all-pro linebacker for the Pittsburgh Steelers, flips for the roller coaster at Kennywood Park outside Pittsburgh in a campaign created by MARC & Co. This is Mr. Lambert's second year in association with the park.

Six Flags has its theme parks spread all over the country. Each has its own agency and promotes specific attractions, according to Allen Edel, director-corporate marketing, although, in total, Six Flags has a $20 million annual ad budget. Six Flags promotes such "family-oriented rides" as the Sarajevo Bobsled (in California and New Jersey) and Air Racer (in Texas and Georgia).

Regional report

Media messages vary, depending on the audience; the bulk is in tv and some radio, print and outdoor.

Della Femina, Travisano & Partners, Los Angeles, handles Six Flags Magic Mountain in **Valencia, Cal.**, while the agency's New York office handles Great Adventure in **New Jersey** (where eight teen agers died recently when fire destroyed the Haunted Castle walk-through attraction).

McCann-Erickson, Dallas, handles Six Flags Over Texas (slogan: "Let us take you away"), which is located in **Arlington, Tex.**, and has a $1.5 million ad budget allocated mostly for tv. Radio and newspaper support special promotions, including teen-agers' concerts. J. Walter Thompson USA, Atlanta, handles Six Flags Over Georgia (slogan: "Come see what we dreamed up now") in **Atlanta**, which gets a $2 million budget used primarily for tv, with radio and newspaper support for special promotions.

St. Louis-based Six Flags Mid-America uses Stolz Advertising. Media for Mid-America is placed by Advanswers. Both agencies are based in St. Louis.

There's also Six Flags Atlantis near **Miami**, handled by Steve Walker & Associates, Fort Lauderdale, and Auto World, **Flint, Mich.**, handled by McCann-Erickson, Detroit.

In **Houston**, AstroWorld uses McCann-Erickson's office there and has a budget exceeding $2.5 million. Ads promote a new roller coaster and an Enchanted Kingdom park for adults and children.

There are few genuinely competitive geographic markets, but one is the **Los Angeles area**, where there is competition among Six Flags, the Universal Studios tour, Disneyland, Knott's Berry Farm and others.

One of those competitors, Walt Disney Productions, promotes attendance at both Disneyland in **Anaheim, Cal.**, and Walt Disney World in **Orlando, Fla.**, through special-events programing.

This summer, Disneyland celebrates Donald Duck's 50th birthday, and a tv campaign is planned in Southern California, plus additional spending in "gateway" cities, including **San Francisco**, **Las Vegas** and **Phoenix**.

A new Alice in Wonderland attraction opens and an "America the Beautiful" presentation, called "American Journeys," presented by Pacific South Airways, opens in July, the company said. Vista Advertising, an in-house agency, handles.

Disney is considering potential sites for new theme parks in Europe and has a licensing arrangement with Oriental Land Co. for Tokyo Disneyland.

"You cannot compete with Disney. It's the No. 1 attraction in the universe," said Thom Stork, marketing director of Busch Gardens in **Tampa, Fla.** But Mr. Stork said Busch Gardens' ad budget has increased in recent years, due to inflation and for test-marketing programs to youths and senior citizens. The youth crowd gets a Saturday morning tv cartoon effort. Needham, Harper & Steers/USA, Chicago, handles.#

Ad believability low

(Continued from Page 3)

lievable"), the mean score in February was 2.31, or slightly above "somewhat unbelievable." In general, the higher the income level, the lower the believability ranking. People in the South Central states ranked believability higher than the national average, and people in the western region rated it lower than average.

Respondents also were asked which media they rely on most to make day-to-day purchases and major-product purchases. For day-to-day purchases, newspapers continued to be the leading source of information. But for major purchases, more people listed in-store advertising.

In both instances, Yellow Pages advertising has continued to increase in mentions across the three studies.

Tv advertising as a source of day-to-day purchase information is more important among younger people and minority respondents. People in the 25-to-34 age group report more reliance on magazine advertising than do other groups.#

NCTA's convention

(Continued from Page 3)

would let cable operators set the price of their basic service without local restrictions.

"Our cost of basic service has gone up and we want to pass that on to the subscribers," says Ed Bennett, exec vp, Viacom Cable.

Another means of gaining incremental revenue is a stepped-up drive to crack down on illegal theft of service, said David Schreff, director of affiliate marketing for Showtime/Movie Channel.

According to Mr. Schreff, the cable tv industry is losing $500 million to $700 million annually through theft of service.

A Showtime survey of four states revealed that as many as 20% of the subscribers in a cable system may be stealing the service's signal.

Industry executives also fear they soon may lose paying subscribers to home video. "Almost in the last six months alone, the videocassette market has doubled. I find that a little concerning," says Mr. Bennett.#

Set goals, then test

NEW YORK—Marketers can take the controversy out of testing copy for tv if they define their objectives better.

That's what Joseph Eastlack Jr., group manager-marketing research, Campbell Soup Co., told members of the Advertising Research Foundation at a conference on tv copy research in New York May 30.

He said that copy testing often is controversial because the purpose of the advertising is not defined clearly in the first place.

There isn't any field in marketing and advertising research subject to more opinion and controversy, he said in explaining why the association is devoting two days to the subject.

Researchers can argue for hours over which type of service proves to be the most valid, Mr. Eastlack noted.

Advertisers, he said, should determine whether the purpose of the commercial is, for example, to increase awareness, gain trial, remind consumers to buy or use up, encourage repeat purchase, reinforce present users' attitudes or resolve doubts.

When these are determined, then what the measure should be is quite clear, he indicated. For example, if the purpose is to increase awareness, advertisers should measure impact; if it is to gain trial, measure impact, name registration and benefit recall; if it is a reminder, measure the saliency to the use occasion.

Campbell, he said, has put this to work in its copy testing.

Mr. Eastlack said he is just arguing for a little sanity. "We just need to back up and do some homework before we decide on using a certain method of research."#

New entrants bring tears to Visine market

By NANCY GIGES

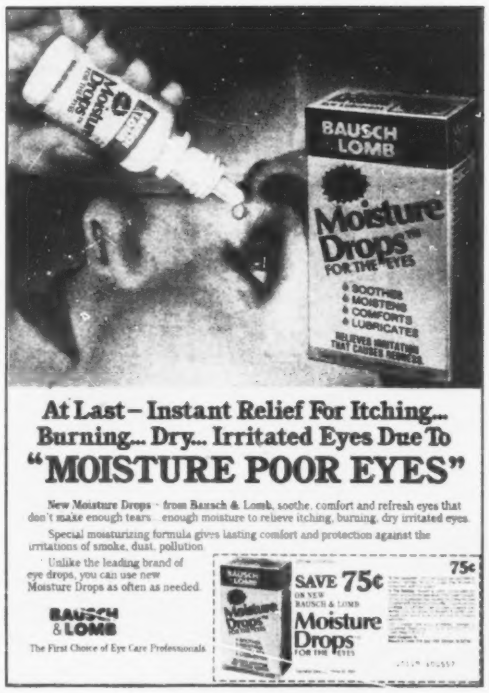
A new category of eyedrops is drawing interest from marketers that may be trying to cut into the lucrative Visine business.

Rochester, N.Y.-based Bausch & Lomb and Ketchum & Co.'s Bio-Products, New York, both are testing "tear replacement" eyedrops for people whose eyes don't produce enough tears.

Products such as these have been marketed professionally by eyecare specialists to contact-lens users for some time. There has been virtually no consumer advertising on these items.

Because the category is small, marketers view repositioning to general consumers as an attempt to

(Continued on Page 74)



For eyes that don't make enough tears, several marketers now are offering "tear replacement" drops. Bausch & Lomb is supporting a test of its Moisture Drops with this ad in Austin, Tex.

Competitors shrug off big AT&T promo

By ROBERT RAISSMAN

American Telephone & Telegraph will launch a multi-million-dollar campaign next week to support a new premium promotion.

But MCI Communications, its major competitor for long-distance phone customers, said it will wait and watch before deciding whether to get into a "dialing for dollars" showdown.

While reserving the right to make a similar move, MCI execs were highly skeptical of AT&T's promotion, calling it a "gimmick." They said the promotion was a clear sign that AT&T has given up the price battle. MCI has been stressing its lower prices in ads (AA, May 28).

Another competitor, GTE Sprint, a unit of GTE Corp., called the AT&T promotion a different type volume-discount package. Sprint says that since last January it has been offering a discount pricing plan, including volume discounts and no monthly fees.

There are 200 separate companies capable of providing discount long-distance service. However, none of them has yet made their presence felt in the way AT&T, MCI and Sprint have. Two

Promo pinch at Gen. Mills?

By JANET NEIMAN

General Mills is disclaiming any liability on the results of a sweepstakes it advertised last month and then canceled a week later, but a source said there might be millions of dollars in winning game pieces outstanding.

General Mills called that report "ridiculous," saying it had "no significant liability" as a result of the sweeps cancelation. A

Silver's in agency hunt

By SCOTT HUME

Add Long John Silver's Seafood Shoppes to the list of major restaurant chains shopping for agencies. That list already includes Pizza Hut and Godfather's Pizza.

The 1,342-store Long John Silver's chain, owned by Lexington, Ky.-based Jerrico, has terminated its relationship with Jordan, Case & McGrath, New York, which had handled the $20 million broadcast creative (only) account since 1980.

Jerrico's in-house Abbott Advertising handles media placement and newspaper advertising, and will continue to do so after a new creative shop is named.

Meanwhile, Pizza Hut indicated creative will not be the deciding factor in its search to replace Foote, Cone & Belding, Chicago, on its $20 million national account (AA, May 7). That chain last week narrowed the list of finalists to Ogilvy & Mather and Ammirati & Puris, both New York, and Chiat/Day, Los Angeles.

Pizza Hut vp-advertising Dave Ropes said the three presentations will involve "only agency personnel and business strategy observations." No creative presentations will be prepared.

"I think that's more professional," he added. "We're looking at the long-term rather than a single campaign."

A Jerrico spokesman said Jordan, Case & McGrath had been dropped because it "was not considered large enough" to handle "additional directions" Long John Silver's intends to pursue.

But some restaurant industry observers saw more than coincidence in Jerrico's move so soon after Pizza Hut left FCB open to find a new restaurant account.

They point to the recent appointment of Anthony Lavely as Jerrico's senior vp-marketing (AA,

Tab moving to SSC&B

By NANCY GIGES

Just two weeks after unveiling a new Tab campaign introducing a new formula, Coca-Cola USA has moved the diet cola to SSC&B, which also handles Diet Coke.

Both SSC&B and the former Tab agency, McCann-Erickson, are part of the Interpublic Group of Cos. The Tab budget is estimated at $50 million.

Brickbats fly in California primary

Vote trail ends with harsh talk

By JENNIFER PENDLETON

'84 Marketing the Candidates

Los Angeles—The Democratic presidential candidates, ignoring calls to foster party unity, pushed their advertising bandwagons even further down the nasty track last week while campaigning in the make-or-break California primary.

In tv and radio commercials airing through the June 5 primary, both Walter Mondale and Sen. Gary Hart blast each other by name.

The importance of this last major primary may have spurred the candidates to pull no punches. The California race, observers agree, is too close to call.

According to a *Los Angeles Times* poll published last week, the two candidates are virtually even in the nation's most populous state, with Hart preferred by 29% of the Democrats likely to vote, compared with Mondale's 28% and Jesse Jackson's 11%. About 30% of the Democrats were undecided.

In addition, with the campaigns

(Continued on Page 70)

N.J. a 'tough buy'

By MARK LIFF

The Mondale and Hart campaigns found New Jersey to be a difficult media buy as they headed into the state's June 5 primary.

"It was a tough buy, an expensive buy," said Eleanor Tillinghast, a media consultant to Sen. Gary Hart's campaign. "It was difficult to target because we were not dealing with the local media."

For the candidates, New Jersey is unique because the target audience is scattered all over the state and reachable by broadcast media in New York and Philadelphia, two of the costliest markets.

In addition, there is no Arbitron ratings book for individual New Jersey markets, forcing the candidates to determine a radio station's reach before making commitments.

"From a media standpoint, it was difficult to ascertain who listens to what," said Judy Traboulsi, a media buyer for the Walter Mondale

Suit hits N.J. legal ad rules

By JOSEPH LAURA

HACKENSACK, N.J.—A requirement that ads be presented with "dignity" has touched off a challenge to New Jersey's strict regulation of attorney advertising.

The legal action is the first attempt to overturn a recent state supreme court ruling mandating that all legal advertising be presented in a "dignified manner" and banning all "drawings, animations, dramatizations, music or lyrics."

The suit, filed last week by the Princeton Junction, N.J., law firm of Felmeister & Isaacs, challenges the ruling, which earlier this year upheld the guidelines set by the state's Office of Attorney Ethics.

A state superior court judge will hear the evidence and then present it to the state supreme court, which is expected to hear the case during its fall session.

The state's rules were issued to protect "the integrity of the legal profession and to protect the public from misleading legal advertising," according to the state attorney general's office. The New Jersey Bar Assn. supports the court's ruling.

In arguing for the guidelines, the attorney general's office wrote, "Any consumer-useful facts that might be conveyed by the use of jingles, lyrics, cartoons and the like can be communicated freely and explicitly via the written and spoken word. These devices would offer little if any consumer-useful information and are more likely to attract clients for reasons other than those that are relevant to the selection of appropriate counsel."

One of the plaintiffs, Hanan Isaacs, testified that his firm had used drawings depicting various

abc
WE'RE WITH YOU
WE'VE GOT THE TOUCH
LET'S ALL BE THERE

ABC's "with you" this summer in promos featuring series stars; CBS still has "the touch," and NBC has new special effects for its "Be there."

Networks warm up fall promos

By DIANE MERMIGAS

NBC will resort to special-effects hype, CBS will try to establish more intimate ties between series stars and viewers and ABC will attempt to convert Olympics spectators into regular network fans with animated promos for its prime time shows.

Such will be the principal tactics of the networks in their promotional battle for viewers this summer as they approach the fall tv season.

A lot of things will change about the way the networks market themselves, but Steve Sohmer said his flair for unconventional promotions as senior vp of NBC Entertainment isn't one of them.

"What the competition has failed to grasp is that for the past several years, we have been engaged in the reinvention of the television promotion," Mr. Sohmer said of the NBC promotions that stirred so much interest and controversy last season.

"The humor we have used, the unusual way we have promoted our shows, the tongue-in-cheek picking on the other guys, all have been part of it," he said.

Some in the industry, however, thought Mr. Sohmer's efforts subsided last season after they yielded only lukewarm response and results. Some surmised that top NBC brass became impatient with the gimmickry and requested a more conventional, direct approach. Mr. Sohmer said that's not so.

"Early last season, when we were faced with the failure of so many shows at once, we suddenly had less time to spend on doing unusual things," he said. "But the promotional approaches we tried. . .regardless of whether the shows themselves worked, were very successful."

This coming season, with a revision of last year's call to arms—"Let's all be there"—NBC will enter the realm of special-effects

(Continued on Page 70)

Syndication buys may trim net hikes

By JAMES P. FORKAN

NEW YORK—Barter syndicators, in a break from tradition, have been conducting their own apparently successful version of an upfront tv selling season. It already may have held the networks' children's programing rate hikes to a minimum and many agency execs hope it will do the same for prime time.

According to various estimates, barter syndication's ad volume for 1984-85 could jump by nearly 15% to $350 million or so.

Some agency execs say there is no comparison between that figure and the anticipated $2 billion or so the three networks anticipate. But many agencies are supporting the concept of a barter upfront season as a bargaining wedge for their imminent network purchases.

"The number of advertisers buying 52-week barter syndication flights upfront is staggering compared to previous years," said one high-level exec at a major agency. " 'Entertainment Tonight' is sold out for the year. 'Solid Gold' is gone. 'Hour Magazine' and 'PM Magazine' are sold out on an upfront basis," he said. "There's been lip service about this before, but this year the blue-chip advertisers are really doing it. There's a couple hundred million dollars going into syndication before the network prime time upfront season. That $200 million or so is the money that was going to cover the networks' price increase. It isn't in the market any more, and it's going to force network prime time prices to increase only about 4% or 5%."

The tv networks' sales staffs remain bullish on the upfront prime time package buys, without going into projections on dollar figures or pricing for the various dayparts. Larry Hoffner, NBC's vp-national sales, said that its news upfront is virtually sold out. Pier Mapes, NBC-TV Network president, told his affiliates in late May that NBC, fresh from enjoying double-digit sales gains in the second quarter (due largely to "V" and strong sophomore series in prime time) and a nearly sold out third-quarter, has upfront sales well under way in daytime and sports. ABC's Jake

Chipwich sued by Leber Katz

By GAY JERVEY

NEW YORK—After months of frustrating negotiations, Leber Katz Partners—the agency for Chipwich Inc. since it first began peddling ice cream novelties three years ago—has sued the company for $128,515 in unpaid bills.

In its suit in state supreme court in Manhattan, LKP also charged that Chipwich misrepresented its insolvent financial condition. Chipwich, LKP contends, falsely promised that it could pay its debts in an attempt to encourage LKP to extend it further credit.

The Fort Lee, N.J.-based Chipwich also is being sued in Nassau County supreme court by its former food broker, Vantage Food Marketing of Port Washington, N.Y., which claims that for well over a year Chipwich has owed it about $50,000 in brokerage fees, as well as miscellaneous unpaid invoices and out-of-pocket expenses.

■ Chipwich chairman and founder Richard La Motta termed the LKP suit "self-explanatory."

"We have not had bad words with them [LKP]," he said, "but they have carried us for a long time, and it just came to the point where they wanted their money. We

Mrs. Paul's drops breading

By BRIAN MORAN

Mrs. Paul : Kitchens hopes to bolster its position in the growing low-calorie frozen-fish business by testing seven new entrees in its Light and Natural line.

The Philadelphia-based subsidiary of Campbell Soup Co.—which has been battling two tough competitors for frozen-fish market share claims that its new offerings are free of breading, a first.

Mrs. Paul's began testing the entrees last fall in Harrisburg, Pa., and extended the trial to the St. Louis and Louisville-Lexington, markets in February. The effort has been supported with local tv commercials and inserts in local newspapers and regional editions of *Good Housekeeping*, *McCall's* and *Redbook*, according to George Piszek, senior vp-sales and marketing for Mrs. Paul's. Scali, McCabe, Sloves, New York, handles.

No date has been set for a national rollout, Mr. Piszek said.

The tv spots carry the tag lines: "Seven tempting food entrees that are low in calories and microwavable. For people who love seafood but don't love to cook it." The entrees, less than 300 calories each, are packaged in heat-resistant oven trays or boil bags.

Mrs. Paul's entered the low-calorie fray in January, 1983, with Light and Natural fish fillets. The company backed the Light and Natural fillets with $5.5 million in measured spending last year, $5.2 million of which went for network tv.

The new Light and Natural entrees—which include shrimp, scallop and sole dishes—are positioned to compete against low-cal single-dish offerings from Van de Kamp's Frozen Foods and Gorton's, as well as Stouffer Foods' Lean Cuisine line (which includes two fish items among its 10 entrees).

Gorton's, the Gloucester, Mass., subsidiary of General Mills, rolled out its low-calorie line, Light Recipe, last August. Gorton's supported introduction of the nine Light Recipe varieties with measured spending of $2.1 million in 1983.

Mrs. Paul's holds about 27% of the $500 million frozen prepared seafood market. Van de Kamp's, with 21%, is second, followed by Gorton's at 16%.#

Frozen fish sales (tonnage)

Frozen fish tread water, SAMI says

HONOLULU—New-product activity in the frozen fish category has not kept pace with the rest of the frozen food section, an executive of Selling Areas-Marketing Inc. told members of the National Fisheries Institute at a convention here recently.

New frozen fish items accounted for 1.83 million pounds during the year ending March 2, but those items accounted for only 0.6% of total frozen fish retail sales, according to figures supplied by Alan B. Miller Jr., vp-sales services manager at SAMI.

Of the 70 new brands of frozen fish introduced since the beginning of 1980, only two million-dollar brands have been launched, he said, while 58 million-dollar brands in other frozen categories have been introduced.

Mr. Miller told members of the institute that frozen fish and frozen fish entrees represent one-third of the $2.8 billion retail sales in the processed fish category (which includes canned and frozen fish), and 29% of the more than 1 billion pounds.

Canned fish, including salmon, sardines, shrimp, tuna and other products, comprise most of the category, he said.

- Dollar sales of frozen fish have increased during the 1980s, partially because of "a change in the mix of products offered featuring new high-quality items, especially among breaded and battered fish sticks, and gains in higher-price frozen shrimp in 1983."

During 1983, he said, frozen fish tonnage was 7.5% below the 1979 level.

In the huge canned fish category, Mr. Miller said dollar sales of canned tuna have increased 16%, but pound sales have increased only minimally.#

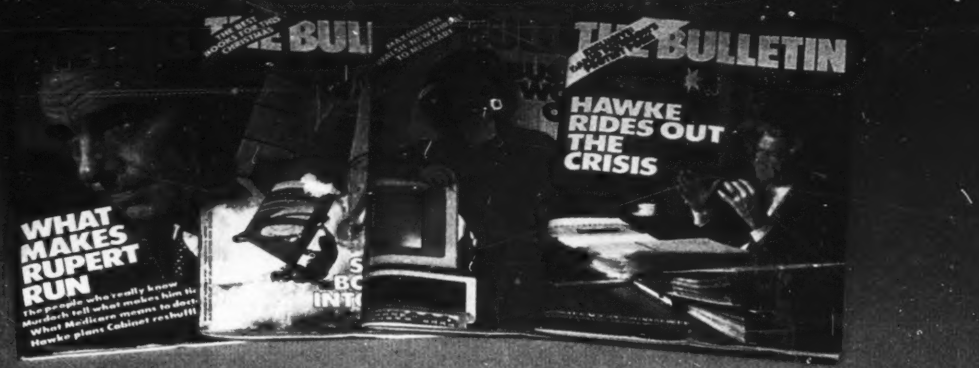
GO AMERICA
Let's bring back the WINNING SPIRIT!

The top of the Australian market:
THE BULLETIN reaches it best.



Australia's standard of living is high. And the gap between rich and poor is less dramatic than in other developed countries. But don't be mislead. For even here the core of a selective advertiser's market is identifiable by income, education, job responsibility, life style and purchasing habits.

The key to reaching those primary sales prospects is THE BULLETIN, the 103 year-old news weekly that prosperous, well-placed Australians depend upon for commentary, interpretation and lively journalistic coverage of their own country and the world.

Atypical

THE BULLETIN's audience is not a cross-section of 15 million Australians. Compared to the national average:
- Over three times as many BULLETIN readers earn $30,000+.
- Twice as many BULLETIN readers plan to take an overseas trip.
- Nearly one and a half times as many BULLETIN readers bought a new car in the last twelve months.
- Two-thirds more drank wine in the last week.

It is also unmatched among Australian media. More people in the $30,000+ income group read THE BULLETIN than any other news/business publication—40% more than Time, more than twice as many as Newsweek, and 32% more than The Financial Review.

Ahead of the pack

Advertisers, both local and international, recognize what THE BULLETIN can do for them. Compare its 1983 performance with the Australian editions of Newsweek & Time: 206% more pages than Newsweek, 87% more than Time. In revenue, 483% greater than Newsweek, 62% more than Time.

That means THE BULLETIN attracted more dollars *and* pages than the local editions of Time and Newsweek combined.

In good times and bad

In periods of economic uncertainty, just as in boom times, there is an audience for quality products and services, for business and personal consumption. These are the people who turn to THE BULLETIN. And so should you.

You can gain even greater impact by adding a supplementary schedule in Australian Business, Australia's fastest growing management magazine.

U.S. wine industry uncorks sales hike

By JOHN C. MAXWELL JR.

The U.S. wine industry increased its shipments by an estimated 2.4% in 1983, accounting for a total of about 560 million gals.

California's volume rose 1.1% but without the inclusion of California Cooler would have declined slightly. Other states' shipments buoyed the domestic market, which finished the year up an estimated 1.1% over-all. Shipments of imported wine to the U.S. rose 7.2% and now account for over 23% of the market, up from 22.2% in 1982.

Per capita consumption of wine in the U.S. was up in 1983 after showing a slight decline in 1982. The preliminary figure for last year is 2.41 gals. per person. The warm summer weather and the popularity of wine coolers aided wine consumption, as well as other beverages such as soft drinks.

E.&J. Gallo, the No. 1-ranked producer by a wide margin, continued to increase its market share and volume. Gallo's shipments rose 6.5% and it gained one percentage point in terms of market share. R.J. Reynolds' Heublein wine operation (formerly United Vintners) experienced a shipment decline of 16.8%, while losing share slightly. Comparisons were difficult because last September, Heublein divested its lower-price domestic wine brands. The operations retained by Heublein, chiefly Inglenook wines, increased shipments 1.9%.

Heublein retained the No. 2 position ahead of The Wine Spectrum, which was acquired by Seagram from Coca-Cola in 1983. Results were mixed as far as the rest of the top 10 domestic producers were concerned. Franzia fell from seventh to ninth place, as Monarch and Guild moved up to seventh and eighth, respectively. The rest of the rankings in the top 10 were unchanged from 1982.

California shipment figures may be inflated somewhat due to the tremendous success of wine coolers, particularly California Cooler, a combination of wine with carbonated citrus flavorings, which has enjoyed tremendous success since it was introduced by California Cooler in 1982.

In 1983 this brand, which now accounts for about 80% of the wine cooler market, had sales of approximately 5.4 million gals. compared to 400,000 gals. in 1982. The 1983 figure represents about 1.5% of the California market and about 1% of the total domestic market. Had it not been for the inclusion of California Cooler, the state's shipments would have been down about 0.3%.

Imports gained a share point in 1983, to 23.2% of all wine consumed in the U.S. Imports are expected to gain again in 1984; by year's end they should account for over one-quarter of the market.

Last year's strong performance was basically a result of the same factors that were at play in 1982: The continuing strength of the dollar, gluts in European markets in the face of declining per capita consumption in some countries and lower production and marketing costs, thanks to European producers being subsidized by their governments.

All of these factors combined to increase the price attractiveness of imported wines to the U.S. consumer.

In addition, wines such as Riunite and Cella seem to have found a special niche by offering consumers in a nation accustomed to soft drinks just what appeals to them: A fruity, sweet, lightly carbonated wine that is served cold.

U.S. wine market: Sales and shares

Shipments of imported wines grew faster in 1983 than the domestics. [1]Both Paul Masson and Wine Spectrum now owned by Seagram. (Combined 1983 volume would rank second). NC—Not comparable. [2]As of 1982, Sierra Wine Co. includes Perelli-Minetti. [3]Concannon transferred its accounts to Pacific Land & Viticulture in 1982 and re-emerged as Concannon in 1983. Figures are in millions of gallons and share of market. *Source: John C. Maxwell Jr.*

It has become increasingly difficult for domestic producers to combat the continued erosion of the U.S. market by imports.

Although pressure for passage of the Wine Equity Act and similar types of legislation has increased, it is doubtful that a tax will be levied on European wines because wine is not a major agricultural product in the U.S. as it is in Europe.

If the U.S. instituted such a tax, the EEC could retaliate by instituting tax penalties on certain U.S. agricultural products such as soybeans. About the only thing domestic producers can do until the dollar levels off somewhat is fight imports through price reductions.

Another reason for the growth of imports has been their increased marketing pressure on domestics, possibly a result of better margins and government subsidy programs.

Domestic producers likely will respond with better in-store shelf and floor presentations for their products. There is also a strong possibility of the reestablishment of generic wine products, since it appears that price consciousness now is overriding brand loyalty. Also, the continuing pressure eventually could result in consolidations of a number of U.S. wineries.

France showed the largest increase in wine shipments to the U.S. in 1983, with its volume up 24.6%. France now accounts for 19.5% of the import market. Italy, the No. 1 exporter to the U.S., increased shipments by 2% but lost share slightly. Germany and Spain also posted gains in 1983—14.2% and 4.3%, respectively. Portugal was the only one of the major wine-producing countries to experience a decline in 1983, with shipments down 8.2%.

Domestic wine marketers should continue to have a rough time for at least the next two years. It appears there will be another large grape crop in 1984, and growers will suffer as a consequence.

One bright spot may be that baby boomers will support the expansion of the wine market, particularly table wines, over the next decade as about 2 million legal-age consumers are added to the market each year.

The U.S. may never reach the per capita consumption levels of many European countries, since about half the wine consumed in this country is accounted for by 4% of the population, but there is plenty of room for expansion for producers who can withstand the heat of these trying times.

Depending on the strength of the dollar and consequently the level of imports, the industry can be expected to grow by 2% over the next two years, with much of this coming from white wines. Whites now are estimated to represent about 65% of the total U.S. market as compared to about 19% for rosé and 16% for red. White wine will continue to grow, as evidenced by industry plans for many new-product introductions in that area.#

New spots for Atari—focusing on data-sending capabilities—again feature the familiar Alan Alda.

Computers borrow on past

By BRIAN MORAN
and BOB MARICH

CHICAGO—Two major home computer marketers, geared up with plans for heavy advertising support, unveiled "new" machines this week that clearly smacked of something old.

Commodore Business Machines and Coleco Industries displayed the two computers—overhauled versions of unsuccessful products—at the summer Consumer Electronics Show here. A third major computer, from Atari, was discussed but not shown before the 90,000 people attending the four-day show, which ended June 6; Atari is not expected to ship its machine until the Christmas season.

The reformulated Commodore and Coleco entries, the most significant new computers at the show, indicate that the once-frantic pace of product introduction in the home computer industry has settled down.

West Chester, Pa.-based Commodore, the home computer industry leader, mounted a lavish exhibit at the show to announce its Plus/4 computer, essen-

Helene Curtis carries Atune in haircare

By PAT SLOAN

Helene Curtis Industries, making yet another entry in the new-product-filled haircare market, is preparing a national introduction in August of a line called Atune.

The line—comprising shampoo, conditioner and aerosol and non-aerosol hair spray—will join Curtis' established Finesse and a host of relatively new products.

Retail sources said Chicago-based Curtis will support Atune, aimed at women aged 30 to 50 with permed and color-treated hair, with $13.5 million in tv advertising, about $4.5 million in print and $30 million in promotions.

A spokesman for Helene Curtis declined to comment on Atune, and it is unclear which agency will handle the product. Executives at Backer & Spielvogel, which handles Finesse, said they do not have the Atune account.

The higher-price Atune—in the $3 to $4 range—is coming at a time when shares of low-end products are declining.

The "plethora of new-product launches" and the "quantity of promotional merchandise" that has accompanied them are taking their toll on that end of the market, said Diana Temple, an analyst with Salomon Bros.

She pointed out that food-store dollar shares for Curtis' economy-price Suave dropped from about 8.9% at the end of 1983 to 7.2% in March of this year.

At the same time, the more pricy Finesse had a 4.4% dollar share in food stores at the end of March, down only slightly from a 4.8% share in December.

Revlon's Flex, another less expensive brand, also declined in share from 6.2% to 5.2% in food-store sales.

The new entries that Atune will face include direct competition from Perma Soft, another line aimed at women with permed hair. The brand, marketed by Minneapolis-based La Maur, is also in the higher-price range.

Other recently introduced products are Johnson & Johnson's Affinity, Revlon's Hair's Daily Requirement, Lever Brothers' Dimension and Andrew Jergens' Squeek.

A recent study by Fairfield, N.J.-based Charles H. Kline & Co. noted that lines like Perma Soft, Affinity and Squeek—each targeted toward a specific population segment—dominated new-product activity in 1983 and can be expected to do so for the next few years. "Segmenting of products

DYR extends Far East reach

By DENNIS CHASE

DYR, the joint venture between Dentsu and Young & Rubicam, will announce tomorrow that it is opening new offices in Hong Kong and Singapore. The agency will accomplish this by taking over its parents' offices there.

The offices will open on July 1 with $21 million in billings from Y&R's Hong Kong agency and more than $12 million from Y&R in Singapore.

Dentsu will not reveal its billings in those locations, but a news release claims that, after the consolidation, "DYR will rank among the top three agencies in these markets." DYR billed $220 million worldwide last year.

The agency also plans to open an office from scratch in Australia before the end of the year and possibly others in Thailand and Germany—DYR's first in Europe—after that.

"We're moving faster than any agency I know of," says Alexander Brody, president and chief executive officer of DYR, which currently has offices in New York, Los Angeles, Tokyo and Kuala Lumpur.

The new agency will inherit Y&R's clients in Hong Kong and Singapore. They include Du Pont in both Hong Kong and Singapore; also in Hong Kong, Colgate-Palmolive, Johnson & Johnson, Hong Kong Tourist, Richardson-Vicks, Westin Hotel group and Time, and in Singapore, Eastman Kodak.

It also will inherit Dentsu's in-

Tanner Co. used sex, cash bribes: Lipton

By NANCY GIGES
and GAY JERVEY

Two former employes of Thomas J. Lipton Inc. allegedly funneled thousands of dollars in payoffs from the former William B. Tanner Co. into a pair of sham consulting companies, Media Counselors Ltd. and East Shore Marketing Inc.

The payoffs, according to Lipton, allegedly ran from cash to sexual favors to exotic birds.

Fresh details about the Tanner scandal, which rocked the world of media barter services last summer (AA, Aug. 15, *et seq.*), are starting to emerge now that Lipton has brought what is apparently the first lawsuit in the affair.

In legal papers on file in the Newark, N.J., federal district court, Englewood Cliffs, N.J.-based Lipton alleged that Tanner showered gifts on Norman Osborn, former director of Lipton's media department, and Stuart Kaufman, former media manager and Mr. Osborn's assistant.

According to the lawsuit, the list of illegal payments included "cash, automobiles, trips, the favors of women and other gifts" in return for using Tanner's media barter services.

The bribes and kickbacks began prior to 1975 and continued through 1982, Lipton charged. Also named as a defendant was Media General Broadcast Services, Tanner's corporate name since its '82

Time limit stymies VOA research bids

By DAVID SNYDER

WASHINGTON—After a 20-year hiatus, the Voice of America is preparing to resume broadcasts to Western Europe, but U.S. market research companies say it has allowed so little lead time on its audience research contract they are unable to submit credible proposals.

Funding for the resumption of English-language programing to Western Europe has been approved by Congress in this year's United States Information Agency budget.

Forty years after the D-Day invasion, USIA will try to cultivate relationships with a new generation of Europeans.

The agency's request for audience research assistance noted that Western Europeans already have access to a wide variety of private and government media. Given this environment, it said, VOA's European success will depend on effective use of modern program-oriented research and marketing techniques.

Invitations to bid on the negotiated contract were published April 30, with a 30-day deadline. At deadline for bids, several major organizations confirmed they are nonbidders despite strong interest.

Large agencies and research companies, including the Gallup Organization, J. Walter Thompson USA and Needham Porter Novelli, an affiliate of Needham, Harper & Steers/USA, say they found the 30-day lead time unrealistic for a proposal covering seven countries from the U.K. to Norway.

Some said they requested an extension but were unsuccessful. "We wanted to bid on the project, but in such a short time we couldn't have done a credible job" said Gallup Organization president An-

Paddington reaches for Pepsi exec

By GAY JERVEY

Paddington Corp., the importer of Baileys Original Irish Cream and J&B scotch, has named a Pepsi-Cola Co. executive as its new vp-marketing, the first step in a plan to double Paddington's U.S. sales in the next five years.

Chuck Nardizzi—an 11-year Pepsi alumnus who previously worked on package goods accounts at Young & Rubicam—was Pepsi's director of consumer promotions. He will join his former colleague, Peter Thompson, a onetime top Pepsi executive who six months ago became Paddington's exec vp-chief operating officer. Mr. Nardizzi's new position has been vacant since early this year when Robert Suhr left the company.

In addition to hiring executives with package-goods-marketing expertise—a growing trend among distilled-spirits companies—Paddington will accelerate new-prod-

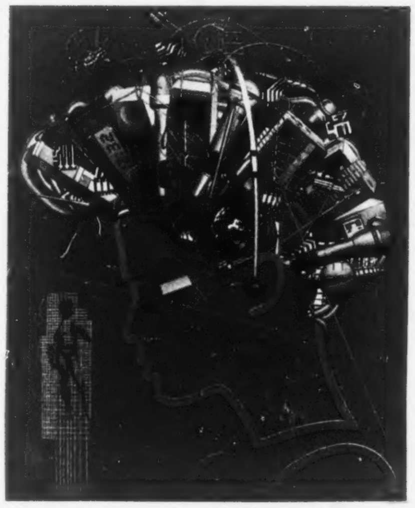
8 Personal computer marketing goes global
The world market for personal computers offers up a few surprises and forces flexibility in advertising in the different countries.

10 Three waste no time on fast track
Three young achievers in the advertising-marketing business have thrown themselves head first into their careers and have rapid advancement to show for it.

Special Report

Consumer Electronics



15 New technologies grab for consumer attention
The consumer electronics industry is in the midst of an unprecedented buying frenzy that has most marketers smiling and pushing even more new products.

16 Software putting computers to work
Software designed for use on the home computer is changing to reflect shifts in the whole consumer electronics industry. Productivity is joining entertainment as important functions for the home computer.

24 Personal robots ready to lend a helping hand
Personal robots are expected to represent a more than $2 billion market by 1990. The droids will help around the house, play with the children and more.

33 Tv sets wising up with innovations
Within five years, almost all new tv sets will be stereo-capable and computer-smart.

Consumer Electronics report coordinator: Cecelia Reed

6 James Brady
6 Words from Gartner
12 Strategic Marketing
12 Parting Shot

To our readers

In writing today's lead Magazine article on the challenges of marketing personal computers internationally, Daniel Burstein was aided by reports from ADVERTISING AGE correspondents around the world. Among the most intriguing of these—and one worth a bit more space than we were able to give it in Dan's article—is that filed by Laurel Wentz, who covers Latin America and is based in Sao Paulo.

Laurel, who joined AD AGE as a fulltime correspondent in 1982 after having been a South American stringer for McGraw-Hill World News and *Time* magazine, confined her report to Brazil—but that Latin giant is a story in itself.

Consider, for example, that personal computer sales in Brazil have grown from 240 units in 1981 to an estimated 188,000 this year. That's only part of the tale, though. We'll let Laurel tell it:

"At first glance, Apple appears to have cornered Brazil's fledgling personal computer market with models called Apple II Plus, Appletronica, Elppa [Apple spelled backward] and a profusion of familiar six-color Apple-like logos. They are all ripoffs.

"Brazilian law bans multinationals from producing mini and microcomputers, leaving a product area that is growing rapidly to local companies with little, if any, technology of their own."

Laurel goes on to quote a Brazilian journalist who edits a computer publication: "Most personal computers are copies of Radio Shack, Apple or Sinclair models, and IBM's PC is beginning to be copied. They [the manufacturers] buy a computer abroad, open it up and make a copy, not as good as the original. It's scandalous."

Scandalous or no, ripoffs of American personal computers are prevalent not just in Brazil, but in other parts of the world too, among them Hong Kong, as Dan Burstein points out in today's article.

But taking a Pollyanna viewpoint, one might even find some good in this rather nefarious activity: To wit, isn't it nice to know that there are still made-in-American products that others *want* to copy?

Videotex here to stay?

Rance Crain's column "Videotex: 2-way ticket to nowhere" (Parting Shot, May 10) was insightful, but (understandably) missed one of the most obvious truths about Viewtron known to most local observers: Viewtron's advertising stinks!

While most of Viewtron's (currently 980) subscribers agree the database is excellent, Viewtron's advertising is uninspired, vague and confusing. Its first slogan, "The waiting is over," was put aside when it was realized that, videotex being so new, nobody was actually waiting around for it. Its second slogan, "A little like a personal computer . . . but a lot more personal," evidently designed to ride the crest of the personal computer wave, instead has had the opposite effect. Informal surveys show that most South Floridians now think Viewtron *is* a personal computer and, having decided against buying one, are thus spared the trouble of looking into Viewtron as well.

Clark Nobil
Viewtron subscriber
Miami Beach

I, too, believe that videotex is much better suited to use as a business tool. But Rance Crain's comment that "if the whole package can pop upon . . . my terminal" leaves the impression that this kind of business service is not yet available.

Nothing could be further from the truth. ITT Dialcom offers a wide range of business information products. The utility and market desirability of this type of service are demonstrated by our more than 60,000 business and government users that have access to the information and who use electronic mail to distribute the data.

Of course, there are other services, too. The point is, business applications are leading the way into the general use of videotex. Business videotex is here, and demand is growing daily.

Paul D. Warren
Public relations coordinator
ITT Dialcom
Silver Spring, Md.

Rance Crain's dismissal of videotex is just the kind of criticism this burgeoning medium does not need.

In a classic chick-and-egg situation, the people at Viewtron have taken the steps to establish which comes first. By providing a complete videotex system, they have created the structural underpinnings that will allow information providers to develop programs that exploit the promise of the videotex concept.

Mr. Crain exposes a lack of current knowledge about videotex when he says, "The trouble will all these new services is that they're trying to make our lives more impersonal at the same time they're trying to make them more efficient." Many new developments in videotex are designed to increase efficiency while enhancing quality of life. Mr. Crain's remarks are classic computer phobia talk, and he only needs to take a look at the skyrocketing success of personal and home computers to realize what's happening. I for one am sorry to see the most respected journal in our industry using a "parting shot" as a cheap shot.

Unlikely justice?

James Brady's May 3 column, "Justice at Leavenworth" is incredible, but an announcement of the seven hangings took place at the very time of the Holocaust revelations and amidst the first "war crimes" results. Against that evil background, the story of seven hanged "Nazis" does not sound quite as unlikely.

John Weitz
New York

Brady on the Yankees

James Brady's column, "Worrying about the Yankees" (March 26) was sent to me by an advertising agency in Louisiana with which I am associated.

Like Mr. Brady, I too worry about the Yankees from time to time, but I feel confident that we will soon bounce back from this season's rocky start. I enjoyed reading his humorous recount of my fellow teammates and me, and I look forward to the day when he can write about the Yankees repeating as World Series champions.

Personal computer marketing goes global

By Daniel Burstein

In Japan, popular tv star Atsumi Kiyoshi, looking cool, suave and Bogartesque with the brim of a blue felt hat shadowing his eyes, told poster and door board viewers in a recent advertising campaign, "Friend, the time is ripe" (for buying an IBM 5550 personal computer). The ad was designed to bolster the notion that the machine represented the class act from America.

In Europe, however, International Business Machines is trying to overcome a problem of being perceived as "too American." Stressing that IBM is actually a "European" company, a new advertising campaign tells of IBM's large factories, research facilities and tax-paying subsidiaries within the European Economic Community.

IBM's flexible tactics in two radically different markets are surface indications of the complexities to be found in the world marketplace. Reflecting the immaturity of this young industry, global personal computer marketing is highly fragmented, full of surprises and anomalies.

Take the issue of who's on top of the worldwide sales charts. Most Americans think of IBM and Apple Computer when they think personal computer, which is logical because the two companies control more than 50% of the U.S. market. But last year, Commodore International sold as many units as IBM and Apple put together on a worldwide basis—more than 2 million. An early entrant into the international market while Apple was focusing on the U.S. and IBM hadn't developed a personal computer, Pennsylvania-based Commodore now does business in 60 countries, with sales outside the U.S. accounting for about half its total volume.

There are very important niche differences between low-end home computers (costing less than $300) used mainly for games, more powerful home computers (less than $1,000), and full-fledged business computers ($1,500 and more).

Those who casually assume the U.S. is the most computer-crazed country in the world are in for a surprise: The U.K. holds the title for most computers per capita. There is a significantly higher penetration of *home* computers in Britain (11% of British homes compared with 7% in the U.S.), although most are low-end machines such as the British-produced Sinclair, (which failed as the Timex/Sinclair in the U.S. but continues to do well in Britain after selling more than 2 million units). According to a study by Intelligent Electronics Europe, published in *Mini-Micro Systems* magazine, the European market should experience a substantial growth during the next two years *(see chart)*.

The Cupertino, Cal., market research company Infocorp provided even more revealing statistics. Breaking down information geographically into the U.S., Europe, the Pacific basin and the rest of the world, the company came up with some impressive figures for the category of home/business computers ranging from $1,000 to $6,000.

In the U.S., the number shipped in 1983 totaled 1.73 million and should rise to 7.27 million by 1988. In Europe, the figure is expected to grow from 451,000 in 1983 to 2.87 million in 1988. The Pacific basin will see an increase from 526,000 in 1983 to 985,000 in 1988. The remaining markets will experience significantly lower numbers, rising from 114,000 in 1983 to 572,000 in 1988.

In France, where the pace of product diffusion has been slow, computer marketers are desperate for tv advertising time. But because of government policies, an American computer manufacturer trying to buy a spot has to wait up to 18 months for an allocation of airtime.

In Brazil, what appears at first glance to be booming sales for Apple is actually sales of Apple ripoffs. Brazilian law bans foreign manufacturers from building and selling small computers in the country, leaving the field protected for the home-grown ripoffs of popular models. Milmar Industria E. Comercio, a local Apple imitator, openly advertises that its so-called "Apple II Plus" is "made in Brazil with all the characteristics that made its twin brother the world's most used microcomputer."

But in the British crown colony of Hong Kong, where the Golden Shopping Centre in Kowloon has served as an emporium for Apple fakes and other ripoffs built mostly in Taiwan, the supply is starting to dry up. Taiwan's government, which long has tolerated the manufacture of pirated microcomputer designs, has announced plans to curtail the Apple fakes. Meanwhile, having been brought into the computer era via low-priced counterfeit Apples, Asia has turned into a mushrooming market for state-of-the-art machines from American and Japanese manufacturers.

In South Africa and Australia, the proliferation of computer makes and models is every bit as dizzying as in the U.S. More than 250 different models are on sale in both countries. The existence of English-speaking populations in those countries allows computer software and documentation to be transported easily from the U.S. and U.K. without the costly, time-consuming adaptations that have kept all but the most successful U.S. companies out of non-English-speaking markets.

In Canada, however, Coleco Industries' willingness to bring out a bilingual (English-French) version of its Adam home computer has boosted prospects for a product that at the moment appears unsuccessful in the U.S. market.

"By adding the bilingual feature to Adam, we've not only responded to the needs of French-speaking Canadians, but we're also creating a burgeoning demand [in French-speaking countries] overseas," says Michael Richards, a Coleco sales executive in Canada.

"Every market is different," says Chris Codrington, general manager of Interco Business Consultants, a U.K. company advising American companies on the European market. "No absolutes or universal trends have yet appeared."

That situation may change soon, however. With competition heightening in the U.S. market, and with the European and Asian markets poised for major growth, look for IBM and Apple, as well as several other major players from the U.S., U.K., West Germany and Japan, to begin to focus more of their activities on international marketing efforts.

Breaking into foreign markets is not the same as increasing market share in the U.S. Requirements differ by country, and the manufacturer that uses the same techniques across the board is in for a big surprise. Physically, system requirements differ, and issues such as keyboard layout, multicharacter development, language command sequences, editing and directional issues with printers and terminals may change.

"Then there is the major issue of promotion," said Alex Stein, a former research analyst at Dataquest, a market research company in San Jose, Cal. "You've got to understand the needs of a particular area before you go in touting the benefits of your computer system. Many U.S. manufacturers are trying to penetrate Third World countries with business computers when those countries don't even use *typewriters* yet. You've got to do your homework before putting together a marketing plan for a foreign area."

One of the most common approaches to that issue is the formation of limited partnerships, such as Kaypro recently signed with Mitsui. The manufacturer finds a top-notch distribution organization in the targeted area and relies heavily on that organization's knowledge of market needs and buying trends.

"We need to get a lot more aggressive in our communications outside the U.S.," says Apple's director of promotion and advertising, Jean Richardson. "We will be doing much more advertising beginning this summer as we launch the Macintosh in Europe."

IBM won't be far behind, according to

Daniel Burstein is a free lance writer and frequent contributor to Magazine. Another free lancer, Betsy Gilbert, also contributed to the article, as did the following Advertising Age *correspondents: Angela Chatburn, United Kingdom; Judith Matheson, Australia; Jack Burton, Japan; Phillip Hill, France; Dagmar Mussey, Germany; Tony Thompson, Canada; Laurel Wentz, Brazil, and Des Kilalea, South Africa.*

Flexibility in advertising is the password to success in the highly fragmented world marketplace, a mix of radically different countries that holds a few surprises.

Paine Webber computer stocks analyst Barbara Isgur. "IBM didn't bring its PC to Europe in a big way at first because of production constraints that kept it from fulfilling domestic U.S. demand," she says, crediting Commodore with a 40% market share in Europe, Apple 20% and IBM less than that. "This year, though, we're going to see IBM making a drive for European market share."

Indeed, IBM announced a dramatic and unexpected price cut in March of up to 30% on its personal computer in Europe, and it has begun rolling out its less-expensive PC*jr*, indicating that it is gearing up to be much more competitive in the price-sensitive European markets. IBM also has announced plans to increase its European retail outlets by 40% over the next year.

At Commodore, meanwhile, worldwide advertising is running at a $100 million annual pace, up from $60 million last year, according to Steven Greenberg, chairman of Anametrics, Commodore's U.S. advertising agency. Although pleased with the company's 125% domestic growth in dollar volume during the fourth quarter of 1983, compared with the like quarter in 1982, Mr. Greenberg illustrates the potential elsewhere by pointing out that over the same period, dollar volume was up 600% in Belgium, 700% in Italy, 420% in the Netherlands and 338% in Australia.

Non-U.S. manufacturers also are marketing more aggressively in Europe and around the world—even in the U.S. Nixdor, Germany's most successful manufacturer of small and medium-sized business computers, is raising a $125 million war chest to move more actively into the American market through the first public offering of its stock.

Acorn, a British entry that built a strong reputation through a tie-in with educational programs on the British Broadcasting Corp., is challenging Commodore, Apple and Atari on their home turf in the U.S with a computer priced at less than $1,000 and designed for the educational market. A $7 million advertising campaign launched last fall has started Acorn on its announced drive toward a 25% share of the U.S. public schools market.

Meanwhile, the U.K.'s Sinclair has unveiled a new model, the QL (Quantum Leap), designed to compete with the IBM PC and Apple's Macintosh at about a quarter of the price. "The QL could be the sleeper that comes out of the pack to have a profound effect on the European market," Paine Webber's Ms. Isgur says.

Not to be outdone, Applied Computer Technologies, maker of the Apricot, which already is selling well in the U.K. and the Far East, has announced its intention to buy the assets of Victor Technologies, a Silicon Valley maker of inexpensive computers that recently went into bankruptcy. ACT marketing director John Leftwich recently told the *New York Times*, "Our objective for the next three years is to be the No. 1 microcomputer company in Europe and in the top 20 worldwide."

Olivetti, the Italian office products giant, lately has shown new signs of wanting to flex its muscles in computers, which until now it has not done successfully outside of Italy. In late March, the company announced plans to sell two IBM-compatible units in Europe, with an entry into the U.S. forecast for late 1984. A $25 million promotional campaign will accompany the European effort, while in the U.S., American Telephone & Telegraph (which recently bought a 25% stake in Olivetti) may market the Olivetti machines as part of its strategy to gain a foothold in the U.S. personal computer marketplace.

AT&T is keeping a lot of options open. Since introducing a new line of computer products in April—several minicomputers and one sophisticated multiuser microcomputer—the company is rumored to have been in discussions with Santa Clara, Cal.-based Convergent Technologies on the development of a low-cost micro in the category of an Apple or IBM PC.

Japanese manufacturers continue to cast an enigmatic specter on the European computer scene, as they do in the U.S. Strong in their home market and elsewhere in Asia, Fujitsu, NEC and Sharp have yet to find their way into the West to any significant degree. Nor have the lower-end Japanese manufacturers met with much success, despite the agreement reached by 14 of them recently to standardize their design around the MSX operating system to promote the development of software that could be used on any of the machines.

"I don't believe U.S. manufacturers have to worry about being edged out of first place anytime soon," Dataquest's Mr. Stein says. "They've got a strong position in the market because they are able to offer the service and support foreign competitors can't. U.S. companies are more likely to make a strong impact on the European or Japanese markets than the other way around."

Yet experts agree the Japanese are coming. "They already have a share of Europe's low-end market," says Richard Imerschein, a computer analyst with the Gartner Group, who worked at IBM for 30 years. "Soon they will be ready to make a major move on the higher-end segment."

In another trend-setting move, Mitsui, one of Japan's giant trading companies, recently has decided to plunge into personal computer manufacture with a notebook-sized IBM-compatible portable unit. Rather than trying to crack the American market directly, Mitsui is negotiating a market agreement with Kaypro, a California-based manufacturer of personal computers. Other such joint ventures with European and American marketing partners appear imminent for other Japanese manufacturers.

Although advertising is regarded as a crucial function by every company trying to increase its share of international sales, there appears to be a consensus that it is less important outside the U.S. Price-consciousness and applications-orientation seem to be the rules abroad. Says Richard Beeman of Mayhoffer Stott, Commodore's agency in Australia, "The key to the whole thing is software; we've just produced a 72-page booklet of software available for our machine." The agency's $1 million ampaign for Commodore in Australia is designed to draw attention the extent of software available for the Commodore. It features the slogan, "Are you keeping up with the Commodore, because the Commodore is keeping up with you."

Apple's Ms. Richardson says that with so much less discretionary income outside the U.S. and lower ad budgets, advertising has to be focused carefully.

"In the U.S., we can do something eye-catching like we did with our '1984' ad on the Super Bowl, and then follow up in print. Outside the U.S., we can't use all those layers, so our advertising tends to be more straightforward." Even so, Ms. Richardson says BBDO, which handles Apple's foreign advertising, has used some of the life-style themes developed by Chiat/Day on the domestic side, helping to position Apple with a "younger, more adventurous, more entrepreneurial corporate image," than IBM.

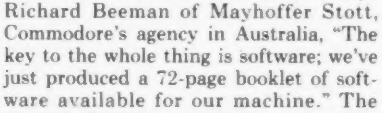
"THE COMMODORE 64 COULD BE THE MICROCOMPUTER INDUSTRY'S OUTSTANDING NEW PRODUCT INTRODUCTION SINCE THE BIRTH OF THIS INDUSTRY."

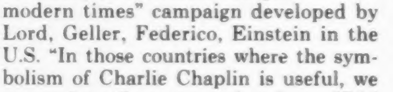
Commodore International's worldwide advertising is running at a $100 million annual pace, up from $60 million in 1983, says Anametrics, Commodore's U.S. agency.

IBM has used different versions internationally of the Charlie Chaplin "tool for modern times" campaign developed by Lord, Geller, Federico, Einstein in the U.S. "In those countries where the symbolism of Charlie Chaplin is useful, we are using that campaign," an IBM spokesman says.

But Mr. Greenberg says products, *not* advertising, will win the day abroad.

"The European market is much more serious than the U.S. If you attempt to fool the end-user with clever advertising, you won't succeed unless you have the product to match. Even then, the European audience wants hard information about price and functionality—not a lot of fluff."





Apple Computer mainly uses straightforward advertising outside the U.S. because of lower ad budgets and other factors.

Consumer Electronics

New technologies grab for consumer attention

By Udayan Gupta

Euphoric is a good word to describe the consumer electronics industry these days. Total factory sales for 1983 for consumer electronics goods were a record $20.6 billion, up 28% from 1982, according to the Electronic Industries Assn. There is unprecedented consumer enthusiasm, and a rash of new products has given rise to a new bullish mood.

"The industry is in the midst of an unprecedented buying frenzy. The closest thing we've had to this before was the introduction of black-and-white television," says Bob Gerson, managing editor of *Television Digest*.

Videocassette recorders, videogames and home computers have combined with a panoply of delivery systems—cable tv, direct broadcast satellites, satellite master antenna tv and multipoint distribution systems—to create a new electronic order.

"What we're witnessing is beyond home video and consumer electronics," says Barbara Dalton Russell, vp-research at Prudential-Bache Securities, New York.

"What we are looking at can best be described as a home entertainment and information service business."

The old tv set has been transformed into the centerpiece of a network that includes vcrs, videodisc players and home computers. Today, tv sets not only play back old or current film or tv show favorites, they also form the stage for videogames and a screen for a variety of editorial and financial data.

Given the scenario, it is perhaps not surprising that color tv sets had record sales of an estimated 14 million to 15 million units in 1983. The sales revival is in a mature industry, one that has penetrated more than 90% of consumer households. Sales have been fueled by a healthy replacement demand that "comes about eight to ten years after the first big selling years of color tv. It's a nice floor to build on," Mr. Gerson says.

The various uses of the tv set have created a need for more than one set. Indeed, with videogames and personal computers proliferating, second sets—even third and fourth—are not uncommon. "No matter how many you have, you may just need one more," one analyst says.

Fueling all this is the price. Tv sets have undergone reductions in price, a result of improved manufacturing technology, economies of scale and competition.

Although prices of tv sets are low, manufacturers are entering the market with high-ticket component video tv systems where the various elements of the tv set are marketed separately. By marketing the various elements—receiver, speakers, monitors—separately, it is possible to get a higher quality for each unit, manufacturers say.

With units being designed by computer and containing a large proportion of microprocessing hardware, component video makes a lot of sense, Prudential-Bache's Ms. Russell says. "The redundancy one builds into the hardware doesn't make sense," she says. "If I'm going to use the tv set for videotex, I'd like to use the same chip with the personal computer."

The concept of component video—a dominant theme in the

Software putting computers to work

By Prashanta Misra

If 1982 and 1983 were years of recreation, then 1984 is going to be the year of the home, where home productivity will be the utilitarian reason for buying a software product," says Dereck McLeish, vp-sales and marketing, Tronix Publishing, Inglewood, Cal.

Software designed for use on the home computer is changing, and the change reflects events in the whole consumer electronics industry. Products are providing not only entertainment opportunities, but they also are transforming hardware into budget planners, word processors and learning tools. They are being put to work.

Industry pundits say even the industry giant, International Business Machines, is changing its pitch on its home computer, PC*jr*, to the computer that brings your work home. Says Sanford R. Robertson, a partner with the San Francisco-based investment banking company Robertson, Colman & Stephens, "Such developments will impart the much-needed stability in a highly volatile marketplace."

Consumers' growing demand for this kind of software has caused a proliferation of different kinds of educational and productivity software. The demand also has come at a good time for game software marketers, which see it as an opportunity to diversify.

"Educational software is like the next generation of games software—software with depth and value," says Francis Pandolfi, president of the Tarrytown, N.Y.-based Scarborough Systems, whose MasterType educational program has topped *Billboard's* best-selling software chart for several weeks. "Both educational and home financial management software are offering people things to do with computers that finally are making these machines genuinely valuable in the home evironment."

Lowell, Mass.-based Hayden Software, which ventured into the field of educational software only last summer, doesn't regret its decision. "I'm personally convinced, based on our revenues, that the market for educational software products will get larger as an over-all market and is going to eclipse the market for the games software," company president Oscar Rodriguez says.

> **"... the market for educational software ... is going to eclipse the market for games software."**
>
> *—Oscar Rodriguez*

Future Computing, Richardson, Tex., a market research company, estimates that while entertainment will continue to be the largest selling home computer software, growth is occurring much more rapidly in educational and home productivity software. The U.S. market for home computer software in 1984 will grow 75%, to $1.4 billion, according to Tricia Parks, vp-consumer group division.

"The fact that educational and home productivity software are the fastest growing segments is indicated by the entry into the field by some very large players such as CBS Software, Reader's Digest and Xerox Publications," Ms. Parks says. According to Future Computing, the educational software market will grow 68% in 1984, to $314 million; home productivity software will grow 100%, to $242 million.

After making a false start in the game software market, CBS Software quickly reorganized its unit last spring to concentrate on making educational software. "But we are not the only ones making this shift—there are others who are doing it too," says Henry Kaplan, executive vp of the Greenwich, Conn.-based company.

Until January, Reader's Digest Assn. concentrated its efforts providing software exclusively for schools. But realizing the potential market that exists in homes, the Pleasantville, N.Y.-based company shifted its gears. "Right now, it looks like consumer sales are going to be the biggest part of our division's revenues," says Richard Scott, director-software division, who is also responsible for marketing and product development.

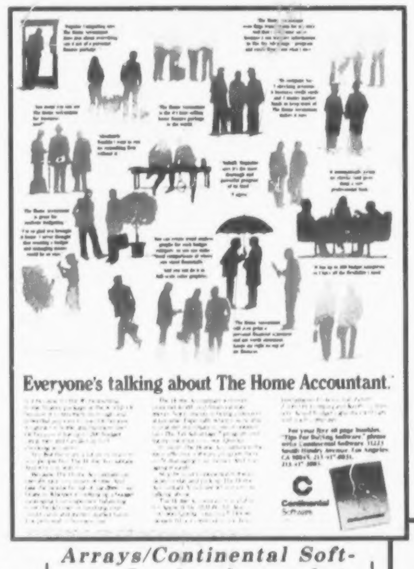
Similarly, the software division of Xerox Education Publications, Middletown, Conn., soon after entering the educational software market, has come to be regarded as one of its leaders, industry observers say.

Companies in the industry have taken a marketing clue from such consumer products companies as Procter & Gamble.

"In the home computer software industry, technology for all intents and purpose is a secondary element," says Sy Kaufman, a microcomputer analyst and a partner with Robertson, Colman & Stephens. "In sorting out winners from losers, it's very much a classical game in the mastery of channels of distribution, shelf space and effective advertising and promotional campaigns to cause industry leaders to rise above the hue and cry."

Venture capitalists, who in 1983 were willing to fund software companies in a big way, are reluctant to do that now because they realize that access to distribution and shelf space has become "at least to the power of ten more expensive," Mr. Rodriguez says. "If you are not prepared to spend $10 million or more, you just don't have a chance on marketing."

Soaring marketing costs and intense competition in the personal computer software industry also has led to the acquisition of some smaller companies by their bigger competitors.



Everyone's talking about The Home Accountant.

Arrays/Continental Software, Los Angeles, markets the best-selling Home Accountant, which has everyone talking in this ad by Ellis/Ross/Tani.

Recently, Gillette Co., the well known consumer goods company, bought a 40% interest in Datasoft Inc., a producer of software.

Also, late last year, Cox Enterprises of Atlanta, which owns 20 newspapers, bought a minority interest in Creative Software, Sunnyvale, Cal., and is likely to buy the remainder later this year, analysts say.

In addition, some of the big publishing houses such as Prentice-Hall, Simon & Schuster and Scholastic Inc. are looking for acquisitions, says Susan Currier, president of Softsync Inc., New York, a software publisher that also has been approached by several big companies for a possible takeover.

The presence of these big companies in the home computer software industry doesn't mean, however, that everybody will disappear, Ms. Parks says. "These small firms will have to be very clever in their advertising and have to have sound business strategies in terms of finding a particular niche they want to go for and focus on that, because they don't have the huge resources and market savvy of the bigger players."

Ms. Currier thinks most of the software advertising so far has been very unexciting. "People in the industry will have to look at the fashion and cosmetics industry to get an idea of some of the pet ways to package and market something that's basically a boring box," she says. "So, some companies are hiring people out of the cosmetics or some other package goods industries—and that's the way to go."

Consumer

(Continued from Page 15)

advertising campaigns of marketers such as RCA and Sony Corp.—still has to catch on with the consumer. Sales last year of component video systems were disappointing, says David Lamb, a senior analyst with Link Resources, New York, a media and communications market research company.

Amid all the dramatic growth that color tv sets were experiencing, the center stage was occupied by vcrs. From sales of nearly 2 million units in 1982, the industry jumped above the 4 million mark in 1983. This year, analysts expect vcr sales to exceed 6 million units. Dollar sales were $2.2 billion, up 70% from 1982, according to the EIA.

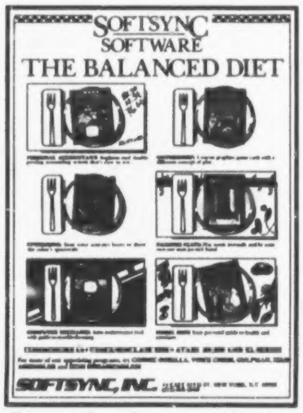
"It was the best year that the industry has experienced," says Richard O'Brien, executive vp, JVC, one of the major vcr marketers. Consumer demand is not likely to abate for the next few years. Vcrs are already in more than 11% of all tv households and that number will only get, higher, Ms. Russell says.

No one factor adequately can explain the meteoric growth of vcrs. Although declining prices have been a dominant factor (some vcrs can be purchased for less than $300), the increased availability of prerecorded cassettes as well as changing patterns of use have had their effect as well.

For the vcr user, the range of materials available in cassette form has expanded considerably. Also alluring is the appearance of major Hollywood motion pictures on cassettes before their showing on pay cable or network tv. (One example: "Terms of Endearment," the big 1983 Oscar getting more into home productivity software. "Essentially, what we're doing now is bringing the business software down to the home level," she says.

Companies such as Spinnaker Software Corp., Cambridge, Mass., and Software Publishing Co., Mountain View, Cal., already have started building their consumer-oriented marketing force, recruiting people from companies such as Procter & Gamble, Richardson-Vicks, General Foods and Chesebrough-Pond's.

"Because we have mostly mass market channels like K mart, J.C. Penney and Toys 'R' Us, we have hired and are hiring people with a classic package goods marketing background," says Jay Mixter, vp-marketing for Spinnaker, which within a few years has emerged as a leading manufacturer of educational software products.



Susan Currier, president of Softsync, says software companies need more exciting advertising.

Realizing there was a niche in the marketplace for "edu-tainment products," and modeling itself on Fisher-Price toy company, Spinnaker specializes in making "learning game" software that is not only fun to play with, but also is educationally sound, Mr. Mixter says.

Big publishers such as Random House have launched themselves into the "edu-tainment" software market, with about 10 titles debuting this month at the Consumer Electronics Show in Chicago.

According to David J. Fiore, advertising-promotion manager for the book company's electronic publishing division, and formerly marketing manager for Sony Corp., Random House will stress the theme: "We were here yesterday and we'll be here tomorrow."

Random House, like Hayden Software, will be spending almost 50% of its anticipated 1984 revenues on advertising. The ads will be only in print media. Says Mr. Fiore, "Since home computers only have 10% penentration into tv households, we'll be advertising in consumer-oriented publications as well as machine-specific magazines."

CBS Software has gone a step ahead of Random House by advertising not only in computer-user magazines, but also in mass market magazines such as *Better Homes & Gardens, Business Week, Money, Newsweek, People,* and *Woman's Day.*

Ms. Parks of Future Computing predicts that by the end of this year, there will be a lot of software advertising on prime-time tv and the dollar commitment on the part of companies will be quite substantial. Two companies that already have indicated their plans for using tv include CBS Software and Spinnaker Software.

Companies such as Arrays/Continental Software, Los Angeles, which specialize in making home financial management/productivity software, will capitalize on the theme of "fear and greed"—the two motivating factors on Wall Street, according to Hank Scheinberg, executive vp. "If you want a bigger house, want a bigger car or want to have more money to spend, we'll tell you how to do that through our Get Rich series on real estate planning, investment planning, retirement planning and insurance planning," he says. Continental also markets The Home Accountant and Tax Advantage—both best sellers.

Another personal finance program called Managing Your Money is written by Andrew

(Continued on Page 18)

Designer hooks mass market

By Cecelia Reed

A 31-year-old entrepreneur from Montana, who once tried to make it in the fashion world (with something called Foot Sweaters) and failed, has found success creating software for home computers.

On the 55th floor of Lake Point Tower in Chicago, Sat Tara Singh Khalsa (he's a convert to the Indian Sikh religion), president of two-year-old Kriya Systems, is seated behind a desk piled with the latest computer publications. His office is quiet, cool; he, too, is cool. He also is rich, as is currently the fashion among smart young hotshot software designers. And Typing Tutor III, the latest permutation of his two previous best-selling Typing Tutor programs, is without doubt going to make him richer.

Mr. Khalsa, a graduate in philosophical psychology from the University of Chicago, became interested in computers "before there were micros." In 1977, he worked in a private psychiatric hospital, where a director asked him if he would work on a computer that recognized speech. At that time, the first microcomputers were being developed. Later, at Image Producers, Northbrook, Ill., he met and teamed up with Dick Ainsworth and Ram Dass Khalsa (no relation), today creative director and vp, respectively, of the 12-person Kriya Systems.

Mr. Khalsa predicts that his young company's entry into the personal productivity/educational segment of the software market is going to be one hot number. Typing Tutor III is designed to teach people how to find their way around a keyboard (a must for getting friendly with any home computer). "We'll sell at least 200,000 units this year, but that's real conservative. My expectation is that we'll do twice that number," Mr. Khalsa says.

Mr. Khalsa's serene confidence is not unfounded. As home computer hardware loses its youthful dash, software is spurting ahead. Sales of software programs for personal computers—the fastest growing segment of the market—are estimated to approach $2 billion in 1984—and continue growing at an average annual rate of 47%.

Darryl Pitt

Sat Tara Singh Khalsa brings a distinct personal style to the mysterious world of computers.

"Software in the past has been marketed as a commodity. There was no authorship, no people recognition," Mr. Khalsa says. Now personal computers are becoming interchangeable commodities in the minds of many consumers looking for discounts rather than brand names.

"For the mass market, you need to have a hook," an image and brand recognition that will distinguish one package from its competition. "This is the kind of marketing approach that should work for software"—especially software of the functional variety, which is gaining on games as the consumer's choice, he says.

Mr. Khalsa is one of the new breed of software designers bringing glamor and a distinct personal style to the erstwhile gray and mysterious world of computers. Kriya Systems has found a new way to bring its products' message to the seekers of applications software: Give it a personality. That is, bring it out of the inaccessible world of computer whizzes who work by night right into the bright light of mass market America.

"Personal computers offer tremendous benefits," Mr. Khalsa says. "They can be a passive resource, but they can also be used as an active resource; you can create art, or music." The way to turn a machine into an "active" property is to have the right software, the guiding spirit of any computer.

Guiding the progress of Typing Tutor III is Kriya's "publisher," Simon & Schuster, which until recently was better known for success with more conventional "authors" than Mr. Khalsa. Simon & Schuster's electronic publishing group chose Kriya's products as its entry into the software market because "It happens to be a very high quality product, it had a name the trade knew and we saw inherent promotional possibilities in it," says Frank Schwartz, president of the electronic publishing group.

With Kriya's brains and Simon & Schuster's marketing brawn (the company could possibly spend up to $250,000 on advertising and promotion), the feeling is that Typing Tutor III will mop up in sales.

Mr. Khalsa is scheduled to go on a major promotional tour—a first for software "authors"—soon after this month's Consumer Electronics Show to promote Typing Tutor III in New York, Boston, Chicago, Los Angeles and Dallas. Mr. Khalsa, whose laid-back style and some-

winner, became available on videocassettes in May, although it's still in theatrical release.) Not surprisingly, sales of prerecorded cassettes have boomed. In 1983, the total was an estimated 7 million units, according to Link Resources. This year, it could exceed 9 million.

Vcrs are changing viewing patterns. They are being used for time shifting and for library building. Pay cable also is fueling the use of vcrs. In 1983, vcrs were in nearly 35% of all pay cable homes.

The introduction of the 8mm camera-recorder by Eastman Kodak also has added a new dimension to the vcr industry. Although some analysts are skeptical about Kodak's attempts to enter the video market with a product that initially is priced at more than $1,500, Kodak feels confident about the product and its demand among home movie and home taping enthusiasts.

Other players include RCA and General Electric and a host of others waiting in the wings.

Not to be forgotten in the excitement surrounding color tv and vcrs is the role of the home computer (a low-end personal computer that has been used primarily for videogames and selected personal applications).

> **"That end of the market [home computers] will continue to rely on games."**
>
> *—Eugene Glazer*

For some time, the home computer phenomenon outshone all other events in the industry. Now that craze has all but vanished and companies such as Atari and Texas Instruments are licking their wounds.

"That end of the market will continue to rely on games," Eugene Glazer, first vp, Dean Witter Reynolds, says. "There really isn't any user-friendly software that can get these computers to do something difficult." Once the software becomes simpler and more relevant to the needs of users, the home computer market could boom. But that, according to many analysts, is still some distance away.

Of course, there are other products in the industry that also are competing for consumer attention. Some, such as the digital audio disc (Compact Disc), are just beginning to make their presence felt. Others, such as RCA's ill-fated videodisc, have been abandoned as costly ventures that didn't produce the desired results.

The demise of the RCA videodisc has demonstrated that consumers are looking for products that are departures from existing ones or provide new value. They're not interested in technology for technology's sake.

A good example of this may be the rise and fall of the first generation of cordless telephones. Sold as a mass consumer item with little emphasis on sophisticated applications, many of the models died a quick death. Some of the more established manufacturers are returning to the market with more functional products.

Of course, there is still the nagging question of whether the market is capable of withstanding this barrage of consumer electronics. Most analysts agree that each of the new products could have stood on their own at another time. Together, their future is a lot more doubtful.

In its "New Media Five-Year Outlook," Link Resources projects sustained growth for nearly all the industry's elements, including vcrs, video cameras, videocassettes and home computers.

More importantly, perhaps, the consumer electronics industry has captured the imagination of its buyers—not merely as a source of entertainment, but also as a conduit for essential services, from informational to transactional (such as home banking and shopping).

The focus now is on bringing business and pleasure together into the living room. Until consumers start feeling the need to go outside again, the future of consumer electronics seems more than assured. ■

NEWSPAPER

Upfront buys in slow start

By JAMES P. FORKAN

NEW YORK—The network tv prime time upfront door now is open, but contrary to expectations agency buyers are not rushing in.

Various sources report the networks are seeking "exorbitant" price increases for prime time upfront—which advertisers and agency executives have been saying would increase this year no more than 7%—leaving the networks and most advertisers far apart in negotiations.

The prime time upfront market broke last week when Paul Schulman Co. completed its traditional opening buy for Ralston Purina (AA, June 7). All indications at that time were that prime time upfront, which in recent years had opened after the July 4 weekend, would follow the fast pace of daytime and news upfront this year. Both dayparts are close to sellouts in upfront for 1984-85. James Duffy, ABC-TV Network president, said last week that daytime upfront will top the $1 billion mark and prime time upfront will surpass $2.2 billion.

In spite of the slowdown by many advertisers, at least three buys are reported close to completion at ABC-TV. And sources say the three networks combined have "20 to 25 budgets working," which some estimated to be worth a combined $200 million-plus.

Not all the upfront activity is emanating from New York, some

A shade better than the rest.

Seagram's Gin tastes so good you can see it.

Next to Seagram's Gin others seem colorless.

Seagram's Gin looks different because it's made differently.

Patience is a virtue.

Seagram's GIN

Seagram's primary gin competitors, Beefeater and Gordon's, are clearly evident in this controversial ad.

Seagram ad riles fellow gin players

By GAY JERVEY

NEW YORK—Joseph E. Seagram & Sons, determined to strengthen its franchise among upscale gin drinkers, has the competition riled up over a new campaign foi Seagram's extra-dry gin.

The campaign, themed "A shade better than the rest," includes a photo of a Seagram bottle with its label in full view, and bottles of Beefeater and Gordon's with their labels barely showing. The copy in the ad notes that "next to Seagram's gin others seem colorless."

The ad then cites the reason for Seagram's golden hue. Unlike other brands poured directly from the still into the bottle, the copy says, Seagram's is "mellowed"

Former execs deny Paramount charges

By JAMES P. FORKAN

NEW YORK—When Gordon Weaver and Stephen Rose, two successful Paramount Pictures marketing veterans, left the studio early last week (AA, June 7) for the second time in five years to form their own company, their departure proved far less amicable than the first one.

In mid-1979, when they left as senior vp-marketing and advertising vp respectively, Messrs. Weaver and Rose retained some Paramount ties, since the studio agreed to finance several initial Barrich Productions projects (none of which reached the big screen).

This time, formation of Barrich Marketing as "an independent movie marketing company" is being overshadowed by rather vague Paramount allegations about "unethical practices with respect to suppliers," which were uncovered during a "preliminary investigation." That statement was issued just hours after the two execs had announced their departures, thereby leaving in doubt whether they jumped or were pushed from their posts as president of Paramount

Detroit plan vs. imports

By RALPH GRAY

NEW ORLEANS—The lifting of import-car restraints in the U.S. will flip a few marketing chips. But the big hand is just being dealt.

It is likely that the import limits will not be renewed next spring. The immediate impact would be on small cars. U.S. marketers are likely to rely mainly on their own imports rather than on domestically made small cars to fight the Japanese auto makers.

The brand names will not change. The Chevrolet Sprint, now marketed in nine western states as a Chevy, will not be renamed a Suzuki, though Suzuki makes it for the General Motors division.

The big game in the post-limits arena, however, will come in the midsize "middle market." That is where the major profits have always been. And the restraints have kept that market shut to Japanese manufacturers.

"A new middle market is emerging," said Joseph Campana, Chrysler Corp.'s vp-marketing.

"The medium-size cars of the past were owned by people who wanted jewel-like versions of big cars but who didn't want the size. The new middle is a driver's car for those who like handling characteristics and road feel," Mr. Campana said.

Chrysler's entries in the new middle market, its H-body LeBaron GTS and Dodge Lancer, are due next January and will start out with four-cylinder engines.

Other cars that already have appeal for the middle market include the Honda Accord and Pontiac 6000STE.

While Chrysler is readying the H-bodies, it will rely on a new agreement with Mitsubishi for Chrysler-labeled small cars. That agreement has been extended to 1995. Chrysler chairman Lee Iacocca, here for the annual meeting of shareholders, said that will cover the bases for his company.

Chrysler is proceeding with a new high-tech, American-built small car for 1986½, Mr. Iacocca said. He called it "an exciting, world-class competitor," adding that it will be delayed three months to "change its styling to compete in a more upscale market segment." That indicates heavy use of Mitsubishi-made components.

Chrysler "possibly needs two [small] cars, one sourced from

New shop netted by cruise line

By RUTH STROUD

Holland America Westours, formed last year through the merger of two cruise/tour operators, last week decided to consolidate its $13 million advertising account, too.

The Seattle-based company has selected Elgin Syferd, Seattle. That agency replaces Chiat/Day, San Francisco, which handled the Holland America Cruises' Caribbean and Mexican tour business, and Livingston & Co., Seattle, which directed the company's Westours Alaskan and Canadian cruises and tours.
